For
Autumn Planting
1963

The Best Time to Plant is Autumn!

The best time to transplant all plant material of definite hardiness is in the autumn. At this time of year weather and soil conditions are usually better than early spring. Little winter protection is required other than a light covering of hay or straw. Do not stop your garden operations because of the first light frost in the autumn. It is a help rather than a hindrance.

All stock offered in this catalogue (with the exception of some tender roses in the coldest parts of the country) does best when transplanted in the autumn. So-called Dutch bulbs **must** be planted in fall. Do it now! and enjoy the results next spring.

PLANT HARDY PLANTS FROM SEPT. 1st TO NOV. 1st; ROSES FROM NOV. 15th TO DEC. 15th; PEONIES, LEMON LILIES (HEMEROCALLIS), GERMAN AND JAPANESE IRIS FROM SEPT. 1st TO FROST; ORIENTAL POPPIES FROM AUG. 15th TO NOV. 15th; DUTCH BULBS FROM OCT. 1st UNTIL GROUND IS FROZEN; MADONNA LILIES FROM AUG. 15th TO NOV. 1st; ALL OTHER LILIES IMMEDIATELY WHEN RECEIVED.

Best Served are Those Who Order Early—Order Now—We Ship at Planting Time

The seasons, (as Shakespeare said of Time and Tide), wait for no man. For this reason the nursery business is a most exacting one where Nature, in the final analysis, is the only real Master. No other business is so subject to the whims and moods of the seasons and to the caprice of climate as is a nursery serving cus-

tomers in all parts of the country . . . This means that in no other business is such a high degree of co-operation essential as that which must exist between customer and nursery. Won't you please continue this same splendid co-operation by sending in your order today?

Additional Helpful Information

For those of you who seek additional and more detailed information than is given in this catalog, we have a number of cultural leaflets. They are as follows and cost twenty-five cents each.

Cultural Instructions for Roses

Cultural Instructions for Lilies

Cultural Instructions for Summer-Flowering Bulbs

Cultural Instructions for Spring-Flowering Bulbs

Any of the above, 25c each.

In the event you order Roses, Lilies or Bulbs, you will receive the corresponding Cultural leaflet free of charge.

They are complete and authentic, you will find them most useful.

In addition to the above, we offer a booklet with complete and accurate cultural instructions of Hardy Plants in general use. You will find it invaluable. \$1.00 per copy.

Concerning Cultural Instructions

The U.S.A. is a large country with widely varying climatic conditions.

Within the states and counties the composition of the soil varies even more widely.

The cultural instructions given in this catalog are a guide in the right direction.

Our advice on winter protection as well as summer care of plants should always be adjusted to meet extreme local conditions.

Gardening practices in Augusta, Georgia, could hardly be the same as those in Augusta, Maine.

FREDERIC HEUTTE, Supt.

Mr. J. J. Grullemans, Pres.
Wayside Gardens
Mentor, Ohio

Dear Mr. Grullemans:

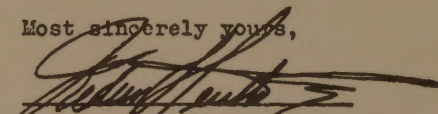

After some delay due to the preparation of our new Perennial trial grounds we were able to set out the nearly 9,000 Perennials we received from you three weeks ago.

This display of 33 species and 156 varieties will I am sure stimulate great interest in a type of plants (Perennials) which have not had the attention they deserve in Tidewater Virginia.

My main reason in writing you is to comment on the quality of the plants and the manner in which they were received, which reflects the meticulous methods used by your shipping department.

I also wish to express my appreciation to you personally, for the time you devoted in correspondence with me and which eventually led to the selection made for our new Botanical Garden.

Most sincerely yours,

Frederic Heutte, Supt.

FH/lg

QUALITY

The enviable reputation we enjoy is known to most gardeners. It is constantly strived for by giving faithful service and sending faultless quality.

Quality perhaps is the most important of the two for bulbs particularly; we can do more than most in that respect, because the President of our company is a member of the firm of Grullemans in Holland, internationally known as the finest growers of bulbs, whose early business years were spent with that firm, obtaining an intimate knowledge about bulbs, an opportunity which does not present itself to the average American importer who consequently is not as well informed.

Buy your bulbs from **Wayside Gardens** and see the difference!

IMPORTED DUTCH EDAM AND GOUDA CHEESE

Along with the quantity wanted for personal use here at Wayside, we shall be delighted to import this famous cheese for anyone who will write us promptly because our option expires Nov. 3rd. Therefore, we must have your request on or before Nov. 1st.

Autumn is **the time** when the finest cheese is made in Holland. It is possible only from milk and cream from that period to make that superlative quality, marvelous for its flavor as well as texture and richest in butterfats. Few people in this country know of it. Some fortunate person traveling in Holland may have encountered these cheeses but they are not generally offered for sale.

This year again with the co-operation of an old friend of our President, Mr. Grullemans (a Hollander), we obtained "first call" on a substantial quantity of this famous cheese. Many of our customers would like to taste and enjoy again this choice delicacy as they have in the past.

Special Edam Cheese each \$5.10 delivered postpaid

For shipments west of the Mississippi River, add 50 cents per cheese.

The average weight of Edam cheese is about four pounds. Each cheese comes packed in an individual carton and costs \$5.10 each, delivered. (We take care of duty, freight, etc.). Delivery to you first week in December in ample time to use them as Christmas gifts.

Famous Gouda Cheese each \$11.50 delivered

For shipments west of the Mississippi River, add 50 cents per cheese.

Anyone who has ever eaten Gouda cheese loves it and many prefer this cheese because it is so mild and distinct in flavor with an almost buttery texture. It weighs about 9 lbs. and instead of being ball shaped like the Edam, is flat. (No smaller size of this cheese available). For several years we have imported it upon special request; men like to give it for Christmas presents because it looks like a real "he-man's" gift. It keeps perfectly if stored in the refrigerator freshener. Delivery time same as Edam.

In the event you receive this catalog during November, send your order anyway because we always import a few more than actually ordered to care for a few late requests resulting from late catalog mailing.

These rich butterfat cheeses may be kept in your refrigerator for 10 months or more, so do not hesitate to order several to last you until next year!

DUTCH CHEESE SLICER OR PLANE!

Remove a thin slice; about 4 inches in diameter from one end of the cheese. Then draw slicer around the whole cheese on top edge of the red rind, removing about $\frac{1}{2}$ inch of rind. Next draw the slicer straight across the fresh cheese (without rind) getting delicious paper thin slices. Pile these generously on fresh buttered bread (crackers are too dry) and eat as Hollanders do for breakfast, lunch, cocktails or midnight snacks.

Be sure and put back the "cap" (the thin slice referred to) on your cheese and store in the refrigerator freshener drawer. Keeps indefinitely!

Cheese Slicer, each \$2.85
Made from finest stainless steel.
Imported from Holland.

Hardy Ground Covering Plants

For Shady Places as Well as Sunny, Dry Places

There's no need to despair over making attractive the shady places under trees and other places where grass won't grow. Here are several plants that are ideal for just such situations.

Once established they will spread quickly, last indefinitely and require practically no care. Although primarily foliage plants, some

have blooms. The Myrtle, for instance, is sprinkled in the early spring with blue or white flowers.

Any of these ground coverings can be planted either in the spring or fall. Let us know the amount of ground you want to cover, and we'll gladly advise how many of any of the plants are needed.

POLYGONUM REYNOWTRIA

The handsome ground cover was introduced a few years ago by Amos Perry, one of England's oldest and best known plantsmen. It is of easy culture, very hardy, and establishes itself quite rapidly from underground runners. It does best in full sun and its pale green foliage turns brilliant red in the autumn. Height is between 12 to 18 inches, and in the fall produces numerous airy pink sprays of flowers not unlike those of the "Silver Lace Vine." The buds are deep red, adding much to its charm. One of the best ground covers for sunny places where Vinca and Pachysandra would not be satisfactory. Plants should be spaced 18 inches apart.

Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00

AJUGA - Bugle

Genevensis Three \$2.15, Doz. \$7.50, 100 \$45.00, 1000 \$400.00

Grows 3 to 4 inches high, with deep blue flowers in May and June. It is an excellent plant for ground covering and makes a good ground carpet for bulbs, such as Snowdrops and grape Hyacinths, which may be planted under its foliage. As a ground cover, plants should be spaced 8 inches apart. Of good growth and spreading fast.

Bronze Beauty Three \$2.25, Doz. \$8.00, 100 \$50.00

This is the bronze-leaved form. It is most interesting if small patches of it are planted between the green variety. It also is a fine ground cover in front of yellow Tulips or other yellow flowers. While it grows freely in shade, it does exceedingly well in full sun where its foliage takes on a richer color. Flowers are deep blue and it grows anywhere.

VIOLA ROYAL ROBE

This glorious variety is a lustrous shade of deepest violet-blue. The blossoms are delicately fragrant and open out flat like a Pansy or Viola. It is quite unnecessary for us to expatiate on the transcendent beauty of this Violet. A few plants in the garden will serve to furnish quantities of bloom either during early winter or early spring and at a time when cut flowers are most highly prized. As a ground cover it is superb. It is easily grown, forms carpets of rich green leaves, does well on comparatively poor soil under trees and other shady places. Spreads freely with richly fragrant flowers.

Each \$1.00, Three \$2.80, Doz. \$10.00, 100 \$60.00

HEDERA HELIX (Ivy)

HARDY BALTICA AND ENGLISH IVY

The famous English Ivy with its familiar evergreen, glossy foliage, requires winter protection in cold sections of the country where it is exposed to chilly winds on open walls. It can, however, be planted with perfect safety as a ground cover or as an edging to flower beds anywhere. Gracilis is perfectly hardy and we recommend its use on the north side of buildings and walls or in shady places or as a ground cover under trees in dense shade. The 2½-inch-pot plants offered are very economical.

ENGLISH IVY—Hedera helix

A lovely vine as well as a splendid ground cover. Its beautiful shiny leaves make a wonderful ground cover in densest shade.

Plants from 2½-inch pots Doz. \$6.75, 100 \$40.00, 1000 \$350.00

For ground covering the 2½-inch pot plants are recommended and should be spaced 8 inches apart.

BALTICA IVY—Hedera helix gracilis

Identical in habit with the English Ivy, but with foliage not as large and more cut; a most graceful vine; perfectly hardy and a splendid evergreen vine on walls with north exposures, also an excellent ground cover.

Plants from 2½-inch pots Doz. \$6.75, 100 \$40.00, 1000 \$350.00

For ground covering the 2½-inch pot plants are recommended and should be spaced 8 inches apart.

IVY—Silver Variegated

Stardust Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00

See page 120.

For additional varieties of Ivy see page 120

Hardy Baltica Ivy Covering Bank—It is Very Hardy and Excellent on Banks—Creates a Beautiful Easy-to-Keep-Up "Lawn" as Well

Polygonum Reynowtria

TRAILING ROSES

Max Graf Each \$1.25, Three \$3.50, Doz. \$13.00

A splendid trailing pillar or climbing Rose with large single bright pink flowers having prettily crimped petal edges. Fine for planting on steep banks or for trailing over a stone wall.

Rosa Wichuraiana Each \$1.25, Three \$3.50, Doz. \$13.00

Almost evergreen, the Wichuraiana or Memorial Rose trails along the ground, making a green, glossy mat covering a wide area. The flowers are produced in late July or August, in big sprays or panicles. They are pure white, semi-double or single, with an enormous center of brilliant yellow stamens. This is by far the most useful Rose for covering banks and slopes because of its close, clinging habit and its tendency to root wherever it touches the ground.

Wichuraiana, Crimson Shower Each \$2.50, Three \$6.60, Doz. \$26.40

A wonderful late blooming Wichuraiana rambler Rose. Flowers July through September. This extension of the flowering period of ramblers should prove of value to all who desire a planting scheme giving a succession of bloom. The flowers are produced in clusters in great abundance, are of rosette form and about an inch across. The clear shade of crimson certainly appears as an improvement on that of other red ramblers. The foliage is of the very best Wichuraiana type, consisting of shiny green leaflets which look highly polished. Use it on pillar, arch, pergola, fence. A great climbing Rose easily grown and prolific, and excellent as a ground cover. See color illustration on page 132.

Rugosa Repens Alba Each \$3.00, Three \$8.50, Doz. \$30.00, 100 \$225.00

This is the creeping, dwarf form of the white Rugosa Rose. It is perfect for bank and ground covering in extreme climates. Will root and grow in any soil, even poor white sand on dunes. Below zero temperatures do not harm it, neither is it affected by salt spray along the sea coast.

The Ajugas Are Suitable for Sun or Shade

Enjoy the Finer Varieties and More Abundant Flowering of Pedigreed Plants

Your garden can bring you the greatest and most enduring pleasure and the greatest return for the thought, effort, time and money you invest in it, only with pedigreed stock. "Breeding" in plants, just as in animals, is the only way to assure pure, true strains and prize specimens.

Wayside shrubs and plants are reproduced only from pedigreed and selected stock set aside for reproducing purposes exclusively. Cuttings or divisions taken from these selected stock plants are grown into salable specimens. This insures that all of the superior qualities of the parent stock will be retained in the new plants, a scientific principle that assures you the enviable color and profusion you want in your garden—as thousands of our customers have learned to their pleasure.

Pachistima Canbyi (Also see page 93)
(Photo Courtesy of Arnold Arboretum)

Perfect Blooms From Careful Breeding

In planning and planting a garden you look forward to an abundance of flowers. In buying plants or bulbs or shrubs you are investing not only money but time, in expectation of this abundance of bloom true to type. You buy in faith in the honesty of the firm using the names, pictures, descriptions which you depended on to guide your selection.

There is only one known way for a grower of nursery plants to deliver without fail what his catalog promises—and this is the Wayside method of reproducing only from pedigreed, acclimatized selected parent plants of known quality. This involves destroying all weaklings.

Insuring Full Vitality for Vigorous Growth

Wayside Gardens Nursery stock is grown in Mentor, Ohio. Within 400 or more acres of Wayside Gardens are several distinct types of soil. This unique condition makes it possible to raise the greatest variety of plants. The climate also affords wide range of heat and cold, wet and dry periods so that plants acclimatized at Mentor on Lake Erie have the stamina and survival characteristics which enable them to thrive anywhere in northern, central and eastern United States.

PACHISTIMA

Canbyi Each \$2.50, Three \$7.15, Doz. \$25.00, 100 \$190.00

This small Holly-leaved prostrate little evergreen shrub spreads about 18 inches. Several planted together make a perfectly charming ground cover. It grows equally well in sun or shade and is hardy anywhere. Because of its ease of culture and fine habit without any care, it is rapidly becoming first choice as a cover for graves as well as in small shady places in the garden. As a ground cover, plants should be spaced 6 inches apart. Prefers acid soil.

Vinca Minor, Miss Jekyll's White

This is a very choice small leaved and very dwarf growing Vinca. Produces a dense low carpet of deepest green which in spring is completely covered with pure white star-like flowers. Not a rampant grower but neat and orderly, a perfect ground cover for locations where a dainty plant is required. Superb covering over small spring flowering bulbs as Scillas and Chionodoxa.

Each 60c, Three \$1.70, Doz. \$6.00, 100 \$35.00

Lily-of-the-Valley

Lily-of-the-Valley (Convallaria Majalis)

We are happy to be able to offer you again our fine strain of Lily-of-the-Valley. This bold, strong form is especially well adapted for garden planting. If reasonably taken care of, a bed of them will produce beautiful long-stemmed flowers in abundance for as long as you live.

But you must not be thoughtless about them. Their culture is so simple. True, they will grow anywhere, under almost any conditions—sun or shade, wet or dry, but truly spectacular results are obtained if, during each winter (December preferred), you will cover your Valley bed with a heavy coating of manure or apply a heavy dose of Wayside Gardens Plant Food. The response to heavy organic fertilizing is remarkable. These pips are in units of 25 per bunch and we prefer to sell them that way but will gladly break these bunches if you only want a dozen.

We recommend the Lily-of-the-Valley for ground covering, particularly in shady places.

Bunch of 12 pips \$2.25

Bunch of 25 pips \$4.00

Pips per 100 \$13.50

Pips per 1000 \$125.00

See page 12 for Forcing Pips Lily-of-the-Valley.

PACHYSANDRA TERMINALIS (Spurge)

A trailing plant 6 to 8 inches high, forming broad mats of bright glossy green foliage. A ground cover, which will grow in all shady situations and the only plant which will thrive under pine trees. Some of its main uses are: Under all evergreen plantings, under all shrub plantings, for area-way copings, for loggia and inclosed porch uses, for shrub and flower bed borders, for bordering walks and drives, for steep terraces in sun or shade; for city yards it is ideal; for dense shade under any kind of trees. Plants should be spaced 4 inches apart.

Pot grown plants 25 \$6.00, 100 \$22.50, 250 \$53.00, 1000 \$200.00
We put 2 plants in each pot. Above prices are per pot.

Frame grown plants, bare root, not potted.

25 \$4.25, 100 \$16.00, 250 \$39.00, 1000 \$150.00

Tied in bundles of 25 per bundle. Excellent for inexpensive large plantings.

PACHYSANDRA SILVEREDGE

This is an exceedingly nice and valuable but still very rare form. It differs from common Pachysandra by sporting a narrow silvery white margin around its leaves, and the leaves themselves are light green instead of dark green. The edge is seldom more than 1/4 inch wide, never discolors.

The effect created by a grouping of this variegated type is most pleasing, giving a much lighter effect; in fact, the contrast is quite sharp. Everyone who has seen it wants it for that very purpose. The variegated form planted at the base of Rhododendrons or other evergreens is just what is wanted for relief of too much green.

Pot grown plants Three \$1.85, Doz. \$6.75, 100 \$40.00, 1000 \$350.00

Frame grown plants, bare root, not potted

25 \$7.00, 100 \$25.00, 250 \$60.00

Tied in bundles of 25 per bundle. Excellent for inexpensive large plantings.

Pachysandra, Silveredge—Fine for Dish Gardens

EPIEDIUM

The Aristocrat of Ground Covers

As ground covers, for edging or the rockery, Epimediums are delightful as well as supreme. In May and June the plants, growing about 9 inches high and wide are a mass of delicately lovely flowers. Their light green, heart-shaped foliage is leathery in texture and most attractive. They grow well in the shade, better in partial shade, and will also tolerate full sunlight. Ordinary fertile garden soil is satisfactory.

Macranthum Lilacinum

Each \$1.25, Three \$3.50, Doz. \$13.00, 100 \$80.00

We have found this to be one of the best. Its handsome foliage is pleasant to look at from early spring until winter. It makes nice clumps, spreads well and does beautifully in shade under shrubs and trees, as well as for edging along shady paths or walks. Early in spring the plants produce dozens of stalks with dainty lilac-blue flowers that are a joy to see.

Niveum

Each \$1.25, Three \$3.50, Doz. \$13.00, 100 \$80.00

A good strong grower producing numerous white flowers of great charm.

Pinnatum

Each \$1.25, Three \$3.50, Doz. \$13.00, 100 \$80.00

One of the best; excellent foliage. Bright yellow flowers with short spurs. A strong grower. We believe this to be the best for quick ground covering or edging. Does well in shade or full sun. The bright yellow flowers make a lovely show in Spring. Very hardy. Requires no care.

Rubrum

Each \$1.25, Three \$3.50, Doz. \$13.00, 100 \$80.00

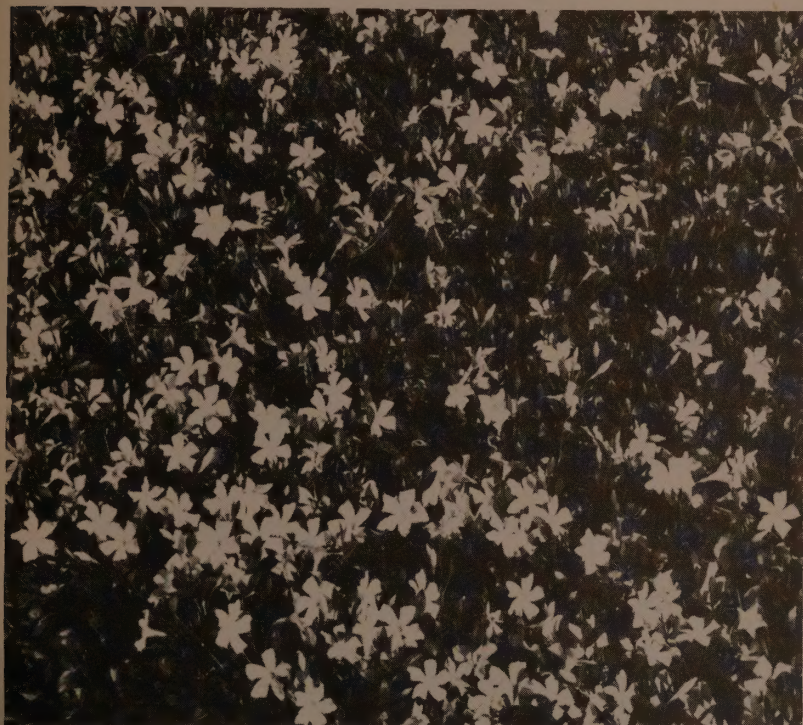

This variety produces the deepest color flowers of all. They are deep rich ruby-red on wiry stems which, as they appear above the young bronzy foliage in spring, make beautiful showing. It is a good grower and multiplies well.

Sulphureum

Each \$1.25, Three \$3.50, Doz. \$13.00, 100 \$80.00

Clusters of sulphur-yellow blooms in spring. Throughout the year its heart shaped leaves are handsome. Like all other Epimediums a delightful ground cover and distinctive edging plant of great character.

Epimedium, showing its dainty flowers in spring

Vinca Minor, Miss Jekyll's White

VINCA - PERIWINKLE OR TRAILING MYRTLE

The Periwinkles are suitable to grow as edgings to shrubbery borders, carpet the ground under the shade of trees, or in shady borders with Ferns, Lilies and other bulbs.

Ordinary soil in positions named above. Plant in autumn or spring 4 to 6 inches apart. Additional beauty is obtained by the interplanting of Daf-fodils, Martensia or Plumbago larpentae. All these bulbs and plants do well planted under Vinca minor. By mixing all colors of "V. minor" indiscriminately and allowing them to intermingle, a beautiful effect is obtained, particularly if also mixed with variegated Stardust Ivy. Do best in half shade or shade.

Minor

A trailing evergreen, used extensively for carpeting ground under shrubs or trees or on graves, where it is too shady for grass or other plants.

Plants from 2 1/2 inch pots Doz. \$5.50, 100 \$27.00, 1000 \$250.00

Minor alba

The rare white-flowered form of the preceding variety.

Plants from 2 1/2-inch pots Doz. \$6.00, 100 \$35.00, 1000 \$300.00

Minor, Bowles' Variety

The foliage is broad and rich glossy green, of strong texture. The flowers are not only larger but of a deeper rich blue color and are borne with remarkable profusion. Plants are supplied in pots.

Plants from 2 1/2-inch pots Doz. \$6.00, 100 \$35.00, 1000 \$300.00

Minor, Double blue

Each 60c, Three \$1.70, Doz. \$6.00, 100 \$35.00

The same habit of growth of the well known "Periwinkle" but with double blue flowers.

Auratum Hybrids

A strain of magnificent hybrids in which the golden band is replaced by one in various shades of red. They are much hardier, easy to grow and multiply quite rapidly if given reasonable care.

7 to 8 inches *Each \$2.00, Three \$5.50, Doz. \$20.00*
8 to 9 inches *Each \$2.50, Three \$7.00, Doz. \$25.00*

AURATUM HYBRID "JILLIAN WALLACE"

This bold and lovely Lily hybrid is now, and may well be for years to come, the best of all the new Auratum hybrids. The fully opened flowers are more than 8 inches across and the plants bear as many as seven of the huge flowers on 5- to 6- ft. stems. The best color description we can give is that the petals are Tyrian rose with white margins and spotted with a really intense, deep crimson. The petals are slightly crested on the inner edges, near the base of the flower. *Each \$3.50*

Auratum Hybrid "Jillian Wallace"

They were developed in Oregon and are a magnificent addition to any garden. We offer big bulbs which will make a beautiful show only a few months after planting.

AURATUM PLATYPHYLLUM

This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, white, richly spotted yellow.

Flowering Bulbs, 8 to 9 inches
Each \$1.25, Three \$3.50, Doz. \$13.00, 25 \$25.00

Flowering Bulbs, 9 to 10 inches
Each \$1.60, Three \$4.25, Doz. \$15.50, 25 \$30.00

Auratum Platyphyllum

New Zealand Hybrid Auratum Lilies

Several years ago the Reverend James E. Freeman living in New Zealand wrote us he was having a "whale of a time" growing and hybridizing Auratum Lilies and he sent along a dozen or more color slides for us to see. A professional could not have done any better if as well. Seed of these crosses and hybrids was sent to Mentor for us to grow into bulbs for disposal in this country; part of the returns to be sent back to New Zealand for his church, the other part to be kept by us for our expenses and effort. They are a superb lot; magnificent flowers of immense size and exciting colors on fine tall stems. We have found they multiply well, inclined to like water when it is hot and dry. Any good well drained garden soil suits them; like full sun to light shade. The bulbs we will send you will vary considerably in size due to the differing types and forms, all will be blooming size. Try and plant them as soon as possible after receipt.

New Zealand Hybrid Auratums

Each \$1.75, Three \$4.75, Doz. \$17.50

New Zealand Auratum Hybrid Lilies

They are as big or a little larger than those shown on the left hand page, stronger and more substantial than the ordinary Auratum.

Aurelian Hybrid Lilies

AURELIAN HYBRID LILIES Mixed Colors

These hybrids are the result of crosses between Henryi, Sargentiae and Sulfureum and vary in shape from short trumpet-shaped, bowl-shaped to those with widely flaring and recurving petals. Cream tinted with yellow and apricot centers; some light yellow with apricot centers, all superbly beautiful. We offer bulbs in a beautiful mixture of colors for:

7 to 9 in. bulbs Each 95c, Three \$2.75, Doz. \$10.75, 25 \$20.70

Jumbo size bulbs Each \$1.50, Three \$4.00, Doz. \$15.00

Aurelian Hybrids, Mixed Colors

Sunburst Strain

Each \$1.00, Three \$2.85, Doz. \$11.00

This group is made up of the flowers which most closely resemble Lilium Henryi in shape. They are much larger and more reflexed than those of Henryi and the colors include white, cream-yellow and orange. The flowers are of unusual texture and substance. Strong growers and permanent

Heart's Desire Strain

Each \$1.15, Three \$3.25, Doz. \$11.50

This selection is almost intermediate in shape between the trumpet form and the Lilium Henryi shape. They are essentially shallow, widely flared and bowl-shaped in shades of white, cream and yellow-orange. Many of them have a bright orange throat shading to cream-yellow at tips of the petals. All are strong growers and will form permanent groups.

Golden Splendor Strain

Each \$1.00, Three \$2.85, Doz. \$11.00

This type resembles the Trumpet Lily in all respects except in color and texture of the flowers. The shading of the petals varies from clear butter-yellow down to cream-yellow. These forms are extremely rare and scarce at present. They are a magnificent addition to the Trumpet Lily group and we predict that these along with the new pink trumpets will become, in the very near future, as popular and as widely planted as are the Olympic Hybrids today.

Golden Splendor

Don't Miss the All-Summer Glory of Lilies

Few flowers bring your garden the unusual and exotic beauty of Lilies, the romance of the far corners of the earth in which many of them were discovered. They have come from Europe, Asia, Africa and the wild crannies of America to delight you with their different grace and loveliness, their uncommon charm and colors that offer you the pleasure of "pointing with pride." Growing some of the new hybrids will give enjoyment and satisfaction like that of collecting rare jades and porcelains.

The new Hybrid Lilies have taken their rightful place in American gardens, large and small, not only for their beauty but because of their ease of culture. In the past few years it has been demonstrated that a great many kinds are just plain easy while others just difficult enough to stimulate gardening interest. And they pay you well in distinctive results, a steady parade of changing bloom from early June to late October.

Centifolium Hybrid Lilies

CENTIFOLIUM - "PINK PERFECTION STRAIN"

Although in habit and in culture the plants are similar to the Centifolium Hybrids, the flowers are shaded pink. This color extends over the inner surface as well as the outer surface of the petals and is indescribably beautiful. This strain is bound to become one of the most popular of garden Lilies as soon as sufficient stocks are available. Specially hand selected bulbs.

	Each	Three	Dozen	25	100

CENTIFOLIUM - "SPECIAL SELECT"

For the more discriminating gardener we offer a number of specially selected Olympic Hybrids. The general types available are the large formal waxy trumpets characteristic of the family, of unusual substance and vigor, with light pink exteriors.

	Each	Three	Dozen	25	100
7 to 8 in.	\$.85	\$2.40	\$9.25	\$18.00	\$65.00
8 to 9 in.	.90	2.50	9.75	19.00	70.00
Jumbo Bulbs	1.25	3.50	13.00		

CENTIFOLIUM

These magnificent Lilies are quickly replacing the Regale Lily. As they are grown from seed, there is a pleasing variation in flower form as well as coloring. Some show a cool sea-green, others delicate shell-pink. Many are tinted soft shades of yellow, others pure snow-white.

Select

Lilium Testaceum (See page 10)

Lilium Martagon Album

Lilium Tenuifolium (See page 10)

Fiesta Hybrid Lilies

This new race of seedlings has neatly reflexed flowers, nicely spaced on thin, wiry stems. The colors range from bright yellow through orange to a beautiful dark rich red. Most of the flowers are of typical recurved Turk's Cap shape and many of the plants have blooms facing outward or somewhat upward with the petals only slightly recurved. A sun loving group, plant them 5 to 6 inches deep where they will get plenty of direct sunlight. Propagation is most rapid from the numerous underground stem bulblets. Award of Merit. Massachusetts Horticultural Society, 1946.

Mixed colors only, Each 80c, Three \$2.25, Doz. \$8.00, 25 \$16.00

Golden Chalice Hybrid

This is another instance where we have chosen to introduce an entire strain of seedlings which have shown marked improvement over the parent plants rather than segregate a few individuals and propagate them for eventual naming and introduction. Our main objective of clearer, brighter colors with the elimination of the muddy oranges and orange-reds has largely been realized in the Golden Chalice Hybrids. After roguing out the less desirable forms the range of colors of the remainder of the population varies from clear lemon-yellow through the rich warm shades of gold and apricot-orange. Extremely drought resistant, of easiest culture and multiplying rapidly, these hybrids are ideally suited for that warm, dry corner of the border where they will flourish and flower freely with a minimum of care. June flowering, height 2½ to 4 feet.

Each 80c, Three \$2.25, Doz. \$8.00, 25 \$16.00

Golden Chalice Hybrids

Fiesta Hybrid Lilies

Japonicum

Each \$1.00

Three \$2.85, Doz. \$11.00, 25 \$21.00

This is one of the new "pink" Lilies for our gardens and a very lovely thing it is. The flowers are carried horizontally on stems 3 feet high. Somewhat capricious in its requirements, it is a Lily so beautiful and of a color so lovely and unusual that it is worth taking pains with. The funnel-shaped finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color often shaded blush. June-July flowering.

Martagon

Each \$1.15

Three \$3.25, Doz. \$12.50, 25 \$24.00

Strong growing Lily, producing from 20 to 30 light spotted purple flowers when established; very graceful, vigorous and floriferous. June-July flowering. Do well in light shade.

Martagon album

Each \$1.35

Three \$3.75, Doz. \$13.75, 25 \$26.25

There are few more beautiful things than the white Martagon Lily. The appearance of these Lilies is graceful and delightful in the extreme. On slender stems 4 to 5 feet high, the numerous drooping, wax-like, white Turk's Cap flowers, with yellow tipped stamens, look fascinating. The small flowers are symmetrical in shape, with reflexed petals and are borne in pyramidal shaped clusters.

Lilium Japonicum

Lilium Speciosum Album

Speciosum Lilies

The petals are well rolled back and are handsomely spotted, often branded with distinct color. The anthers are conspicuous for their size and color, and extremely delicate poise. In addition to these attractive qualities, it has a strongly waved outline to the petals, which adds much to its beauty. It flowers through the late summer into autumn. The cultivation of this Lily is simple, sending up its flowering stems year after year in increasing numbers.

Speciosum magnificum

Rich ruby-carmine, margined white; stout of substance and broad of petal, this variety stands out prominently on account of its vigorous growth as well as the size and depth of coloring.

8 to 9 in. Each 80c, Three \$2.25, Doz. \$8.00, 25 \$15.50
9 to 10 in. Each 85c, Three \$2.45, Doz. \$8.50, 25 \$16.50

Speciosum rubrum "Red Champion"

A handsome deep colored variety of the Speciosum Lily. Superb for garden decoration, cut flowers or pot culture in a cool greenhouse. Our strain is uniform, disease free, vigorous, and AMERICAN-GROWN. The foundation stock was discovered locally on the slopes of Mount Hood, where it had grown undisturbed for some forty years. It likes a situation in well drained soil. Likes light shade during the hottest part of the day.

Each 90c, Three \$2.50, Doz. \$9.75, 25 \$19.00

Speciosum album

Beautiful snow-white with golden green stripe through the center of each petal, and anthers of a coppery tint. Alike in the form of the flower and in the way of growing, this Lily is one of the most beautiful we have.

Each 85c, Three \$2.40, Doz. \$9.25, 25 \$18.00

Lilium Regale (The Regal Lily)

One of the most beautiful and one of the easiest of Lilies to grow, it never fails "*Lilium Regale*" is truly a Royal Lily; worthy of a place in every garden; it is a lover of loam and sunshine. A vigorous grower with sturdy stems, 4 to 6 feet high, densely covered with fine foliage. Center of flower flushed with yellow shading to white at outer edges; externally the flowers are streaked with brown on the "ribs," shaded through almost translucent petals with a delightfully pearly tint; the contrast between the color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. The Regal Lily is very floriferous and when thoroughly established, bears as high as 18 to 20 flowers.

Lilium Speciosum Magnificum

Lilium, Royal Gold

The Golden Regale Lily

A golden yellow Regale Lily. This beautiful new variety is identical with the best L. Regale except for its golden coloring. The flowers have a most attractive, shiny, glistening surface. Royal Gold is without doubt one of the finest introductions in Lilies. Don't miss it!

6 to 7 in. bulbs Each 95c, Three \$2.75, Doz. \$10.75
8 to 9 in. bulbs Each \$1.15, Three \$3.25, Doz. \$11.50
Jumbo size bulbs Each \$1.50, Three \$4.00, Doz. \$15.00

Lilium, Royal Gold

Lilium Green Mountain Hybrid

Lilium Green Mountain Hybrids

Size of flower, combined with a green coloring of the throat and the brown shaded exterior of the petals has resulted in an impressive group of Trumpet Lilies. Quite distinct in shape and color, they are definitely a superior group of plants, particularly valuable for exhibition and specimen planting as well as being a magnificent cut flower. They require the same cultural treatment as Centifolium Lilies and are at their best when planted in very light shade.

8-9 in. Each \$1.00, Three \$2.85, Doz. \$11.00, 25 \$21.00
Jumbo size bulbs Each \$1.50, Three \$4.00, Doz. \$15.00

Lilium Theodore A. Havemeyer

A special gold medal was awarded to a display of this variety in the Gardens on Parade at the New York World's Fair. The flowers are a tender shade of buff or creamy old ivory with three or four buff, longitudinal lines, and marked with rosy amber on the basal half of the segment. This lovely shading is enhanced by attractive brown anthers. The flowers are of fine size, broad and spreading. Begins to bloom the end of July, and blooms over a very long period.

About 6-7 in., Flowering Bulbs Each \$1.15, Three \$3.25, Doz. \$11.50
About 7-8 in., Flowering Bulbs Each \$1.35, Three \$3.75, Doz. \$13.75
About 8-9 in., Flowering Bulbs Each \$1.60, Three \$4.25, Doz. \$15.50

Theodore A. Havemeyer

[9]

Emerald Strain

Emerald Strain

This lively strain has flowers of an almost translucent, pure, cool white, with a flush of emerald-green. The large beautifully shaped trumpets are borne in a pyramidal inflorescence of perfect form. Stems are strong and rigid, do not need staking. A superb Lily.

8-9 in. Each \$1.00, Three \$2.85, Doz. \$11.00
Jumbo size bulbs Each \$1.50, Three \$4.00, Doz. \$15.00

Regal Lilies

Jumbo Bulbs

The term Jumbo stands for the largest bulbs produced that season.

The new Hybrid Lilies are robust and strong growers. They produce each year a limited number of giant size bulbs some 12 inches and over. Our offer of these Jumbo bulbs is for as long as they are unsold. The bulbs are immense size and will produce a spectacular and lovely display immediately after planting and for many years to come.

**Lilium
Formosanum,
Giant Late
Flowering**

Formosanum Giant Late Flowering Form
Each 80c, Three \$2.25, Doz. \$8.00,
25 \$15.50, 100 \$60.00

The latest flowering of all the popular Lilies, this white trumpet type is particularly desirable for gardening in moderate climates. The plants are often in flower as late as December in the mild sections of the country. Of easiest culture, this Lily should be in every garden. Our strain is tall and free flowering and has been grown from selected plants for several generations. The bulbs are very small, but should be planted 5 to 6 inches deep since Formosanum produces very heavy stem roots.

CANDIDUM (MADONNA LILIES)

The Madonna Lily is one of the loveliest of white Lilies, popular throughout the world, loved and admired by all. Its delightful fragrance and lovely white flowers have made it a universal symbol of purity. Plant it in groups of three or more bulbs, close to the pale blue Delphinium Belladonna. It will be the loveliest spot in your garden during late June and early July. Madonna Lilies are simple to grow if you plant in full sun and perfectly drained soil.

Top Size Bulbs, 22-24 cm.

Each 60c, Three \$1.70, Doz. \$6.00, 25 \$11.00, 100 \$42.50

Giant Size Bulbs, 26-28 cm.

Each 80c, Three \$2.25, Doz. \$8.00, 25 \$15.50, 100 \$60.00

Pardalinum Giganteum, Sunset Each 80c, Three \$2.25, Doz. \$8.00, 25 \$16.00

This brilliant Lily is of easiest culture, in fact, it's "fool-proof." It is vigorous, dependable, very hardy, and multiplies rapidly. Stems are stout and require no staking. The petals are somewhat recurving and a brilliant sunset-red, while the base of the bloom is yellow, beautifully marked with amber-brown dots.

Lilium Candidum

**Hybrid Lily,
Redbird**

Flowers shown
Half size

Testaceum Top size bulbs Each \$2.50, Three \$7.00, Doz. \$25.00

Also known as the "Excelsum" and as the "Nankeen Lily." One of the choicest garden Lilies. The warm apricot tone, almost a cafe au lait, set off by brilliant orange anthers, puts it in a color class by itself; in fact, many people consider it the most graceful and lovely of all Lilies. It is beautiful for every kind of garden use. In combination with light shaded Delphiniums or with Madonna Lily, which it resembles, it is most effective. It has the texture of Lilium Candidum with reflexed petals, does well under same conditions as Candidum. Four to five feet high, June-July flowering.

Tenuifolium Each 70c, Three \$2.00, Doz. \$7.25, 25 \$14.00, 100 \$48.00

A charming little early flowering Lily with strongly recurved petals of waxy texture; deep scarlet. A gem in the rock garden as in the border. Likes a cool, damp, loamy soil and partial shade, but does well anywhere in well drained soil.

Tenuifolium, Golden Gleam

Each 65c, Three \$1.80, Doz. \$6.50, 25 \$12.00, 100 \$45.00

A beautiful, robust and floriferous hybrid of this type, bearing numerous flowers of a pure apricot-yellow. June flowering.

Hybrid Lily, Redbird

A superbly handsome creation by Dr. E. F. Palmer. The dark stem rises strongly erect to a height of five feet, richly covered with glossy, healthy leaves which are topped by 12 to 16 blooms gracefully arranged along the stem, all facing upwards. The blooms are 4 to 5 inches in diameter and rich mahogany-red in color which shows to perfection if given a dark green background. It flowers in July, lasting 3 weeks or more. Of easiest culture. Increases rapidly from the many bulbils which are formed in the axils of the leaves. Plant in full sun about 3 to 4 inches deep. Again, we say, a superb new Lily!

Each 90c, Three \$2.50, Doz. \$9.75

Lilies for Forcing—See page 12 for Croft Easter Lilies

Mid-Century, Valencia

Mid-Century Hybrid Lilies

For literally hundreds of years fruitless attempts have been made to cross the Umbellatum and Tigirnum Lilies in Europe. Finally and possibly because of more favorable conditions, this feat was accomplished a few years ago in Oregon. The results are astounding and sensational. The cross produced magnificent plants 3 to 4 feet tall, rigid stems which do not require staking, beautifully formed flowers growing in big open clusters. Fool-proof and perfectly hardy; they will grow anywhere. Here at last is what every gardener has been waiting for—Lilies that will grow, multiply and live under almost any conditions. We cannot say too much about these remarkable new Hybrids. Be sure and plant a few of them this year and when you see the results, we are sure you'll be more enthusiastic about them than we. This group of Lilies is truly a horticultural sensation.

Valencia

Each 80c, Three \$2.25, Doz. \$8.00

Beautiful heads of flowers of softest gold to rich yellow, clear and clean. A slight midrib and a very few small coppery gold spots on the flower petals create an excellent effect. This is a brilliantly colored variety. It stands out and we consider it one of the best. Flowers grow horizontally, are nicely balanced, petals broad. Its color glows. One of the "tops" in the collection. Grows 27 to 30 inches high.

Enchantment (Plant Patent No. 862)

Each 80c, Three \$2.25, Doz. \$8.00

A veritable giant, growing about 36 to 40 inches tall when established. Color is nasturtium-red. Flowers upright in big heads blooming week after week, providing a blaze of the richest possible color in the garden. Enchantment is probably the most vigorous Lily in cultivation, as well as the most rapid multiplier of bulbs. There is a surprise in store for you. If you ever failed growing Lilies, you won't with this one.

Fireflame

Each 90c, Three \$2.50, Doz. \$9.75

This is possibly the best in the red shades. Color is described by customers who have seen it as Indian red, burnt orange and mahogany-red. Flowers grow horizontally, are wide open with recurving broad petals in big heads on stems about 25 to 28 inches tall. It produces bulbils on the stems, all of which will bloom in 2 years. Sturdy, rugged grower.

Mid-Century, Fireflame

Mid-Century, Enchantment

MID-CENTURY LILIES IN MIXED COLORS

For the past few years we offered a number of named varieties of the Mid-Century Lilies. The response was so overwhelming that we found ourselves oversold even before the normal season opened. This year with still only limited quantities available of the named varieties, we decided to offer a mixture consisting not only of the kinds offered but including hundreds of the hybrids as well. We guarantee this mixture to contain only the choicest of our new hybrids in a range of most brilliant colors.

Each 80c, Three \$2.25, Doz. \$8.00, 25 \$15.50, 100 \$60.00

Mid-Century Hybrid Lilies in Mixed Colors

Bulbs Easily Grown in the House or Greenhouse

Amaryllis Hippeastrum

Whether you grow them in the house or in the garden, these Giant-flowering Amaryllis produce truly magnificent blossoms. Even the amateur gardener can confidently expect results and with the least possible care and attention. March, April and May are the months to plant them in your garden and they will bloom during July and August as easily as Gladioli. From these lovely bulbs a vigorous stem shoots out, carrying 4 to 6 very large blooms. We can supply them from November until June, but place your order early.

Royal Dutch Hybrids

This is the finest strain available. The flowers are superbly shaped and of mammoth size. Only a very limited number of this genuine type is available and we believe we are the only source where they can be procured.

Royal Dark Red Shades	Each \$2.50
Royal Rose-Red Shades	Each \$2.50
Royal Variegated Red and White	Each \$2.50
Royal Pure White	Each \$3.00
Mixed Royal Dutch Hybrids	Each \$2.25, Three \$6.00, Doz. \$22.50

Christmas Flowering Amaryllis

These South African bulbs are ready to start blooming only a few weeks after you receive them. They produce beautiful large flowers. Flowering around Christmas time they add greatly to the spirit of the season with their gay, cheerful colors.

Mixed Colors Only Each \$2.50, Three \$7.00, Doz. \$25.00

FRENCH ROMAN HYACINTHS

The early Roman Hyacinth, with its graceful spike of fragrant bells, is one of the earliest of all winter-flowering bulbs.

They may be placed in the more artistic ornamental bowls, using peat moss as a filler, which only needs to be kept continually moist, requires no additional fertilizer, and in which the bulbs thrive and bloom luxuriantly. Bulbs planted in October bloom in December.

White Roman Hyacinths Extra large bulbs, Six \$2.25
Doz. \$4.00, 25 \$7.00, 100 \$25.00

PAPER-WHITE NARCISSUS

Paper-White Grandiflora Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
The popular bunch-flowering, pure white Narcissus, frequently having 30 individual blooms and splendid decorative foliage from a single bulb. We offer top size bulbs best suited for growing indoors in pebbles and water.

GOLDEN YELLOW NARCISSUS

Soleil d'Or Six \$2.25, Doz. \$4.10, 25 \$7.50, 100 \$26.00
Soleil d'Or resembles the Paper-White Narcissus very much in habit but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paper-White Narcissus. We have some very fine stock of this variety to meet the steady increased demand.

NARCISSUS, FEBRUARY GOLD (See page 42)

CROFT EASTER LILIES

Very large, purest waxy white, long trumpet-shaped flowers of most wonderful texture. If cut when partially open, blooms can be kept for two weeks. Plants are strong growing and prolific bloomers, the flowers having a most pleasing fragrance. Stem is short, making it an ideal pot plant. Use a 5- or 6-inch pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60° F. Ideal garden subject in frost-free locations. In other sections, after blooming in the house, they may be planted outdoors for late summer bloom.

Large bulbs: Ready from August until December

Each 80c, Three \$2.25, Doz. \$8.00, 25 \$16.00, 100 \$63.00

Croft Easter Lilies

[12]

FREESIAS (Large Flowered)

Without doubt the most sweetly scented flower grown; a single bloom permeates the living-room with its delicate perfume. Although they are quite popular and very easily raised, we suggest the following treatment: procure the bulbs as early as possible and plant them in August, 6 to 25 bulbs for a single pan. The soil should be a mixture of good loam. The bulbs planted early, say August and September, must be placed outdoors until cold weather sets in; must be regularly watered and kept growing all the time. In November, before frosts appear, the pots should be placed in the window of a cool room.

Golden Giant Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
A yellow Freesia of unusually sturdy growth; tall, straight stems. Flowers large and wide open. Great lasting qualities. Very prolific producer with several laterals.

White Giant Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
A new giant white, stems average 18 to 20 inches long. Single flowers 2½ inches long; early bloomer.

Mixed Colors Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
A lovely mixture made up out of many varieties. All the shades of the rainbow.

CALLAS - Zantedeschia

Plant Callas indoors in the late fall of the year. In April or May dormant bulbs may be planted near the pool in a sunny spot where they will flower beautifully in August or September.

Elliottiana (Yellow Calla) Each 80, Three \$2.25, Doz. \$8.00, 100 \$60.00

One that should be planted extensively. The deep golden yellow flowers are truly magnificent and produced in abundance. The green foliage is spotted white which adds to its beauty; lovely house plant as well as garden subject.

Godfrey (White Calla) Each 70c, Three \$2.00, Doz. \$7.00, 100 \$50.00
Most ornamental foliage if grown near pool where it will get plenty of water; an excellent, easily grown house plant.

Rehmanni Each 50c, Three \$1.35, Doz. \$4.85, 100 \$33.00
The pink or rose Calla. A rather uncommon species native to Natal. The flowers are small but pink and therefore unusual. An uncommon plant for the greenhouse or indoor culture.

LILY-OF-THE VALLEY (for Indoor Growing)

These are the so-called retarded Lily-of-the-Valley pips. They have been kept in cold storage to prevent them from sprouting throughout the summer and autumn. They are the same pips the florists use to produce the blossoms needed during the winter. Only the very finest quality of pips are used for this purpose.

Plant a dozen or more in a 5-inch pot. You may use soil, peat moss or moss as a growing medium. Keep them moist and dark for two weeks after planting in a warm place, then bring them into the light in a sunny window and you will grow fragrant flowers without any difficulty in a few days.

Doz. \$3.00, 25 \$5.50, 100 \$20.00

All retarded Lily-of-the-Valley pips will be shipped during the first week of December, not at any other time.

Paper-White Narcissus

Fritillaria Meleagris

Leucojum Aestivum
Puschkinia Libanotica

Hardy Bulbs for Permanent Plantings

FRITILLARIA - Guinea Hen Flower

Fritillarias are lovely bulbous plants for the rock garden or indoor culture. The stems are leafy and most graceful, with many pendent, bell-like flowers. One species found in Southern California is called "Mission Bells," while in other places local species are called Brown or Chocolate Lilies.

Meleagris

These produce in early April dwarf, pendent, reddish brown and purple, bell-shaped flowers in curiously checkered shades, on stems 12 inches high. They are very effective in colonies, requiring a somewhat dry situation. Invaluable for the rockery, for naturalizing and very lovely grown in pans indoors; use same culture as for Freesia.

Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.25

GALANTHUS - Snowdrops

Snowdrops belong to the most beloved early flowering spring bulbs. They require very little attention and can remain undisturbed for years and years. They like rather moist and cool soil. To get a lovely effect they must be planted thickly, while they can be grown under trees and shrubs, in woodlands and in lawns. In the latter case, the lawn should not be mown before the leaves are withered or next year's blooms may be spoiled.

Nivalis

This is the old-fashioned favorite. Its lovely white nodding blooms are out before the frost is out of the ground; one of the lovely bulbs that tell us spring is almost here. A group naturalized in the shade of shrubs or under trees is worth while. Once planted they remain for a lifetime.

Six 60c, Doz. \$1.05, 25 \$1.85, 100 \$7.00

Nivalis flore-pleno

Double form of the common Snowdrop, requiring same care.

Six 85c, Doz. \$1.45, 25 \$2.70, 100 \$9.75

LEUCOJUM - Snowflake

Aestivum (Summer Snowflake)

This large-flowered Snowflake produces in April and May gracefully drooping white bell-like flowers. Does best when growing in a shady situation and should be left alone as much as possible because the flowers become larger when the bulbs are not disturbed. Particularly fine for cutting.

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$14.00

BRODIAEA

These are easily naturalized in almost any soil. Plant them about 3 inches deep and leave them alone. They are especially happy under deciduous trees, in the rock garden or rough, gritty soils.

Mixed

This mixture contains the following colors: blue, red, yellow, white, and is good for naturalizing. Bulbs self-sow and increase quite rapidly.

Six 50c, Doz. 85c, 25 \$1.55, 100 \$5.50

CAMASSIA (Hardy)

There are few bulbous plants that meet climatic or soil conditions better or give a more attractive bloom. They are hardy without protection, and thrive either under ordinary garden conditions or when naturalized in open, moist woods or in not too dense a grassy growth. The flower stems are 2 to 4 feet high with as many as a hundred star-shaped flowers measuring 1 1/2 inches across and flowering in long succession.

Esculenta

Very showy in mass planting. Forms flower spikes 2 feet high, bearing a cluster of star-shaped flowers of a very fine, rich purple. Fine for wet or swampy places where other bulbs do not grow.

Six 50c, Doz. 80c, 25 \$1.45, 100 \$5.00

Cusicki

Same as preceding but a giant. Flowers are larger and deep blue. A very showy bold flower. 4 feet high. Again does well where other bulbs fail.

Six 75c, Doz. \$1.35, 25 \$2.50, 100 \$9.00

MUSCARI - See pages 20 and 21

PUSCHKINIA

Libanotica

A beautiful little April-flowering bulb prized for the permanent hardy flower border and rock garden; it is also an easily grown indoor pot plant. The flowers are white, shaded and striped a soft clear blue, about 6 inches high.

Doz. 90c, 25 \$1.65, 100 \$6.00

TRITELEIA - Milla

Uniflora violacea

A root-like bulb which produces in early spring a pale violet-blue flower with white center. Somewhat resembles the Chionodoxa, is delightfully fragrant. They spread and multiply with amazing rapidity and are excellent in the rockery, or under shrubs or trees where nothing else will grow. They are hardy, but like a little protection. About 3 inches high.

Doz. 70c, 25 \$1.30, 100 \$4.00

IXIOLIRION

Pallasi (Tataricum)

A little known but choice hardy bulb which in early June produces several deep blue tubular flowers on slender stems. One of the last of the small "spring" bulbs to flower. If left undisturbed, it will soon grow into a charming colony of brilliant blue flowers not unlike Chionodoxa.

Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.25

Triteleia Uniflora Violacea

Ixiolirion Pallasi

Crocus Speciosus Albus

Crocus Sativus, Pistil is the Saffron of Commerce

CROCUS - AUTUMN-FLOWERING

September, October, November flowering.

Order immediately as they must be planted early.

The Crocus listed below bloom in the autumn. Growing equally well in sun or light shade, they are permanent and multiply freely. Once planted they increase year after year without time or trouble to you. They are wildlings and do best when left to their own resources. The outstanding ones in the group are of the Speciosus varieties especially the Speciosus Albus, a truly beautiful Crocus. The Zonatus is very popular and extremely attractive coming through some low growing Sedum.

- Medius** Doz. \$2.15, 25 \$3.75, 100 \$13.00
Flowers lovely rich violet with handsome purple veining at base; stigmata rich glowing orange-red; one of the handsomest.
- Sativus (Saffron Crocus)** Doz. \$1.50, 25 \$2.75, 100 \$10.00
Habitat Italy to Kurdistan. Large flowers, purplish lilac, feathered violet, with showy orange stigmata, slightly scented. Flowering freely when established.
- Speciosus** Doz. 85c, 25 \$1.55, 100 \$5.50
Large bright blue flowers, beautifully veined, orange-red anthers and bright yellow throat; a very fine autumn Crocus.
- Speciosus albus** Doz. \$1.05, 25 \$1.85, 100 \$7.00
Grand pure white variety, large snow-white flowers are produced in abundance and are marvelous when seen coming through dwarf Sedums or springing up from nowhere under the shrubs. One of the loveliest of autumn flowers.
- Speciosus, Artabir** Doz. 95c, 25 \$1.70, 100 \$6.50
Pale blue, dark feathered, large flowers. This variety contrasts well with the white form.
- Zonatus** Doz. 85c, 25 \$1.60, 100 \$5.75
Flowers rose-lilac with yellow throat, freely produced. One of the most satisfactory kinds, lovely in the rock garden or under tall shrubs. Does well planted under trees between Vinca, Pachysandra, or other ground covers. Easily grown indoors.

Mixed Varieties of Autumn-Flowering Crocus 25 \$1.70, 100 \$6.50

Autumn Flowering Bulbs

COLCHICUM GIANT AUTUMN-FLOWERING CROCUS

These have large Crocus-like blossoms and appear during the months of September and October, without foliage. The foliage, however, appears early in the spring. The dashing, Crocus-like blossoms are shown to best advantage when planted between the early spring flowering plants such as Iris. They do remarkably well when planted in the woods or in naturalistic plantings of any kind.

Autumnale Each 40c, Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00
Commonly called the Autumn Crocus; very free flowering; of easy culture.

Autumnale album Each 55c, Six \$2.75, Doz. \$5.00, 25 \$9.50, 100 \$35.00
Pure white, increasing fast; free flowering.

Giganteum Each 60c, Six \$3.00, Doz. \$5.75, 25 \$10.75, 100 \$40.00
Large, soft violet, white center; late flowering.

Speciosum, Autumn Queen Each 60c, Six \$3.00, Doz. \$5.75, 25 \$10.75, 100 \$40.00
An outstanding large flowered hybrid, gives huge clusters of flowers of deepest rose-purple.

Speciosum, The Giant Each 60c, Six \$3.00, Doz. \$5.75, 25 \$10.75, 100 \$40.00
Truly a giant, makes a fine show growing in a ground cover such as Vinca. The immense flowers are pure lilac.

Mixture of Colchicums Each 60c, Six \$3.00, Doz. \$5.75, 25 \$10.75, 100 \$40.00
This mixture consists of a fine lot of bulbs raised from seed. All are in colors of rosy purple to violet and deep rose.

COLCHICUM—Waterlily Each 70c, Six \$3.75, Doz. \$7.00, 25 \$13.50, 100 \$50.00

A very fine form of Colchicum Autumnalis flora-plena. Its double pompadour-like flowers come in clusters of six or more. Plant it between a low growing ground cover such as Vinca minor or a low growing sedum. These provide a fine green background. Hardy and most any soil suits them. May also be grown without soil or water on the window sill. In that case plant bulb outside right after flowering.

AUTUMN FLOWERING AMARYLLIS (LYCORIS)

Radiata Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$14.00

From 10 to 20 flowers are borne on slender scapes 1 to 1½ feet high in early autumn. They are bright crimson in color, about 1½ inches across; the sickle-shaped segments being scarcely crisped; filaments are bright red. The leaves appear after the flowers. They are easily grown indoors in the North, but in the South may be grown outdoors in ordinary good garden soil.

P. S.—Lycoris Radiata is generally mis-named Nerine Sarniensis.

Squamigera Each 50c, Three \$1.35, Doz. \$5.00

We offer only big American-grown bulbs which will bloom the following year after planting, not devitalized, imported stock at a cheap price which takes several years before they produce flowers. Produces attractive green foliage in early spring which grows until July when it ripens and disappears. About a month later, as if by magic, the flower stalks spring from the ground to a height of 2 to 3 feet, developing an umbel of large, Lily-shaped flowers, 8 to 12 in number, of a delicate lilac-pink shade. The bulb is perfectly hardy and should be covered with about 4 to 5 inches of earth. A small stick or label put where bulb is planted prevents damage to bulb while dormant.

Galanthus Nivalis (See page 13)

Colchicum, The Giant

Crocus Speciosus, Artabir (Autumn-Fl.)

Crocus Zonatus (Autumn-Fl.)

Colchicum—Waterlily

Colchicum, Autumn Queen

Sternbergia Lutea Major

Autumn Flowering

STERNBERGIA

Lutea major

Six \$1.35, Doz.

\$2.30, 25 \$4.20,

100 \$15.00

A very effective October-flowering bulbous plant producing Crocus-like flowers of a rich golden yellow. The bulbs make a charming decoration if planted in bowls or pots and flower a few weeks after planting. Out-of-doors the Sternbergia likes a warm, well drained situation in borders, where it should be left undisturbed. Bulbs should be planted in units of three or more and left undisturbed to multiply.

Colchicum Giganteum

Dutch Crocus Naturalized in Lawn

Dutch Crocus — Spring-Flowering

Whether you particularly enjoy gardening or not, one of the great delights of spring is seeing the first blooms of the Dutch Crocus. Not only because of its early flowering, but because of its sheer beauty and brilliant coloring, it never fails to captivate us.

Then, too, they are so easily grown and persistent that the merest amateur can obtain perfect results. They multiply with amazing rapidity in number, from year to year, another reason why they are so popular.

Only top size bulbs are listed below, this for the reason they produce the largest number of blooms.

Blizzard Pure white, globular flowers of great beauty.	Doz. 90c, 25 \$1.65, 100 \$6.00
Early Perfection Dark violet-blue, deep and intense coloring.	Doz. 90c, 25 \$1.65, 100 \$6.00
Enchantress Clear porcelain-blue, large flowers; very pleasing; early.	Doz. 90c, 25 \$1.65, 100 \$6.00
Golden Goblet Giant golden yellow flowers.	Doz. 90c, 25 \$1.65, 100 \$6.00
King of the Whites Large, white. One of the best whites.	Doz. 90c, 25 \$1.65, 100 \$6.00

Mammoth Yellow Golden yellow flowers in abundance.	Doz. 90c, 25 \$1.65, 100 \$6.00
Queen of the Blues Dark lilac; one of the best.	Doz. 90c, 25 \$1.65, 100 \$6.00
Striped Beauty Blue striped white, late.	Doz. 90c, 25 \$1.65, 100 \$6.00
The Sultan Dark purple-blue, almost black; large flowers.	Doz. 90c, 25 \$1.65, 100 \$6.00
Mixed Colors of Crocus A beautiful mixture of all the kinds offered and will make a cheerful and colorful display early in the spring. Bulbs are all top size.	25 \$1.65, 100 \$6.00

Anemone

These popular flowers of French origin are exceedingly brilliant when in flower and excellent for cutting. They like to be planted about 2 inches deep in a cool, moist but well drained soil. Will establish without any trouble and remain for years. For northern states we advocate early spring planting, for the southern section of the country, fall planting is best. Cover in winter with strawy manure.

DOUBLE ANEMONE

Double Anemone in Mixture This mixture contains a riot of colors in all shades of blue, red and pink as well as white.	Six 75c, Doz. \$1.30, 25 \$2.40, 100 \$8.50
--	---

SINGLE ANEMONE

Lieutenant (Blue Poppy) Large, single blue flowers on long stems, resembling a blue Poppy.	Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
His Excellency A grand variety bearing flowers measuring as much as 3 inches across, of the most vivid, velvety vermillion, with glistening silvery white base and a handsome blue-black central boss. Height 1 foot.	Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
The Bride Single pure white flowers sometimes showing a faint reddish rim.	Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
Single Giant Flowering Mixed These are popular Anemones so frequently seen in the florists' shops in the early spring. The flowers are unusually large with a wide range of rich and brilliant colors.	Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25

HARDY ANEMONE

Blanda Atrocoerulea Quantities of rich violet-blue, star-shaped flowers appear in early spring just about after the Snowdrops have bloomed. The fern-like foliage grows about 3 inches tall, above which the flowers are carried in rich abundance. Perfectly hardy and liking light shade they make a wonderful show under shrubs, in rock gardens or in naturalized masses under trees. Always plant in clumps; preferably of a dozen bulbs, spaced 2 inches apart and planted 3 inches deep.	Six 80c, Doz. \$1.40, 25 \$2.60, 100 \$9.50
Blanda Mixed Colors This mixture contains numerous shades of blue and pink and makes a most cheerful picture in the early spring garden.	Six 75c, Doz. \$1.35, 25 \$2.50, 100 \$9.00

Anemone Fulgens Annulata Grandiflora

Six 70c, Doz. \$1.25, 25 \$2.30, 100 \$8.25
The vivid scarlet Windflower loves a comparatively dry, porous soil which does not retain water. It is a good variety for planting under shrubs or under a hedge where the soil is naturally somewhat dry, but it must be on the sunny side. There is absolutely nothing which will produce as fine a fiery brilliant scarlet color as Anemone Fulgens. It multiplies freely and forms fine clumps blooming year after year. A slight protection in winter is desirable.

CHIONODOXA - Glory-of-the-Snow

A mass planting forms one of the most sumptuous displays of floral beauty, a mass of blue and white, intense and brilliant. They bloom at the time of the Crocuses, producing dwarf flower spikes, bearing from 12 to 15 flowers of sky-blue with a pure white heart, creating a lovely effect. They should be planted in the fall, 3 inches deep, about 18 bulbs to the square foot, in a sunny location or in half shade and in places where they can remain undisturbed for a number of years. The flowers will cross with one another and will seed themselves, forming natural colonies. All are 6 to 7 inches high, therefore excellent in the rockery as well.

Luciliae Top size bulbs. Bright blue, white center. Flowers often with 6 to 8 blooms on each stem.	Doz. 80c, 25 \$1.50, 100 \$5.25
Luciliae alba A very beautiful pure white variety of the Luciliae.	Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50
Luciliae rosea A fine variety with pink flowers of the Luciliae form.	Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50
Sardensis Top size bulbs. Same as above with true gentian-blue flowers.	Doz. 80c, 25 \$1.50, 100 \$5.25
Mixed Chionodoxa, All Varieties Listed	Doz. 80c, 25 \$1.50, 100 \$5.25

ERYTHRONIUM - Trout Lilies

These are charming woodland plants, producing in early April, small Lily-like flowers of which the colors run in delicate tints of white, pink, cream, bright yellow and rose. They thrive in wooded places under shrubs and in shaded corners or crevices of the rockery.

Tuolumensis Glacier Lily, Mountain Lily, or Golden Easter Lily. One of the most beautiful and rarest of Dog-Tooth Violets, do best in shady woodland places, well drained soil. Not unusual to see them with 10 to 12 golden flowers, the flowers often being 3 inches across. Plant in colonies.	Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00
Mixed Colors This mixture is made up of many varieties. Splendid for naturalizing and for rock garden in light shade. It is best to plant them in groups of six or more. Once planted they multiply rapidly. Are perfectly hardy and simple to grow.	Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00

ERANTHIS - Winter Aconite

Plant Bulbs Immediately Upon Receipt

These produce about two weeks before Crocus are in bloom, little yellow flowers like Buttercups about 3 inches above the ground, with settings of fine green, frilled collars which seem never to mind the worst of weather conditions. Will thrive under trees where few other plants can hold their own. They seed themselves freely and colonies from self-sown seed are soon formed. Plant at once upon receipt, firmly, 2 inches deep, in shade or full sun, about 18 bulbs to a square foot.

Hyemalis The common Winter Aconite. Clear yellow, very early. Good for the rock garden, under Sedums or under trees. Plant bulbs at once when received.	Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.00
---	--

Spring Flowering Crocus Species

Besides the well known Dutch Crocuses there are certain species that bloom very much earlier in the year, often before the snow has gone. And what is more, all are permanent, coming up season after season without care.

No garden is complete without some *Crocus Chrysanthus* Canarybird and *E. A. Bowles*. Their brilliant yet delicate yellow flowers are exceptionally fine. Yellow-colored *Crocus* varieties are few and we, therefore, want to call your attention to these two little known varieties which are perfectly beautiful in the spring when they open their flowers to the first rays of the spring sun.

Once planted they will take care of themselves for many years.

Aureus (Moesiacus) Doz. 90c, 25 \$1.65, 100 \$6.00
Deep golden yellow. The most brilliant of the early *Crocus*.

Biflorus Doz. 90c, 25 \$1.65, 100 \$6.25
White, outside purple lined. Slightly scented.

Chrysanthus, A. P. Bowles Doz. 85c, 25 \$1.55, 100 \$5.50
A beautiful early flowering variety. Its pale yellow, brilliant flowers are outstanding. An additional attraction is the bright reddish orange stamens. We consider this and the other *Chrysanthus* varieties the finest of the early *Crocus* species.

Chrysanthus, Blue Giant Doz. 95c, 25 \$1.70, 100 \$6.50
A choice variety with big bright blue flowers. Like all the *Chrysanthus* varieties it is early, hardy and prolific blooming. We have been suggesting for several years to plant any and all *Chrysanthus* varieties. We consider them the loveliest of the spring flowers.

Chrysanthus, Canarybird Doz. 90c, 25 \$1.65, 100 \$6.00
Orange-yellow cup with bronze tints on the exterior of the flower petals. Exceptionally free flowering. A choice variety giving additional shades of yellow so much needed in *Crocus*. You will like this.

Chrysanthus, E. Aug. Bowles Doz. 95c, 25 \$1.70, 100 \$6.50
Butter-yellow, outside base bronzy gray tinged, large and beautifully rounded blossoms, the most beautiful of all *Crocus* species.

Chrysanthus, Snow Bunting Doz. 95c, 25 \$1.70, 100 \$6.50
This is a lovely form of the *Chrysanthus* group. The flowers are pure white with an occasional delicate striping of purple on the outside. When flower is fully open, it displays a pure golden center. One of the loveliest of spring flowers.

Fleischeri
White, anthers orange-red.

Korolkowi Doz. \$1.10, 25 \$1.95, 100 \$7.50
This unusually fine early species is invaluable for the rock garden, for clumps in the border or for grouping near the terrace or house and under trees. The color is brilliant golden yellow shading to orange, exterior of the petals shaded bronze; the very earliest of spring flowers.

Sieberi Doz. 90c, 25 \$1.65, 100 \$6.25
This is a very lovely spring-flowering variety which will bloom as early as February. The graceful flowers are delicate blue with gold in the throat. Potted in October they will bloom for Christmas. Can be grown easily in pebbles or peat in water throughout the winter, same as Paper-White Narcissus.

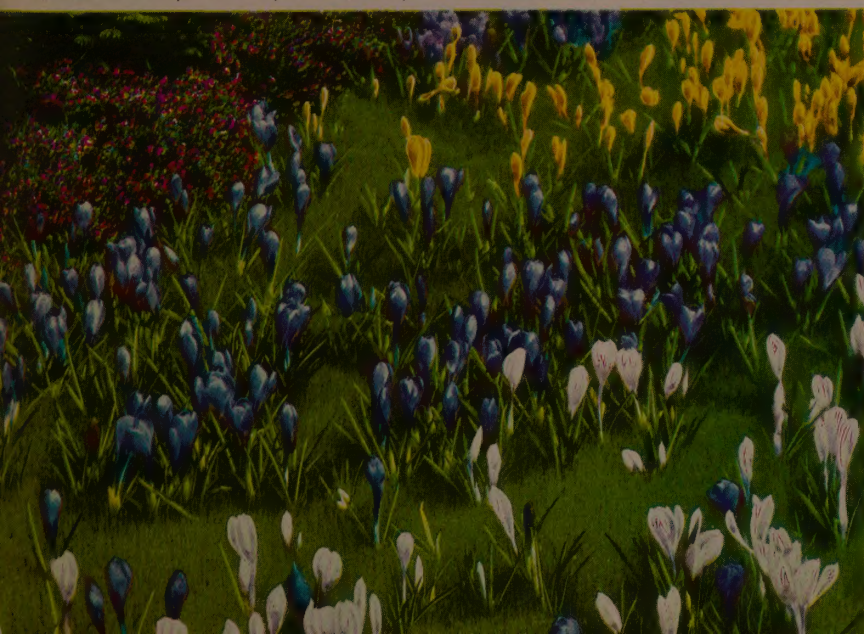

Susianus (Cloth of Gold) Doz. 85c, 25 \$1.55, 100 \$5.50
Bright golden yellow flowers, outside brown striped, produced in great profusion. Specially recommended for naturalizing.

Tomasinianus Doz. 80c, 25 \$1.45, 100 \$5.00
Pale lavender; outside silvery gray, a very charming species which blooms with numerous flowers in early spring; one of the best for naturalizing, especially in woods or shady places. No other *Crocus* does as well and multiplies or flowers as freely from one year to another without care or attention.

Versicolor picturatus (Cloth of Silver) Doz. 90c, 25 \$1.65, 100 \$6.25
White outside, purple feathered, very pretty and free.

Mixed Crocus Species, Spring Flowering 25 \$1.70, 100 \$6.25

Dutch Crocus, Blizzard, white; Early Perfection, purple; Golden Goblet, yellow

Camassia Esculenta
(See page 13)

Mertensia Virginia

MERTENSIA VIRGINICA

- Virginia Blue Bells

This is indispensable in the garden for color effect; flowers are porcelain-blue, buds pink at opening. The plant grows from 1 to 2 feet high, bearing a panicle of flowers about 1 inch long in short pendent clusters. It is splendid for the open border or for naturalizing along the wooded path. It flowers from the time Daffodils are in bloom, continuing while the May-flowering Tulips are at their best. Use this delightful plant in quantities, as it is permanent and so helpful to create beautiful pictures, especially in shady places.

Wayside's Large-Flowered Lily-of-the-Valley

Lily-of-the-Valley

(Convallaria Majalis)

We are happy to be able to offer you again our fine strain of Lily-of-the-Valley. This bold, strong form is especially well adapted for garden planting. If reasonably taken care of, a bed of them will produce beautiful long-stemmed flowers in abundance for as long as you live.

But you must not be thoughtless about them. Their culture is so simple. True they will grow anywhere under almost any conditions—sun or shade wet or dry but truly spectacular results are obtained if during each winter (December preferred), you will cover your Valley bed with a heavy coating of manure or apply a heavy dose of Wayside Gardens Plant Food. The response to heavy organic fertilizing is remarkable. These pips are in units of 25 per bunch and we prefer to sell them that way but will gladly break these bunches if you only want a dozen.

We recommend the Lily-of-the-Valley for ground covering, particularly in shady places.

Bunch of 12 pips \$2.25.

Bunch of 25 pips \$4.00.

Pips per 100 \$13.50.

Pips per 1000 \$125.00

See page 12 for Forcing Pips.

Erythronium—Trout Lilies

(See page 16)

Eremurus—Foxtail Lilies

They are among the finest of hardy bulbous plants. Striking, sensational and dignified, are extremely effective in hardy plant borders where they form early, colorful groups. Absolutely hardy, they grow giant flower spikes that reach a height of from five to eight feet. They should be planted in autumn, from September until December, and they flourish in any sunny, well drained border. After blooming, the plant disappears above ground. Annuals may be planted right over them to fill the vacant space. Many of our customers fill such spaces with Gypsophila. Eremurus roots are persistent and once planted will last for ten to fifteen years or more without resetting or dividing, growing stronger and better from year to year. In the very coldest regions a light mulching is advised for their protection. Plant them 5 inches deep.

GIANT EREMURUS — Spectacular and Rare Garden Plants

Himalaicus

Each \$2.50, Three \$7.00, Doz. \$25.00

A veritable giant. It is a simple matter to grow flower stalks 7 to 9 feet tall on this variety. The rigid spikes are covered with waxy white, cup-like flowers with golden anthers and remain in bloom four weeks or more. We have withheld Himalaicus from sale for several years because we wanted to sell this plant in quantity and at a popular price. With reasonable care they will flower for you ten years or more without need of transplanting.

Robustus

Giant roots, Each \$2.50, Three \$7.00, Doz. \$25.00

Light rosy pink flowers grow on stems 6 to 8 feet tall. One-third to one-half of the stem is covered with sparkling, small cup-like flowers. This is one of the giants of the family, easily grown and lasts from year to year. Giant roots produce one or more spikes.

PASTEL SHADED SHELFORD EREMURUS

Stately—Daintily Graceful—Charmingly Dignified

That is the impression these tall flower spikes make on one. These hardy hybrids are truly lovely. Their inflorescence is three feet long, containing great numbers of coppery pink, orange, pale yellow and pink flowers. Attaining an average height of four or five feet, these rich and rare blooms are excellent for cutting as well as garden planting. They create a most fascinating impression in the garden. They last three weeks or more indoors when kept in water. After many, many years of patient growing, our supply is now such that we can offer them at low cost, enabling you to plant them in groups of three, six or twelve, for it is when they are planted in units of three or more that they show to best advantage. Once planted, the roots will last for ten years or more. Plant them 4 inches deep.

Shelford Pastel Hybrids

Each \$2.00, Three \$5.70, Doz. \$20.00

SHELFORD HYBRIDS, NAMED VARIETIES

Isobel. Coppery orange. Each \$4.00

Moonlight. Pale yellow. Each \$4.00

White Beauty. Pure white. Each \$4.00

Chionodoxa
Luciliae
(See page 16)

Eremurus,
Shelford Hybrids

Oxalis Adenophylla

Hardy Amaryllis
(Lycoris Squamigera)

Muscari Plumosum

FRITILLARIA - Imperialis (Crown Imperial)

The Crown Imperials with their stately, graceful drooping flowers should not be missed in any garden. They want a good soil, much sun, and can be left undisturbed for years. Must be planted as early as possible and have to be carefully protected against sharp winds. They are real "grandmother's favorites" and should be in every hardy border or old-fashioned flower garden.

Maxima, Red

Each \$2.00, Three \$5.70,
Doz. \$20.00

Robust and strong growing variety with large orange-red flowers. Height 34 inches.

Maxima Yellow

Each \$3.00

Same habit of growth as red flowering variety. Brilliant golden-yellow flowers of robust growth. A fine garden plant.

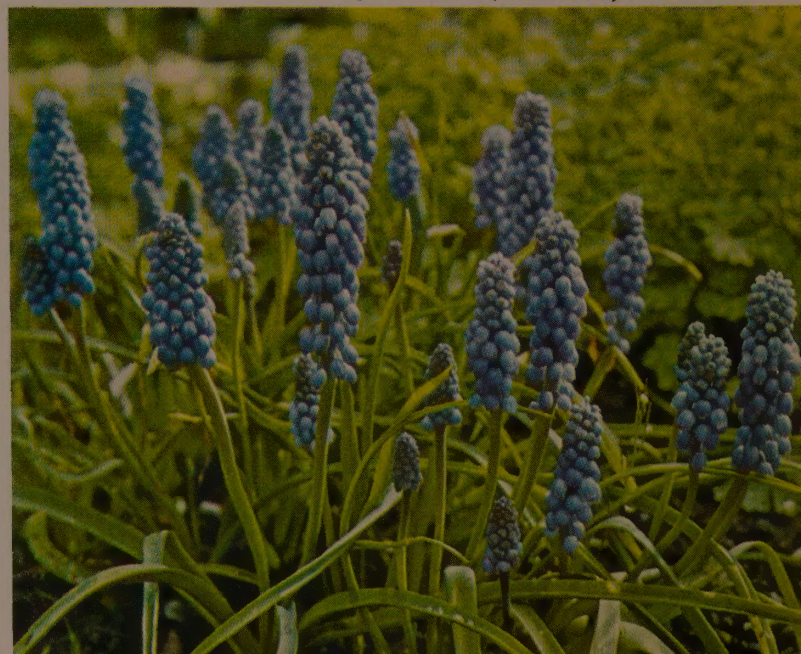

Muscari Armeniacum—Also called Heavenly Blue

[20]

Muscari Botryoides Blue (Coeruleum)

Fritillaria Imperialis

HARDY AMARYLLIS

Halli (*Lycoris Squamigera*)

Each 50c, Three \$1.35, Doz. \$5.00

We offer only big American-grown bulbs which will bloom the following year after planting, not devitalized, imported stock at a cheap price which takes several years before they produce flowers. Produce attractive green foliage in early spring which grows until July when it ripens and disappears. About a month later, as if by magic, the flower stalks spring from the ground to a height of 2 to 3 feet, developing an umbel of large, Lily-shaped flowers. 8 to 12 in number, of a delicate lilac-pink shade. The bulb is perfectly hardy and should be covered with about 4 to 5 inches of earth. A small stick or label put where bulb is planted prevents damage to bulb while dormant.

OXALIS

Suitable for pots or hanging baskets for winter flowering. Very easily grown in the house. Their clove-shaped leaves are most attractive as well as the small cup-like blooms. They are excellent inexpensive small plants for decorating the home and growing on window sills.

Adenophylla

Doz. \$1.10, 25 \$1.95, 100 \$7.50

A lovely hardy species from China, forming small, compact rosettes of foliage and dainty small, lilac-pink flowers opening in the sun. Height 3 inches. Plant in the rock garden or grow in pots in the house from end of August to November. A rare hardy variety, easily grown.

Hirta

Doz. 85c, 25 \$1.60, 100 \$5.75

Produces dozens of pink, cup-shaped flowers at one time and is in bloom over long periods.

Bermuda Buttercup

Doz. 85c, 25 \$1.60, 100 \$5.75

Lovely yellow variety.

IXIA - Corn Lilies

Mixed

Doz. 75c, 25 \$1.35, 100 \$4.50

The colors run through all the shades of red, pink, yellow, bluish and pure white. These beautiful bulbs from the Cape Colony (South Africa) are far too little known; they should be planted in late autumn and in cold districts must be covered with a thick layer of straw or leaves. Splendid for southern states. Few bulbs are so lovely and graceful and those who live where the climate is mild should plant them freely.

SPARAXIS

Finest Mixed

Doz. 85c, 25 \$1.60, 100 \$5.75

Delightful spring blooming Cape bulbs of the Ixia group, their beautiful flowers being borne on graceful spikes about 6 to 8 inches high and the colors of the brightest and all shades. They are tigered, blotched, spotted, streaked and flushed, a complete riot of color. For the southern rock garden they are indispensable. Protect in cold climates.

CALOCHORTUS - Mariposa Tulips

Until one has seen a good collection of these plants, he has no idea how much Nature can do in the variation of one flower. One to many on a stem, wonderfully marked with eyes and dots, and penciling in rich colors, are characteristics. "Mariposa" is simply the Spanish word for butterfly, and is applied to these Tulips because the eyes and markings are so like those on a butterfly's wings.

Mixed Colors and Varieties

Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00

They grow from 1 to 2 feet high and branch. The flowers are simply marvelous in their variety of colors and markings. Scarcely two are alike; in a mixed lot they may vary through white, lilac to purple and again through shades of pink to claret-red. In any mixture whites, more or less eyed, predominate. There is no better investment for the flower lover than a quantity of these bulbs. They thrive best in a rather porous soil, either sandy or gritty, and grow either in sun or light shade. Flowers 2 to 4 inches in diameter.

RANUNCULUS

Their brilliant lovely globular-shaped flowers are splendid cut flowers and lovely at all times. May be left undisturbed for years. In the North, bulbs may be planted in April and May outdoors, will bloom in July.

Giant Wayside Hybrids

Six 65c, Doz. \$1.10, 25 \$1.95, 100 \$7.50

This new giant Ranunculus is far ahead of the common types. The perfectly double flowers are produced on tall, stout stems and appear in every conceivable shade and color. The blooms are many times larger. The color range is exquisite and the long stems make them superb for cutting.

Muscari - Grape Hyacinths

Muscari are charming spring-flowering subjects. They can grow under trees and shrubs, and also do well in full sun in the border or at a sunny spot of the rockery, without special attention. They are best planted immediately on receipt and can remain undisturbed for years. They are absolutely hardy and some varieties are delicately fragrant. Botryoides, Azureum and Armeniacum are beautiful when forced in the house, same culture as Freesias; while Plumosum is always a source of great interest. All are about five inches high.

Armeniacum (Early Giant)

Doz. 85c, 25 \$1.55, 100 \$5.50

Deep cobalt-blue flowers, producing many spikes with larger flowers than Heavenly Blue. Excellent for forcing and massing; wonderfully fragrant. While there are several kinds of Muscari we consider this variety the best for mass planting. Their flowers open just about the time that Crocuses are going. They do well in the wild garden and also in grass not too rank. They are nice under trees and along borders where they may be left undisturbed.

Azureum (Hyacinthus)

Doz. 90c, 25 \$1.65, 100 \$6.00

Bright blue, flowering in February; valuable early spring flowers, also fine for forcing in January.

Botryoides coeruleum

Doz. 85c, 25 \$1.60, 100 \$5.75

Bright blue, very free-flowering at the time of the Crocus. This is the common blue Grape Hyacinth and fine in the rockery. Foliage is more compact, is better for the rockery than Hyacinth Botryoides.

Botryoides album

Doz. 90c, 25 \$1.65, 100 \$6.00

This is the white form which is very pretty planted with the blue variety of this type.

Plumosum (Plume Hyacinth)

Six \$1.20, Doz. \$1.85, 25 \$3.35, 100 \$12.00

Bearing in May, handsome feathery plumes of violet colored flowers; very attractive. Height 7 inches. A most unusual and fascinating flower.

Mixed Varieties

Doz. \$1.15, 25 \$2.10, 100 \$7.75

This mixture contains some of all the varieties listed as well as other unusual species not generally offered. It will provide you with a most interesting, varied and colorful display of Grape Hyacinths. Left undisturbed they will increase rapidly and last practically forever.

Allium Giganteum

ALLIUM

Giganteum

Each \$3.00

Produces astonishingly large spherical umbels of 6 to 9 inches in diameter. They are composed of literally hundreds of small, star-shaped flowers of a radiant violet color. The rigid woody stems vary from 5 to 8 feet. Its excellent lasting qualities are unsurpassed, making it a superb cut flower. Give bulbs same treatment as Daffodils, plant 5 inches deep. They multiply rapidly and soon form a bold clump. Here is a most unusual and easily grown bulb flowering in July.

Moly (Luteum)

Doz. 70c, 25 \$1.30, 100 \$4.00

Umbels of brilliant golden yellow flowers on 12-inch stems. Due to its short stature there are few better bulbous plants for growing between Vinca, Pachysandra, or other low growing, ground covers. Allium Moly is hardy and multiplies rapidly, flowering in June.

GLORIOSA - Climbing Lily

Superba

Each 75c, Three \$2.00, Doz. \$7.50

A splendid low climber, easy to grow in the garden, it does well in sheltered spots out-of-doors. Grows 2 to 3 feet high, producing a dozen or more gorgeous Lily-like flowers which open a bright yellow and red, but change to a deep scarlet. In bloom through the summer and autumn months. Most unusual and rare garden bulbs. Store tubers in winter like Gladioli; may be used season after season. It may also be grown in a 4- or 5-inch pot in a cool greenhouse where it makes a beautiful show.

Gloriosa Superba

Scilla Sibirica (Siberian Squill)

Scilla Hispanica (Campanulata)

(Wood Hyacinths; Scotch Blue Bells)

They bloom at the same time as Tulips and are beautiful combined with them in a flower border. Very attractive flowers in shrubby borders, and most valuable for wild gardens and woodlands where they are easily naturalized. They may be planted in bare, shady places and odd corners which often have a desert-like appearance that can thus be rendered bright and cheerful. Require absolutely no care, multiply rapidly and when once planted last a lifetime.

Alba maxima

Large white flowers.

Doz. 90c, 25 \$1.65, 100 \$6.00

Donau

Rich pure blue flowers on fine, tall stems. We believe this to be the best of the pure, true blues. Multiplies very freely.

Doz. 90c, 25 \$1.65, 100 \$6.00

Myosotis (Forget-Me-Not)

Porcelain-blue, tall growing and very free flowering.

Doz. 90c, 25 \$1.65, 100 \$6.00

Excelsior

Large bells, deep blue, very fine, tall and large spikes.

Doz. 90c, 25 \$1.65, 100 \$6.00

Rose Beauty

Deep pink, beautiful large spikes. One of the best.

Doz. 90c, 25 \$1.65, 100 \$6.00

Hispanica, Mixed Varieties

This mixture is carefully made of the best kinds. It contains some bulbs of all the varieties offered including the newest improvements. For mass plantings and colorful effects there is nothing better. They are happy in shade as well as in full sun; they increase at an amazing rate and will last forever, providing you with fine, inexpensive cut flowers as well as giving color where it is difficult to grow anything else.

Doz. 90c, 25 \$1.65, 100 \$6.00

Ranunculus, Giant Wayside Hybrids
(See page 21)

Scilla - Squill

The rich dark blue of *Scilla bifolia* and the bright blue of *Scilla sibirica* in early spring render them invaluable for edgings or for massing in flower beds and borders. As they bloom so early, it is advisable to give them a sunny location. They are not particular about the soil in which they grow. They are ideal for the wild garden but they are not to be despised in the border, especially if they are left alone for two or three years without being disturbed in any way. They are splendid in the rock garden. Never plant less than 12 to 18 bulbs in a clump.

Bifolia

This species flowers in March with deep gentian-blue flowers. They are very beautiful in combination with the early flowering *Eranthis*, *Snowdrops*, etc.

Doz. 90c, 25 \$1.65, 100 \$6.00

Sibirica (Siberian Squill)

Earliest to flower, connecting the flowering of the *Crocuses* with the *Narcissi*. Fine for naturalizing, producing drooping, bell-like flowers on stems 3 to 4 inches high. Succeeds well in the rock garden. Color bright blue. Plant 3 inches deep in shade, half shade or full sun. Giant bulbs are offered.

Doz. \$1.15, 25 \$2.10, 100 \$7.75

Sibirica alba

Pure white form of *Sibirica*.

Doz. \$1.10, 25 \$1.85, 100 \$7.25

SCILLA HISPANICA (Wood Hyacinth)

Alba Maxima

Excelsior

Wayside Gardens Special Tulip Mixture

HARMONIOUS COLORS AND LONG STEMS

This Famous Mixture of Tulips Contains Only the Best Varieties Carefully Hand Mixed

So that you may be able to have a great abundance of the choicest Tulip flowers in your garden at the lowest possible price in keeping with tip top quality, we arrange with our Holland grower to set aside for us several thousand of top size Tulip bulbs of the choicest kinds. These hundreds of kinds are then blended into the famous Wayside Gardens Mixture of Tulips. Into this mixture go Cottage Tulips, Darwin Tulips, Ideal Tulips, Giant and Standard Breeder Tulips, as well as Multi-flowered, Lily-flowered and Chameleon Tulips.

Colors are carefully selected and properly proportioned and the result is a riot of color of the loveliest shades, as well as a complete record of shapes and forms. This method of selling Tulip bulbs is the least expensive. If you are not particularly interested in specific varieties, but want something of everything, here is your best way of obtaining what you want. Once more extreme care is taken in mixing. For sheer beauty and gorgeous riot of color, the Wayside Gardens Tulip Mixture cannot be duplicated anywhere at double the price we ask.

Ideal Darwin, Breeder and Cottage Tulips

Recent Introductions—All Superb Varieties

We can unhesitatingly say that any and all are "tops" in color and quality as well as most desirable for our climate. The flowers last longer and are better in every respect.

They are superb and surprising in quality of bloom as well as vigor of growth. There is no doubt that these new varieties as well as many others listed in this catalog will be the popular leaders as soon as they are generally available, just as today, Glacier and Niphotos are in general demand and recognized as the best in Tulips. All of these were introduced by Wayside Gardens some years ago.

Abraham Lincoln

For a number of years, American visitors to the Grullemans Bulb Nurseries have consistently picked one variety which appealed to them more than any other. It is outstanding and a magnificent flower. When last spring, a group of visitors was told it would be introduced next year in America, one suggested it be named Abraham Lincoln as he said—a great Tulip named for a "great man." The color is bright crimson-maroon, outer petals shaded somewhat darker, close to chestnut-red, base dark blue. The flower is larger than usual and of excellent substance. Height 29 inches. Unquestionably, the finest Tulip in the deep red shades.

Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00

Annie Speelman

A tremendous white Tulip with white base and anthers. The flower is oval-shaped and of remarkable texture. A beautiful garden Tulip of great substance. Will last from two to three weeks, when cut the flower does not open too wide when placed in a warm room. Straight, stiff stem. Height 30 inches.

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Atlantic

The form and habit of this variety are perfect. A Tulip of no mean qualities and of rare beauty. For three years in our trial garden it has been greatly admired. The cup-shaped flower is of good size and of the richest and most brilliant intense deep purple which shines when the sun strikes. The anthers are pitch-black and the base of deepest blue. A gorgeous Tulip on a 29-inch stem. Plant it together with Ideal Darwin Glacier, for stunning effect.

Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Bonnie Lassie

A rather long white flower the petals of which have a distinct reddish pink margin. There are very few tulips which have this lovely picotee look. Stem is stiff, about 26 inches high, flower most attractive and distinct. One of the outstanding new tulips.

Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00

Chinese Bandit

Immense oval-shaped flower, Chinese red with considerable shading of warm, bronzy orange. The inside of the flower is bright and has a vivid yellow base. Fine, old, striking flower, stem not too tall, about 25 inches. We believe this to be the largest Tulip flower ever raised. It makes a tremendous show in the garden and in addition has remarkable lasting qualities. Looks at its best in front of a dark green background and would be superb in mass plantings.

Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Clara Butt

Lovely old time pure pink Tulip that should be in quantity in every garden. In some lights elusive salmon suffusions in this fine flower add to the interest of the beautiful blossoms. Height 30 inches.

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.75

Crimson Giant

This magnificent new deep crimson-red Tulip will in time replace all other kinds of similar color. It produces an immense flower of deep crimson-red. Many of our friends who have seen it agree with us that it is better, bigger and stronger, and darker, and better in color than City of Haarlem. Crimson Giant is particularly fine if flowering next to a pure white Tulip such as Glacier. Here is a magnificent new dark red Tulip which we recommend without any reservations.

Six \$1.25, Doz. \$2.00, 25 \$3.50, 100 \$12.50

Djinge Chan

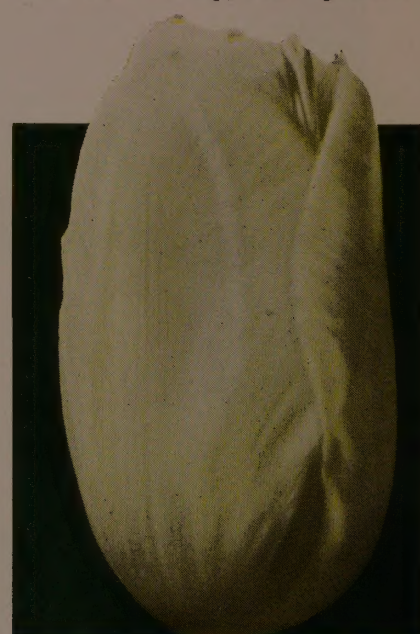

Without doubt this is the stateliest of the violet Tulips. Nothing so far equals it. The color is pure deep purple-violet nearly black at edges of petals and vibrates with life. The substance of the bloom is unusual. Height 30 inches.

Six \$1.40, Doz. \$2.45, 25 \$4.45, 100 \$15.75

Ideal Darwin Tulip, Golden Spike

Ideal Darwin Tulip, Annie Speelman

Giant Breeder Tulip, Chinese Bandit

Giant Breeder Tulip, Don Alma

**Bonnie
Lassie**

Don Alma

Unique pointed flower of a dull golden brown with lavender bloom. Much lighter towards base with narrow margin of tan. Inside coffee-brown with soft buff shading. An outstanding combination of colors and a rare quality. This variety was very much admired by visitors and in our opinion is a very choice Tulip which will be planted in great numbers in years to come. Height 27 inches.

Six \$1.40, Doz. \$2.45, 25 \$4.45, 100 \$15.75

Drifted Snow

This magnificent white flower is without question the finest pure white Tulip in existence. The perfectly shaped flower has tremendous substance and grows on a rigid stiff stem 30 inches or more tall. There is nothing to equal this variety. A superb Ideal Darwin.

Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00

Edna Bonner

Magnificent, large, egg-shaped flower of uniform pink. Tall, strong stem; great substance, one of the new outstanding varieties. This will in time be grown in every garden.

Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00

Glacier

A giant among pure white Tulips white base and white anthers. Tremendous oval-shaped flower of great substance, will last three weeks in the garden or when cut. We do not know of another Tulip its size, some of the flower petals measuring six inches in length. This Tulip is a gem in any collection. Sturdy straight stems. Highly recommended. Height 30 inches.

Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Golden Spike

This is referred to frequently as the King of Yellow Tulips. A long, substantial flower. The slightly recurving petals give it a classic design. Color pure chrome-yellow; stem stiff and strong, about 28 inches tall. There just isn't anything better.

Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00

Grand Canyon

A beautiful sunflower yellow Tulip. Petals somewhat fringed on the edges. Long flower of exceptional substance. Outer petals are slightly reflexed, giving the flower a lot of grace and style.

Six \$1.45, Doz. \$2.50, 25 \$4.65, 100 \$17.00

Guido Gezelle

Uniform glowing raspberry, outer petals are recurved which makes the flower very attractive as well as most distinct in color, one of the best new Tulips.

Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50

Lady Sylvia

The color of this Tulip is beautiful. The flower is of perfect shape and has exceptional lasting qualities. A soft glistening pink, somewhat lighter at edges of petals. Should be used for the show garden. A tulip with a great future and one of the loveliest pink tulips in existence. Height 28 inches.

Six \$2.25, Doz. \$4.10, 25 \$7.50, 100 \$26.00

Lipstick

A handsome cup-shaped vermillion-red flower. The coloring in this variety is superb and unusually clean; sparkling and brilliant yellow base and yellow anthers have added brilliance, particularly when the flowers are opened in sunlight. Stem stiff and wiry giving a most graceful effect. We consider this one of the finest among light red Tulips. Height about 28 inches.

Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00

Maureen

A lovely pure white Darwin Tulip; flowers are large and of great substance with pure white center, light sulphur-yellow anthers and stiff stem. One of the best white Darwin. Height 27 inches.

Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00

Mellow Moon

Wonderful and unusual vase-shaped flower. Bright yellow outside, lemon-yellow inside. Long pointed petals, outer petals lightly reflexed. Tall, strong stems. A top variety.

Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Mrs. John T. Scheepers

Elegantly formed, oval shaped, large flowers of deep golden yellow, very clear of color, are carried on tall, thick, sturdy stems with clear green foliage. The entire plant is of the strongest development. The blooms are enormous with petals of unsurpassed substance and of fine lasting quality. A real giant. This magnificent variety is recognized by experts as one that especially fits the American climate. Awarded highest honors whenever exhibited.

Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00

Niphetos

A glorious soft yellow flower with lighter base and anthers of perfect Ideal Darwin form; the reflexing petals are of a remarkable texture, and have, therefore, lasting qualities. The flower is carried on a strong erect stem. It is far superior to any Tulip in this color, and the most beautiful in our collection. Highly recommended. Height 29 inches. Acclaimed as the handsomest Tulip grown.

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.75

Pride of Zwanenburg

This variety appears to be the finest rose-colored Tulip in existence. The color is pure and radiant. The flower is huge, of beautiful form and long lasting; very tall, straight stem. A truly superb Tulip. Height 32 inches.

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Queen of Spain

A charming cream-colored flower delicately flamed and feathered with pink and light rose. There is no other Tulip which can compare with this lovely variety. Flowers have excellent substance; stem strong and wiry. Truly a rare beauty. Height 25 inches.

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Rosy O'Day

A rare and delightful shade of palest blush of lilac-rose on white background. Cup-shaped flowers of great substance. Height 28 inches. A cheerful color and very outstanding in the garden. A color effect very hard to cover in an illustration.

Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00

Scotch Lassie

Purest deep lavender with darker shade inside and with dark blue base. This variety is far superior to the well known Melicette or any other kind in this color, larger and far more substantial flower, slightly reflexing. Will last three to four weeks either in the garden or when cut. Among the best lavender Tulips in our collection. Height 26 inches.

Six \$1.25, Doz. \$2.00, 25 \$3.50, 100 \$12.50

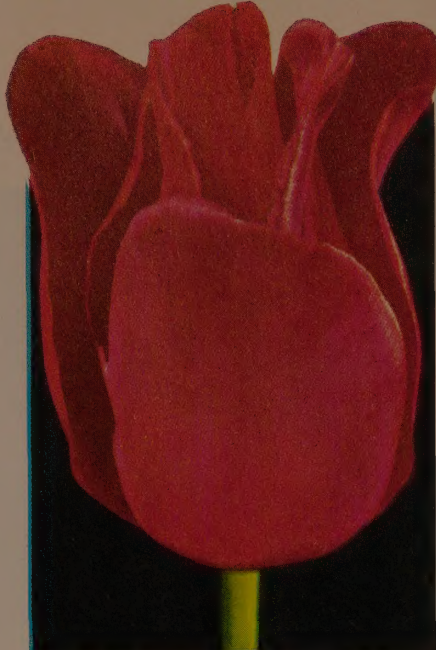

William Tell

A deeper edition of Clara Butt. Uniform color and pure raspberry-rose with slightly paler flush on edge of petals, rich rose-pink inside; long, stiff stem. Center white, black anthers. We consider this the finest rose-pink novelty in existence. It is a much improved Clara Butt and will be as popular and used in as great quantities as Clara Butt was when the bulbs are more plentiful and available. Height 26 inches.

Six \$1.40, Doz. \$2.50, 25 \$4.55, 100 \$16.25

Ideal Darwin and Darwin Tulips in Mixed Colors

We take great pride in this special mixture made from Ideal Darwin and Darwin Tulips. We have offered it for several years and many are the letters from customers telling us how they have enjoyed the flowers produced from these bulbs. Only the finest and newest kinds are used. All colors and shades are carefully proportioned and blended so as to create the most colorful and cheerful effect possible. If you are not very particular as to any specific variety but just want the best and clearest, largest blooms we suggest you plant a goodly quantity of these and you will be well repaid for your efforts and money spent.

COLLECTION 50 Tulips in 5 Distinct Varieties OUR Selection \$8.00

Bulbs will be packed in separate packages each one with the name of the variety it contains. Colors will be distinct. Top grade size bulbs. This offer is made in answer to the many requests we receive each season. Your money back if you are not satisfied with our selection at blooming time.

Tulipa Grullemansi

The result of crossing *Kaufmanniana* with a Darwin Tulip. The flowers are long and large, and carried on stout stems holding the blossoms boldly upright. All are of remarkably robust habit, resisting disease or all sorts of ailments. Their coloring is unique and most attractive, *Inga Hume* being greatly admired at London, Paris, and Berlin Flower Shows. Easily grown and tremendously long lasting. In the garden they will outlast any Tulip in existence. The bulbs multiply rapidly. May we suggest you plant a few this fall.

Inga Hume

Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Inside deep yellow slightly sprayed red, outside red with broad, shapely lined yellow edge, large black base, perfectly formed large flower on erect stem, very fine variety. Highly recommended for forcing, it will outlast any other Tulip and becomes more beautiful as the flower ages. Height 24 inches.

Golden Nugget

Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50

A bold, strong and exceedingly long lasting flower which is golden yellow edged on soft reddish salmon petal faintly sprayed with red on the outside of the petal; inside deep yellow, the center is vivid black. Darker and more vivid than *Inga Hume*. Height about 26 inches.

Tulipa Sylvestris

Tulip Species and Hybrid Species

Particularly valuable because they are permanent. Once planted they need no further care and come up every year.

Tulip species, coming as they do from southern Europe and Asia, should be planted in dry, sunny locations.

The following collection of Tulip Species or Botanical Tulips includes a great number of beautiful and interesting varieties, which show a bewildering variation of size and shape of flowers, structure of the leaves, habits, etc., and they only have in common that they grow wild in some part of the world, Asia Minor, Central Asia, Greece, the Mediterranean, etc. Cultivation has not modified them and they may be planted in the rock garden between creeping plants or in colonies in small, warm nooks where they will come up year after year without any care.

Acuminata (Cornuta stenopetala, (Chinensis)

Three 60c, Six \$1.10, Doz. \$1.85, 25 \$3.30

The long, very narrow tapering petals end almost in a thread-like point. One of the most unusual and distinct species. The long flower is yellow streaked with orange-red. Height 10 inches.

Batalini

Three \$1.40, Six \$2.70, Doz. \$4.85, 25 \$9.25

Soft chrome-yellow with deeper yellow center. Flowers in April with three or more flowers to each bulb. Height 4 inches.

Biflora

Three 55c, Six \$1.00, Doz. \$1.65, 25 \$2.95

This species is a native from the Altai Mountains and does not grow over 5 inches tall. The short stem is crowned with a cluster of several small, dainty white flowers. A charming variety for the rock garden.

Chrysantha

Three 45c, Six 75c, Doz. \$1.35, 25 \$2.55

Small flowers on slender stems, yellow exterior of petals often flushed with copper-red, very charming. Height 6 inches.

Clusiana

Three 75c, Six \$1.35, Doz. \$2.25, 25 \$4.00

A charming species, known as the Lady Tulip. Small flower on 14-inch stem, white; exterior crimson, dark blue base; very fine for cutting.

Dasystemon

Three 95c, Six \$1.75, Doz. \$3.00, 25 \$5.50

A dwarf growing species, white flowers with bright yellow eye. Usually blooms with 3 to 5 flowers on a stalk. Height 5 inches.

Eichleri

Three 60c, Six \$1.10, Doz. \$1.85, 25 \$3.30

Splendid large crimson-scarlet flowers, yellow and black center, effective in the flower border of rock garden. Height 10 inches.

Kaufmanniana

Three 75c, Six \$1.35, Doz. \$2.25, 25 \$4.00

A charming very early flowering species Tulip which is often called the Waterlily Tulip because when the flowers open wide, which they do every day, they remind one of a Waterlily. The flowers are soft pale yellow inside with white outside edge and salmon-pink outside petal on 4- to 6-inch stems. Foliage is dark green with handsome brown veins and stripes. A perfect background for a lovely flower. Kaufmanniana naturalizes freely, plant it in colonies of six or more close together for best effect.

Kolpakowskyana

Three 75c, Six \$1.40, Doz. \$2.50, 25 \$4.55

Yellow, outside scarlet striped. A beautiful species carrying its flowers on slender stems. Height 14 inches.

Linifolia

Three 75c, Six \$1.40, Doz. \$2.45, 25 \$4.45

Charming for the rock garden. Narrow undulated leaves, small brilliant scarlet-vermilion flowers with black base. Height 6 inches.

Marjoletti

Three 45c, Six 75c, Doz. \$1.35, 25 \$2.55

A very pale yellow, exterior edge of petals rosy red, very charming in the rockery. Height 16 inches.

Persica (Breyniana)

Three \$1.55, Six \$3.00, Doz. \$5.75, 25 \$10.75

Yellow, outside bronze, dwarf and late. Two or three flowers on one stem. Height 3 inches.

Praestans

Three 75c, Six \$1.35, Doz. \$2.30, 25 \$4.20

A fine tall growing species, several scarlet flowers to each stem. Height 9 inches.

Pulchella Violacea

Three \$1.40, Six \$2.70, Doz. \$4.85, 25 \$9.25

A very unusual species, olive-green leaves tipped purplish red. Stem about 3 to 4 inches long; flowers are peculiar in shape with narrow funnel-like base then becoming globe-shaped, often two flowers on a stem. Violet-red with black outside base, inside olive-green. A rare and colorful species.

Rockery Beauty

Three 75c, Six \$1.35, Doz. \$2.30, 25 \$4.20

One of the earliest of Hybrid Species Tulips to bloom. The intensely brilliant vermilion-red flowers last a long time and surely "set the garden on fire." Height only 8 inches, and therefore quite a favorite in Europe in the rock gardens.

Saxatilis

Three 75c, Six \$1.40, Doz. \$2.50, 25 \$4.55

Very rare, bearing often two lilac flowers with yellow center on each stem. Should be planted in a sheltered position as the leaves appear early. Height 7 inches.

Sylvestris (Florentina Odorata)

Three 80c, Six \$1.45, Doz. \$2.60, 25 \$4.75

Small flowers golden yellow, usually in pairs and nodding, fragrant, recommended for wild gardening. Height 10 inches.

Turkestanica

Three 60c, Six \$1.10, Doz. \$1.85, 25 \$3.30

Miniature Tulip, many flowered, white, yellow center. A lovely rock garden subject. Height 5 inches.

Mixed Tulip Species

Six \$1.25, Doz. \$2.00, 25 \$3.50, 100 \$12.50

An attractive mixture of the various species listed. A dozen or more planted in a small group provides a lot of interest and charm.

Tulipa Fosteriana Hybrids

Giant Flowered Forms of Tulipa Fosteriana

Albas

Three \$1.30, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00

Immense ivory-white flower. Each of the outer petals is broadly marked with a pale carmine line which runs through the center of the petals. Long lasting, in size it resembles Red Emperor but the flower has much more substance.

Red Emperor

Three 75c, Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Magnificent variety, large, rounded, vermilion-scarlet petals, handsome black, yellow bordered base. Height 18 inches. A veritable giant! This is the true giant early flowering kind and not something like it.

Tulipa Kaufmanniana Variations

One of the most charming Tulip Species is Tulipa Kaufmanniana. Blooming long ahead of other Tulips on short stems with its wide open flowers exposed to the sun, gives it a charm all its own. Last but not least it is one of the most permanent Tulips, coming up year after year without any care. No question but what the lovely variations offered here will be even more popular. All have the same characteristics as the original species; they differ only in color and size.

Gaiety

Three 70c, Six \$1.30, Doz. \$2.15, 25 \$3.75

White inside, outside striped dull red. Exceedingly dwarf, flowers seem to rest on the foliage.

Shakespeare

Three 75c, Six \$1.40, Doz. \$2.50, 25 \$4.55

Apricot-orange with sparkling yellow center.

Stresa

Three 75c, Six \$1.40, Doz. \$2.50, 25 \$4.55

Golden yellow inside, outer petals marked brilliant red with red and black center.

Vivaldi

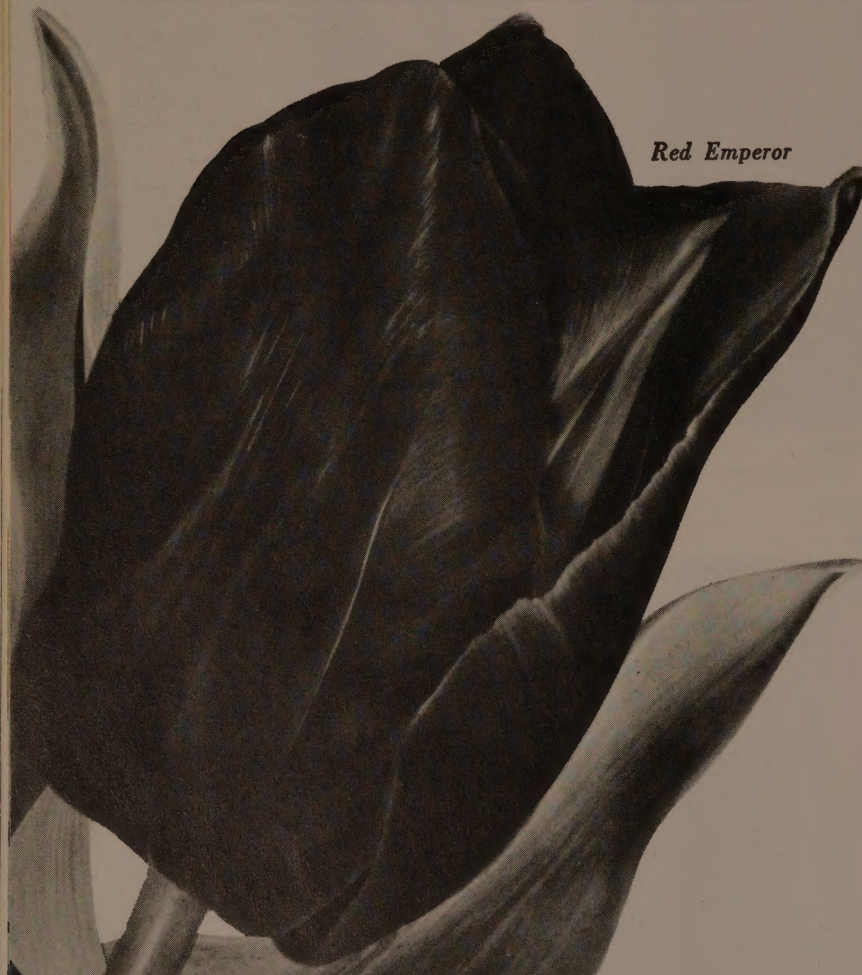

Three \$1.10, Six \$2.10, Doz. \$3.65, 25 \$6.65

Creamy yellow with crimson blotch on outer petals. Crimson ring in center of flower. The effect is quite unusual. A good strong grower.

Kaufmanniana Hybrid Mixture

Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00

Contains all varieties listed as well as several more. Here is something that will give you an attractive small patch of color long before your other Tulips come into bloom.

Red Emperor

Single Early Tulips

Few, if any, of the spring-flowering flowers rival the Single Early Tulips for brilliancy of bloom or ease of culture. They are excellent subjects for formal beds on the lawn or for garden borders. While they do not possess the same size of bloom and length of stem as the May-Flowering Darwin, Breeder, and Cottage varieties, they are used where earlier blooms are desired. All of the varieties may be forced into bloom in January, while all of them may be easily had in flower pots late in February or early March.

Brilliant Star Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00
Bright vermilion-scarlet, same color as Vermilion Brilliant, but larger and of great substance. Splendid early forcer, flowering easily for Christmas.

Couleur Cardinal Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50
Brilliant crimson-scarlet with a deeper tone or bloom on the outer petals. A bed planted wholly of this variety is a grand sight. Fine for midseason forcing.

De Wet Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
Golden yellow flushed deep orange; large, sweet-scented flower of erect habit. Quite different in color from any other variety.

Diana Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
Large, long, snowy white flowers of splendid shape. The finest white for bedding, and superb for pots or pans.

Keizerskroon Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50
Brilliant crimson-scarlet edged clear, rich yellow; excellent, large flower on long stem. Fine bedder; splendid for forcing.

Pink Beauty Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00
Bright cherry-rose, center of petals striped white. It has no equal as a bedder, for the stem is strong and the white center of the big, fleshy petals shows very conspicuously against the broad, vivid rose edges.

Rising Sun Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
A variety used for exhibition on account of its pure yellow color and wonderful size and substance. The finest golden yellow Early Tulip introduced to date.

Rose Luisante Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
Large, brilliant, deep rose-pink flower. Splendid for bedding or pots.

Super Single Mixed Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50
This is our own special mixture which we recommend where the best results are desired in beds of mixed colors. This mixture is made up of hundreds of named sorts and in equal proportions of each variety.

Double Early Tulips

Double Tulips are chiefly grown for their show effects in masses and are very lasting. Where a display of color is desired they are very satisfactory. Excellent for growing in pots or pans.

The following list contains the worth-while sorts.

Marechal Niel Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
A bright orange-yellow Tulip of great beauty and substance; its color resembles that of the famous Marechal Niel Rose. The best in this color for forcing.

Mr. Van der Hoef Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
A yellow sport of Murillo with its superb qualities. One of the very finest of the primrose-yellow, Double Tulips. A very lovely flower.

Murillo Maximus Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
Delicate rose-pink, flushed white. Fine for bedding, and excellent for forcing.

Peach Blossom Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
Bright rose-pink, flushed white, deepening with age to carmine-rose; large. Excellent for pots.

Scarlet Cardinal Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
Excellent scarlet for bedding and forcing. The best of the double red varieties.

Schoonoord Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
A beautiful, pure white sport of Murillo, with the same excellent forcing qualities. One of the best double white varieties, if not the best.

Mixed Double Tulips Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50
This is our own special mixture which we recommend where the best results are desired in beds of mixed colors. Made up of the best named sorts and in equal proportions of each variety.

Chinese Lantern Tulips

The general effect is that of lighted delicately colored Chinese Lanterns. The perfectly formed globular blossoms glow with an iridescent light not heretofore seen in Tulips. The colors are too exquisite to accurately describe. They have been admired by visiting growers from all over Europe.

Good Gracious Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00
Brilliant salmon outside, inside of cup is translucent salmon-pink of great beauty. Height 25 inches. One of the loveliest of Tulips.

Lily-Flowering Tulips

The Tulips offered under this heading have been kept by themselves because of their distinct Lily-like flowers. They really belong with the Cottage Tulips but would be lost or difficult to find if offered in that already quite large group.

Lily-flowered Tulips bloom the same time as the Cottage Tulips, and are best used where a light, airy, and graceful effect is desired. The delicately curved petals give a delightful effect. As a flower for cutting, it surpasses the regular Tulips because they are so much more graceful. Don't miss planting a few this year. The best varieties in existence are offered here.

Astor Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50
A delightful salmon and rose tinted flower with soft buff-pink shadings. The gracefully pointed petals create a delicately formed flower. The stem is about 26 inches high.

Crabeth Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00
Beautifully vase-shaped, flower bright rose-pink somewhat paler at edge of petal. This is an outstanding and fine variety.

Golden Duchess Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50
Large, long-pointed flower with golden yellow reflexing petals on stiff stem. We believe this to be the best of the Lily-Flowered Tulips in this color; not overly tall, 23 inches.

Golden Orb Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00
Brilliant buttercup-yellow, Lily-shaped flowers on strong stems makes this probably the best of the bright yellows. A stately flower which never fails to please.

Queen of Sheba Six \$1.45, Doz. \$2.50, 25 \$4.65, 100 \$17.00
Handsome Lily-shaped flower on 27 inch rugged stem; color bright shiny chestnut-red with narrow golden ochre edge along the curving petals. One of the outstanding Lily-flowered Tulips.

Sidonie Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00
The flower is perfectly shaped and of the most unusual Bordeaux-wine-red shade with a rich undertone of purple which becomes more pronounced as the flower ages. Grows about 21 inches tall.

Spitfire Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50
Without doubt the finest of the red Lily-Flowering Tulips. Large, long, handsomely vase-shaped flower with sharply pointed petals. Color brilliant scarlet and very long lasting. It is superb as a cut flower and most attractive and showy in the garden where it will outlast most other Tulips. Height about 26 in.

White Triumph Six \$1.30, Doz. \$2.15, 25 \$3.85, 100 \$13.25
Pure alabaster-white, large flower, nicely reflexing petals. Without any question this is one of the best pure white Lily-Flowering Tulips.

Yankee Girl Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
A glorious Tulip of a salmon-buff color. The flower petals are strongly reflexed and curled in a half-circle. The only Lily-Flowered Tulip of this shape. Standing up straight, petals are very thick and it has better lasting qualities than any other. Height 24 inches.

Lily-Flowering in Mixed Colors

Six \$1.30, Doz. \$2.15, 25 \$3.85, 100 \$13.25
This is a mixture containing the above varieties as well as several more which could not be offered for lack of space. You will find the Lily-Flowered Tulips charming for cutting as well as for garden display.

Collection of Lily-Flowered Tulips

Nine distinct named varieties listed above. All bulbs will be carefully labeled.

27 Bulbs, 3 of each kind.....\$ 5.50
54 Bulbs, 6 of each kind..... 10.00

Lily-Flowered Tulip

Parrot Tulips

You will enjoy some of these new quaintly shaped flowers, particularly for house decoration. They are stunning in clumps here and there in the border, in front of shrubs or groups of evergreens. Their artistic form and coloring make them especially suitable for cut-flower purposes. Fantasy is recommended for pot culture also. Forced slowly, in not too high a temperature, it develops into one of the most unusual Orchid-like flowers you have ever seen.

Blue Parrot Six \$1.35, Doz. \$2.25, 25 \$4.10, 100 \$14.50
A glorious Parrot Tulip of bright violet shaded steel-blue. The unusual flower is large and carried erect on a strong, 30-inch stem. A rare novelty.

Doorman Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50
An outstanding Tulip. Large solid bold cherry-red flower edged golden yellow on a stiff stem. The lacinated petals with their curious excrescences of red and yellow make a flower of great curiosity.

Fantasy Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
The flowers are of unusual and beautiful form, the petals being lacinated, having curious excrescences on the outside. It is not only the rare form of this Tulip or its main color, which is a soft rose-pink; the shadings of the cup are a deep velvety rose color which is more sumptuous than words can tell.

Orange Favorite Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.75
Glistening deep orange, shaded rose, inside deep orange-scarlet with yellow base, sweet scented flower of great size and brilliant coloring. Height 23 inches.

Texas Gold Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00
A bright, clear, golden yellow flower of excellent substance is carried on a stiff stem about 24 inches tall. Texas Gold is much superior to Sunshine which we have discontinued.

The Black Parrot Six \$1.35, Doz. \$2.25, 25 \$4.10, 100 \$14.50
The deep purple-black color of this Parrot is so unique and outstanding it never fails to be admired. Wayside was the first to introduce this into American gardens several years ago yet each season customers request more of them. As a cut flower, they are quite fantastic.

Therese Six \$1.40, Doz. \$2.50, 25 \$4.55, 100 \$16.25
Bright cochineal-red with green markings on outside. Inside of flower is a vivid scarlet with white center tinted blue. This variety is the Parrot form of Darwin Tulip. Farncombe Sanders. A brilliant and most interesting Parrot Tulip. Height 30 inches. The best by far of the red Parrot Tulips.

White Parrot Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00
A large pure white, distinctly flaked with green. The finest of the white Parrot Tulips. This variety is especially choice for cutting. A few flowers in a white vase create a marvelous effect.

Mixed Colors Doz. \$2.30, 25 \$4.20, 100 \$15.00
This is a well proportioned mixture including all the varieties listed above. It will make an interesting display of odd shapes, forms and colors.

12 bulbs each of the 8 named varieties listed for..... 18.00
All varieties will be packed separately
and will be carefully labeled.

Multi-Flowered Tulips

Bunch-flowering or Multi-flowered Tulips are a most interesting lot. Instead of producing the conventional single stem with one bloom on top, the varieties offered under this heading all grow a strong main stem with from three to six branches half way up the stem, each side shoot or branch carrying its own flower. The result is that three to six, or sometimes eight, flowers are obtained from one bulb on one stem. All the blooms are of good size, are gracefully spaced and as you can well imagine, produce an unusual and great mass of color.

Bo-Peep Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00
The center bloom is quite large and surrounded by four or five smaller ones. The creamy white blooms are lemon-yellow inside with a bold ochre-yellow center. Makes a wonderful show when fully open.

Odetta Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50
A cluster of charming sulphur-yellow flowers, each bloom having a dainty red margin all on a stiff rigid stem. A few bulbs produce a bouquet of flowers.

Rose Mist Six \$1.45, Doz. \$2.50, 25 \$4.65, 100 \$17.00
A lovely pink-colored variety with five to six flowers open at the same time. We highly recommend this variety as it is without question one of the best pinks. Height 26 inches.

Royal Command Six \$2.25, Doz. \$4.10, 25 \$7.50, 100 \$26.00
Bright lacquer-red blooms which are lighter red inside with blackish blue center edged white. The flower cluster is most effective and unusual especially when flowers are fully open. The separate blooms are all of good large size.

Wallflower Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50
Shiny wallflower-red, interior clear yellow. Of vigorous growth; tall straight stem with five or more good sized flowers. A favorite in all trial gardens in America. Highly recommended. Height 27 inches.

Multi-Flowered Tulips in Mixture Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50
There are several more varieties of bunch-flowered Tulips available in Holland. We, however, list only the five most popular because of their unusual colors. This mixture contains the kinds offered as well as several others in many shades.

Green Tulips

Artist Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00
A most unusual Cottage Tulip. The outer petals are a combination of purple, salmon-rose with green markings. Inside of flower is bright salmon-rose with green, petals are pointed, grows 20 inches high, a very unusual and artistic flower.

Palestrina Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50
An interesting flower of salmon-pink with green veining. As the flower ages the green finally disappears and becomes entirely salmon-pink. Center of bloom light salmon, stamens yellow. Height about 20 inches.

Viridiflora Six \$2.25, Doz. \$4.10, 25 \$7.50, 100 \$26.00
Well formed wide opening flower with pointed petals of a soft pale green edged creamy yellow. A charming variety of extraordinary coloring. An artistic Tulip for garden as well as cutting.

Peony-Flowered Tulips

(Double Cottage Tulips)

These flower at the same time as the Cottage Tulips. They are thankful for a little shading against hot midday sun which will help them to carry their heavy Peony-like blossoms erect.

Blue Dream Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00
Large, violet-purple Tulip flowering later than any other double sorts. It is very fine for indoor decoration and for the garden. Height 18 inches.

Clara Carder Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50
A fine, big bold flower, fully double, of richest Tyrian purple. It is considered one of the best in this group and certainly the best in this color.

Eros Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50
Very large flower of clear old rose. A very interesting Tulip, as the flower resembles a Peony flower very closely. One of the best doubles for the American garden as the flower has fine substance. Height 20 inches.

Lilac Perfection Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50
Pure lilac, large, full double flowers. Good substance, strong stem. Considered the best double in this color.

Lion d'Or Six \$1.45, Doz. \$2.50, 25 \$4.65, 100 \$17.00
18 inches. The finest double yellow ever introduced, of a lovely deep yellow color, exquisitely formed blossom. A flower of unusual symmetrical perfection.

Mount Tacoma Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50
A magnificent giant double white Tulip which reminds one of a Peony in full bloom, superb for beds.

Symphonia Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.00
A magnificent crimson-red Peony-flowered Tulip. It really is a "sport" of Eros. It has the same form and habit as Eros but as stated before, it is of brightest crimson-red. Makes a bold show in the garden.

Peony-Flowering in Mixed Colors Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50
This mixture contains not only the varieties offered but also several other kinds which we do not list. For a riot of color this will answer the purpose splendidly.

RARE BEARDED TULIP

The Skipper

The vigorous plant has a large goblet-shaped flower, which possesses a most artistic blending of tones of indescribable beauty, pleasantly scented. Dark bluish violet with tawny margin flushed golden brown and dull blue base with yellow star shaded bronze. To the above add the daintily lacinated edge on the petals and you have one of the most beautiful and rare flowers.

Wayside's Special Daffodil Mixture

In this mixture you are offered an extremely fine selection of Daffodils in the widest possible range of colors and types. Dainty clusters of fragrant Poetaz varieties, popular large trumpet sorts, and the spectacular new giant "**Weather-Proof**" Daffodils are included.

Three of the world's leading Daffodil growers turn over their entire crop of superior seedling Daffodils exclusively to WAYSIDE. In their constant striving for still greater perfection, our growers subject seedlings to a rigorous process of elimination and destroy all undesirable seedlings. The better ones are tested for two or three years when a few of the very best are selected and set aside for continued growing. These outstanding specimens are ultimately introduced as named varieties when sufficient quantities become available. **THE ENTIRE BALANCE GOES INTO OUR SPECIAL MIXTURE. NO MATTER HOW FINE.** As a result, you will find flowers in this mixture that differ but slightly from catalog varieties selling for \$3.00 each or more.

Note: In order to maintain all the characteristics of a specific variety (stamina, color, shape and size of bloom), propagation must be made from bulblets of the parent plant. However, when developing new strains, hybridization is from seed. Bulbs grown from seed are called seedlings notwithstanding the fact that they have been grown for several years and are actually fully developed bulbs.

Through the selection of early, medium and late flowering kinds in proper proportions, the longest possible period of bloom is assured. With each passing year, you will enjoy an ever-increasing number of flowers because we have carefully selected types which will multiply in numbers as well as beauty.

With this definite purpose in mind, we have spared no effort to make this a truly wonderful mixture of worth-while Daffodils. It is decidedly not a "catch-as-catch-can" sort of thing with everything in it a grower wants to get rid of at any price.

SPECIAL DAFFODIL MIXTURE

This Special Mixture is one of our most popular offerings. Many, many letters are received with glowing praise for the gorgeous flowers produced by these superior bulbs. Since all of these fine, early, spring-flowering bulbs are a rare value of definitely high quality, plant them freely and enjoy their carefree loveliness every spring.

Champagne

Pink Glory

Pink Trumpet Daffodils

One of the most remarkable facts is that it is not uncommon to count 20 to 30 perfect blooms on 6 bulbs, the second year after planting. Their rapidity of increase and blooming is truly surprising. They require no frequent transplanting or dividing and are perfect for planting in drifts or naturalizing. The masses of flowers produced over the years is astounding.

Champagne Each 50c, Six \$2.40, Doz. \$4.25, 25 \$7.75, 100 \$27.50
Pure white perianth, well formed and of good substance. The cup is large, pale cream-pink, with broad apricot-ruffled edge. When in full bloom the color turns to salmon-pink. One of the first to bloom and one of the very best.

Lady Bird Each 50c, Six \$2.40, Doz. \$4.25, 25 \$7.75, 100 \$27.50
White perianth of perfect form. The large trumpet is distinctly pink and flaring, evenly ruffled, pale apricot outside, deep apricot-pink inside at opening, deepening towards the throat. An outstanding variety with rugged flowers. One of the most desirable of the new pink Daffodils. Multiplies rapidly and is a heavy bloomer.

Mrs. R. O. Backhouse Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00
This is the old "Pink Daffodil," fine informal perianth of ivory-white, and beautifully proportioned, slim long trumpet of apricot-pink, changing to shell-pink at the deeply fringed edge. Delicately beautiful but of exceptional substance; long lasting; early. Belongs in every collection.

Pink Fancy Each 50c, Six \$2.25, Doz. \$4.00, 25 \$7.00, 100 \$25.00
White perianth, well formed, with a pale apricot cup, broadly fringed soft pink. This is a very free flowering variety and lovely for cutting. A few bulbs soon develop into a big clump. It is for that reason it can be offered for less. It is a splendid multiplier.

Pink Glory Each 50c, Six \$2.25, Doz. \$4.10, 25 \$7.50, 100 \$26.00
The "Orchid" among the Narcissi. Pure white perianth, somewhat loose but graceful, with an exquisite long trumpet opening light Indian yellow soon shading to a lovely pink, inside deep pinkish apricot remaining so till the end. Without any question one of the most beautiful "pinks" ever raised. When used in a small corsage with some Asparagus green, it is as delicate as an Orchid.

Pink Rim Each 50c, Six \$2.25, Doz. \$4.00, 25 \$7.00, 100 \$25.00
The stiff, pure white perianth is of exceptionally good form. The cup is soft citron-yellow with a shapely defined picotee-like pink rim. It is quite distinct in its marking and coloring and always draws a lot of attention wherever shown. Strong stem and free blooming plus a rapid increased makes this one of the best new pink Daffodils.

Rosy Sunrise Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00
This is one of the choicest of the Pink Daffodils. It is a strong grower and one of the freest bloomers. Perianth is white, of good substance, with a fine, strong, much-fringed cup or trumpet which is heavily ruffled. Color is salmon-apricot with pink shadings. Inside trumpet color soft corn-yellow, a difficult color to describe and still more difficult to illustrate.

Siam Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00
Pure white perianth, well formed and of good substance. The cup is wide and flaring, apricot-tinted changing gradually to a soft pink. This is perhaps the largest flowered one in the collection is deliciously fragrant.

Mixed Pink Daffodils Six \$2.25, Doz. \$4.00, 25 \$7.00, 100 \$25.00
This mixture is made up from varieties listed here to which has been added a number of unnamed kinds. All are strong growers; increase very rapidly and will give an abundance of lovely blooms for many, many years without any trouble.

Louise de Coligny Each 50c, Six \$2.70, Doz. \$4.85, 25 \$9.25, 100 \$33.00
Louise de Coligny is in our estimation, the most unusual Daffodil ever offered because it is deliciously fragrant. The reflexing perianth, which is pure white and of good substance, tends to throw the neat apricot pink cup into focus. This variety, on opening, shows its color immediately while some of the other pinks do so on the second or third day. Although the flowers are not giants, they are produced in great quantity. A clump of six bulbs in our test garden produced over 22 good flowers the second year. It is a rapid multiplier. When walking past a cluster of flowers, the air is perfumed with a fragrance not unlike Violets and vanilla mixed. There has never been anything like it. The flower closely resembles that of Pink Fancy.

Louise de Coligny
The Violet-Scented Daffodil

Confuoco

Aruba Each 55c, Six \$2.75, Doz. \$5.00, 25 \$9.50, 100 \$35.00
Broad, creamy white perianth. Crown is large and flat, deep golden yellow with broad reddish orange edge. Usually good substance and very free-flowering.

Brookville Each 50c, Six \$2.40, Doz. \$4.25, 25 \$7.75, 100 \$27.50
Giant flowers and a greatly improved form of the well known John Evelyn. It is distinguished by its tremendously heavy, broad, flat, white perianth and large, short, completely ruffled cup of pale lemon-yellow. A magnificent new hybrid of outstanding merit. It flowers freely and grows ruggedly; the general effect is bold and strong, yet handsome. One of the finest flowers for garden or cutting. Don't miss including this variety in your next planting.

Confuoco Each 50c, Six \$2.75, Doz. \$4.85, 25 \$9.25, 100 \$33.00
Here we have an outstanding and popular new Weather-Proof Daffodil. The flower is large and substantial on a rigid stem and many stems on one bulb. The perianth is deep golden yellow with wide heavy petals which overlap, forming a perfect background for a vivid scarlet crown which is beautifully crested. Confuoco flowers for a long time, takes bad weather in its stride; does not require frequent transplanting yet multiplies rapidly. A Grullemans introduction that will be grown throughout the world.

Grullemans Giant

Weather-Proof Daffodils

These new hybrids embody all of the good qualities we associate with a really first class Daffodil. First of all, they are rugged, their flowers have twice or more the substance of varieties now in general use and are practically indestructible despite abuse from adverse weather. Through rain, snow or wind, they maintain their proud bearing. Even a burning hot sun which frequently occurs during the blooming period does not faze them! Secondly, our own experience with them added to enthusiastic reports from customers have convinced us that they are second to none for the so-called permanent planting.

Diamond Jubilee

Each 50c, Six \$2.40, Doz. \$4.25, 25 \$7.75, 100 \$27.50
The perianth is just off-white, petals strong and well formed, a fine background for the brilliant sparkling tangerine-orange crown which is quite flat but heavily fringed and ruffled. Exceedingly free blooming and multiplies rapidly; requires no transplanting and develops into a beautiful clump. One of the best of the Weather-Proof Daffodils.

Duke of Windsor

Each 50c, Six \$2.25, Doz. \$4.00, 25 \$7.00, 100 \$25.00
Magnificent, heavy, thick, pure white, overlapping petals with pale yellow cup, very flaring and short, beautifully ruffled. The inside edge of the cup shows delicate tinting of a broad deeper yellow band, and a most interesting variation in the soft over-all pale yellow shade of the cup. This is one of the choicest hybrids. It already is one of the leaders. No garden should be without it.

Green Emerald

Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00
The perianth is composed of short, heavy and thick, pure white petals. The soft lemon-yellow tinted crown is short, widely flaring and beautifully ruffled. We consider this one of the finest Daffodils Holland has sent us. It is distinct, handsome, very free flowering and multiplies fast. What more could be asked!

Grullemans Giant

Each 50c, Six \$2.70, Doz. \$4.85, 25 \$9.25, 100 \$33.00
The creamy yellow perianth is of exceptional substance and makes a perfect background for the enormous golden cup. Reputed to be the largest ever developed. It is one of the most outstanding of the Weather-Proof Daffodils; a splendid grower increasing rapidly; once planted it will take care of itself.

Grullemans Senior

Each 50c, Six \$2.40, Doz. \$4.25, 25 \$7.75, 100 \$27.50
The perianth consists of thick, substantial, pure white, well rounded petals. The crown is brilliant Indian yellow flaring and heavily ruffled; stem tall and stiff; very free-flowering and does not require transplanting in order to maintain the free blooming of this remarkable Daffodil.

Hyperion

Each 70c, Six \$3.75, Doz. \$7.00, 25 \$13.50, 100 \$50.00
Pale yellow perianth with large golden yellow crown. Crown is nicely fringed. Exceptionally free-flowering, it multiplies rapidly and does not require frequent transplanting to keep it blooming freely.

Manco

Each 50c, Six \$2.70, Doz. \$4.85, 25 \$9.25, 100 \$33.00
Substantial, formal, deep cream to ivory perianth. Bold, handsome, flaring cup, wavy at edges, deep golden orange, somewhat deeper at edges. A handsome flower. Along with its great substance it is an unusually heavy bloomer which naturalizes well and requires no transplanting.

Duke of Windsor

Brookville

Weather-Proof Daffodil, Diamond Jubilee

Mother Grullemans *Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00*
 Large white perianth of excellent substance. The crown is edged with a delicate pale sulphur-yellow border followed by a broad band of soft ochre-yellow. The base of the cup is pale cream shaded with a very light ochre. A superb new variety. Daffodils.

Wodan *Each 55c, Six \$2.75, Doz. \$5.00, 25 \$9.50, 100 \$35.00*
 Large canary-yellow perianth with very large, flaring crown of the same color, beautifully frilled and ruffled. The edge of the ruffle is tinted light orange which gives a fine character to the flower. It is a very rugged variety which multiplies rapidly and blooms very freely. A superb Daffodil for the garden as well as for cutting.

Mixed Weather-Proof Daffodils *Doz. \$4.00, 25 \$7.00, 100 \$25.00*
 We offer a beautiful mixture of Weather-Proof Daffodils which includes all varieties offered as well as some dozens of unnamed seedlings, at a very special price.

Trumpet Daffodils

All Glory

This superb variety is of marvelous size and symmetry. Its gold glistening bright yellow trumpet seems to send a call to all the world to come and view its beauty, while the lustrous pure white perianth serves as a shield to enhance the grace and the color of the trumpet. A great Daffodil.

Each 65c, Six \$3.50, Doz. \$6.50, 25 \$12.00, 100 \$45.00

Beersheba

Perianth and trumpet of magnificent proportions. Height 20 to 22 inches. Its color is not pure white, yet is excessive of purity in the highest sense. Those who are forming collections of fine Narcissus rate Beersheba at the top of the large white Triumphs.

Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00

Golden Smile

Despite its huge size (perianth being five to six inches across) the whole flower is beautifully proportioned and is carried gracefully on a two-foot stem, entirely free from the stiffness of many of the giant trumpets. The broad overlapping petals form a star-shaped perianth of deep golden-yellow.

Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00

Insurpassable

An outstanding novelty. Extremely large, golden yellow flower of bold carriage. It is one of the finest of the big-flowered golden trumpet Daffodils. It grows well, blooms freely, and has long stems, altogether a great Daffodil of recent introduction.

Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00

King Alfred

Top Size Round Bulbs

Six \$1.35, Doz. \$2.30, 25 \$4.15, 100 \$14.75

Mammoth Double Nose Bulbs

Six \$1.60, Doz. \$2.95, 25 \$5.35, 100 \$19.00

A King among the fine varieties. Rich, lustrous golden yellow throughout. Extremely vigorous in habit. Perianth often 4 inches across, trumpet fully 2 inches. Most popular variety for forcing.

Limone

Here is a rare Daffodil which is being talked about by the "experts." The perianth is primrose-yellow while the trumpet is of a much lighter shade but broadly edged with dark yellow which makes the fringed trumpet most distinct. Add to that the inside of the trumpet is creamy white and you have quite a combination.

Each 55c, Six \$2.75, Doz. \$5.00, 25 \$9.50, 100 \$35.00

Mount Hood

A magnificent, pure white Daffodil. It is strong in stem and flower has fine substance. The trumpet is well proportioned and of purest white color. In our opinion this is the White Trumpet Daffodil of the future. Only a limited number of bulbs available now.

Six \$1.50, Doz. \$2.75, 25 \$5.00, 100 \$18.00

Peerless Gold

An extremely large golden yellow Trumpet Daffodil of superb yet graceful proportions. Massive overlapping deep golden yellow perianth; large, flaring, well formed golden trumpet. Vigorous grower suitable for exhibition.

Each 55c, Six \$2.75, Doz. \$5.00, 25 \$9.50, 100 \$35.00

Rembrandt

Pale yellow flowers of perfect form and substance. This is one of the most attractive varieties in this color. There are not many pale yellow trumpet Daffodils and we believe this to be one of the best in this group Holland has to offer us.

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

William the Silent

One of the choicest of golden Daffodils. The large trumpet is pure golden yellow with round, overlapping, golden yellow perianth.

Six \$1.75, Doz. \$3.00, 25 \$5.50, 100 \$20.00

This is a beautiful Collection of the best and most popular
of the Short Cup Daffodils

Short Cup Daffodils

Apricot Attraction Each 85c, Six \$4.75, Doz. \$9.25, 25 \$18.00, 100 \$65.00

This is probably the rarest and finest Daffodil ever offered to gardeners. Never has there been anything quite as exquisite in color as is now seen in Apricot Attraction. The short, frilled cup is of deep amber color with rich fiery glow, the petals are firm and well placed, colored a soft amber with yellow ochre overtones, making a color effect often called majolica-yellow. It is a strong growing, free reproducing variety everyone will want. A visitor, who saw the test planting at Wayside, suggested it be called "Forever Amber." Whatever it is named, we elect it as the finest Daffodil of the past fifty years.

Emerald Isle Each 50c, Six \$2.40, Doz. \$4.25, 25 \$7.75, 100 \$27.50

A charming European introduction. The six rigid pure white petals overlap each other, forming a perfect background for the small emerald-green cup which is banded with a ruffle of yellow. It is one of the outstanding varieties and is particularly handsome when used as a cut flower. Free blooming and increases rapidly.

John Evelyn Six \$1.40, Doz. \$2.50, 25 \$4.55, 100 \$16.25

Outstanding among the new Incomparabilis hybrids. Flatly opening perianth, 4 to 5 inches across, with a flat cup nearly 2 inches in diameter, densely frilled, the perianth being pure white without a trace of shading, and the cup lemon-yellow and fluted or shirred to the base; good neck. Strong grower; free flowering and a good propagator; one of the greatest Daffodils.

Kansas Six \$1.60, Doz. \$2.95, 25 \$5.35, 100 \$19.00

Here is a beautiful Daffodil. A pure white perianth of heavy overlapping petals. The short crown is lemon-yellow edged with a brilliantly bright cinnamon-red edge quite wavy unlike most Daffodils of this sort; none of the colors fade or burn in the bright sun. Stem is rigid; it multiplies freely and requires no dividing. One of the best.

Emerald Isle

Red Marley

La Argentina Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Large and broad white perianth, the cup is white but frilled with radiating stripes of yellow and orange, giving the appearance as of spokes in a wheel. These distinct markings make this variety unusual and distinct. It never fails to draw attention.

Milk and Cream Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00

A different Daffodil! Pure white perianth, enormous self colored flat crown of Indian yellow, heavily shaded with salmon. We consider this one of the finer new varieties. Free blooming, strong growing; stiff stem. Tops for garden and show table.

Red Marley Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00

A choice and brilliantly tinted Daffodil. Perianth is a distinct dark golden yellow. The cup is quite long and tinted richest copper-red. This brilliant coloring remains throughout the life of the flower and is not affected by the sun. Red Marley is one of the finest Daffodils to come from Europe since the war. It multiplies freely and should be in every Daffodil fancier's collection.

Apricot Attraction

Trumpet, All Glory

Kansas

Insulinde

Sweet Scented Poetaz Narcissi

All Poetaz are hybrids from Poeticus Ornatus and Polyanthus Narcissi. The plants are tall and vigorous growers, bearing heads of large, well formed flowers, deliciously fragrant. There is no better group for indoor culture in flats, pots or bowls, while if planted in time, their hardiness outdoors leaves nothing to be desired.

Golden Cheerfulness

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

This is the golden yellow form of Cheerfulness and it has all the same qualities. Fragrant, easily grown and prolific.

Cheerfulness

Six \$1.10, Doz. \$1.80, 25 \$3.25, 100 \$11.50

Three to five double, white fragrant flowers on a stem. There is a faint tracing of yellow deep between the pearly white petals. Prolific blooming and multiplies rapidly without care.

Early Perfection

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Good white perianth and lemon-yellow cup. Exceptionally free flowering. It is outstanding as a variety for growing indoors.

Geranium

Six \$1.30, Doz. \$2.15, 25 \$3.85, 100 \$13.25

Three to six flowers on a stem. White perianth with bright orange-red cup. Good for semi-shade. Very early and an excellent variety.

St. Agnes

Six \$1.35, Doz. \$2.40, 25 \$4.35, 100 \$15.50

This beautiful cluster-flowered Daffodil is especially lovely in full sunlight, as it has transparent character. The perianth, which is a cream-white, seems rather to be of the quality of soft taffeta silk, and the petals are slightly ridged lengthwise. The corona is of rich canary-yellow and there are usually about six flowers to a stalk.

Scarlet Gem

Six \$1.30, Doz. \$2.15, 25 \$3.85, 100 \$13.25

This beautiful cluster flowered Daffodil is especially lovely in full sunlight. The perianth which is yellow, makes a perfect background for the deep orange cup. Usually has six flowers on a stem. Delightfully fragrant and outstanding.

Innocence

Six \$1.40, Doz. \$2.50, 25 \$4.50, 100 \$16.00

It produces a fine cluster of flowers, five or more. Petals are pure white. Cup is brilliant orange. A clear and pleasant color combination. Multiplies freely.

Poetaz Narcissi Mixed

Six \$1.25, Doz. \$2.00, 25 \$3.50, 100 \$12.50

This mixture includes all the varieties listed in this catalog as well as several other kinds we do not offer because of near duplication in color. Poetaz Narcissi are very fragrant and make a wonderful show after the Trumpet Daffodils have faded, prolonging the Daffodil season by two weeks.

Double Narcissi

Daphne

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Sweet scented, dainty, pure white, double flowers. Charming flower for cutting. Multiplies rapidly. It is a choice small-flowered Daffodil of great charm.

Insulinde

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

A large pompon-like flower composed of creamy white petals which are interspersed with short orange and red petals. The effect is interesting; flowers are very fragrant and showy.

Mary Copeland

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

One of the famous varieties of the new doubles. This variety has been termed the most striking double in cultivation; the longer petals are pure cream-white with a golden ray down the center, interspersed with shorter petals of lemon and brilliant orange, giving a three-color effect; unsurpassed for garden or show.

Snowball (new)

Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00

One of the outstanding new double Daffodils. First and foremost it is delightfully fragrant. It blooms freely and multiplies quite rapidly. Perianth is pure white with stout and well overlapping petals. The center crown is a tight button-like ball also pure white but as the flower ages this little ball opens slightly turning ivory white. It is a choice variety, one of the most distinct we have seen for a long time. Flowers stand up well in adverse weather.

Twink

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$14.00

It is double, of the semi-full type, the petals alternating a soft primrose and clear orange; and so arranged as to give the flower a most attractive appearance; and making it a most adaptable flower for large scale decorative work; is very free flowering and hardy.

Sweet Scented Poeticus Narcissi

Poet's Narcissi have pure white petals with a small very short scarlet cup and are some of the latest to flower. Highly fragrant and exceptionally good for naturalizing.

Actaea

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50

One of the finest of the new Poeticus varieties, beautifully proportioned; small pheasant's eye, reddish cup. This variety was introduced by Englehart in 1927 and is still considered one of the best new varieties.

Recurvus

Six \$1.30, Doz. \$2.15, 25 \$3.85, 100 \$13.25

The old Pheasant's Eye. Perianth pure white, somewhat reflexing; cup margined deep scarlet; sweet scented. Fine for massing in borders or in grass.

Poeticus Recurvus

Narcissus Cyclamineus

Miniature Trumpet, February Gold

Miniature Daffodils

(NARCISSUS SPECIES)

The following are charming little subjects for the rock garden, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and if happy, will soon establish themselves and afford a lovely picture in early spring. All the Bulbocodiums (except Monophyllus) and the Cyclamineus like moisture, and should therefore, be planted at the foot of the rockery. Triandrus Albus (Angel's Tears) and Juncifolius delight in partial shade and a light, gritty soil, and should be given a well drained position.

Miniature Trumpet - February Gold

Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50

This is a little known, extremely early blooming small golden Daffodil. One of the parents of this Hybrid is the little "Cyclamen" Daffodil which is responsible for its extreme earliness and "perky" flowers which in March or sometimes in late February start off the Daffodil season. It is one of the earliest Daffodils to grow indoors. Start a few bulbs in pebbles and water in

November. Keep bowls in a dark, cool place for three weeks and then bring into light or put six bulbs into a shallow 5-inch flower pot with earth in October. Keep pot moist and in a dark, cool place for six weeks. Then bring into light. You'll have dozens of small golden Daffodil blooms in no time. Several plantings will give you a continuation of blooms.

Narcissus Triandrus Albus

Narcissus Minimus

Bulbocodium citrinus

Large sulphur Hoop-Petticoat, very beautiful pale citron-yellow. Height 6 to 8 inches.

Three 75c, Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

Bulbocodium Conspicuus

Yellow Hoop-Petticoat, flowers rich golden yellow of hoop-petticoat form and rush-like foliage. Height 6 inches.

Three 60c, Six \$1.05, Doz. \$1.70, 25 \$3.00, 100 \$11.00

Canaliculatus

A dainty little Polyanthus Narcissus from Mentone suitable for sunny positions in the rock garden. It has narrow, erect bluish green foliage and bears heads of 3 to 4 flowers with white perianth and globular golden cup, sweetly scented. Height 6 inches.

Three 75c, Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.75

Cyclamineus

A rare species from Portugal. The downward pointed trumpet or tube is about 1/2 inch wide and somewhat frilled at the edges; segments or petals are sharply refined, giving the little flower a lot of style. Grows about 6 inches tall, loves a dry warm location.

Three 75c, Six \$1.45, Doz. \$2.50, 25 \$4.50, 100 \$16.00

Juncifolius

Small, graceful, rich flowers, rather smaller than a Buttercup with a dainty little flat crown.

Three 75c, Six \$1.35, Doz. \$2.35, 25 \$4.25, 100 \$15.25

Minimus

A miniature trumpet Daffodil not over 6 inches tall. Its tiny yellow trumpet is perfectly formed and not much over one-half inch long. A choice variety for the rock garden.

Three 75c, Six \$1.35, Doz. \$2.30, 25 \$4.15, 100 \$14.75

Triandrus albus

An exquisitely beautiful little species, it is of slender growth and produces a cluster of elegant creamy white little flowers with globular cup and perianth reflexing as in the Cyclamen. Height 7 inches.

Three 75c, Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50

[42]

Narcissus Canaliculatus

Narcissus Bulbocodium Conspicuus

Triandrus Hybrids

These are the Cyclamen-flowered Daffodils with reflexing perianth. The flowers are more or less drooping, of elegant form and graceful habit.

Moonshine

Six \$1.40, Doz. \$2.50, 25 \$4.60, 100 \$16.50

A beautiful Triandrus Hybrid, star-shaped white flowers, often three to a stem, drooping gracefully, very beautiful and a great favorite, especially for the rock garden or for naturalizing in the shade. A fine exhibition variety.

Silver Chimes

Each 35c, Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00

One of the prettiest of the small-cupped Triandrus Hybrids, being a cross of Triandrus calathinus and Polyanthus Grand Monarque; frequently produces heads of six or more flowers with pure white perianth and delicate pale primrose cup; an ideal and most beautiful plant to grow in pots in a cool greenhouse. Not perfectly hardy in the North.

Thalia

Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50

In addition to a peculiar attraction at first sight, this flower leaves one with an impression that it is white, yet it is a whiteness that is not white. The recurving petals and the angle of the three trumpets are unlike the conventional short-cupped Daffodil. The stem is dark green, round and reed-like thin. Some call it the "Orchid-flowered" Narcissus which adds to the mystery. Thalia provides unusually good material for artistic arrangements.

Jonquilla Hybrids

Hybrid Jonquils have two or more small, very fragrant flowers on one stem. The flowers of the Jonquil Hybrids are exceedingly long lasting and withstand heat and wind better than any other group of Daffodils. They are particularly good for cut flower use in the home.

Campernelle, Double

Six \$1.35, Doz. \$2.30, 25 \$4.20, 100 \$15.00

Two to three golden yellow, small, fragrant flowers on strong stems; lovely for cutting. Height 13 inches.

Jonquilla Simplex (Queen Anne's Daffodil)

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$13.50

The true tiny single Jonquil. The bulbs as well as the flowers of this miniature Daffodil are not very much larger than the Snowdrop. The flowers are pure golden yellow and delightfully fragrant; foliage is grass-like. Perfectly hardy and most satisfactory small Daffodil for the rock garden.

Trevithian (New)

Six \$1.35, Doz. \$2.25, 25 \$4.00, 100 \$14.00

A superbly beautiful variety. The translucent sparkling soft yellow flowers are wavy and fairly dance. Seldom does one see so much grace and charm in a flower. Trevithian has from two to four flowers on a tall, stiff stem which makes it an outstanding cut flower variety. In the garden it is equally satisfactory. High winds don't bother it, and like all Campernelle Hybrids, it is able to withstand the hottest sun without wilting or burning.

Liberty Bells (New)

Each 50c, Six \$2.25, Doz. \$4.10, 25 \$7.50, 100 \$26.00

Clusters of 2 or 3 dainty deep golden yellow bell-like flowers top a rigid stem. The effect is distinct as well as charming. Like all Jonquilla daffodils they not only last remarkably long in hot weather but mind not for rain or wind. This is a hybrid Jonquilla of the highest quality and a splendid new introduction. It naturalizes without effort and blooms freely and quickly forms a good clump. Here is a new daffodil which will give you great pleasure from year to year and like all Jonquilla delightfully fragrant.

Jonquilla Campernelle, Double

Triandrus, Thalia

Liberty Bells

TO CUSTOMERS in the GULF AREA, TEXAS and CALIFORNIA

We do not recommend planting imported bulbs in the warm states before November 15th. Bulbs planted while the weather is still quite warm will produce a top growth before the roots have properly developed with the result that your flowers will not have proper stems and be of normal size. This applies particularly to the following states: Texas, California,

New Mexico, Florida, Mississippi and Arizona. Should hardy or so-called Dutch bulbs be delivered to you before recommended planting time, store them in a cool place. All bulbs at Wayside Gardens are scientifically stored to avoid drying out or premature growth. Constant tests are being made in Florida in an effort to learn which are the best varieties for Southern use, also what is the best time to plant as well as keep bulbs in prime condition.

City of Haarlem

Jan Bos

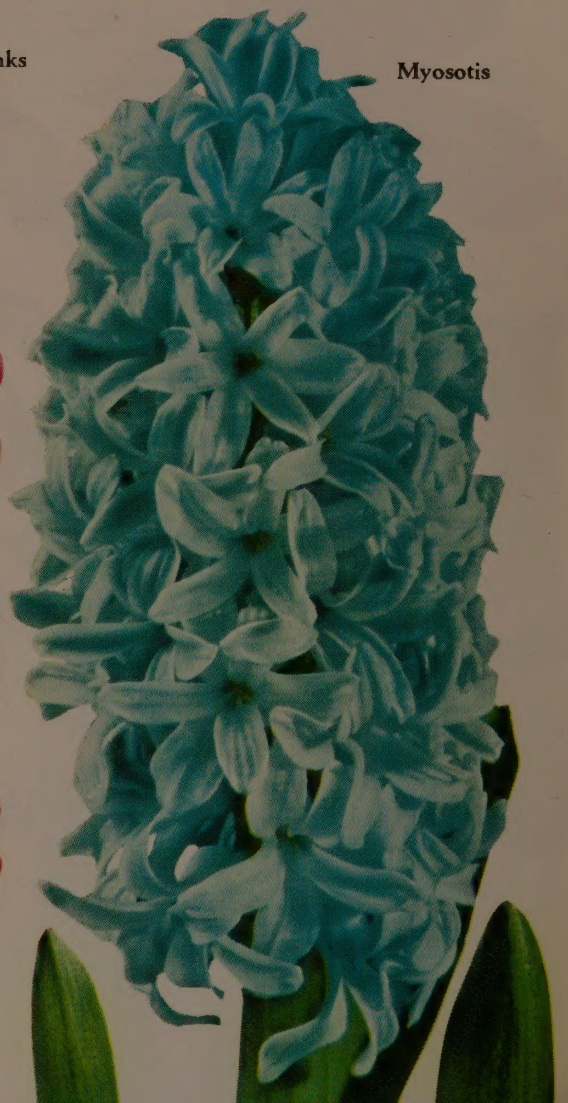

Carnegie

King of the Blues

Queen of the Pinks

Myosotis

Sweet Scented Hyacinths

Hyacinths produce the first color of spring to which you so eagerly look forward. In no other way is it possible to obtain so early such a wide variety of gorgeous color. Equally desirable is their lovely fragrance . . . Plant them most anywhere, informally. Scatter them about with other spring flowers. Plant them by themselves in beds of one or more colors. Their beauty is enhanced by most any kind of background. Consistent and dependable, they are uniform in height, therefore popular in carrying out any pattern or design. How joyfully you will greet them as they bring you the first fragrance and color of spring. They bloom 4 to 6 weeks in advance of the Darwin Tulips. The varieties offered are of the very finest obtainable for garden use. They have a wide range of vivid colors, the stems are strong and the blooms noted for their longevity. Left in the ground you may expect annual returns from your investment in color and fragrance.

Carnegie

Pure white: This and L'Innocence, we recommend as the two best varieties in this color.

City of Haarlem

The finest of the yellows. Well formed trusses of pale yellow bells. An excellent variety.

Delft Blue

Rugged stems, brilliant delft blue. An impressive variety.

Jan Bos

A fine clear scarlet bloom, good stem and habit, considered the best red.

King of the Blues

Dark violet-blue; splendid large trusses. One of the best blue Hyacinths.

Lady Derby

Beautiful and clear rose-pink, with large, compact trusses. Early and fine for forcing and bedding. The best of the pinks.

La Victoire

Shiny carmine-red with large, fringed spikes. A splendid bedder where brilliant color is required.

L'Innocence

This is the most satisfactory all-around pure white. Compact spikes with large bells. Does well anywhere.

Myosotis

Clear, light porcelain-blue; a strong variety with large, well formed trusses. One of the best of its color.

Princess Margaret

A very fine novelty. The flower is large and perfectly formed. Color is clear soft pink. This is by far the best Hyacinth, both as to size and color.

Queen of the Pinks

A fine variety. Color is lovely rose-pink. Broad, large trusses, good sized bells on strong stem. One of the top quality varieties in this color.

Growing Hyacinths in Water

Before placing the bulbs on Hyacinth glasses, the root base must be cleaned, so that all residue and old roots are removed. Fill the glass with clean, cool water until the root base is touched. The glasses are then placed in a cool, dark closet or cellar until the top growth is 4 inches above the bulb. This takes about eight weeks. Preferred temperature not over 50 degrees F.

When 4 inches top growth has been made, the glasses may be taken to a north window in the living room, and if necessary some water can be added; never change the water completely. Hold temperature to not over 70 degrees F. Avoid too much direct sunlight.

Imported Hyacinth Glasses

Leerdam Crystal

These crystal Hyacinth glasses are imported by us from the world famous Leerdam glass factory in Holland. They are beautifully made and when not in use for the growing of Hyacinths become handsome vases for cut flowers.

Each \$1.60, 3 for \$4.50

Finer results for outdoor or indoor growing are obtained from the sizes offered below. Greater vigor is naturally found in the larger size bulbs and this added vitality produces larger trusses.

All varieties listed above are offered in 15 to 16 cm. size and are priced as follows:

3 of one kind for \$0.90	12 of one kind for \$3.25
6 of one kind for 1.75	25 of one kind for 5.75
100 of one kind for \$22.00	

Mixed Colors—Six for \$1.75 Doz. for \$3.25 100 for \$22.00

All varieties listed above are offered in 18 to 19 cm. size and are priced as follows:

3 of one kind for \$1.50	12 of one kind for \$ 5.25
6 of one kind for 2.75	25 of one kind for 10.00
100 of one kind for \$37.50

Iris Reticulata

Perfectly hardy. March blooming. As fragrant as Violets

Iris Reticulata (Fragrant Iris)

All three are very early blooming and very hardy as well as fragrant. An attractive effect is obtained by planting some of each close together. They will multiply and produce their dainty blossoms each spring.

Iris Reticulata Six 60c, Doz. \$1.05, 25 \$1.85, 100 \$7.00

This lovely species is one of the treasures of the garden or rock garden. It can be described as a small form of the Spanish or Dutch Iris. Its main value lies in the fact that it may be forced into bloom in the house with the greatest ease. Six or eight bulbs put into a 4- to 5-inch pot when received will bloom about Christmas time. The fragrant blossoms remind one of a bunch of fresh Violets. Perfectly hardy with reasonable protection. It is one of the loveliest early flowering bulbs for the rockery. To show it off well, plant a number of bulbs under the white *Arabis Alpina*; you'll enjoy the results.

Iris Reticulata Cantab Each 50c, Six \$2.50, 12 \$4.50, 25 \$8.25
Same as above but flowers are pale blue. 100 \$30.00

Iris Reticulata J. S. Dyt Six 75c, 12 \$1.35, 25 \$2.50, 100 \$9.00
With flowers deep reddish purple.

Dutch Iris

Great Beauty, Fast Growing and Inexpensive

Be prepared for a surprise after you plant some of these for they multiply so rapidly that their numbers increase each year. These blooms bear a striking resemblance to the Orchid and their rich colors are most fascinating, ranging from pure white through golden yellow to cornflower-blue, dark violet and deep purple. They are excellent for cutting, stand a lot of handling and last even longer when put in water. All they ask is a sunny spot, fairly well drained and a little protection when the weather is extremely cold. We know of no other bulb that is so lovely, at the same time, so low in cost. It is not without reason that in England they are known as "The Poor man's Orchid." By all means, include some of these lovelies in your garden today.

Blue Triumphator Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.25
Soft dove gray-blue with distinct yellow spot on falls. A lovely Iris for cutting and mixing through the darker shades of blue. Very distinct.

Bronze Queen Six 70c, Doz. \$1.15, 25 \$2.10, 100 \$7.75
Standards blue, heavily shaded bronze, giving blue-bronze effect. Falls coppery bronze. This is a rare shading seldom found in flowers. One of the most artistic of the bulbous Iris.

Golden Lion Six \$1.75, Doz. \$3.25, 25 \$5.75, 100 \$22.00
The perfectly beautifully ruffled yellow flowers are in a class all their own. Without a doubt it is the finest of the lot. Will last for a week or ten days in water when cut. In the garden, it makes a stunning group. Bulbs multiply freely and a carefully planted clump will bloom for years without attention.

Imperator Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.00
A bold flower of rich navy-blue with narrow golden stripe on falls. Probably the best of the deep blue Dutch Iris.

Lemon Queen Six 60c, Doz. \$1.05, 25 \$1.85, 100 \$7.00
Standards creamy white. Falls are canary-yellow with orange stripe. This is the best of the white and yellow combinations. Most attractive when cut and cheerful looking in the garden.

Pride of Holland Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.00
Clear, deep golden yellow. Flowers are very substantial and of good size. We believe this to be one of the best of the deep yellow varieties.

Princess Irene Six 75c, Doz. \$1.35, 25 \$2.50, 100 \$9.00
White standards with two-tone falls of yellow and deep gold with coppery sheen. Outstanding and very colorful.

Prof. Blaauw Six 60c, Doz. \$1.05, 25 \$1.85, 100 \$7.00
Deep blue standards and coppery bronze falls. This flower has a rich quality about it that is hard to describe. Most unusual for cutting as well as garden planting.

Saxe Blue Six 55c, Doz. 90c, 25 \$1.65, 100 \$6.00
A brilliant clear, delft-blue flower with golden spot on petal near base makes this one of the outstanding new varieties. It has great substance and is fine for cutting.

Wedgewood Six 50c, Doz. 85c, 25 \$1.65, 100 \$6.00
Standards blue, falls lighter blue. This is the variety used by florists for forcing and is popular as a cut flower. For garden planting, it is perfect, and we recommend it highly for that purpose. Flowers are large and substantial. One of the best of the lighter blue shades.

White Perfection Six 55c, Doz. 85c, 25 \$1.55, 100 \$5.50
Without question, this is the best of the white Dutch Iris. Flowers are large and clean looking. Therefore, white being white, we only offer this one variety. The best white.

Dutch Iris Mixed Colors Doz. 85c, 25 \$1.60, 100 \$5.75
Here we offer a mixture of the above varieties along with some other kinds not listed. We know of no other bulb which will give you such rich returns at so low a cost. They multiply rapidly, giving you more flowers each year. All are delightfully fragrant.

Dutch Iris Collection 100 bulbs in 10 varieties for \$6.00
This collection will be made up of 10 distinct varieties, selected from the varieties offered above. They will be labeled and packed separately. Just the thing for the hardy border.

Iris Species

Andromache Each 50c, Six \$2.50, Doz. \$4.50, 25 \$8.25, 100 \$30.00
A rare and beautiful hybrid, belonging to the Regelio-Cyclus group. Grows about 18 inches tall with several heavily veined flowers of soft lilac, with dark violet sheen. It is the first time since World War II that we are able to offer this rare plant. It loves a sunny, dry place and multiplies quite freely. In very cold sections protect from too cold weather. Blooms in May.

Danfordia Six 60c, Doz. \$1.05, 25 \$1.85, 100 \$7.00
A beautiful little Iris from Eastern Asia Minor which was unobtainable for many years; bright golden flowers resembling in form Iris Reticulata produced in early February. Height 3 inches.

Pavonia Each 55c, Six \$2.75, Doz. \$5.00, 25 \$9.50, 100 \$35.00
Often called Peacock Iris. Flowers white or light blue with peacock eye at base of outer segments. Stems 10 to 15 inches high. Excellent for cutting, forcing, rock gardens and pots.

Tuberosa Six \$1.45, Doz. \$2.60, 25 \$4.75, 100 \$17.50
A rare species, producing charming small green flowers with vivid black blotches. An attractive and unusual flower.

Susiana (Extremely rare) Each \$2.50
Unique in form and color, and equally handsome. Intricate veining and speckling of deep dark blackish brown almost completely covering a grayish white ground. Nothing surpasses Iris Susiana as a most unusual and artistic table decoration which usually creates a mild sensation. It is perfectly hardy, increases well. All it asks is a warm, sunny dry place in the garden where it will produce its exotic flowers from year to year. 24 inches.

Iris Andromache

Iris Pavonia

Iris Danfordia

Hardy Herbaceous Plants

A List of Varieties Especially Well Adapted for Autumn Planting

ACHILLEA - Milfoil or Yarrow

Showy rock and border perennials, some of which are valuable for cut flowers. Some have silvery and others elegantly cut foliage, which adds considerably to the beauty of the plants.

Culture: All will succeed in any good, ordinary soil in sunny borders. A too rich soil should be avoided. Plant in autumn or early spring, 8 to 10 inches apart. As nearly all grow freely, it is advisable to lift, divide, and replant every third year. Directly after the plants cease flowering, cut the shoots back.

Coronation Gold *Each \$1.25, Three \$3.50, Doz. \$13.00*

A splendid border plant which flowers from June to well into September. Its rigid stems are 3 feet tall, require no staking and are topped by large convex umbels of golden flowers. It is a fine improvement over the variety Gold Plate. Trouble free and hardy anywhere, makes it a No. 1 garden plant with good foliage.

Millefolium, Fire King *Each \$1.10, Three \$3.00, Doz. \$11.00*

Silvery gray-green fern-like foliage from which rise 18-inch stems topped with convex umbels of rosy red flowers from July to October. It is a plant eminently suited for hot dry places and is very effective in front of a flower border. Requires little or no care and hardy anywhere.

Moonshine *Each \$1.25, Three \$3.50, Doz. \$13.00*

Bright sulphur yellow flowers grow on 18 to 24 inch stems which rise above the cushion of silvery-gray fronded foliage. Flowers are produced in great profusion from June until the end of September and do not fade. Foliage as well as flowers are excellent for cutting. A first class border plant as well. Easily grown in most indifferent soil. Prefers a hot dry sunny location.

Ptarmica, Perry's Giant White *Each \$1.10, Three \$3.00, Doz. \$11.00*

An improvement on "The Pearl," which we have discontinued, with fuller and more perfect flowers. Best for borders; neat plant. Excellent cut flower.

AJUGA - Bugle *See page 1.*

GIANT-SPURRED AQUILEGIAS

A magnificent strain of Columbines, very large flowers with long spurs, robust growth and rich colors. A great step ahead in Columbines. The following colors are now available:

McKana Hybrids *Three \$2.15, Doz. \$7.50*

A mixture of all colors and shades, many not seen before. Long spurs and beautifully colored as well as good strong growers. They are the best of their kind and are an "All-America Seed Selection first."

ANTHEMIS - Chamomile

Free flowering perennials with elegantly cut foliage and Daisy-like flowers. Suitable for edgings or grouping on the margins of borders. Flowers are especially fine for cutting.

Culture. Ordinary soil and a sunny position will suit all kinds. Plant in autumn or spring, 10 to 12 inches apart.

Moonlight *Each \$1.10, Three \$3.00, Doz. \$11.00*

Few plants are more satisfactory in the garden than Anthemis Moonlight. Its pleasing pale yellow Daisy-like flowers are 2½ inches in diameter and produced by the hundreds, making a gorgeous show in early summer. They are superb for cutting and the handsome flowers last for several days in water. They blend beautifully with all other flowers. The habit of growth is neat. Insects do not bother it, grows in almost any kind of soil, does not spread unduly and crowd out other plants. The foliage is ornamental. Not much more can be asked of any plant.

ALYSSUM - Madwort; Basket of Gold

Attractive early-flowering perennials, suitable for growing on the margins of sunny borders or in sunny places in the rock wall or rock garden.

Culture. The varieties offered will succeed in any good, ordinary soil which must be thoroughly drained. They are best grown in groups of three or more in the rock garden, or as edgings to beds. Plant in fall or spring, about 6 to 8 inches apart. Alyssum Saxatile is frequently used for carpeting beds planted with spring bulbs, and is very effective for that purpose.

Saxatile compactum *Each 70c, Three \$2.00, Doz. \$7.25*

Big clusters of bright yellow flowers in early spring. An excellent plant for the rockery or front of borders. One of the best early yellow plants to use with Tulips; 12 inches high.

Saxatile flora plena *Each \$1.00, Three \$2.80, Doz. \$10.00*

This is the double flowered form of Saxatile Compactum. Bright clusters of fully double golden yellow flowers completely cover the plant. Makes a brilliant show when in bloom as well as a neat silvery leaved plant throughout the year.

Saxatile citrinum *Each 90c, Three \$2.50, Doz. \$9.00*

Same habit of growth as Saxatile compactum but the flowers are a lovely pale yellow, much more desirable. They blend beautifully with pink or lavender Tulips and are outstanding in the spring garden or rockery.

ASCLEPIAS - Butterfly Weed

Tuberosa *Three \$2.00, Doz. \$7.25*

An attractive native plant flowering during July and August. It grows about two feet high. Rigid stems are topped by flat umbels of bright coppery yellow flowers. A perfectly hardy plant which requires a sandy, well drained soil in a hot sunny location; needs no care or dividing, plant in groups of three or more 4 to 6 inches apart.

ANCHUSA - Alkanet

Stately and handsome herbaceous perennials belonging to the Forget-me-not order. It is difficult to imagine a more beautiful plant than a well grown specimen of a Dropmore when in flower. The leaves are hairy and silvery green and the brilliant blue flowers are borne in racemes on branching stems.

Culture: Anchusas require a deep, well drained soil, not too damp or heavy, and a sunny position. They are best grown singly, so that they can display their natural contour to good advantage. Plant in fall or early spring, 18 inches apart, except Myostidiflora, which should be planted in groups of three or more, about 8 inches apart.

Loddon Royalist *Each \$1.50, Three \$4.25, Doz. \$15.00*

(Plant Patent No. 1729)

A magnificent form of the well known Anchusa Dropmore. Plants are of medium height and bushy, loaded with superbly fine purple-blue flowers of unusually large size. It is an English introduction and was shown for the first time at the Chelsea Show in 1957 when it was unanimously awarded a first class certificate, something which rarely ever happens. For a spot of startling blue in your garden this is a "must."

Myosotidiflora *Each \$1.10, Three \$3.00, Doz. \$11.00*

A distinct dwarf perennial from Russia, with clusters of charming blue flowers resembling Forget-me-nots. An effective plant for shady or sunny places, flowering in May and June. 12 inches high. Hardy as an Oak. Grows anywhere.

ARABIS - White Rock-Cress

Useful plants, suitable for forming edgings to beds and borders, and fine for rockery or dry wall.

Culture. Any good, ordinary soil that is not too damp will suit the Arabis. Plant 6 inches apart in autumn or spring. After the flowers have faded cut the straggling shoots back moderately to encourage a new tufted growth. Do well in either shade or full sun.

Alpina flore-pleno *Each \$1.00, Three \$2.80, Doz. \$10.00*

We consider this one of the nicest of early flowering plants. Spreading in habit but not weedy, it covers itself in late April and early May with double, pure white flowers resembling miniature white Stock. Dozens upon dozens of 6- to 8-inch stems stand above the new foliage and are covered with pure white, double flowers. They make a beautiful showing and are excellent for cutting.

Hardy Asters - Michaelmas Daisies

Autumn Glory *Each \$1.50, Three \$4.25, Doz. \$15.00*

We are inclined to believe this to be the finest hardy Aster yet raised. Rich claret-red, large semi-double flowers over 3 inches in diameter. Flowers are prettily curled giving them a distinct appearance. Plants grow 3½ to 4 feet high and make a magnificent show.

Blue Radiance *Each \$1.50, Three \$4.25, Doz. \$15.00*

A charming light blue with very finely cut petals giving a light dainty appearance. The flowers are large, well over 2 inches in diameter, in great abundance during September and October. Excellent for cutting and exceptionally nice when grown in combination with Chrysanthemums. Flowers last well in water and make a fine autumn show.

Connie Thrower *Each \$1.50, Three \$4.25, Doz. \$15.00*

A lovely, semi-dwarf, violet-blue Aster; grows only 1½ to 2 feet high. The plants are smothered under hundreds of double flowers completely covering all foliage. One of the first to flower early September onwards. It is a first class border plant and one of the nicest Asters for cutting. Blends very well in a planting of Chrysanthemums for greater color effect.

Crimson Brocade *Each \$2.00, Three \$5.70, Doz. \$20.00*

One of the best of the red Asters. Flowers are intense red and fully double. It is very free blooming and grows to about 3 feet. Of recent English introduction and one of the best.

Eventide *Each \$1.25, Three \$3.50, Doz. \$13.00*

Here we have what may be considered the darkest and richest of deep violet-blue hardy Asters. The flowers are semi-double in heavy clusters which in early autumn completely hide all foliage. It is one of the very best of English introductions which perform beautifully here. One of the best of the dark blues.

Fontaine *Each \$1.25, Three \$3.50, Doz. \$13.00*

Rich petunia-pink flowers of good size with an unusually small eye making it decorative and charming. Habit is light and dainty; a fine early flowering variety.

Lassie *Each \$1.50, Three \$4.25, Doz. \$15.00*

Soft pink flowers in big masses; flowers are double and on good stiff stems. Blooms over a long period and flowers last well when cut.

Marie Ballard (New) *Each \$1.25, Three \$3.50, Doz. \$13.00*

A lovely shade of powder-blue. The flowers are large and double, and show no sign of an eye until they begin to fade. 3 to 4 ft. in height. September-October flowering. They are perfect plants for background in the border and the color leaves nothing to be desired.

Melbourne Early Red *Each \$1.25, Three \$3.50, Doz. \$13.00*

A dwarf growing plant about 1½ to 2 feet high but literally covered with maroon-red flowers in early fall. A brilliant sight when in flower and one of the best of recent introduction.

Patricia Ballard *Each \$1.50, Three \$4.25, Doz. \$15.00*

An outstanding new pink with beautifully formed, double flowers which completely cover the 3-foot high plant in September and October. Makes a superb show in the autumn and it is a splendid variety for cutting as it looks well in water. An English novelty of great worth.

Violetta *Each \$1.25, Three \$3.50, Doz. \$13.00*

It grows into a plant about 3 feet high and about as wide. During September it is completely covered with semi-double flowers from the top of the plant to the base. It simply turns into a perfect mound of glittering deep violet-blue. This is a "must" for every garden, big or small.

Campanula, Wedgewood

Alyssum Saxatile flora plena

CAMPANULA - Bellflower

In their various sizes from the dwarfs up to those 3 feet high, some thriving in semi-shady places, others glorious in sunny spots, no garden can be quite complete without them. Some bloom continuously from June to October, a wealth of white and blue blooms.

Culture. A rich well drained light soil will grow them to perfection. It is well to protect fall-transplanted plants with a little dry covering; remove covering early in March before new growth starts. Plant in early autumn or very early spring 8 to 10 inches apart in full sun.

Carpatica Each \$1.00, Three \$2.80, Doz. \$10.00, 100 \$60.00
(Carpathian Harebell). A pretty species growing in compact tufts not exceeding 8 inches high; flowers clear blue held erect on wiry stems. It begins blooming in June, continuing until October. As an edging for the hardy border or for the rockery it is unsurpassed.

Carpatica alba Each \$1.00, Three \$2.80, Doz. \$10.00, 100 \$60.00
A pure white form of the preceding.

Carpatica, Blue Carpet Each \$1.10, Three \$3.00, Doz. \$11.00, 100 \$65.00

A beautiful compact grower and prolific blooming variety of recent introduction. It flowers over a long period from June until October. Plants are completely covered with deep blue flowers. Its uniformity of habit and its remarkable freedom of bloom unquestionably make this the finest of all the Carpatica type Campanulas. It makes a charming low edging to a flower garden or along walks. Here's an exceptionally good iron-clad hardy perennial for the foreground of the border.

Rotundifolia

Each \$1.00, Three \$2.80, Doz. \$10.00
(Blue Bells of Scotland or Harebells.) 1 foot. June to August. In the wild it is more slender and taller than in the garden; clear blue flowers. Especially suited for crevices in the rock garden or deep slopes, best planted so as to show pendent habit. Does well also in light shade.

Wedgewood

Each \$1.25, Three \$3.50, Doz. \$13.00
"Here is a 'gem' of a plant," one of our visitors exclaimed as she saw it growing in our nursery last summer. We heartily agree with her. We did produce a big quantity of them before we dared offer them in our catalog because we know they will be snapped up quickly. Dozens of brilliant violet-blue flowers on almost rigid stems look skyward from a cushion of deep green foliage not over 6 inches high. A neat subject for edging, in front of other plants or the rock garden. We think it is one of the finest of dwarf Campanulas to date.

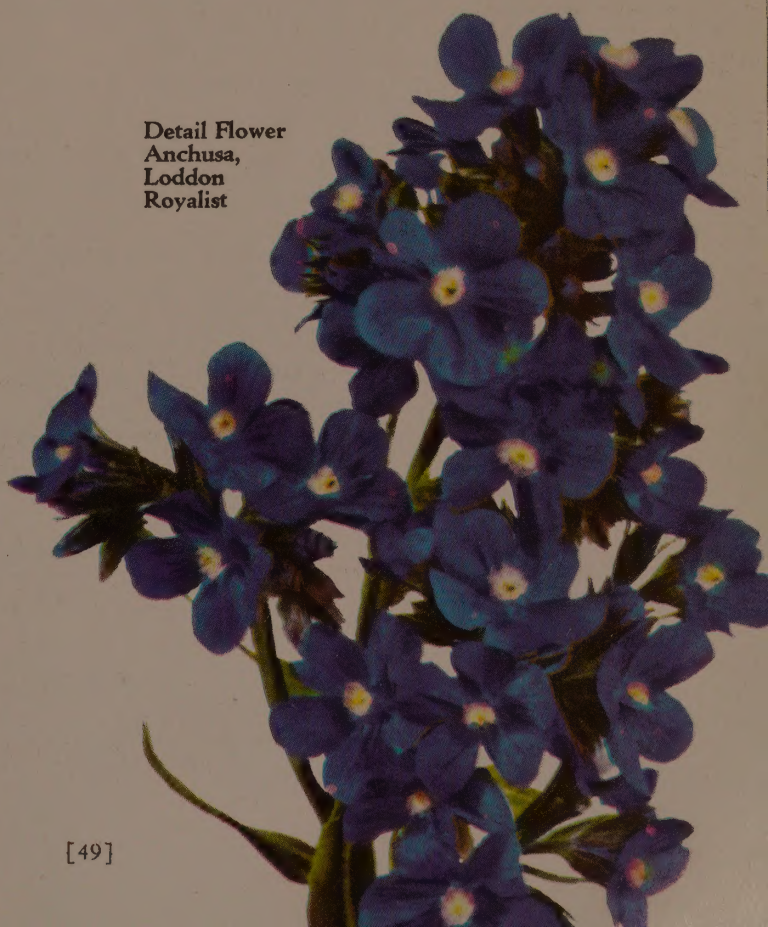

White Wedgewood

Each \$1.25, Three \$3.50, Doz. \$13.00
This is the pure white form of the handsome Wedgewood variety. The plants are identical in shape, growth and floriferousness. Its pure white flowers on rigid short stems look like so many small, white cups. It is a perfect companion for Wedgewood.

Hardy Asters

Detail Flower
Anchusa,
Loddon
Royalist

Double Shasta Daisy, Mount Shasta

Shasta Daisy, Thomas Killin

NEW DWARF OREGON ASTERS

Bonny Blue *Each \$1.10, Three \$3.00, Doz. \$11.00*

An excellent new dwarf hardy Aster fine for border edges and bedding. The flowers are a medium shade of wisteria-blue and the compact plants are sturdy and vigorous, long-blooming and floriferous. They grow 8 to 10 inches high and 10 to 15 inches wide and bloom from mid-August to mid-October, with the peak late in September. Very ornamental even before blooming and long afterward.

Persian Rose *Each \$1.10, Three \$3.00, Doz. \$11.00*

Masses of rose tinted flowers on plants 15 to 18 inches high. Make a remarkable show in early autumn. Seldom have we seen such handsome displays of color as can be expected of Persian Rose. Starts blooming late August and continues until well into October.

Snowball *Each \$1.10, Three \$3.00, Doz. \$11.00*

The plants grow 8 to 10 inches high and 12 to 15 inches wide. The flowers are pure white with golden centers. When in full bloom in September, they fairly smother the plants, giving the effect of big snowballs in the autumn garden. Snowball blooms from early September into October. The plants are very ornamental for border edges, rock gardens and foreground plantings. It is best to divide each year, using 3 to 5 new shoots to make one plant, otherwise they might become too large.

Twinkle *Each \$1.10, Three \$3.00, Doz. \$11.00*

Compact plants which do not grow any higher than 8 to 10 inches and almost 18 to 24 inches wide. They are completely covered with thousands of flowers of a delicate shade of crushed raspberry and amaranth-rose. It is the outstanding dwarf Aster in the nursery and creates more comment than any of the other varieties. Superb for edging or foreground planting.

NEW SEMI-DWARF OREGON ASTERS

Pacific Amaranth *Each \$1.10, Three \$3.00, Doz. \$11.00*

Compact plant about 12 inches tall. Begins flowering in August and remains in bloom until early October. The amaranth colored flowers are prolifically produced on sturdy stems which have a tendency to grow somewhat horizontally, making a fine plant for the front of the border.

Twilight *Each \$1.10, Three \$3.00, Doz. \$11.00*

A handsome autumn flowering plant. It is about 12 to 15 inches high when flowering. Grows into a perfect mound which is completely covered with flowers of rich violet-blue color. Its intermediate height makes it a perfect subject to be planted with early flowering Chrysanthemums where its sharp color contrast will be very welcome.

CIMICIFUGA - Snakeroot

Handsome, herbaceous perennials. They have large, palmate leaves, and small flowers borne in feathery racemes.

Culture. Grow in ordinary moist soil in colonies of six or more in partially shaded borders or in open woods. Plant in autumn or spring, 8 to 12 inches apart.

Racemosa *Each 90c, Three \$2.50, Doz. \$9.00*

Handsome shade-loving plant, bearing in July and August spikes of pure white flowers, 4 to 6 feet high; well suited for planting at the back of border, or for naturalizing at the edge of woods.

Simplex *Each \$1.50, Three \$4.25, Doz. \$15.00*

This is one of the finest, if not the finest, of fall flowering plants. Its flower stems are 2½ to 3 feet high, terminated with a dense plume-like spike of white flowers which, when cut, last in perfection a long time. As a garden plant it is hard to beat but its greatest asset is that it grows superbly in shade. We know of no other plant quite as useful for that purpose. The flowers are at their best from September to middle October, and it's perfectly hardy anywhere.

Chrysanthemum Maximum

SHASTA DAISY

Hardy perennials of easy culture, and especially noteworthy for their freedom of flowering. There are two distinct types of this genus. One is the Shasta Daisy, which bears large, white flowers on long stems, and is therefore, invaluable for cutting, and the other is the Leucanthemum, the Daisy of our meadows.

Culture. The Shasta Daisies require a deep, rich soil. They must have a sunny position. They should be planted 1 foot apart. It is advisable to lift and divide the rootstocks every alternate year, then the plants will be more compact in growth and also yield much finer flowers than if left undisturbed.

Double Shasta Daisies

Mount Shasta *Each \$1.25, Three \$3.50, Doz. \$13.00*

The pure white, fully double flowers have a high crested center and average four inches across or more. A double row of overlapping guard petals enhances the beauty of this fine double Daisy. The flowers come singly on stiff, 24-inch stems from spring until frost. Especially fine for cutting. Mount Shasta in our opinion is a top notch plant, a healthy, vigorous grower.

Single Shasta Daisies

Alaska *Each 90c, Three \$2.50, Doz. \$9.00*

This is one of the best known of the older varieties. It is particularly liked because of its hardiness as well as being a strong grower and heavy blooming variety. The flowers are of good size, well formed, excellent for cutting. Feed it a little each winter and you will be well rewarded.

Thomas Killin *Each \$1.50, Three \$4.25, Doz. \$15.00*

Considered in Europe the finest Shasta Daisy. We are inclined to agree with the opinion of our European friends. Majestic and Mark Riegel most certainly are the finest of Shasta Daisies but Thomas Killin seems to out-perform them both. Its broad rigid pure white petals which occur in a double row form a perfect background for its crested and gold center. It is a splendid formal flower for cutting and a superb garden variety which grows well and increases in size quite readily.

Garden Chrysanthemums

We do not think it advisable to plant all Chrysanthemums in the autumn. We here list only those types which may safely be transplanted at this time. In our spring catalog you will find a complete list of all the best garden Mums introduced in recent years.

CENTAUREA - Perennial Bachelor Button

Hardy perennials of easy culture and attractive appearance. Are showy plants in sunny borders, and useful for cut flowers. Flowers are more or less thistle-like.

Culture. All will succeed in good, ordinary soil in sunny borders. Best grown in groups of three. Plant in autumn or spring, 8 inches apart; divide and replant every third year.

Dealbata Sternbergii *Each \$1.25, Three \$3.50, Doz. \$13.00*

A distinctive plant which is quite readily grown. Large rosy-purple cornflower-like blooms grow on 2 foot stems and are produced in quantity from June to August. Excellent for cutting and a satisfactory garden plant.

Montana *Each 90c, Three \$2.50, Doz. \$9.00*

(Perennial Cornflower.) Grows 2 feet high, bearing large, violet-blue flowers from July to September. Showy and of easy culture.

Delphinium - Larkspur

Try as you will, one can hardly say enough for these regal midsummer favorites. None quite equal them in the commanding stateliness of their profusely bloom-laden stalks. Their gamut of colors ranging from exquisitely delicate pastel blues, whites and lavenders to those of the deep solid colors in violet and indigo-blue, is but one of their charms.

DELPHINIUM BELLADONNA

The Belladonna Delphinium does not grow quite as tall as the popular English Hybrids, but they produce more spikes and are more graceful, therefore, more useful for cutting. In fact, they are our loveliest early blue flowers for that purpose. They require the same care and treatment as suggested for the English Hybrids, but may be planted a little closer together, 12 inches apart is sufficient space for them. Their lovely blue spikes are about 3 to 4 feet high and produced in June and again in September.

Belladonna, Cliveden Beauty

Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00

This is a fine English improvement over the common Belladonna, growing much taller, many more flowers to each spike and of a brighter color. A fine form for garden as well as for cutting.

Bellamosa

Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00

A dark blue form of Belladonna.

WAYSIDE GARDENS ENGLISH HYBRIDS

This is one of the most permanent and at present the most popular strains of the garden Delphinium. It is distinct because of its broad, conical spike and enormous individual flowers. 1½ to 2 inches in diameter, in all shades of blue blended with mauve and violet. Also contains some fine clear white types. For permanent groups in the garden this mixture has no equal.

Each 95c, Three \$2.70, Doz. \$9.50, 100 \$57.50

Culture. Delphiniums require a rich, generous and well drained soil. On soils of a light or medium nature dig in plenty of well-decayed manure. In those of a heavy nature it is desirable to fork up the subsoil and compost of two parts loam and one of equal proportions of decayed manure and sand. The plants are best grown in groups of three or six. Allow a distance of at least 18 inches to 2 feet between the plants. Planting may be done in autumn or early spring. Remove faded flowers, and on no account allow seeds to develop, then a second crop of flowers may be expected later on.

GIANT PACIFIC HYBRID DELPHINIUMS

Galahad Series

Each \$1.00, Three \$2.80, Doz. \$10.00

Greatest achievement in giant whites, fully worthy of its name, which possesses all the qualities one expects to find in a fine Delphinium. The standard attained in this series is perhaps responsible for its wide popularity, ranking in demand next to the blues. The clear white flowers, with white bees, are of large size, reaching often three inches in diameter, combined with glistening heavy texture.

King Arthur Series

Each \$1.00, Three \$2.80, Doz. \$10.00

This is still one of the most brilliant Delphiniums so far developed. The color is rich, royal purple, with a velvety texture and large white bee, and the beautifully formed, long spikes are carried on thin, woody stems.

Summer Skies Series

Each \$1.00, Three \$2.80, Doz. \$10.00

Light, heavenly blue of a summer sky with white bees representing the fleecy clouds; a color long sought in the large hybrid Delphinium. They come almost 100% true to color from seed, with such a uniform growth that many people think they are propagated from cuttings. As a class this is the finest blue Delphinium in existence today.

Round Table Series

Three \$2.80, Doz. \$10.00, 100 \$60.00

The Round Table Series is a superb mixture comprising all available shades in Delphiniums. Nothing yet has been created that equals them for sheer beauty.

Delphinium Belladonna, Cliveden Beauty

[51]

Wayside Gardens Delphiniums

Dianthus - Pinks

A great selection of plants for the sunny border or sunny, exposed places in the rock garden or rock wall. In fact, no rock garden is complete without a liberal planting of the various Dianthus. In England where rock gardening is a well understood art, Dianthus are used by the thousands. They are perfectly hardy anywhere.

Culture. Plant in ordinary good soil, which must contain some lime and should be well drained. Planting may be done in fall or early spring, 6 to 10 inches apart, in sunny, dry places in the rock garden, rock wall or on the margin of the border. All love lime and gritty soils.

Dinah *Each \$1.10, Three \$3.00, Doz. \$11.00*
This "Border Pink" is the companion to Evangeline. It is just as spicily fragrant, just as prolific flowering in spring and autumn. The color is a deep Persian rose with maroon center. The flower stems are perhaps 12 inches long with about 2 to 6 flowers on a single stem which is stiff and just right for cutting. The flowers are perfectly formed, never a split calyx. Plants are about 8 inches high and 10 to 12 inches across.

Essex Witch *Each \$1.10, Three \$3.00, Doz. \$11.00*
A very dwarf and compact Pink producing a legion of rose-pink flowers on short stems. They are very fragrant and petals are finely fringed. When in bloom, not over 5 inches high. A fine old-fashioned variety which is hardy anywhere. A splendid variety for edging beds or walks.

Her Majesty *Each \$1.10, Three \$3.00, Doz. \$11.00*
Grows about 4 inches high and when in bloom it is literally covered with fragrant double white flowers on 6-inch stems. It is an old fashioned favorite of neat habit and absolutely hardy. Excellent for edging beds or walks.

Moon Mist *Each \$1.10, Three \$3.00, Doz. \$11.00*
Pure white and spicily fragrant double flowers on 12-inch stems. This border Pink has Carnation-like flowers which are perfect for cutting. Flowers throughout the summer with its heavy crop of blooms in spring and again in the autumn.

The Bishop *Each \$1.10, Three \$3.00, Doz. \$11.00*
Here we have a variety that is a splendid grower; stays neat and compact and at the same time blooms very freely. Its unusual Bishop-purple flowers are very fragrant and are produced in abundance on 12-inch stems. After the first flash of spring bloom, there is a constant procession of flowers throughout the summer and early autumn. Looks very well planted along with the white variety Moon Mist.

Highland Hybrids in Mixture *Three \$2.00, Doz. \$7.25, 100 \$42.50*
A beautiful and very varied mixture, including unnamed hybrids of all possible shades. Especially noted for their fragrance and long bloom.

Dictamnus Fraxinella Caucasicus

Allwood's Perpetual Flowering Pinks

These new Pinks first of all are Sweet Scented. They all have glorious silvery foliage which shows up well during the winter months. They commence to flower in spring and continue during the entire summer and autumn. Flower stems are stiff and the colors bright; picking the flowers encourages more bloom. Plants grow compactly. If planted in the fall, a light covering for a little protection the first winter is advisable.

Blanche *Each \$1.25, Three \$3.50, Doz. \$13.00*
Pure white and highly fragrant, good stiff stems. Growth is orderly and neat. A fine fully double white companion for this group of Allwood's new perpetual flowering Pinks.

Doris *Each \$1.25, Three \$3.50, Doz. \$13.00*
Delicate salmon-pink with deeper pink eye. The full semi double flower is large and of a perfect shape as well as extremely fragrant. It has a husky upright habit and very perpetual flowering.

Helen *Each \$1.25, Three \$3.50, Doz. \$13.00*
Nicely shaped plants produce deep salmon shaded flowers on husky stiff stems by the dozens. Not only a lovely color but free flowering and an exceptionally good grower.

Ian *Each \$1.25, Three \$3.50, Doz. \$13.00*
Deep rich velvety red. The almost black shading at outer edge of petals makes it most unusual. This deep coloring and shading is not seen very often in flowers.

Robin *Each \$1.25, Three \$3.50, Doz. \$13.00*
Bright vermilion with brilliant orange glow, but poorly describes the color of these lovely fully double flowers. They sort of "light up" the spot where they are growing. It blooms prolifically, plants well formed with good stiff flower stems. One of the best.

Collection of three new Pinks

1 each — Doris — Helen — Robin.....\$3.50
3 each — Doris — Helen — Robin..... 9.25

Dianthus, Old Spice

A choice Hybrid, possessing, it seems, all the good qualities you can ask for in a plant.

First—It is as hardy as an Oak.

Second—Habit of growth is neat, cushion-like and compact. Stems are about 12 inches tall.

Third—It flowers prolifically over a long period, 20 or more flowers on a single plant.

Fourth—Color of the beautifully moulded flowers is rich salmon-pink like that of the popular greenhouse Carnation, Laddie.

Fifth—The calyx does not split as in the case with the old-fashioned Clove Pinks. All the flowers are perfectly formed.

Sixth—The flowers, when cut, last a long time.

Each \$1.10, Three \$3.00, Doz. \$11.00, 100 \$65.00

DICENTRA - Bleeding Heart

Old-fashioned perennials; also known under the name of Dielytra. The species named below have fleshy, brittle stems and finely cut fern-like foliage.

Culture: Spectabilis should be grown in a partially shaded border. Eximia will do well in a similar position, or in the woodland garden, or in a shady nook of the rockery. Plant in fall or very early spring, 8 to 12 inches apart.

Spectabilis *Each \$1.25, Three \$3.50, Doz. \$13.00*
(Bleeding Heart or Seal Flower.) An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive; it is used also for forcing in the house, and is perfectly at home in any part of the hardy border, and especially valuable for planting in clumps.

Dicentra Hybrid, Bountiful (U. S. Plant Patent No. 1198)
See page 53.

DICTAMNUS - Gas Plant or Fraxinella

An old-fashioned herbaceous perennial. Once firmly established, a plant will continue to thrive in the same spot for several generations. They have ash-like leaves which emit a delightfully fragrant odor, and the quaintly formed flowers are borne in upright racemes. The inflorescence is covered with glands secreting a resinous volatile matter, which may be ignited in the evening of hot days without any damage to the plants.

Culture: They require a deep, rich loamy soil and a sunny, well drained border. Not suitable for heavy, damp soils. Best grown singly, so as to display the handsome contour and beauty of the foliage. Once planted, avoid disturbing the roots. Plant in spring or fall, 10 to 12 inches apart.

Fraxinella Caucasicus *Each \$1.50, Three \$4.25, Doz. \$15.00*
A very showy border perennial, forming a bush about 2½ feet, having fragrant foliage and spikes of rosy pink flowers with deeper veins during June and July. It is not advisable to transplant often, as it improves with age—one of the most permanent features of the herbaceous border.

Alba *Each \$1.50, Three \$4.25, Doz. \$15.00*
The white-flowered variety of above, and much sought after as a long-lasting flower for cutting.

Allwood's Fragrant Perpetual Flowering Pinks

Dicentra, Bountiful—One of the most unusual and free flowering plants ever introduced

Helleborus Niger (See page 54)

Dicentra Hybrid, Bountiful

(U. S. Plant Patent No. 1198)

The New Perpetual Flowering Bleeding Heart

This is a remarkable Hybrid, in a robust way resembling the Plumy Bleeding Heart (*Dicentra Eximia*) but vastly superior. It forms a clump fully 18 inches in diameter, of handsome dark blue-green foliage, about 10 inches high. The flowers appear in early May and as many as 30 to 40 flower stems can be counted on a 2-year established plant. Stalks are about 18 to 20 inches tall and topped with fuchsia-red flowers which are about double the size of the common Plumy Bleeding Heart. It comes into bloom before *Dicentra Eximia*, and the flowers last well into July. Throughout the summer a few flowers are produced; but in the early autumn it blooms as freely again as it did in spring. Perfectly hardy, does well in any well drained soil and prefers sun to shade. As we said before, a remarkable plant with a great future, we predict it will, before long, be growing in most of the gardens in this country. Happy in either light shade or in full sun but if grown in shade the rich color fades and becomes several shades lighter.

Each \$1.50, Three \$4.25, Doz. \$15.00

[53]

Helleborus Orientalis Atrorubens (See page 54)

DORONICUM - Leopardbane

Very showy yellow-flowered perennial. Their yellow, Daisy-like flowers are invaluable for cutting. As they flower chiefly in spring, they are indispensable in the border at that period of the year. They have bright green, heart-shaped leaves which disappear during July and August when the plant is dormant.

Culture. Thrive well in heavy soils and succeed in sunny or partially shaded borders. Best grown in groups of six or more. Plant in autumn or early spring, 6 to 8 inches apart. Lift, divide and replant every third year; remove the flower heads directly after they fade, then a second crop of flowers will follow. Water freely in dry weather. Lovely with pale lavender Tulips.

Madame Mason *Each \$1.25, Three \$3.50, Doz. \$13.00*
Large, bright yellow flowers on 2-foot stems; one of the most sparkling early spring-flowering perennials. Effective in a hardy border in combination with Tulips. It is a splendid flower for cutting, as it carries well and lasts a long time in water.

FERNS - Hardy Varieties

The cultivation of Hardy Ferns is remarkably simple. All they want is a simple light alluvial soil, a little loam and peat or leaf mold to keep the soil light and open, plenty of moisture, position from partial to deep shade.

Culture. A shady position is, of course, preferred, or a spot which gets practically no sun, will be an ideal place for a fernery. If the position should be a very damp one, it will be advisable to raise the surface about 6 inches to a foot. For a good effect plant 8 to 10 inches apart.

Adiantum pedatum *Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00*
The well known Maidenhair Fern, grows at its best on moist banks, stony and well shaded. It will thrive in any shaded location, even if dry, but will not be as tall as with plenty of moisture. Try it with Bleeding Heart under trees.

Aspidium acrostichoides *Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00*
(Wood Fern.) (Polystichum.) An evergreen species with deep green, divided fronds. Should be planted in a shady position. 12 inches.

Aspidium spinulosum *Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00*
The most beautiful of the evergreen wood ferns, and most useful, too. It is picked for florists use, but it is as useful in shade, especially if moist, for it will make a strong clump to 30 inches high. Beautifully divided pinnae give a lacy effect. Easily cultivated.

Asplenium filix-foemina *Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00*
The Lady Fern is both our most common, and our most valuable form. Fine and delicate, it is very attractive and if one wants a cover for shade, or partial sun, this is the plant.

Osmunda cinnamomea *Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00*
In wet swampy land, the Cinnamon Fern will grow six feet tall. Yet it thrives in deep shade, and is tall enough. A luxuriant plant, very sturdy, and because of the root size, able to care for itself.

Osmunda Claytoniana *Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00*
Clothed with loose wool when unfolding its fronds in spring, but soon becoming perfectly smooth. This Fern, two to three feet high, is found in rather dry, shaded places and does quite well under cultivation.

GAILLARDIA - Blanket Flower

We consider the Gaillardia one of the most desirable hardy plants in cultivation. Everyone will have noticed how grandly Gaillardias have thrived through droughts; they seem hardly to need water. The gay blossoms are obtainable in perpetual profusion from June to November, and the greater the drought and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated.

Culture. A rich, but light soil is essential to grow Gaillardias successfully. They cannot be depended upon to survive the winter on heavy, clay soils, but do splendidly on those of a light or medium character. Require a sunny position. Plant in fall or spring, 6 to 8 inches apart.

Giant English Hybrids *Each 90c, Three \$2.50, Doz. \$9.00*
In lovely shades of orange, yellow and red all summer and fall, flowers measuring 4 inches or more across. The finest mixture available.

Helleborus - Christmas Rose or Lenten Rose

There are two distinct types, one, Christmas Rose, flowering in late winter, and the other, Lenten Rose, in spring. Both are valuable for garden decoration because of their flowering during the dull period of the year.

Culture. Require to be grown in a cool, moist, shady position, such as under the shade of trees or among ferns. The ideal soil is a retentive loam, freely mixed with leaf mold and well rotted manure. As Helleborus are impatient of disturbance at the roots it is advisable to select a position for them where they will not be required to be disturbed for many years. Planting may be done in fall or spring, 12 inches apart. Each autumn add a top dressing of leaf mold and well rotted manure, and let it lie on the surface. In summer give plenty of water.

Niger (Strong plants) *Each \$1.50, Three \$4.25, Doz. \$15.00*
A dwarf growing hardy plant, able to withstand temperatures many degrees below zero. Its palm-like leaves are evergreen and of leathery substance. In December, January and February, depending upon locality, large, single, white bell-like flowers which last for weeks, are produced regardless of cold or snow. We offer healthy Wayside grown plants.

Niger 3 yr. old plants *Each \$1.10, Three \$3.00, Doz. \$11.00*
We find that plants of Helleborus Niger, not too large, transplant easier and grow better, and will flower the following season. For that reason, we are offering nice husky, 3-year plants at this attractive price.

Orientalis Atrorubens *Each \$2.00, Three \$5.70, Doz. \$20.00*
This is the purple Lenten Rose. Its growth and requirements are practically the same as those of the Helleborus Niger. It is, however, easier to transplant and better adapted to warm weather. The flowers are amazingly interesting, being chocolate-purple tinted on the outside while inside they are greenish, shot with purple. Foliage is evergreen and palm-like. The unusual coloring and shape of the flowers make them a choice subject for a corsage or cut flower, lasting a long time. Quite rare and unusual!

ECHINOPS - Globe Thistle

Handsome perennials with pinnate or spiny foliage, woolly beneath, and globular, thistle-like flowers. A well-grown plant has a pleasing effect in the border.

Culture. Ordinary soil in sun or light shade in border or wild garden. Plant in autumn or spring 10 to 12 inches apart.

Taplow Blue *Each \$1.25, Three \$3.50, Doz. \$13.00*
This variety is particularly desirable. The flower heads are larger and are intense metallic blue. It is very free flowering and does beautifully in difficult, dry soils. A clump of Taplow Blue makes a fine contrast growing alongside of white Phlox. Plant in full sun. Hardy anywhere.

FUNKIA - Hosta

Hardy, herbaceous perennials with handsome green or variegated foliage, and Lily-like flowers borne on graceful spikes. The ovate, cordate, or lance-shaped leaves grow in tufted form. Excellent plants for growing in sunny or partially shady borders on the margins of water or as edgings to beds and walks.

Culture. Funkias require to be grown in a rich, well manured soil. The variegated kinds are best grown in partial shade. The others will succeed in sunny borders, or as specimens in groups. Subcordata should be grown in a warm, sheltered position. Plant in fall or early spring, six inches apart.

Albo marginata *Each \$1.25, Three \$3.50, Doz. \$13.00*
A picturesque plant with handsome big leaves edged with a broad band of white. It grows into a fine ornamental clump and is always showy; does well in sun or shade, hardy anywhere, and not particular about soil. Lavender flowers in September.

Coerulea lanceolata *Each \$1.00, Three \$2.80, Doz. \$10.00, 100 \$60.00*
Broad green leaves; blue flowers from July to August.

Japonica Blue *Each \$1.25, Three \$3.50, Doz. \$13.00*
This fine Hosta came to us from the Montreal Botanic Gardens. It is a rugged plant with ample foliage and it blooms heavily with many lilac-blue flowers. It is exceptionally hardy and takes heat, cold, and drought in its stride. Quickly develops into a bold ornamental group.

Minor alba *Each \$1.25, Three \$3.50, Doz. \$13.00*
Minor alba is a small, compact growing variety with narrow pointed leaves forming neat, medium size plants. It is a prolific bloomer with a dozen or more spikes of white flowers about 12 inches tall. It is best grown in light shade in clumps of three or more and is perfect for a narrow edging to a walk in shade where it would be difficult to grow other flowers. Minor alba is quite rare and not found in many gardens. It is a choice, uncommon plant.

Sieboldiana *Each \$2.00, Three \$5.70, Doz. \$20.00*
A very fine species with large blue-gray leaves. It develops into a stately, handsome foliage plant for the open border and is superb in shady places. May also be used in the rock garden.

Thomas Hogg *Each \$1.25, Three \$3.50, Doz. \$13.00*
A rare plant with handsome foliage; blooms early autumn. A choice variety probably the most desirable of all the variegated leaf kinds. It does well in shade or sun and loves moisture. Its rich, large, green leaves have a narrow, clear silver edging which remains clean and clear throughout the season. In early autumn dozens of rigid spikes with lavender flowers greatly enhance its beauty. It is hardy anywhere and does not require frequent transplanting. It does not multiply too rapidly but always remains a neat looking plant. One of the best of the Hostas, if not the best. Makes a most attractive plant for winter color in the house in shady window.

Variegata (undulata media picta) *Each \$1.25, Three \$3.50, Doz. \$13.00, 100 \$80.00*

Wavy leaves handsomely variegated with silvery white, often 12 to 18 inches long, in a tight cluster, create a very fine plant. The leaves are most useful for cutting and blend handsomely with other flowers. This variety is easily grown, is fine for edgings or clumps and does especially well in shade. Its flower spikes are about 18 inches high with clusters of lilac bell-shaped flowers. Plants may be dug in late fall and grown in a shady window where the variegated leaves make a fine show. Increases rapidly and is hardy anywhere.

HEUCHERA - Alum Root; Coralbells

Neat growing and graceful flowering perennials yielding an abundance of flowers for cutting; effective subjects for the margins of borders, as edgings to walks, flower beds, and excellent for the rock garden. They have heart-shaped leaves and bear their dainty blooms in graceful panicles or racemes.

Culture. Heucheras require a well drained, fairly rich, and not too heavy soil, also a sunny position. Plant 6 inches apart in autumn or early spring. Each spring top dress with well decayed manure. Lift, divide and replant every third year for best results.

Bressingham Hybrids *Three \$2.45, Doz. \$8.75, 100 \$52.50*
These are the new English Hybrid Heucheras in a beautiful range of colors. The shades are from white to pink to coral and red in a charming combination of tints. The flowers are excellent for cutting and unsurpassed in the garden where their graceful airy display never fails to draw attention. Perfectly hardy and lovely evergreen foliage. All Heucheras are the finest of garden plants and particularly good for edging walks.

Rosamundi *Each \$1.25, Three \$3.50, Doz. \$13.00*
We have carefully tested several varieties of Heuchera in all the pink shades during the past few years, and we find that this is the most desirable of the coral-pink sorts. It is a strong grower, not subject to any blight, and produces an abundance of fine coral-pink blossoms on tall, strong stems, which last over two months.

Sanguinea *Each \$1.25, Three \$3.50, Doz. \$13.00*
Flowers bright crimson, on 12- to 18-inch stems in June to September; very free flowering. Nice for cutting. Excellent for rock garden.

HELIANTHUS - Perennial Sunflower

Very showy and attractive plants for border decoration, massing in the wild garden or flowers for cutting.

Culture. Ordinary soil and a sunny position will suffice to grow Helianthus. Lift, divide and replant every second or third year to keep the plants compact and shapely. Few plants can equal the Helianthus for providing a gay display of color in the autumn garden. Plant in fall or spring, 12 inches apart.

Multiflorus fl.-pl. *Each \$1.00, Three \$2.80, Doz. \$10.00*
Clear yellow; closely resembling a small Dahlia in shape and finish. 4 feet high.

Hosta Undulata Media Picta (Variegata)

Gypsophila - Chalk-Plant; Baby's Breath

They are remarkable for their numerous feathery panicles of small, starry, white or pink flowers borne in profusion on thread-like stalks during early summer. The flowers are highly prized for cutting.

Culture: Gypsophilas will succeed in any well drained and not too heavy soil. They are very partial to lime, and it is well to mix some lime with the soil before planting. A sunny position is essential. Plant all fully two feet apart; Reopens 8 inches apart. Plant in autumn or early spring.

Paniculata, Perfect *Each \$1.25, Three \$3.50, Doz. \$13.00*
Growth and habit the same as the well known Bristol Fairy. It is in the flowers that the big difference lies. They are twice as large and are produced in abundance. A handsome plant for the garden and indispensable for cutting.

Paniculata, Pink Star *Each \$1.25, Three \$3.50, Doz. \$13.00*
A beautiful New Zealand introduction with large double pink flowers on wiry stems in greatest profusion. Invaluable for cutting and for its filmy effect in the border. Could well be called an enlarged form of Rosy Veil. Flowers from June through September about 18 inches tall. Side laterals continue to bloom until frost.

Heuchera, Example of the Famous Bressingham Hybrids

Hosta, Thomas Hogg

Life size flower detail, Gypsophila Pink Star

Fragrant Hemerocallis Hyperion

The Incomparable Lemon Lily

The giant Amaryllis-like flowers of Hyperion are citron-yellow and delightfully fragrant. It is one of the most prolific flowering plants ever seen. The stems are gracefully thin and have exceptional substance; about 40 inches tall, carrying delicately sparkling clusters of flowers, the soft color of which "carries" a great distance. Experts, as well as amateurs, consider Hyperion **the finest yellow** Hemerocallis available at a moderate price.

Few plants surpass the beauty and vigor of a well flowered clump of this wonderful Day Lily. It received an Award of Merit of the Royal Horticultural Society of Great Britain. Its graceful arching foliage always looks handsome. The flower buds open in water. It is perfectly hardy, grows in dry, wet, sunny, or shady places. Blooms in July and August.

Each \$1.50, Three \$4.25, Doz. \$15.00

Hemerocallis Double Gold

Hemerocallis Gratia
(See page 58))

Hemerocallis Double Gold

Several years ago the late Hemerocallis specialist, Doctor Stout of the New York Botanic Gardens turned over to us a substantial quantity of seed of what he termed Hybrid Double Hemerocallis Seed. Several hundred plants were raised from this seed, all but one were destroyed. This particular one was so fine and outstanding it seemed useless to introduce varieties of lesser merit. The flower instead of being fully double has two rows or rather 12 petals which are broad, thick and substantial and reflex or curve sharply backward and in so doing produce a delightful effect. The plant is a robust grower and prolific bloomer, stiff straight stalks are topped by 8 to 12 flowers and buds. Color is bright, clear, clean golden yellow. Begins flowering about the last week in June and continues until August.

We offer a limited number of nice strong plants at \$10.00 each.

**Detail Flower,
Primrose Mascotte**
(See page 58)

Bonanza
(See page 58)

Primrose Mascotte
(See page 58)

Hemerocallis - Day Lilies

We supply strong plants which will flower promptly and form nice clumps.

If the value of a plant is to be judged by the aggregate qualities of absolute hardiness, floriferousness and complaisance under almost any circumstances, then the Day Lily must be placed among the elect. From 18 inches to 4 feet in height they stand on stalwart stems. Their flowers are new in a multitude of shades from softest yellow through to almost fiery red, all with a clean and pleasant fragrance. By a careful selection of varieties, flowers may be had in abundance from June until September. Few plants surpass the vigor and beauty of well-flowered clumps of the Day Lily. You will find offered here some very interesting new varieties in a fine range of colors.

CULTURE: Any kind of soil will grow these plants successfully. They do well in partial shade, but do excellently in full sun. May be grown singly or in masses. Plant one or two feet apart in autumn or spring. Lift, divide and replant every fifth year to ensure the plants flowering freely. Very graceful and stately plants for the waterside, naturalizing in grass or growing in the border. Absolutely hardy and require no care. They never fail to please!

Croesus Each \$1.50, Three \$4.25, Doz. \$15.00
Noted for its clear and big flowers of brilliant amber-yellow with a soft golden glow, carried on tall, stiff stems. A bold and colorful plant. One of the best of the new Lemon Lilies. Height about 40 inches.

Crusader Each \$1.25, Three \$3.50, Doz. \$13.00
Visitors describe the color as Indian red, rich mahogany, velvety chestnut, etc. It's a shading difficult to describe, glowing richly but softly in the sun. Lighted by a golden throat, it is one of the fine, distinct varieties. Petals of flowers are delicately penciled with a fine golden line through the center. Late June and early July flowering. Height 30 in.

Dido Each \$1.25, Three \$3.50, Doz. \$13.00
Clear, warm soft apricot. It is one of the outstanding colors in our Hemerocallis field. A very choice variety greatly admired by visitors, flowering late June. Height 36 inches.

Duchess of Windsor Each \$1.50, Three \$4.25, Doz. \$15.00
Cup-shaped blooms of broad, overlapping petals crimped along the edges. The coloring is deep cream shading to soft golden with a very soft delicate flushed rosy brown halo in the throat. Late July and early August blooming. Height about 24 to 30 inches.

Erie Each \$1.50, Three \$4.25, Doz. \$15.00
Buff-shrimp-pink with soft buff-yellow midrib deepening to dull gold in the throat of the flower. A most unusual color combination. General effect created by flowers in bloom is soft buff-shrimp-pink. Flowering late June. Height 24 inches.

Fascinating Each \$1.25, Three \$3.50, Doz. \$13.00
Soft Chinese yellow somewhat deeper tinted in center of flower, lighter along the edges of the petals, all overlaid with a soft shading of apricot, creating a delightful cool and delicate effect. Very fragrant. Flowering late June. Height 28 inches.

Gratia Each \$1.50, Three \$4.25, Doz. \$15.00
A massive gold reddish mahogany flower with big golden yellow throat; center of flower petals is veined yellow, giving the whole a brilliant star-like effect. A bold flower which stands out clearly, making it especially good for planting in the background or where a tall, bold effect is desired. Flowers are delicately fragrant. July flowering. Height 36 to 40 inches.

Hercules Each \$1.50, Three \$4.25, Doz. \$15.00
Well shaped flowers of maroon-red with red-mahogany overtones and deep golden yellow center. Particularly bright and brilliant, totally devoid of dullness often present in the New Lemon Lilies. Grows about 40 inches tall and makes a fine clump. One of the best of the reds.

Insulinda Each \$1.50, Three \$4.25, Doz. \$15.00
Fine bold flowers of apricot-buff with pink overtones. Hemerocallis enthusiasts refer to this type of bloom as pink but it is not. However, the feeling of pink is present. Center clear yellow. Grows about 36 inches tall and is free blooming. One of the best of the New Lemon Lilies.

J. A. Crawford Each \$1.25, Three \$3.50, Doz. \$13.00
Rich apricot-yellow shaded light cadmium. Many flowers on 4-foot stems; at their best about late June, flowering until end of July. A lovely plant which looks well in light shade.

Hemerocallis Helios

(Plant Patent 1669)

The Finest Red Hemerocallis

HELIOS, named for the Sun God, that ancient deity who dwelt within the sun itself, riding the heavens from dawn to dusk, is quite unlike the former mahogany, maroon and other so called "red" Day Lilies. Of a flame-red; its blazing flowers, with golden rays at base of petals, have all the brilliance of the setting sun. Luxuriant and ornamental foliage enhances the quantities of burning blooms up to 5 inches in diameter, borne on strong, upstanding stalks, with dozens of stalks on established plants. A wonderful fool-proof plant that never fails to provide brilliant color.

Big flowering clumps for immediate show, Each \$3.00,
Three \$8.50, Doz. \$30.00

DWARF HEMEROCALLIS

Primrose Mascotte

Primrose Mascotte - Dwarf Hyperion

Each \$2.00, Three \$5.70, Doz. \$20.00

Cool empire-yellow deepening to lemon-yellow in center. Visitors to our nursery call this "The Dwarf Hyperion" and consider it the best of the dwarf summer flowering pale yellow Hemerocallis. In addition to its cool icy yellow shade, it is delightfully fragrant and forms fine clumps. A perfect plant for foreground planting or corners of flower beds. Has handsome foliage. Flowers about mid-July. Height 20 inches.

Linda Each \$1.50, Three \$4.25, Doz. \$15.00
Color is soft, pale amber-yellow, Havana or Egyptian buff. The throat of somewhat deeper tone is separated from the main color by a well defined, narrow, delicately shaded starlike band of soft mahogany. The three main or broadest flower petals are heavily ruffled while the separating three narrow petals are not. The effect is very pleasing.

Magnificence Each \$1.25, Three \$3.50, Doz. \$13.00
Soft burnt orange with undertones of Chinese coral inside of flower, outside shows buff and gold center, inside golden. A rare and choice color combination which glows and sparkles in sunlight as if dusted with gold and coral. Flowering in early July. Height 38 inches.

Morocco Beauty Each \$1.50, Three \$4.25, Doz. \$15.00
Medium size flower but very brilliant. Color seems to be a mixture of velvety maroon-chestnut with purplish undertone; deep golden yellow throat, midrib in center of petals golden. Makes a very bright spot in the garden. Late June and early July flowering. Height 24 inches.

Nigrette Each \$1.50, Three \$4.25, Doz. \$15.00
This is the darkest colored Hemerocallis in our collection. Flowers are deep pansy-purple with very dark mahogany overtone; throat deep golden yellow. The flowers are not as large as we would like them to be but that fact can be overlooked because of their distinct color. Late June and early July flowering. Height 26 inches.

Perpetual Motion Each \$2.00, Three \$5.70, Doz. \$20.00
First to bloom—last one to stop! At the height of the flowering season plants produce dozens of stems each with 10 or more flowers and buds, color bright apricot yellow not unlike the color of Apollo. Strong growing free and constant flowering, good foliage; not much more can be asked of any plant.

Summer Pride Each \$1.25, Three \$3.50, Doz. \$13.00
A profuse bloomer bearing ruby-red flowers with violet flush and small golden throat, faint yellow vein on midrib. This is a most unusual coloring and we have not seen anything like it in any of the new Hemerocallis now offered for sale. Late July to early August blooming. Height about 30 to 36 inches.

Tasmania Each \$1.50, Three \$4.25, Doz. \$15.00
Chinese coral overlaid with purplish glow, star of same color but several shades deeper, center golden yellow. The general effect is unusual. Several visitors wanted to know what this pink Hemerocallis is and rightly there is a definite pinkish shade produced by this flower. Flowering from middle to late June. Height 30 to 36 inches.

Leonian Hybrid Hemerocallis in Mixture

In height they vary from 3 to 5 feet. They stand on stalwart stems. Their flowers are of every shade from deepest burnt orange through flaming orange-red into amazing tints of pastel, old rose and maroon shades, all with a clean and pleasant fragrance.

Colors will be similar to those of the named varieties illustrated on next page.

Unit of 6 plants Leonian Hemerocallis for \$4.00, unit of 12 plants of Leonian Hemerocallis for \$7.00, unit of 25 plants Leonian Hemerocallis for \$13.00.

Hemerocallis Apollo

(Plant Patent No. 1670)

The Finest Apricot Hemerocallis

APOLLO, namesake of the Greek God of light, beauty and youth, who held an unrivaled place in the hearts of his ancient worshippers, bears masses of scintillating, iridescent apricot-yellow, out-facing flowers. In form and texture they are quite distinct and even more graceful than its parent, Hyperion. Throat of flower deep apricot-yellow lessening in depth of color as it reaches the edges of the petals. Rather narrow, graceful foliage sets off the delicately brilliant flowers which are borne on slender stems, 30 inches tall. It is noted for its freedom of bloom, requires no care and is happy anywhere. Here is the perfect plant for those who love unusual and delicate yet bright colors. One of its outstanding qualities is the "carrying power" of its color. It is so forceful it is spotted at once. In addition it multiplies quite rapidly.

Big flowering clumps for immediate show, Each \$2.00,
Three \$5.70, Doz. \$20.00

Bonanza

Bonanza - New Dwarf Variety Each \$1.50, Three \$4.25, Doz. \$15.00

A beautiful, very free flowering new variety. It is low growing, not much over 15 inches high when in bloom. Flowers are soft golden yellow with well defined halo which provides striking contrast. It is outstanding for its low growth, prolific late flowering in July, with heavy bloom throughout August, lasting well into September. Truly a small "hill of gold" when in flower, a superb foliage plant when not.

Hemerocallis
Erie

Hemerocallis Crusader

Hemerocallis Offer 1963

We take pleasure in offering you three of the best Hemerocallis ever introduced at a most attractive price in a Collection.

Helios listed at \$3.00. *Apollo* at \$2.00, and the unbeatable yellow *Hyperion* listed at \$1.50.

Collection A: One each of the above three varieties for \$6.00.

Collection B: Three each of the above three varieties for \$16.00.

P. S. Don't overlook the varieties Bonanza and Primrose Mascotte, two of the most floriferous and best low growing kinds. See page 58 for descriptions.

Hemerocallis
Helios

Hemerocallis
Apollo

New

Giant Hibiscus
in Brilliant Colors

Super Giant Hibiscus

HIBISCUS

Blooms 10 to 12 inches in diameter.

When, many years ago, the Giant Hibiscus were introduced, they created quite a lot of comment. The New Super Giants in many instances produce flowers which are 50% bigger or even more. A well grown plant with its immense flowers is quite a sight to behold.

The varieties offered were all produced from selected plants noted for their size and freedom of bloom. Increase from divisions is slow but the results justify the extra effort. Give these plants ample room and grow them in full sunlight, watering freely.

Culture. A rich, moist, well drained soil suits them best. Best planted as single specimens in full sun in the border, or in groups of three or more on the lawn. Plant in fall or spring. 25 inches apart.

Crimson Wonder *Each \$2.25, Three \$6.45, Doz. \$22.50*
Lovely shade, American-Beauty-red; blooms deeply cupped as they first open. Edges of petals gently ruffled.

Fresno *Each \$2.25, Three \$6.45, Doz. \$22.50*
A lovely silvery pink, deepening to bright rose-pink at outer edges of petals. Bright cherry-red center. Petals are gently ridged and softly ruffled at tips. A most handsome flower and one of the most prolific.

Intense Pink *Each \$3.50*
Flowers are over 6 inches in diameter, rich rose-pink with thin bright lines veined through petals. It is a tall upright growing plant about 6 feet high and an exceptionally profuse bloomer.

Pink Giant *Each \$3.00*
Mammoth pale pink flowers 6 to 8 inches across with small red eye, on a plant never over 3½ feet high. The short rigid stems are well placed permitting the giant flowers to show themselves unobstructed.

IBERIS - Candytuft

When in flower in spring and covered with a mass of snow-white blossoms, they add considerably to the attractions of the garden. They are of shrubby growth, with dark green, evergreen foliage.

Culture. Grow in good, ordinary soil. Plant in fall or spring, 6 inches apart. When plants become straggly, trim them directly after flowering.

Purity *Each \$1.10, Three \$3.00, Doz. \$11.00, 100 \$65.00*
A neat, evergreen, compact and low-growing plant with immense pure white flowers which cover the plant entirely when it is in bloom. This new variety is in our opinion the best of the dwarf Iberis. Its neat, compact habit and rich deep evergreen foliage make it an A. No. 1 edging plant for flower beds or along walks. Its uniform habit creates a very neatly finished little edging.

Sempervirens *Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00*
Covered with a sheet of white flowers in spring, completely covering its rich dark green foliage; a particularly fine plant for the border. Does well in light shade and therefore excellent as a ground cover in front of shrubs. May be used for edging to parks or walks. Little Gem, however, is more formal and upright for these purposes.

Spring and Autumn Flowering Iberis

Autumn Snow (Blooms twice a year)
Each \$1.10, Three \$3.00, Doz. \$11.00
After long and careful selecting, we have finally obtained an autumn flowering Iberis. Its first blooming occurs in the spring while the second crop of flowers appears in late September lasting well into October depending on the season. Plants grow compact and have dark green leaves; height about 7 inches and spread about 12 inches. Flowers are pure white and freely produced. A fine plant for edging, or clumps of 3 or more in the foreground of the shrub border.

NEPETA - Ground Ivy; Catmint

The three varieties listed below are beautifully suited for garden use. The foliage is aromatic and silvery gray. The flowers are lavender-blue. The upright growing kinds make a perfect subject for massing in the border while the dwarf forms are unparalleled for foreground planting or as edgings. Few plants lend themselves to such widely varying garden conditions or are as ornamental throughout the season.

Culture. Ordinary soil or even poor sandy soil, well drained and a sunny position will suit the Nepetas. In very cold locations, plant in spring only; otherwise in fall or spring, 12 inches apart. Never cut off summer growth until early spring. Old tops act as fine winter cover. Trim faded flowers to promote new bloom.

Mussini *Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00*
Here we have one of the most satisfactory and showy edging or border plants. Its growth is compact and low spreading. It stays "put" and does not crowd out plants nearby, seldom is over 15 to 18 inches wide. In early summer it is covered with dozens of 12- to 15-inch stems which bear small, fragrant, lavender-blue flowers. After the first burst of bloom which lasts better than two months, old flower stems should be removed and there will be an intermittent blooming after that until frost, in addition to its ornamental silvery gray-green foliage. Does perfectly in hot, dry, sunny places where soil is sandy, poor and dry. Avoid wet locations and shade.

Radiant Pink *Each \$3.00*
An upright growing plant 6 to 7 feet tall. The immense flowers are 6 inches across, soft rose-pink with cherry-red eye, soft red veining in fan shape almost to tips of petals. An imposing plant.

Radiation *Each \$3.50*
Low growing and bushy, about 3½ feet high. Flowers have a velvety appearance and are somewhat "crinkled."—Handsome clear pink with rose-red eye and of giant proportions, frequently 8 inches and over.

Satan *Each \$2.25, Three \$6.45, Doz. \$22.50*
Here is the dusky member of the family; a deep velvety crimson, so unusual that it is not to be found in standard color charts. Nicely formed open flowers.

Snow White *Each \$3.00*
Magnificent pure white flowers with a faint suggestion of light cream halo in the center. The plant is somewhat of open habit, not over 3½ feet high, which permits a perfect showing of its lovely blooms; hardy, tree, and easily grown. A number one plant for the sunny border; loves a moist location.

Strawberry Blonde *Each \$3.50*
Plants do not grow much over 3½ feet high, are neat, upright and orderly. Flowers although no giants are compelling and different, largely because of their bright sheen and crinkled effect when opening. Color is bright deep pink.

The Bomb *Each \$3.00*
A fine late blooming variety growing tall and stately to 7 feet or more. Against a soft pink background are emblazoned heavy rose-red lines which virtually "explode" from the deep crimson center and vein outward toward the tips of the petals.

The Beanstalk *Each \$3.00*
A tall plant up to 7 feet high, foliage is deeply incised and has a bronzy cast. Tremendous amount of deep pink flowers with small red eye. A fine subject for background planting.

Super Giant Hibiscus in Mixture *Each 90c, Three \$2.50, Doz. \$9.00*
These magnificent hybrids contain a wide variation of colors and forms. They are superb.

LIATRIS - Blazing Star or Gayfeather

Showy plants, native of North America. They have grassy, linear leaves produced in a thick, tufty mass, out of which arise the stems furnished with spikes of purple flowers.

Culture. They will all thrive in ordinary garden soil, in sun or in shade, and are grown in groups of three or more. Plant in autumn or early spring. May be grown by the waterside, and bees are very partial to the flowers.

Spicata, Silver Tips *Each \$1.10, Three \$3.00, Doz. \$11.00*
A strong growing plant which sends up several rigid spikes of bloom, the color of which is lavender with a strong and decided silvery sheen, hence its name "Silver Tips." It is a very showy variety for the garden and much prized as a cut flower. Like all other Gayfeathers it is free from bugs, requires no care and increases in size each year. It is a fine, fool-proof plant.

LUPINUS - Lupine

Stately, colorful and beautiful perennials. The pea-shaped flowers are closely spaced on 3- to 4-foot spikes. The effect made by these colorful spires places the Lupines in the rank of hardy border plants.

Culture. Growing Lupines well is not as much a problem of soil as it is one of atmospheric conditions. They require ample moisture, full sun and do not like the hot, drying winds of summer. They do equally well in heavy or light sandy soils. Water freely when ground is dry. They look best planted in bold groups. Plant in fall or early spring, ten inches apart. Whenever possible, do planting and transplanting in fall.

Polyphyllus, Blue *Each 90c, Three \$2.50, Doz. \$9.00*
(Hardy Lupine). Clear blue spikes, 3 to 4 feet high, during June.

Polyphyllus albus *Each 90c, Three \$2.50, Doz. \$9.00*
A white variety of the above.

Polyphyllus roseus *Each 90c, Three \$2.50, Doz. \$9.00*
Flowers of beautifully shaded rose.

ROYAL HYBRID LUPINES IN MIXED COLORS

You will find in our Royal Lupines the same gorgeous colors: self blues, pinks, reds, yellows, maroon, purples, etc. Bicolors such as violet and white, blue and yellow, red and bronze, red and white, purple and cream, blue and white, yellow and orange, pink and white, etc. The standards one color, the keel another. Individual flowers above average size, upright standards of some being an inch across. The flower spike resembles a closely set, well rounded column of Sweet Peas. All flowers on spike open at one time from top to bottom. Spike 3 to 5 feet tall. The sensation of the English horticultural world in 1954.

We offer fine two-year, field-grown plants that will give you a mass of blooms the same year they are planted.

Three \$2.50, Doz. \$9.00, 100 \$55.00

LYTHRUM - Purple Loosestrife

Suitable showy plants for moist, sunny borders and the waterside. The plants are of stately growth, and bear their rosy or purplish flowers in tall, leafy spikes.

Culture: Grow in ordinary soil in moist, sunny borders, or in groups by the waterside. Plant in autumn or early spring and divide and replant.

Superbum, Morden's Pink *Each 90c, Three \$2.50, Doz. \$9.00*
This fine Lythrum originated at the Morden Experiment Station, Morden, Manitoba, Canada. The plant grows to a height of 3 to 4 feet and bears dozens of spikes covered with deep Phlox-pink florets from June to late September. Lythrum Morden's Pink can be grown anywhere; it is as hardy as a tree. It does well during the driest weather but comes to perfection in a moist, sunny location where it develops into a magnificent showy clump 3 feet across or more. An excellent summer flowering perennial.

Guaranteed Superior Quality

Wayside Gardens

MENTOR, OHIO

Wayside's Famous 7 "Blue Ribbon" Iris

Of the hundreds of varieties offered to us by ardent hybridizers and enthusiastic specialists, those listed below and on the following pages were selected by us, as well as a committee of experts on Bearded Iris. These successfully passed the rigorous **WAYSIDE GARDENS** test of the "survival of the fittest." During the past few years we have grown goodly numbers of these new hybrids and they are a sight to behold when they are in bloom.

Make room for some of these lovely new Iris in your garden. You will be enthralled with their dazzling beauty.

FAMOUS 7 IRIS COLLECTION No. 7

During the past 10 years or so a tremendous number of new Iris have been introduced, a great many of them truly beautiful. However, as improvements continued, these varieties remained and still are outstanding. Their clear colors, freedom of bloom, rigid stems, good foliage and hardiness put them "on top of the list," as it were. They are outstanding in our nursery. They will be outstanding in your garden. They are illustrated on these two pages.

One each of seven kinds illustrated on pages 62 and 63

\$ 5.00

Three each of seven kinds illustrated on pages 62 and 63

14.25

Jane Phillips

Each \$1.00, Three \$2.80, Doz. \$10.00

A new light blue that is deeper in color than Helen McGregor. We have seen no Iris which appears near true blue, and for that reason, other experts as well as ourselves consider it an outstanding new variety. It blooms freely, has good stems, and brilliantly proportioned flowers. A hardy, good grower which will be in great demand for many years to come.

Lavanesque

Each \$1.00, Three \$2.80, Doz. \$10.00

Classic in its perfection is this beautifully formed, lacy frilled orchid. Connoisseurs are lavish in praise of its beauty. Ruffled, and its exquisite orchid tone is emphasized by a gold illuminated beard and haft.

Winter Carnival

Each \$1.00, Three \$2.80, Doz. \$10.00

A fine hardy white, bred in Minnesota. Widely flaring falls, snow-white in color, the throat heavily tinted gold. Branching is excellent and the stout stems hold the big blooms aloft. This is surely one of our best whites.

Top Flight

Each \$1.00, Three \$2.80, Doz. \$10.00

A handsome deep apricot with a beard of fiery orange-red. The coloring is appealing and the finish is superb. This is a top flight variety.

Gudrun

Each 85c, Three \$2.45, Doz. \$8.75

Winner of the Dykes Memorial Medal by the English Iris Society. A top notch white Iris among so many fine new white ones and by many judges considered the finest of all. It is a massive flower of purest snow-white, undoubtedly the largest and most massive. It is one of the most popular of white varieties. We consider it outstanding and one of the finest.

Violet Harmony

Each \$1.00, Three \$2.80, Doz. \$10.00

This shapely bloom is one of the classics of Irisdom. The lovely shade of violet with a deft touch of lighter tone in the center of each petal gives a positive Orchid-like effect. To behold a stem with three nicely spaced florets open at one time, you will understand why it was the proud winner of the President's Cup in 1953.

China Maid

Each 75c, Three \$2.15, Doz. \$7.50

It is difficult to convey an adequate impression of the beauty of the flower. It is a soft pink, enhanced by an intriguing blending of golden bronzy buff and soft lilac at the edges of the petals. It is of rare charm and one of the handsomest of pink Iris. The flowers are large, well proportioned of smooth and even texture, and grow profusely on tall, graceful stems. Planted among soft yellow and pale blue Iris it makes a picture not soon forgotten. The best new pink at a reasonable price.

Prairie Sunset

Each 75c, Three \$2.15, Doz. \$7.50

All that has been said about this gorgeous creation is true, but it simply has to be seen to be realized. The blendings of peach, apricot, rose copper and gold are so well done that one is at a loss to describe it in a manner that might be conceived in the mind of the listener. A fine big flower, and the color will absolutely stun you when first you see it, and every time you see it! Dykes Medal, 1943.

Solid Gold

Each \$1.00, Three \$2.80, Doz. \$10.00

A very deep solid gold with a cast of orange. Huge in size with a flower very broad in all its parts. One of the very fine deep golden yellow varieties.

Caroline Jane

Each \$1.00, Three \$2.80, Doz. \$10.00

A superb blue-dotted plicata with enormous flowers well borne on fine stems. Delicate, distinct violet-blue markings are etched on glistening snow white.

Blue Sapphire

Each \$1.00, Three \$2.80, Doz. \$10.00

Here is a blue Iris of extra large size and exquisite purity. Heavenly silvery blue. Makes a magnificent clump. Its charming ruffling belies its extra heavy substance. An Iris that wind will not blow over nor rain injure.

Elmohr

Each \$1.00, Three \$2.80, Doz. \$10.00

Dr. Loomis of Colorado originated this magnificent masterpiece, which the American Iris Society referred to as a sensation. Its immense, beautifully rounded flowers are colored somewhat between Bishop's purple and mulberry-purple. Both flower and color are highly praised by the keenest of Iris judges. It is robust, free blooming, hardy, thrives anywhere; foliage lush, blooms immense. What more could be asked? Flowers of exceptionally large size, larger than those of any other variety and greatly contribute to the distinction of this wonderful variety.

Happy Birthday

Each \$1.00, Three \$2.80, Doz. \$10.00

This is one of the most famous of the Hall flamingo pinks and a great favorite. It is a very vigorous, free growing light pink. You must have this in your collection without fail.

Wide World

Each \$2.00, Three \$5.70, Doz. \$20.00

Of particular interest because it is the first blue and white reverse bicolor. The intensification of blue toward the center of the flower, especially on the standards, and the white falls is unique.

First Violet

Each \$1.50, Three \$4.25, Doz. \$15.00

A remarkable Iris of majestic proportions. A self of clean, sparkling manganese-violet with blue highlights. The wide clean haft and the ideal spacing of the blossoms on tall, sturdy stalks, make it outstanding.

Golden Sunshine

Each \$1.00, Three \$2.80, Doz. \$10.00

Here we have an Iris of such lovely form, excellent habits and generous size, that it would be outstanding in any color. Pure soft yellow absolutely free from any other shadings, its massive flowers create a pool of golden sunlight in the garden. One of the finest yellow Iris.

Harbor Blue

Each \$1.00, Three \$2.80, Doz. \$10.00

Sapphire blue describes its color best. Flowers are large and leathery of substance, making it practically weather proof. Stems are rugged, well branched, flowers produced abundantly and superb in color. Here is a tip-top blue Iris.

Russet Wings

Each \$1.00, Three \$2.80, Doz. \$10.00

A smooth blend of gold, copper and apricot melting into a true russet self. Wide standards, perfectly domed and flaring falls which ruffle at the edges make this a lovely Iris. A beautiful shade which blends perfectly with light blue.

Sable

Each 75c, Three \$2.15, Doz. \$7.50

Almost black; a uniform shade of deepest blue-black-violet, with blue beard. Sable has every attribute that a fine Iris should possess; large size, reasonably tall stalks, thick substance and a wonderfully lustrous sheen. Everybody wants Sable.

Great Lakes

Each 85c, Three \$2.45, Doz. \$8.75

The purest of the blue Iris. Winner of the Dykes Medal. No other blue Iris can match it for color, hardiness and freedom of bloom. The flowers are of superb substance with a pronounced flare, crispy petal texture and are strikingly fine. Rugged and hardy, exceedingly free blooming, we repeat it is unquestionably the finest of all blue Iris. Yearly, we receive reports from customers how fine it is and that they rank it as one of the finest Iris in their collection. We recommend it without hesitation.

Paradise Pink

Each 75c, Three \$2.15, Doz. \$7.50

A self-color of a clear, clean pink with no haft markings and a pleasing reddish tangerine beard. Beautifully formed, slightly ruffled flowers with heavy substance, a quality lacking in so many Iris. Five-inch blooms with arching standards and slightly flaring falls. Splendid branching, vigorous and free-flowering. A pink of real value and resistant to sun, wind, rain. Late flowering. 32 inches.

Orelia

Each 75c, Three \$2.15, Doz. \$7.50

Deep crimson-brown, more red than brown. A handsome, bright flaring flower. The gold lines at the haft reflect a glow in the center of the flower. Many dark and mahogany colored Iris are apt to be dull. Not so with Orelia, it is bright and shiny and has a lively feeling about it. One of the best in the shade.

Golden Majesty

Each 85c, Three \$2.45, Doz. \$8.75

Clusters of bold, gleaming deep gold unfading flowers, on 3-foot stems, place Golden Majesty among the top quality of yellow Iris. The color is rich and clear and stands out handsomely among other flowers. While not one of the newest of Iris it has not been beaten; each spring its golden masses of flowers defy competition. In our opinion it reigns supreme among the yellow Iris.

Blue Rhythm

Each 75c, Three \$2.15, Doz. \$7.50

Very large flowers of cornflower-blue softened by a silvery overtone. The large standards are arched and domed, the broad falls are semi-flaring with smoothly colored hafts. Grows from 3 to 4 feet in height, perfectly branched. A very fine blue Iris of recent introduction which we predict will go a long way.

Palomino

Each \$1.00, Three \$2.80, Doz. \$10.00

Most aptly named. Standards are flushed palest pink, falls are pale ivory with a copper amber shoulder and trim around each petal. Bright beard.

carefully labeled for \$5.00

Japanese Iris, Delft Blue

This is the finest of all Japanese Iris. The magnificent delft-blue flowers, veined a slightly darker shade, are of unusually heavy texture as well as beautifully waved. In the center of the flower occurs a tuft of short, curly and thick dark blue petals, made more pronounced by the golden star-like heart. It is a very free flowering variety and not too rank a grower. The flowers are of unusual substance, one can crush the flower petals and they will spring back into shape. The last of the Japanese to bloom. Here is a choice garden plant.

Each \$2.50, Three \$7.15, Doz. \$25.00

Iris Kaempferi - JAPANESE IRIS

The ancient poets called their Iris Ground Rainbows; also Children of the Gods. A promise from them that beauty on earth would ever be. The finest of all their varieties is the Kaempferi which we offer you in a wide choice of colors. Not the least of their fine points is the graceful foliage. A thing of beauty after the blooms are past.

Planted in a mass, or as a border, they are ideal. A few edging a reflecting pool or stream, is something to remember. No matter how fine your Iris collection may be, not to have these is to deprive yourself of something that will make it complete.

Culture. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen to prevent roots from being heaved out of the ground by frost. Plant in spring or September and October. Avoid all lime.

Albatross Each \$2.00, Three \$5.70, Doz. \$20.00

In our opinion, it is the finest white Japanese Iris grown. The bold double flowers are composed of pure white, waxy petals of fine texture. Stems are rigid, each with several blossoms. It is a superb variety.

Eleanor Parry Each \$1.00, Three \$2.80, Doz. \$10.00

Double. Hyacinth-violet, yellow center at base of petals is outlined by blue veining. Especially well formed.

La Favorite Each \$1.00, Three \$2.80, Doz. \$10.00

Double. Very large white petals veined throughout with thin blue lines. A narrow edging of rich purple at the center.

Pink Pearl Each \$2.00, Three \$5.70, Doz. \$20.00

An amazing color, soft rose-pink with opalescent iridescence. A beautiful, free-flowering variety which never fails to cause comments.

Lucia Marshall Each \$1.00, Three \$2.80, Doz. \$10.00

Double, very large and showy. Petals blue-violet. Broad white veining widens near base to form a halo for yellow markings at center.

Nishiki Yama Each \$1.00, Three \$2.80, Doz. \$10.00

Double pansy-violet. Flushed and veined white. Center petals tipped mauve. An unusual combination of colors, not seen in other varieties.

Pyramid Each \$1.00, Three \$2.80, Doz. \$10.00

Double bluish violet. Very large. White center tipped violet. Blue shading and white veining at center of petals.

JAPANESE IRIS

In a Rainbow Mixture of Delightful Colors and Shades

Few plants are as easily grown or provide as beautiful a display of flowers early in summer. Both form of flower as well as the subtle coloring is charming, while the foliage is always graceful and ornamental. The mixture offered here is grown from special seed imported from Japan. It contains a wide range of colors in both single and double flowers. It was gathered from one of the finest collections in that country. If varieties do not particularly matter, we suggest you make a planting of this mixture.

Rainbow Japanese Iris Mixture, Three \$2.15, Doz. \$7.50,
25 \$12.50, 100 \$45.00

Special Mixture of Bearded Iris

This mixture contains only those selected varieties grown and offered by Wayside during recent years. All are free blooming kinds and hardy. This is not a "catch as catch can" lot of plants but a selection of the best.

12 mixed Iris.....\$ 4.50

25 mixed Iris..... 8.00

100 mixed Iris..... 29.00

A Planting of Iris Kaempferi, Rainbow Collection

Iris Pumila

Autumn Flowering—Flowering in Spring as Well

These autumn-flowering Irises have two or more normal flowering seasons each year. They blossom in spring with other early flowering varieties and again in autumn, beginning in September and continuing until killed by heavy frosts. Some of them also flower intermittently throughout the year.

Autumn Queen Each 85c, Three \$2.45, Doz. \$8.75

This is a reliable spring and fall bloomer. A pure snow-white. It belongs in almost the same class as Jean Siret and Lieut. Chavagnac so far as size and height are concerned, but is a little larger and a little taller.

Jean Siret Each 85c, Three \$2.45, Doz. \$8.75

This variety and Lieut. Chavagnac are the most persistent bloomers of the Iris family. They begin to flower quite early in the spring with the earliest miniatures and have a long spring-flowering season. They also have an equally long autumn-flowering season. Clear chrome-yellow.

Lieut. Chavagnac Each 85c, Three \$2.45, Doz. \$8.75

A new everblooming, fragrant, violet-colored variety, with the same qualities as Jean Siret. The two go well together.

Olive White Each 85c, Three \$2.45, Doz. \$8.75

This is a good cream-colored spring and fall bloomer.

Sangreal Each 85c, Three \$2.45, Doz. \$8.75

Somewhat larger than the average Pumila variety as well as an even more profuse bloomer than most of the dwarf Iris. Dozens of short spikes with clear pale yellow flowers in spring and quite a few throughout the summer and autumn.

Spring Flowering Varieties

These beautiful little Irises do not grow over 4 inches high and bloom in April and May. They are fine for bordering flower beds or planting in the rock garden.

Atroviolacea Each 80c, Three \$2.25, Doz. \$8.00

Wine colored, reddish purple; very dwarf, free blooming.

Excelsa Each 80c, Three \$2.25, Doz. \$8.00

A very dwarf pale lemon-yellow; very free flowering.

Keepsake Each 80c, Three \$2.25, Doz. \$8.00

Tiny flowers of brightest yellow on very slender, graceful stems. Dainty and of clean color. Stems 12 inches tall. Very floriferous.

Sambo Each 80c, Three \$2.25, Doz. \$8.00

Dark violet-blue; very distinct and showy.

Sapphire Each 80c, Three \$2.25, Doz. \$8.00

Rich sapphire-blue, most cheerful color. Very prolific bloomer.

Schneecuppe Each 80c, Three \$2.25, Doz. \$8.00

A large pure white; very floriferous.

Tampa Each 80c, Three \$2.25, Doz. \$8.00

Tiny flowers of a delicate redness for a dwarf Bearded Iris, on slender stems 14 inches tall, often gracefully reflexed. Very floriferous.

Iris Sibirica

Iris Spuria

Finest Iris for cut flowers. These are so different from all other Beardless species and hybrids as to deserve a separate sub-division. The flowers are quite unlike all other Irises, and are very artistic, making exquisite cut flowers for which purpose they are used extensively by florists. They are hardy anywhere. While not indispensable to their success, they prefer a moist spot and make a most imposing effect in the garden.

Laevigata Monstrosa Each \$1.50, Three \$4.25, Doz. \$15.00

The Laevigata Iris are closely related to the Japanese Iris or Kaempferi and in Japan it is considered more handsome than the Kaempferi. They will also grow readily where the Kaempferi is not happy. Siberia being its homeland as well as Japan, it is extremely hardy. Handsome blue flowers on 15 to 18 inch stems. Are freely produced in June.

Monnieri Each \$1.50, Three \$4.25, Doz. \$15.00

A soft yellow. The flowers have rather broad petals and are of smooth texture. Height 3 feet. Superb cutting.

Ochroleuca gigantea Each \$1.50, Three \$4.25, Doz. \$15.00

A stately garden plant and a beautiful long lasting cut flower. In good rich moist soil it will grow 5 feet or more. The flowers have pure white standards while the falls are yellow with a quarter-inch margin of white. An A-1 plant for garden or cutting.

Ochroleuca, Golden Nugget Each \$1.50, Three \$4.25, Doz. \$15.00

This is a fine golden yellow selection from the type. Grows same height and size except its flowers are rich golden yellow. A beautiful plant for the garden and superb for cutting.

Iris Sibirica

A handsome group of Beardless Iris. All are readily grown, prolific in blooming; have handsome foliage and are, you might say, a permanent installation in the garden. They require no care and are ironclad hardy. But like any other plant of that nature a little care and feeding brings superb results. We supply plants which give immediate results.

Caesar's Brother Each \$1.00, Three \$2.80, Doz. \$10.00

A stately plant not too tall, 30 inches high. It is the best of the entire lot of dark blue Siberian Iris and was given Honorable Mention by the American Iris Society. The flowers are an unusually rich black-pansy-violet of a beautiful depth of color. A superb plant for any flower garden.

Gatineau Each \$1.00, Three \$2.80, Doz. \$10.00

Handsome well formed flowers of clear light blue richly veined and marbled. They grow on tall, wiry stems which occur in an amazing quantity. Fine foliage throughout the summer. A distinct and lovely variety which provides interest in the garden as well as an abundance of lovely cut flowers. About 40 inches tall.

Llewellyn Each \$1.00, Three \$2.80, Doz. \$10.00

The flowers are large and of a most unusual shade of soft blue with darker veins showing. It is a prolific flowering kind. Stems are wiry and about 40 inches tall. An excellent garden plant and fine for cutting.

Perry's Blue Each \$1.00, Three \$2.80, Doz. \$10.00

Beautiful sky-blue flowers by the hundreds. A fine strong plant with good foliage. Grows about 40 inches tall. Its stately form as well as its free-flowering have made this one of the most popular varieties.

Royal Herald Each \$1.25, Three \$3.50, Doz. \$13.00

A free-flowering variety with rich plum-purple flowers. The "falls" are large and drooping velvety black. A handsome plant at all times and stunning when its 3-foot high flower stems are topped with flowers. Hardy anywhere and requires no care.

Snowcrest Each \$1.25, Three \$3.50, Doz. \$13.00

An exquisite, hardy Iris; the flowers are of a snowy whiteness, large and well formed, produced in great abundance; foliage light and graceful. A gem for flower border or waterside. 3 feet high.

Tunckhannock Each \$1.25, Three \$3.50, Doz. \$13.00

Pure white flowers somewhat larger than those of Snowcrest. Plant and flower stems about 12 inches shorter than Snowcrest. It is a clean nice plant for foreground planting. Increases rapidly and requires no special care.

Tycoon Each \$1.25, Three \$3.50, Doz. \$13.00

A handsome foliage plant throughout the entire year which is transformed at blooming time into a fountain of rich blue-violet. Dozens of stems, each one topped with several blossoms. Flowers over a long period, making a wonderful show in the garden and are excellent for cutting as well.

MONARDA - Bee-balm; Bergamot

The flowers are borne in close heads or whorls on stems about 2 to 3 feet high, surrounded by colored bracts, and the leaves are more or less fragrant. Attractive plants for the semi-shady or sunny borders, the wild garden, or for the city gardens.

Culture. Grow in ordinary soil in sunny borders or in light shade. All may be naturalized in the wild garden. Plant in bold groups in autumn or spring, 10 inches apart. Divide and replant every third year.

Adam Each \$1.25, Three \$3.50, Doz. \$13.00

The newest and best of the Bergamots. The compact growth and large flower head put Adam on top of the list. In England where it originated it is quickly replacing Cambridge Scarlet, because the color red is more pleasing and flowers are much more freely produced; the flowering period also lasts over a long time. Does well in light shade but develops its fullest when grown in full sun. A perfect border plant of easiest culture you'll enjoy growing.

Didyma, Cambridge Scarlet Each \$1.10, Three \$3.00, Doz. \$11.00

Brilliant crimson-scarlet flowers are produced freely from June until August. A good plant for wild garden as well as border or garden in the city where other flowers don't grow well.

Didyma, Croftway Pink Each \$1.10, Three \$3.00, Doz. \$11.00

Not many new plants arrived from England in wartime but this is one of them, and it's a valuable acquisition. A most appealing rich rose-pink. Hardy and free blooming. Like other Bergamots, it presents an irresistible attraction for hummingbirds. Does well in shady gardens and is excellent for cutting. It replaces the old variety Salmon Queen which we have discontinued.

Mahogany Each \$1.10, Three \$3.00, Doz. \$11.00

Presenting a vivid new color nuance in an old, greatly loved family—the Bee-balm or Oswego Tea. Striking cluster heads of fragrant, whorling flowers of deep Indian-lake-red, like Currant jelly. Fine for mid-summer bouquets. Distinctly perfumed leaves and blooms. Height 3½ feet. A handsome, long flowering, easily grown, trouble free plant. What more could be asked?

OENOTHERA - Evening Primrose

The species named below are especially suitable for growing on the margins of sunny borders and rock gardens, and make a continuous and brave display of color throughout the summer with little attention.

Culture. Require a well drained medium sandy soil freely intermixed with well-decayed manure and a sunny position to grow and flower freely. Show to the best advantage when grown in groups. Plant 8 inches apart in spring or fall. They are apt to perish in winter if grown in heavy damp soils.

Youngi

Each \$1.00, Three \$2.80, Doz. \$10.00

A strong, stocky, large-leaved plant with firm, shiny foliage, numerous bright lemon-yellow flowers on stems about 24 inches tall from June to August. Iron-clad hardy even on heavy clay soils. Does well in full sun and is valuable for growing in light shade; multiplies freely.

PACHYSANDRA TERMINALIS. See page 3.

PLATYCODON - Chinese Bellflower

Very satisfactory hardy plants for the sunny border. It has broad, blue or white, bell-shaped flowers all summer and is therefore a very fine garden plant.

Culture. Must be grown in a light, more or less sandy soil, in a well drained, sunny border. If the border is slightly elevated so much the better. Plant in early spring or fall, 8 inches apart. Disturb as little as possible.

Apoyama

Each \$1.25, Three \$3.50, Doz. \$13.00

A beautiful and easily grown dwarf Japanese species. Large, violet-blue, cup-like flowers on very low stems, seldom over 6 inches tall, more often 4 inches high. Has fine leathery dark green foliage and it blooms almost the entire summer. We advise planting 3 or 6 roots in a clump for continuous and fine effect. Perfectly hardy and not particular about soil. Makes a nice showing in front of the flower border.

Grandiflorum

Each 90c, Three \$2.50, Doz. \$9.00

Large, showy, deep blue flowers on 20-inch spikes are produced all summer. A splendid plant for the hardy border.

PLUMBAGO - Leadwort

Larpentae

Each 95c, Three \$2.70, Doz. \$9.50, 100 \$57.50

One of the most desirable of late blooming low growing hardy plants. If left undisturbed it will very soon spread into a clump 12 to 18 inches in diameter, not over 6 to 8 inches high, solidly covered with small clusters of bright peacock-blue flowers during late summer and fall. It does perfectly in semi-shady or very hot corners or equally as well at the base of shrubs. It may also be used as an edging to a walk or garden path. Its extra long period of blooms plus its fine, leathery, small foliage set it apart and it is considered one of the finest of garden plants. Grow it in well drained soil; it does perfectly in sand. Space plants 8 inches apart and spread roots flat when planting. It starts into growth quite late in spring so don't be alarmed if no new growth appears promptly after planting. Cover lightly in very cold locations during winter. Once planted it is there to stay for years to come.

POLYGONUM - Dwarf Lace Plant—See page 1.

PYRETHRUM - Colored Marguerite or Painted Daisy

They produce showy flowers of all shades of color, except blue and yellow, freely on long stems throughout spring, which are of inestimable value for cutting. They grow in neat, compact tufts, and have elegant, finely cut foliage, which adds to the attractiveness of the plants.

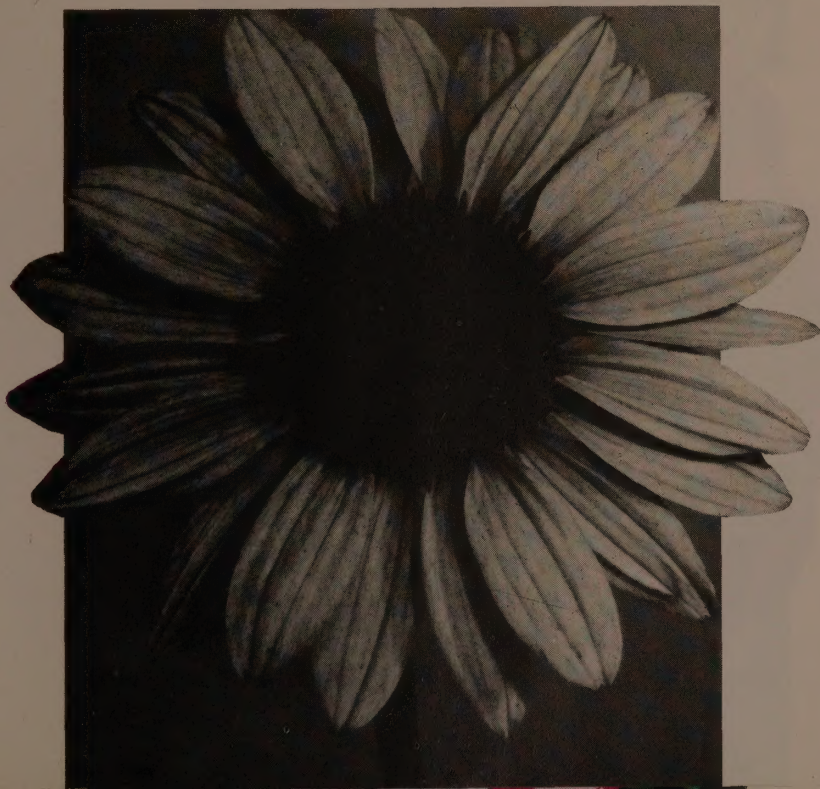

Culture. The best time to plant is in spring; early fall planting is also very successful. Grow them in groups of not less than three plants, planted a foot to 15 inches apart.

Finest Mixed English Varieties

Three \$2.15, Doz. \$7.50

This mixture contains double and single-flowered sorts in many shades of pink, rose and white. Strong clumps that will give immediate results.

Rudbeckia, The King

PRIMULA

This genus contains many species of interesting hardy plants suitable for the rockery, the waterside and the border. No garden or rock garden is complete without a liberal planting of all sorts offered.

Culture. Primulas will succeed in good, rich, loamy soil freely mixed with leaf mold. All require light shade. Most gardens contain a damp, shady spot, and this would be an ideal place for growing hardy Primulas. Plant in early spring or early fall, 4 to 6 inches apart.

ACAULIS, Blue Beauties

Each \$1.10, Three \$3.00, Doz. \$11.00

A hardy strain of fascinating blue primroses. They vary in color slightly but all are deep rich blue with a small golden eye. We obtained our stock in Europe and have grown a fine lot of plants in Mentor where visitors have been most enthusiastic about them when they were in bloom this spring. Here is something new and good! Grow them in light shade, water frequently during dry spells in summer. For best effect grow 3 or more plants together.

POLYANTHUS - Primrose

The Polyanthus was obtained by crossing the Cowslip (*Primula veris*), and the Primrose (*Primula vulgaris*). It has the large flowers of the Primrose and the flower umbel of the Cowslip.

Culture. They like a moist, shady position, and rich, liberally manured soil.

Pink and Rose Shades

Each 70c, Three \$2.00, Doz. \$7.25

The mixture is made up of rose and pink tinted flowers of unusually large size and lovely colors and shades.

Pacific Giants in Mixed Colors

Three \$2.00, Doz. \$7.25

A superb mixture of unusually large flowers in a tremendous range of colors. The plants are vigorous and exceptionally free-flowering. We have never seen anything like them.

RUDBECKIA - Coneflower

Hardy, free-flowering and easily grown perennials, somewhat akin to the Sunflowers in habit. Excellent and showy plants for sunny or partially shaded borders, and for yielding flowers for cutting.

Culture. Ordinary soil in sun or shade. Can be grown singly or in groups. Plant in autumn or spring, 12 to 15 inches apart. Divide and replant every fifth year.

Goldsturm

Each \$1.10, Three \$3.00, Doz. \$11.00

Developed in Europe during the war where it is extremely popular. The large, deep yellow Daisy-like flowers often 3 to 4 inches across have a handsome bronzy black cone in the center. They are produced in the greatest abundance on nicely branched stems, blooming throughout July, August and September. Here is a plant which is not bothered by insects, heat or drought and is hardy anywhere; requires practically no care. A fine new addition to the summer blooming hardy plants.

The King

Each \$1.10, Three \$3.00, Doz. \$11.00

It bears its large Daisy-like flowers which are maroon-red in the center shading lighter toward the edge of the petals, on stout branching stems. An established clump will produce from 1 to 20 fine spikes, never failing, no matter how hot or dry it may be. From half open buds to the orange-brown seed pod, the plant is always attractive. Insect free, not bothered by weather, easily grown, almost indestructible. Height 3 feet.

SCABIOSA - Scabious or Pincushion Flower

Charming perennials for border culture and for cut flowers. The Scabiosa caucasica are particularly valuable for the latter purpose, as its large, showy, blue or white flowers are borne on long stems. The species are of easy culture, and desirable to grow in sunny borders.

Culture. All will thrive in well drained, good, ordinary soil, which is not heavy or damp. Cold and damp are fatal to these plants. An ideal soil for them is a sandy loam. Plant in early autumn or early spring. The plants are best in groups of three or more. Plant about 8 inches apart. A full sunny position is essential.

Caucasica

Each \$1.10, Three \$3.00, Doz. \$11.00

(Blue Bonnet). Their lovely flowers are a soft and charming shade of lavender; commence to bloom in June, throwing stems 18 to 24 inches high until September.

Giant Pacific Polyanthus

Paeonias - Peonies

(We do not ship Peonies into California, Washington, or Oregon.)

The numbers or RATINGS given immediately below the names are the averages tabulated from the votes of the members of the American Peony Society throughout America and Canada. Ten is highest possible score; none under seven are offered. This list contains the best only.

Mary E. Nicholls

Philippe Rivoire

Kansas

Red

- Big Ben** Each \$3.00, Three \$8.50, Doz. \$30.00
A large dark red bomb-like flower on stiff stem. Flowers produced in goodly quantities. Not only a superb dark red for garden use but a most valuable sort for the commercial cutflower growers. Especially good for the warmer sections of the country.
- Felix Crousse** Each \$1.50, Three \$4.25, Doz. \$15.00
A dependable, attractive red that has given satisfaction for many years. A variety that will stand the test of time for as many years as Felix Crousse has, surely must be good. Color is brilliant crimson of even tone and silky luster.

- Kansas** Each \$4.00, Three \$11.00, Doz. \$40.00
An early bright red held on a good strong stem. Foliage clean, dark green and has always been found to be healthy. The flower is full double, with a few hidden stamens. A good flower for show purposes, makes a good cut flower, and holds up exceptionally well.

- Mary Brand** Each \$2.00, Three \$5.70, Doz. \$20.00
(8.7) No red Peony ever won favor so quickly as Mary Brand. Always found among the winning reds in every show room. Color so distinct it is easily recognized by amateurs, no matter how often they find it in our fields. A red in which there is little trace of purple. One of the most satisfactory reds as a cut flower as it will last a week if cut in the bud.

- Monsieur Martin Cahuzac** Each \$3.00, Three \$8.50, Doz. \$30.00
Dark purple-garnet with black reflex. One of the darkest Peonies. Globular semi-rose type, strong grower, free bloomer, dark green foliage with red stems. Blooms midseason. This is the darkest of the red Peonies.

- Philippe Rivoire** Each \$3.50, Three \$9.75, Doz. \$35.00
(9.2) A very bright rich crimson coming into bloom late midseason. The beautiful form of this flower and its uniform soft rich color make it a flower loved by all who see it. This is a fine show flower and is absolutely void of stamens. It has a pleasing fragrance and is the highest rated of any red Peony.

White

- Festiva Maxima** Each \$1.50, Three \$4.25, Doz. \$15.00
(9.3) Paper-white, crimson markings in center. Very large and full rose type; very tall, strong growth. Early.

- Hans P. Sass** Each \$2.00, Three \$5.70, Doz. \$20.00
A very large rich satin blush-white suffused shell-pink, alluringly illuminated with an inner glow. A lovely variety for garden as well as cutting.

- Kelway's Glorious** Each \$3.00, Three \$8.50, Doz. \$30.00
(Kelway, 1909) (9.8) Buds slightly tinted pink, opening into large blossoms of iridescent white. Fragrant. Late midseason. This is undoubtedly one of the finest Peonies.

- Le Cygne** Each \$3.50, Three \$9.75, Doz. \$35.00
(9.9) Very large, perfectly formed flower, freely produced; cream-white with a touch of green at the heart. The finest white. Received the highest rating of any Peony.

- Lillian Wild** Each \$2.75, Three \$7.85, Doz. \$27.50
Its very large flowers are pure white, of full rose type; exquisite form and grace; in plant habit it is excellent, having strong stems, good foliage and vigorous growth.

- Mary E. Nicholls** Each \$2.75, Three \$7.85, Doz. \$27.50
A grand white Peony. Many amateurs consider this just as good or better than Kelways Glorious, and any Peony that achieves that distinction is quite a Peony. Wonderful flowers on stiff stems in abundance.

PEONIES IN MIXED COLORS

Three \$2.75, Six \$5.00, Doz. \$9.00

This mixture is a choice one. It contains many varieties in a wide range of colors and forms. Each season small quantities of a great many kinds are left. These are put together along with several other varieties of which we have a surplus. A real buy for good cut flowers and lots of color.

Lottie
Dawson
Rea

Walter
Faxon

Pink

Hermione *Each \$3.00, Three \$8.50, Doz. \$30.00*
Apple blossom pink blooms on strong stems. Excellent in every respect; a tireless bloomer. Makes a magnificent show year after year.

Loren Franklin *Each \$3.50, Three \$9.75, Doz. \$35.00*
A deep pink Peony of more than ordinary merit. Much in demand. Very large, full rose type with stiff stems and foliage to the ground. Believe us, this is a beautiful dark pink.

Lottie Dawson Rea *Each \$3.50, Three \$9.75, Doz. \$35.00*
A very trim flower of light pink, with exquisite tints. Received Honorable Mention Certificate of the A.P.S. Stock scarce. We believe this one will make a real cut-flower variety.

Mrs. Franklin D. Roosevelt *Each \$4.00, Three \$11.00, Doz. \$40.00*
This lovely pink has attracted as much attention as Mrs. F. D. R. herself. It is truly a fine introduction of a deep Therese-pink with extremely long, overlapping, cupped petals which enfold a real rosebud center. Good substance, keeps well. Gold Medal Award Winner, 1948. Early to midseason blooming.

Martha Bulloch *Each \$2.25, Three \$6.45, Doz. \$22.50*
Mammoth cup-shaped blossoms often 9 to 12 inches across. The largest of the good Peonies. Deep rose-pink in the center shading to silvery shell-pink in the outer petals. Stalks strong and erect.

Mons. Jules Elie *Each \$2.00, Three \$5.70, Doz. \$20.00*
(9.2) A beautiful silvery pink. Broad reflexing guards with a high pyramidal body of semi-quilled petals converting to an apex. One of the largest, handsomest and most lasting cutting sorts in existence.

Nick Shaylor *Each \$3.00, Three \$8.50, Doz. \$30.00*
A most outstanding beauty and one much sought after. Blush or light pink, with occasional red markings. Very fine form, good plant growth and does well in all sections of the country. No fine collection complete without it.

Sarah Bernhardt *Each \$1.50, Three \$4.25, Doz. \$15.00*
(9.0) Apple-blossom-pink, very free blooming and flowers of perfect form on graceful stems. This is the ideal pink cut flower Peony.

Walter Faxon *Each \$2.25, Three \$6.45, Doz. \$22.50*
(9.3) Semi-rose type; midseason. A very distinct, delicate rose colored flower. Tall, free bloomer. Those who know this variety consider it one of the best pure pinks.

Lillian Wild

Loren Franklin

Big Ben (See page 72)

Paeonia Officinalis Rubra fl.-pl.

Hans P. Sass

(See page 72)

Nick Shaylor

(See page 73)

PAEONIA OFFICINALIS HYBRIDS

Officinalis, James Crawford Weguelin

Each \$3.00, Three \$8.50, Doz. \$30.00

Large, open glowing fiery crimson flowers, 8 inches in diameter, of an intense brilliant color one rarely ever sees; nothing could be better for a bright show. A plant that particularly appeals to men.

PAEONIA OFFICINALIS (Early Peony)

Officinalis albo-plena

Each \$2.00, Three \$5.70, Doz. \$20.00

Double white.

Officinalis rosea fl.-pl.

Each \$2.00, Three \$5.70, Doz. \$20.00

Brilliant deep rose-pink, fragrant flowers; one of the earliest to bloom.

Officinalis rubra fl.-pl.

Each \$2.00, Three \$5.70, Doz. \$20.00

The old-fashioned early red, that even in our latitude blooms before Decoration Day.

Hermione

(See page 73)

Semi-double Peony, Aerie

ANEMONE-FLOWERED PEONIES

In place of the pollen-bearing stamens, the stamens and anthers are greatly enlarged into narrow, thick, twisted petaloids of various colors, forming a dense cushion. They produce an enormous amount of flowers, creating a riot of color in the garden and are superb for cutting, lasting longer than the double flowered varieties.

Aerie *Each \$4.00, Three \$11.00, Doz. \$40.00*

A magnificent semi-double variety that holds its cup shape very well. Large cluster of golden-yellow stamens fill the center of each flower. Blooms last long on the plant and for cut flowers. An outstanding and artistic variety. Sparkling white blooms.

Isani-Gidui *Each \$4.50, Three \$12.50, Doz. \$45.00*

Pure white with golden center resembles a large white Poppy.

Krinkled White *Each \$4.00, Three \$11.00, Doz. \$40.00*

A large single flower with great, broad, pure white petals like crinkled crepe paper. Undoubtedly the best single white. Won best single white at American Peony Show, 1949, and has been a consistent ward winner since.

Mikado *Each \$2.50, Three \$7.15, Doz. \$25.00*

A rich red with long, rounded petals of brilliant red surrounding a great dome of golden staminodes. Exceedingly brilliant.

Single Flowered Peony, Westerner

Single Flowered Peony, Isani-Gidui

Nippon Beauty *Each \$2.50, Three \$7.15, Doz. \$25.00*

A late, rich deep garnet-red. Center petaloids are garnet-red edged with golden yellow. A strong grower and a free bloomer. An excellent variety that is always admired. Makes a superb show in the garden and is lovely for cutting.

Sea Shell *Each \$4.00, Three \$11.00, Doz. \$40.00*

This pink single was always one of the most admired exhibits at our Peony shows. Large flowers of a bright lively pink with a full center of yellow stamens on strong stems. A center of attraction in the garden and simply beautiful as a cut flower. One of the best.

Westerner *Each \$3.00, Three \$8.50, Doz. \$30.00*

Guard petals very large and of a beautiful shade of light pink. The center is filled with yellow staminodes that are extremely firm and erect. The cup-shaped form is gracefully poised and held rigidly erect. One of the finest Japs, a thrill to all who see the flower in the garden or vase.

Sea Shell

Paeonia Moutan - Chinese Tree Peonies

CHINESE TREE PAEONIA

The above illustration gives you an idea of the type of plant we offer as "Choice Kinds without Names." They are magnificent.
Each \$7.00

Tree Peony, Surprise

One of the choicest plants available for the garden. Quite hardy, and does well under the simplest treatment. It flourishes in the most astonishing manner, bearing blossoms from 6 to 8 inches across, which increase every year in beauty and size. A grand addition to the garden, as they do not die down to the ground like the herbaceous sorts, but make fine brushes 3 to 4 feet in height covered every spring with elegant flowers.

Culture. It is advisable to avoid wind-swept locations and to protect the early bloom buds in case of late spring frosts. The south or east side of a planting of evergreen shrubs, wall or building is a very good location for Tree Peonies. Mulching is advisable the first winter after transplanting. Apply mulch of light material after ground is frozen solid. Any good, well drained garden soil is satisfactory. **Never cut back woody branches.**

5- to 6-yr.-old plants. Ready to bloom.

Godaishu *Each \$10.00*
Nearly full double blossoms of pure white with clusters of yellow stamens nested in center provide striking white and gold combination. Tips of petals ruffled. Flowers are of great size. It is one of the finest of the white Tree Peonies which are so much sought after.

Hakuow Jishi *Each \$9.00*
Semi-double white flowers with rich ivory sheen at center. Petals are crinkled paper-white as they open, heavily frilled at tips.

Hanadayin *Each \$9.00*
This is the famous true purple Tree Peony. Magnificent fully double flowers make this a most unusual variety, unquestionably the best in purple shades.

Higurashi *Each \$9.00*
The many crimson blooms make this a very showy variety. Large, semi-double flowers of this vivid color provide a beautiful effect.

Jitsu Getsu Nishiki *Each \$9.00*
A beautiful variety with large, open flowers. Two rows of petals. Bright cherry-red shading to crimson at base. Wonderfully formed, edges of petals gently frilled. Has nice fragrance.

Kamata Fuji *Each \$9.00*
A most unusual color rose-red at base shading to old rose. Tips of petals gently frilled. An overtone of lavender reflected throughout. A very handsome variety.

Rimpow *Each \$9.00*
Brilliant deep purple self with yellow center. Large flowers. Double.

Shirotai *Each \$9.00*
White with yellow center. Semi-double, saucer-shaped flowers. Frilled edges.

Surprise *Each \$20.00*
Very heavy double flowers, the ground color of which is yellow but heavily veined with cochineal-red as well as vermillion stripes. When in bloom it is truly a surprise!

Tama Fuyo *Each \$9.00*
One is immediately impressed by the delicate freshness of this variety. Blooms are semi-double, light rose-pink, deepening at center to rhodamine-pink. Large heavily clustered petals at center. An A-No. 1 variety in every respect.

Ukare Jishi *Each \$9.00*
Beautiful semi-double flowers of brightest red. This is a very floriferous variety and good grower.

Yachiyot Subaki *Each \$9.00*
Beautiful shade of phlox-pink shading to soft Neyron-rose at tips. Long petals are ruffled and fringed at edges giving this a most artistic appearance. Haunting fragrance not soon forgotten, and for clearness of color, this is unsurpassed.

Yaso-No-Mine *Each \$10.00*
Large double flowers of the purest white, growing on strong, upright stems. We believe this to be the very finest white. Grows into strong bushes and is exceedingly free flowering. A variety we have spent many years increasing; it will be a show piece in anyone's garden.

TREE PEONIES BY COLOR

We particularly recommend you purchase Tree Peonies by color. It is less costly to produce them that way and for that reason can be sold for less. The plants we offer are 5 to 6 years old; will bloom promptly the season after they are planted —no waiting! A real bargain at \$6.00 each.

Pink Flowering Tree Peonies	Each \$6.00, Three \$16.00

Papaver Orientale

Oriental Poppies are the royal representatives of this popular family. Rich tints of rose, salmon-pink, white and lavender, as well as Indian-copper-red are now available besides the brilliant reds. Growing 3 to 3½ feet in height, they contribute a rare splendor of bloom throughout the late spring. Plant them singly or en masse; they have a way of dominating, by their gorgeous display of rich and bright coloring and the splendor of blooms, that portion of your garden where they are placed.

They flower in May and June, at which time their sheer burst of vivid and brilliant colors renders them without equal.

Culture: Almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in the fall or early spring before the first of May, 12 inches apart. Give them water occasionally during the dry spells in the early part of the season.

Aksarben Each \$1.50, Three \$4.25, Doz. \$15.00

A bold and brilliant rich rose opal pink flower on stiff 3 foot stem. A rare shade of pink somewhat between the colors of Helen Elizabeth and Salome. A free blooming strong growing variety of the first water.

Barr's White Each \$1.50, Three \$4.25, Doz. \$15.00

For contrast there is nothing better than Barr's White. It is the only white Poppy we grow, we have not found a better one yet. It is free blooming; flowers are large pure white with small purplish black spot at the base; stems are rigid and about 30 to 36 inches tall. It is quite a rare sight to see a white Oriental Poppy alongside a brilliant red. Be sure and add some to your collection

Helen Elizabeth

Watermelon

Surprise

Cowichan

Salome

Oriental Poppies

Cowichan *Each \$1.50, Three \$4.25, Doz. \$15.00*
A superb British Columbia contribution to our Poppy collection. We consider it the finest of the turkey-reds. The truly substantial flowers grown 40-inch rigid stems and create a brilliant mass of color. Of easy culture and permanent. We recommend it without hesitation.

Crimson Pompon (Double) *Each \$1.00, Three \$2.80, Doz. \$10.00*
Blood-red, pompon-like flowers, fully double. The first double Poppy in a really red shade. It is of medium height, multiplies readily and flowers very freely.

Helen Elizabeth *Each \$1.25, Three \$3.50, Doz. \$13.00*
Considered by many as one of the best pinks. It is a rugged grower. The straight 34-inch stems are topped by La-France-pink flowers without dark spots. We also think it one of the best.

Salmon Glow (Double) *Each \$1.00, Three \$2.80, Doz. \$10.00*
A fine double salmon-orange not to be confused with Olympia. The flowers are exceptionally large, fully 8 inches across. It is a Dutch origination and selected for the Wisley trials. It received a First Class Certificate in Holland and is spoken of as a beautiful double salmon-orange. Strong, upright growing Poppy.

Salome *Each \$1.25, Three \$3.50, Doz. \$13.00*
Here is a real beauty. The nicely formed flowers are colored a beautiful French rose. A plant in flower makes a showing you will not soon forget. There are so few flowers of this color, we feel sure this will be a favorite with all gardeners.

Sonate *Each \$1.25, Three \$3.50, Doz. \$13.00*
Beautiful soft camellia-rose in great numbers grace this variety in early spring. Large in size, pleasing in color, it stands out among the Poppies as one of the choice ones. A rare shade of clear deep rose-pink we have never seen in Oriental Poppies before.

Souvenir

Sultana

Barr's
White

Crimson
Pompon

Souvenir *Each \$1.25, Three \$3.50, Doz. \$13.00*
Vivid poppy-red with copper tinting. Its huge flowers are flamboyant and commanding. It is a rugged grower and free blooming. This will be a popular variety in the years to come and well worthy of being in this collection.

Sultana *Each \$1.25, Three \$3.50, Doz. \$13.00*
Brilliant watermelon-pink flowers of extraordinary size make a wonderful showing in spring. No other color in Poppies is like it and few Poppies produce as many flowers or last as long. Here is a variety to make your mouth water.

Sungod *Each \$1.25, Three \$3.50, Doz. \$13.00*
A brilliantly colored Poppy, bright saturn-red with golden glow. Outstanding in color, vigor and bloom. There is nothing like it. Shows up brilliantly in the garden.

Surprise *Each \$1.25, Three \$3.50, Doz. \$13.00*
Giant flower in unusual quantities of the brightest vermilion-red which is enhanced because of the pronounced blue-black, round spots at the base of the flower. Its rich clear color is not matched by the older varieties.

Watermelon *Each \$1.50, Three \$4.25, Doz. \$15.00*
The flowers are 6 to 7 inches across and of clear bright watermelon-pink. Our illustration is somewhat too dark and does not do this fine variety justice. Stems are 30 inches tall, rigid, and topped with magnificent flowers. Blooms freely, is permanent and requires no care. One of the best in our collection.

Mixed Colors of Oriental Poppies

This mixture is made from the named varieties offered in this list. If you are not particularly interested in varieties, this mixture would suit you perfectly.

Three \$2.80, Six \$5.25, Doz. \$10.00

Hardy Phlox

The Real
Backbone of
Your Summer
Garden

S EARCH where you will, say what you will, after all is said and done, Phlox still holds its head highest as an indispensable in every garden from coast to coast.

None other has so many desirable attributes or adapts itself so happily to all gardens. Do you know of any that give an equal in showy, colorful bloom? **What other hardy plant needs as little attention or grows as prolifically and flowers so long?**

What one of your garden family, dollar for dollar, stretches its bloom over so long a period? Gives you so much for your money?

For first blooming in early spring comes the welcome Subulata, the delighting Moss or Mountain Pinks, giving you drifts of cheery color.

For blooming in shade there's the Stolonifera Blue Ridge which comes early and continues till early summer. Thrives in sunlight or shade.

For summer until fall there are the members of the Decussata family.

For choicest of all: If you were to ask us what Phlox are the very best of them all, we would unhesitatingly recommend those listed in this book as the finest available to date.

The late Capt. Symons-Jeune has done a beautiful job creating new varieties. All of his best kinds are now offered here.

The hundreds of varieties now available are quite likely to be confusing; we have, therefore, discontinued growing any but the best and newest varieties noted for their clear colors, freedom of bloom, and strong habit. They are offered in this book.

It is easy to grow Phlox

To grow Phlox really well the soil should be well drained, deeply spaded, and enriched with *Wayside Gardens Organic Plant Food*. Planting may be done in fall or spring in a sunny border. Set the plants 10 inches apart. Lift and divide every three or four years, it helps produce big flowers. Never let plants go to seed, never water overhead, always keep blooms and foliage dry, letting hose run slowly on the ground. This method of watering prevents mildew.

RED AND DARK RED SHADES

Augusta Each 85c, Three \$2.45, Doz. \$8.75, 100 \$52.50
The finest American-Beauty-red Phlox ever introduced. A strong growing plant of medium height, about 2½ feet when fully grown, with rich bronzy green foliage and stem. The color remains perfect under all weather conditions. Augusta is a beautiful vivid colored variety of exceptional growth and qualities.

Charles Curtis Each 85c, Three \$2.45, Doz. \$8.75, 100 \$52.50
The color is outstanding and difficult to describe. Sunset-red probably comes nearest to it. It is a fine strong grower about 2½ to 3 feet tall, has good clean foliage. The flower head is large and unusually clear and sparkling due to the fact that the flowers do not discolor in the sun or fade with age.

Leo Schlageter Each 85c, Three \$2.45, Doz. \$8.75, 100 \$52.50
Seldom has one seen a shade of red such as produced by this fine Phlox. Its brilliant scarlet blooms seem to glow with fire. This impression is heightened by the fact that there seems to be a decided orange cast to the blooms. Of splendid habit, about 3 ft. high with full rich heads of bloom.

Spitfire (New) Each \$1.00, Three \$2.80, Doz. \$10.00
Color difficult to define; some people call it orange-scarlet, while others say dark salmon with orange glow. Be that as it may, it is a rare color with a lot of punch and fire, one of the really good Phlox.

WHITE AND WHITE SHADES

Iceberg Each \$1.00, Three \$2.80, Doz. \$10.00
Growth is vigorous. The dark green foliage has a rich, leathery texture. Heavy bloom trusses bear all the majesty and changing shadings of color as the huge floating mountains of ice for which they are named. Traces of the soft Tyrian-red eye extend into the background color of light cobalt violet, so delicate at times as to appear ice white.

Mother of Pearl (New) (Plant Patent No. 1817) Each \$1.00, Three \$2.80, Doz. \$10.00
A magnificent Phlox of bold habit, excellent foliage and large flower trusses. Color is basically white but delicately suffused pink, giving a mother of pearl effect. It flowers over a long period and is a superb companion to any of the light lavender Phlox. A beautiful English introduction.

White Admiral Each 85c, Three \$2.45, Doz. \$8.75, 100 \$52.50
Beautiful big heads of bloom like great mounds of snow. Here is a brand-new white Phlox guaranteed to bring more beauty to your garden. It produces enormous pure white heads and the continually breaking side branches give an excellent late bloom. Reaches a height of 2 to 2½ ft. and blooms profusely in July and August.

PINK AND ROSE-PINK SHADES

Balmoral *Each \$1.00, Three \$2.80, Doz. \$10.00*

A choice new addition to this select color range, combining the distinctive warm pink tones of its huge flowers with robust healthy growth. The color is a soft shade of pink, yet an extra "glow" is provided by a brighter and deeper shade at the center of the florets. The foliage is clean and trouble-free; nothing seems to bother it.

B. Symons-Jeune (New) *Each \$1.00, Three \$2.80, Doz. \$10.00*

A bold tall Phlox growing 3½ to 4 feet high. Rigid stems are topped with big heads of rose-pink flowers with clear crimson eye. Here is a Phlox that knows how to take care of itself; will form a handsome clump in the flower border and make a fine show during the summer.

Chas. Van Delft (New) *Each \$1.00, Three \$2.80, Doz. \$10.00*

New Phlox with big heads of deep pink flowers; about 2½ to 3 ft. tall. Blooms freely over a long period. One of the best new pinks.

Dodo Hanbury Forbes (New) *Each \$1.25, Three \$3.50, Doz. \$13.00*

A magnificent clear pink which has been wanted in this family for 20 long years. The form and build of the spike is perfect and it produces a triangular truss 1 foot 4 inches across. The large pips are of unusually heavy texture and it stands up well to the heaviest storms. In every way an outstanding variety.

Fairy's Petticoat *Each \$1.00, Three \$2.80, Doz. \$10.00*

Lovely delicate shade of soft China-pink on light ground; slightly deeper colored eye. Despite its name it is a sturdy and vigorous grower with bold heads of flowers. One of the fine new varieties.

Olive Wells Durant (New) *Each \$1.25, Three \$3.50, Doz. \$13.00*

Here is a prolific bloomer with strong, branching growth and "color fast" flowers. The immense trusses, nearly 2 feet through, are composed of large, soft salmon pips which have a dark pinkish red eye. Over all effect is clear, light rose. About 30 inches tall. Stem rigid. Good clean foliage. One of Capt. Jeune's best.

Pink Gown (New) *Each \$1.00, Three \$2.80, Doz. \$10.00*

Large trusses of deep pink, clear and sparkling, with slightly deeper shading towards center of flower. A splendid addition to the pink Phlox of which there are so few good ones. Hardy and free flowering, about 30 inches tall.

Rapture (New) *Each \$1.25, Three \$3.50, Doz. \$13.00*

Delicate neyron-rose-pink or cameo-pink with slightly deeper pink center. The clearness of color is instantly noted, no discoloration when fading. A beautiful light pink Phlox. Heavy masses of bloom grow on a rigid stemmed plant of medium height. Rapture is well named.

Lilac Time

Spitfire
(See page 80)

Fairy's
Petticoat

Salmon Beauty *Each 85c, Three \$2.45, Doz. \$8.75, 100 \$52.50*
Rich salmon-pink with white eye. There are many Phlox of this general color, but when all is said and done, we believe Salmon Beauty is one of the first on the list in this shade.

Sir John Falstaff (New) *Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00*
Color is a rich luminous salmon-pink. One of the loveliest colors in the floral pageant of summer. Individual "pips" are large. The flower truss is truly massive. Sir John Falstaff has a first-class habit and a constitution as befits the name — robust, vigorous, with sturdy stems and bold substantial foliage. One of the most accommodating. Height 24 to 36 inches.

Windsor (New) *Each \$1.00, Three \$2.80, Doz. \$10.00*
Big heads of deep rose-pink flowers with darker eye; grows strong and blooms extremely well. A variety which will unquestionably replace older kinds of similar shades. Its nice open head is a bouquet in itself.

PURPLE, LILAC AND LAVENDER SHADES

Amethyst *Each \$1.00, Three \$2.80, Doz. \$10.00*
A color we have been looking for. A Phlox with excellent branching habit and starts blooming about July 15. Of a deeper shade than Lilac Time. Makes nice heads of flowers and is exceedingly free blooming. Grow it near a white or pink Phlox for fine contrast. Height about 24 inches.

Lavender Cloud (New) *Each \$1.00, Three \$2.80, Doz. \$10.00*
A bold and strong growing variety with many flower stems over a long period of time. The flowers are bluish white with soft blue shadings toward the center which is lavender color. Flower heads are large conical clusters on rigid stems. Well named—it is a lavender cloud. Lovely from July until end of September.

Lilac Time (New) *Each \$1.00, Three \$2.80, Doz. \$10.00*
A Phlox with a great future. It has everything. Usually vigorous, attractive foliage, immense flower heads composed of well formed pips. Color a lovely clear lilac from bud stage until flowers drop. It is one of Symons-Jeune finest introductions. Blends perfectly with all shades of pink.

Russian Violet (New) *Each \$1.25, Three \$3.50, Doz. \$13.00*
Large, well formed flower heads of rich violet-purple. A most outstanding color not matched by any other Phlox. There is just nothing like it in color. Height about 26 to 30 inches. Blooms freely and over a long time. Comes to perfection if grown near a plant with white flowers.

Starry Skies *Each \$1.00, Three \$2.80, Doz. \$10.00*
Big broad heads of florets which are palest lavender to white, daintily flamed soft rosy lilac. A most unusual combination making for a distinct flower. It is outstanding as a robust grower and free bloomer. One of the fine new European Phlox.

Amethyst

Sir John
Falstaff

Sedum Spectabile, Meteor

SEDUM - Stonecrop

Culture. Ordinary soil and dry, sunny borders or dry, sunny places in the rock garden will suit all. Spectabile, indeed, will also thrive in shade. Plant in autumn or spring, 4 to 8 inches apart.

Acre *Each 90c, Three \$2.50, Doz. \$9.00*
(Golden Moss). Much used for covering graves; foliage green, flowers bright yellow; prostrate and slow spreading.

Cauticola *Each \$1.10, Three \$3.00, Doz. \$11.00*
A lovely low growing Sedum. Arching branches covered with fleshy gray-green, small leaves, giving a fine effect throughout the summer. However, it is in the late autumn that it is at its best when the plants are covered with rose-red flower heads. We consider this one of the finest late fall flowering plants. Excellent, of course, in rock garden or rock wall. Height not over 4 inches. September and October flowering.

Lidakense *Each \$1.25, Three \$3.50, Doz. \$13.00*
Round fleshy bronzy leaves which turn beautifully red in September. Bright pink flowers at the tip of each arching stem in late summer and early fall. Plant is neat and rosette-like not unlike Sieboldi in form and habit of growth. A choice variety.

Middendorffianum *Each \$1.00, Three \$2.80, Doz. \$10.00*
A really hardy species from Siberia. The short decumbent stems are slender and have narrow leaves which are toothed. During July and August the plants are richly covered with gold-yellow flowers. Never grows over 6 inches high and is not untidy or rampant in growth. An A-1 species for the rock garden or in front of a flower border.

Sieboldi *Each \$1.10, Three \$3.00, Doz. \$11.00*
Round, thick, silvery gray leaves with faint reddish margin all summer. Bright pink flowers in the fall, from September until frost. It is also a good pot plant, easily cared for in the house and forces readily. The loveliest of all the Sedums. There is no doubt about it.

Spathulifolium, Capablanca *Each \$1.10, Three \$3.00, Doz. \$11.00*
This variety we received recently from England and it is one of the nicest of Sedums. Low growing and slowly spreading, its blue-green rosette-like leaf clusters create a fine effect. During May and early June the plants are covered with bright yellow flowers. A fine and orderly variety.

Spectabile, Carmen *Each \$1.00, Three \$2.80, Doz. \$10.00*
A handsome delicately colored Sedum. Well known flower heads often are 10 inches in diameter and softly shaded Persian rose which combines beautifully with the silvery gray-green leaves. Height about 12 to 15 inches tall. An excellent subject for tubs, porches or steps. They do not mind going without water for weeks and will live over winter outside without care of protection. Three plants to a tub make a fine show.

Spectabile, Meteor *Each \$1.00, Three \$2.80, Doz. \$10.00*
Glowing carmine-red flower heads grown on leafy stems about 18 inches tall. The foliage which is a soft gray-green is handsome throughout the year. In summer and early autumn when the brilliant flower heads are at their best, it is one of the showiest of plants. May also be grown in tubs in which they do beautifully, requiring the minimum of care.

Telephium, Indian Chief *Each \$1.50, Three \$4.25, Doz. \$15.00*
A compact, upright growing plant about 10 to 14 inches high; stems are closely covered with gray-green foliage. In early autumn each stem is topped by an umbel of a striking burnished copper or Indian-red. A well established plant will produce 10 or more stems, so that the results obtained from even one plant are truly astounding. It is hardy as an Oak, should be grown in full sun and reasonably dry location; like all Sedums it multiplies readily.

TEUCRIUM - Germander

Shrub-like plants of moderate growth. Chamaedrys has shrub-like, shiny, dark leaves.

Culture. A well-drained, good garden soil is all that is required to grow them to perfection. Plant in fall or early spring, 6 inches apart in full sun, in rock garden or border. Chamaedrys may also be used as an edging to flower beds or garden plants in the small garden.

Chamaedrys *Each 90c, Three \$2.50, Doz. \$9.00, 100 \$55.00*
Glossy green foliage resembling dwarf Boxwood, may be used in place of Boxwood where the latter is not hardy; can be clipped to suit any height up to 12 inches.

SPIRAEA - Astilbe (Goat's Beard; Meadow Sweet)

Very handsome herbaceous perennials. The species named below have handsome divided leaves and flowers borne in graceful, feathery plumes.

Culture. The Spiraeas require a deep, rich and moist soil. Plenty of leaf mold and well-decayed manure must be incorporated with it before planting. They will thrive in shady, moist borders or they may be grown by the waterside.

Deutschland *Each \$1.25, Three \$3.50, Doz. \$13.00*
A lovely pure white variety of strong growth and very free flowering 2-foot spikes. The best white grown.

Red Sentinel *Each \$1.25, Three \$3.50, Doz. \$13.00*
This brilliantly colored new Spiraea not only develops plants that are delightfully decorative, with their bronzy, divided foliage all season, but the flowers are the darkest in color of the family. Height of both plant and bloom spike is about 2 feet, at least a foot of which is a feathery spike of rich deep garnet which appears to be lightly dusted with tiny frost crystals. Bloom lasts over a long period during early summer, providing a vivid splash of unusual color in the border.

Rheinland *Each \$1.25, Three \$3.50, Doz. \$13.00*
Conspicuously beautiful with dense, feathery plumes of brilliant pink.

Venusta magnifica *Each \$1.25, Three \$3.50, Doz. \$13.00*
Attractive fern-like foliage and large plumes of glowing rose-pink flowers make this a beautiful stately plant in bloom as well as out. Flowers throughout July and August on rigid stems 4 to 5 feet tall. Likes a moist location in full sun. Requires no care or frequent dividing. An excellent carefree plant.

TRILLIUM - American Wood-lily or Wake Robin

Spring-flowering perennials with three leaves borne in a whorl, and flowers with three petal-like segments.

Culture. The Trilliums require to be grown in peat and leaf mold in shade or partial shade. Plant in autumn or very early spring, 3 inches apart, in large colonies to produce the best effect.

Grandiflorum *Three \$1.55, Doz. \$5.50, 100 \$32.50*
Excellent plants for shady positions in the hardy border or in a sub-aquatic position. Large, pure white flowers in early spring. 12 to 18 inches high.

STATICE - Great Sea-Lavender

The leathery dark green leaves spring directly from the root stock and the flower stems are stiff and twiggy, bearing their hundreds of small flowers in much branched panicles.

The flowers are very useful for cutting for indoor decoration, also for drying for winter use. Wherever you have encountered difficulty in growing Perennial Baby's Breath you will find Statice a perfectly good substitute.

Culture. Any good garden soil will grow them to perfection, the richer the larger the flower-heads. A sunny location is essential for good color. Will grow well in seaside gardens where salty wind or even salty soil has no effect on them. Require no care, do not need transplanting, and are permanent.

Latifolia, Collier's Pink *Each \$1.10, Three \$3.00, Doz. \$11.00*
From a crown of leathery leaves spring several stiff stems with big heads of flowers composed of dainty pink flowers. Invaluable for cutting or drying as well as airily graceful in the garden. About 18 inches tall; permanent, requires no care or transplanting. Just as the other varieties listed, this plant will grow in salt marshes and all are superb subjects for growing in seaside gardens as neither salt nor hot winds bother them. Where it is difficult to grow perennial Baby's Breath we recommend Statice in its place.

Latifolia *Each 90c, Three \$2.50, Doz. \$9.00*
A valuable plant either for the border or rockery; immense heads, frequently 1½ feet high and 2 feet across, of purplish blue, minute flowers during July and August. These, if cut and dried, last in perfect condition for months.

Latifolia Violetta *Each \$1.10, Three \$3.00, Doz. \$11.00*
A lovely form of the well known Sea Lavender. The heads of violet-blue are splendid and clear in color. A decided improvement over the type which it resembles in every other respect. Lovely cut flower and graceful garden plant.

Statice Latifolia

SOLIDAGO

Golden Mosa

Each \$1.25, Three \$3.50, Doz. \$13.00

This fine English favorite was so named because its sprays of lemon yellow flowers closely resemble the well known Mimosa. Not only are the large plume-like flower sprays most pleasing, its foliage also takes on a soft yellow tint or glow as well, contributing to a fine splash of pleasing soft yellow during August and September. Never over 3 foot high. Don't miss it. This is one of the most popular summer flowering plants in English gardens.

Peter Pan

Each \$1.50, Three \$4.25, Doz. \$15.00

An interesting as well as a lovely cultivated form of Golden Rod. The rigid two foot stems about 30 inches tall require no staking and are clothed in closely placed pendulous leaves not unlike shingles on a roof. Just like "Peter Pan's coat"—on top of stem numerous flower bracts grow horizontally smothered with small deep lemon yellow blooms, outstanding and attractive, starts flowering in late July.

Primrose Cascade

Each \$1.50, Three \$4.25, Doz. \$15.00

Here is a superbly fine cultivated form of the Golden Rod. Each plant produces from 3 to 6 rigid spikes about 18 to 20 inches high, each topped with two dozen or more gently cascading plume-like flower bracts. The color is soft primrose-yellow of unusual clarity. So outstanding were these plants in the nursery that every visitor made a beeline to where they were growing, all commenting on the beautiful yellow color. They flower a long time, almost 2½ months, beginning mid-August. Hardy anywhere; plant in spring or fall 8 inches apart; require no dividing or special care—a "must"!

STOKESIA - Cornflower Aster; Stokes' Aster

A very handsome perennial, with China-Aster-like flowers, that appear throughout the season. It prefers a warm, sheltered location. Should certainly be grown in all gardens since its flowers are most beautiful in form and color.

Culture. Grow in a sunny, well drained border in sandy loam, 6 inches apart. Plant in March or early autumn.

Blue Star

Each \$1.10, Three \$3.00, Doz. \$11.00

The immense light blue disc-like flowers are 5 to 6 inches in diameter, growing on stiff 12- to 18-inch stems. In the foreground of the border they make a picture not easily duplicated. Stokesia, Blue Star, is a vigorous growing and free flowering variety of exceptional merit and distinction. It is perfectly hardy and has no insects bothering it. It is of easy culture and flowers throughout the summer and autumn until stopped by hard frosts. A most worth-while addition to the hardy plant garden.

THALICTRUM - Meadow-Rue

Hardy perennials, with elegant, finely divided, Columbine or Maidenhair-like foliage, which is most useful for cutting for mixing with cut flowers. Are borne in feathery clusters or panicles, and they add considerably to the beauty of the plants. They are of easy cultivation in sun or shade.

Culture. They will thrive in any good, ordinary, well drained soil. May be grown in sunny or partially shaded borders, are most effective when grown as single specimens in the front of shrubby borders, or in the wild garden. Plant in autumn or spring, 8 to 12 inches apart.

Aquilegifolium

Each \$1.00, Three \$2.80, Doz. \$10.00

Graceful foliage like that of Columbine, and flowers shading from rosy lavender to white; blooming from June to July on 2- to 3-foot tall spikes; lovely planted together with Poppy Helen Elizabeth.

Glaucum

Each \$1.10, Three \$3.00, Doz. \$11.00

Similar in habit to the Aquilegifolium; blue-gray leaves rather finely cut, with heads of Chinese yellow, fragrant flowers. 3 to 4 feet. July.

Rochenbrunianum

Each \$1.25, Three \$3.50, Doz. \$13.00

Flowers of a charming shade of lilac-mauve, which is brightened by a bunch of lemon-yellow stamens and anthers. The plant is of strong growth, about 3 to 4 feet high. The dainty flowers are produced in graceful sprays during August and September. It grows into a fine clump with many stems on each plant. Foliage is Maidenhair Fern-like. Loves a moist, sunny spot and is ironclad hardy. A superb and distinct plant, very decorative and of great cut-flower value. Sometimes referred to as the hardy Diptherocarpum.

TROLLIUS - Globeflower

Hardy perennials belonging to the Buttercup order. The flowers are globe-shaped yellow or orange in color, and particularly useful for cutting.

Culture. They require a deep rich soil containing plenty of humus. They also like plenty of moisture, hence, should be grown in damp, shady corners, or, better still, by the waterside, in bold masses. Plant in autumn or very early in spring. 8 inches apart.

Ledebouri (Golden Nugget Globeflower)

Each \$1.25, Three \$3.50, Doz. \$13.00

A remarkable plant of tremendous garden value. Tall stems with dozens of golden cup-shaped flowers composed of five ovate sepals from which rise 10 to 12 narrow linear petals giving a most unusual effect. It is a strong growing plant, very free blooming; requires little or no care and Siberia being its home will take any cold weather we have to offer. Height about 24 inches; loves a moist, sunny location. A well established plant will produce dozens of spikes with innumerable flowers over a long season. They are showy and particularly well suited for cutting, lasting a long time in water.

Veronica Longifolia Subsessilis

VERONICA

We cannot imagine a garden or a well kept rock garden without just quantities of Veronics. No matter what may be introduced in novel plants, no matter how fine the garden or border in which they are to grow, this garden would not be complete without such plants as Veronica Longifolia Subsessilis. From July to September they are the highlights. The color created by Royal Blue in June is outstanding.

Culture. Good, ordinary soil will suffice for all the following kinds. Grow the dwarf sorts in masses on the margins of sunny borders or rock gardens, and the others in colonies in positions according to their height. Plant in autumn or spring, 6 to 8 inches apart.

Amethystina "Royal Blue"

Each \$1.10, Three \$3.00, Doz. \$11.00

Beautiful spikes of rich gentian-blue flowers. 10 to 15 inches. June and July flowering.

Blue Champion

Each \$1.10, Three \$3.00, Doz. \$11.00

Growing two feet high, its lovely deep blue spikes show up well in the hardy border. The foliage is clean and plant is of bushy upright habit and flower throughout the early summer. A fine new introduction of real merit, and a plant which does withstand hot and dry weather without suffering. Altogether a very worth-while border plant.

Blue Peter

Each \$1.10, Three \$3.00, Doz. \$11.00

A recent novelty from England and without doubt the best of the early summer-flowering Veronics. The flower spikes are of deepest navy blue on stiff stems about 15 to 18 inches tall. This variety will replace Blue Spires as soon as it is better known because of its better color and far superior habit of growth and floriferousness. A heavy bloomer and of easy culture. A "must" for your garden. (Blue Peter is the name given the blue flag displayed by ships ready to leave port.)

Crater Lake Blue

Each \$1.10, Three \$3.00, Doz. \$11.00

For foreground planting in the border where you want a strong growing plant and a rich mass of color, there is nothing much better than Veronica Crater Lake Blue. It grows about 18 inches tall, prefers sun but does well in light shade. The dozens of flower spikes are the color of Oregon's famous Crater Lake.

Ice

Each \$1.10, Three \$3.00, Doz. \$11.00

This fine white Veronica has been most attractive in our nursery and many visitors have spoken of it. The white spikes it produces are about 15 in. tall and keep on coming throughout the summer and well into fall. The plant is as hardy as an Oak and multiplies freely without being woody. The flowers are at their best when most gardens are a little jaded. In addition, they are fine for cutting. All in all, this is a splendid new variety.

Longifolia subsessilis

Each \$1.25, Three \$3.50, Doz. \$13.00

2 feet. July to September. One of the handsomest blue-flowering plants. Perfectly hardy and increases in strength and beauty each year. Spikes completely studded with beautiful blue flowers, fine for cutting and one of the best plants for the hardy border.

Minuet

Each \$1.10, Three \$3.00, Doz. \$11.00

Its silvery gray foliage and dusty pink spikes of flowers make this one of the outstanding Veronics. In bloom in July and August, it gives a beautiful cool effect. The flowers and foliage of this fine plant are so distinct one cannot miss it. It is easy of culture; perfectly hardy and free blooming. All it asks is a sunny place. Height about 15 inches.

Pavane

Each \$1.10, Three \$3.00, Doz. \$11.00

This new English introduction will be well received over here. Its lovely 18-in. spikes are rigidly erect and of a fine shade of clear pink. It has performed beautifully at our nursery where it flowered from late June and throughout August. Up to 20 spikes on one plant. Like Barcarole, it withstands heat and drought well and is of easiest culture.

VIOLA ODORATA - Sweet Violet

Double Russian

Each \$1.00, Three \$2.80, Doz. \$10.00

Perfectly hardy anywhere, producing double sweet scented violet flowers in abundance. A splendid variety for that troublesome shady place, and that is not all, when established it will surprise you as well as delight you with its superb fragrance.

Odorata semperflorens

Each \$1.00, Three \$2.80, Doz. \$10.00

A sweet scented perpetual flowering Violet. It never stops blooming. The flowers are fair size and you can always pick a nosegay from a few plants. The fragrance leaves nothing to be desired. This perpetual flowering Violet is a good grower and if you plant it in a favorable location will soon become a big clump. Does well in light shade. Perfectly hardy. A joy to own.

Rosina

Each \$1.00, Three \$2.80, Doz. \$10.00

Producing not only in spring but again in late autumn quantities of dainty, deliciously fragrant, pink or old rose flowers. Useful for bordering or as a ground cover in half shade or full sun.

Royal Robe

Each \$1.00, Three \$2.80, Doz. \$10.00, 100 \$60.00

This glorious variety is a lustrous shade of deepest violet-blue. The blossoms are richly fragrant and open out flat like a small Pansy. It is quite unnecessary for us to expatiate on the transcendent beauty of this Violet. Suffice to say a trial in your own garden will bear out all we have had to say and more. A few plants of this Violet in the garden will serve to furnish quantities of deliciously fragrant bloom either during early winter or early spring and at a time when flowers are most highly prized. Stems are long and excellent for picking. Plants multiply freely and grow into big clumps. Especially good as a ground cover in shade.

VINCA - Periwinkle or Trailing Myrtle. (See page 3.)

Hardy Exbury and Knaphill Azaleas

Cultural Instructions Apply the same method as given for Azaleas

They are so named because they were developed by that fine plantsman Lionel de Rothschild on his estate named "Exbury." Sufficient time has elapsed since their creation several years ago to permit selection and re-production of the finest of these hybrids so that they could be sold by name. They are now offered here. One of their outstanding characteristics is hardiness. Below zero temperatures do not interfere with flowering. Their colors are exquisite and they are fragrant. Mature plants, depending on variety, will reach a height of 5 to 10 feet. We urge you to plant some of these aristocrats in front of the house or in any other choice spot; you will enjoy them for your entire life.

Aurora

The large, broad petaled flowers are a lovely salmon-pink with a distinctive golden flare on the upper petals. Heavy trusses of bloom add to its distinction.

Balzac

A fine red with flame markings on upper petals. Truss of flowers when established will measure 12 to 15 inches. Flowers are fragrant. One of the very good hybrids.

Bright Forecast

Warm shadings of salmon-pink and golden yellow. Large fragrant flowers; strong growing plant of fine habit.

Canasta

Orange-yellow flowers which have the characteristic broad petals of the Exbury Azalea. Grows into a fine plant which is very hardy, and a heavy bloomer.

Cecile

Buds deep pink opening to salmon-pink with yellow flare, also noted for its large flower.

Devon

A superb rose-red variety which in 1952 was given an Award of Merit at Wisley. The lovely cheerful colored blooms are produced abundantly and last a long while. Plants are good growers and soon develop into fine specimens.

Fawley

Large flowers in big clusters are freely produced on a good strong growing plant. This is one of the lovely pastel colored varieties. Flowers open pink and become white.

Fireball

Deep red clusters of flowers are prodigiously produced and cover the plant at flowering time completely. Can always be depended on to put on a good show. Grows well and is considered one of the best red kinds.

George Reynolds

One of the original Exbury varieties but still very much in demand. The flowers are broad and flat, the color a lovely buttercup-yellow with a deeper flare. Excellent habit and fragrant.

Gibraltar

A beautiful luminous coppery red. The richly colored flowers are flat with broad petals and delightfully fringed. As the name implies, it is a strong grower and blooms exceedingly free.

Golden Eagle

A beautiful yellow flower with orange blotch. It was given an Award of Merit in 1956. One of the good deep yellow shades.

Hotspur

The large fringed flowers are a delightful pale orange, come in big clusters on a nice strong growing plant. Makes a bright cheerful show.

Hotspur Red

Red blooms with yellow blotch make this an outstanding variety. Its strong rich color makes it stand out. Nice habit and strong growing.

J. Jennings

The truest red of all the Exburys. While the flower size is not as large as the others, the color is excellent and a well established plant is a brilliant sight.

Nancy Buchanan

The large, broad petaled flowers open to pure white with a distinctive yellow flare on the upper petal. Looks superbly beautiful if planted near the deeper colored kinds. It is vigorous and blooms freely.

Old Gold

One of the best. Immense flowers of pale orange-buff flushed rose with orange flare. A charming color combination and a first class plant. One that is much sought after.

Persil

Large pure white flowers with orange-yellow blotch. A lovely white Azalea of good habit and sturdy growth.

Royal Lodge

Deep vermillion-red flowers which become crimson-red as the flowers mature. One of the desirable qualities of this variety is its late blooming, extending the flowering period of this superb race of Azaleas.

Satan

This striking new variety is about as close as Mr. de Rothschild came to a large flowered red. The color is a rich flame-red, almost a self. We consider this to be one of the best in its color range.

Sylphides

Flowers open pale pink and change to almost white. Petals are fringed and ruffled giving a lovely effect to the dainty blooms. Good strong grower and always free blooming.

White Throat

Sparkling white flowers in big clusters on a neat strong growing plant, one of the newest and best double, white varieties.

Exbury Azaleas

HARDY EXBURY AZALEAS

Plants about 12 to 15 inches high.....Each \$9.00

Plants about 15 to 20 inches high.....Each \$12.50

Sizes and shapes vary according to habit of growth of each individual variety.

CULTURAL INSTRUCTIONS FOR DECIDUOUS AZALEAS

Plant them in a loose, well drained soil to which has been added liberal amounts of moist peat moss. Soak the soil thoroughly after planting, taking care to have the top of the root ball no more than one inch beneath the surface. A surface mulch of some loose humusy material such as dried leaves or coarse peat moss will be beneficial. Water plants freely during the summer months and be sure to remove the old flower trusses before they go to seed. This promotes fine flowers the next season. While they may be grown perfectly in full sun, the flowers will last longer if the plants are given the benefit of a little shade. Do not cultivate deeply as the roots are close to the surface of the soil. For fertilizing we especially recommend cottonseed meal or cow manure; if neither are available, a heavy top dressing of Wayside Gardens Plant Food is excellent. Deciduous Azaleas, which means those kinds which are not evergreen, are shipped without a ball of earth just like any other common shrub so there are no heavy transportation charges involved.

Carefully note size of immense flower clusters.

De Rothschild's Supreme Hybrid AZALEAS

THE STORY behind the creation of these Supreme Selections is interesting. Beginning back in 1918, Mr. de Rothschild procured from Mr. Anthony Waterer, one of England's most renowned nurserymen, the choicest varieties of his famous Knaphill strain of Azaleas, considered the best at that time. The Knaphill Azaleas were the result of over fifty years' work of careful breeding and selection at the Waterer Nurseries, where American species, notably the eastern Flame Azalea (*R. calendulaceum*) and the California species *R. occidentale* were crossed with selected *Mollis japonicum* types to obtain greater hardiness, increased flower size, and a wider range of colors. Some of these were sufficiently distinct to be given individual names, one of these being an excellent yellow called George Reynolds. This, and selected plants of *Rhododendron Molle*, a large flowered yellow Chinese species, were used intensively to improve the Knaphill strain, which finally became known as the Exbury Hybrids. Several of these Exbury Hybrids were given names and propagated. Some twenty or more of these named varieties are offered on page 86.

The work of selecting and hybridizing was painstakingly carried forward. As the best of these new hybrids bloomed, it was Mr. de Rothschild's practice to select two parent plants from each color group; the pinks, reds, yellows, et cetera. These were chosen for size, vigor, color and texture. Then these selected parents would be crossed, care being exercised to keep each two parents within their own color category. As each succeeding generation flowered, he would destroy ruthlessly all except the few plants that measured up to his very exacting standards. All the rest, which numbered into the thousands, were yearly consigned to the bonfire, as he never kept one that failed to show improvement over its parents. And now you can enjoy the results of Mr. de Rothschild's decades of labor, tremendous expense and infinite patience.

Supreme Hybrid Azaleas in Small Sizes

Several of our customers have written asking if they could not buy small plants of the Supreme Hybrids, stating they would enjoy growing the young plants into large specimens in their own gardens. Knowing that de Rothschild Supreme Hybrids are hardy, husky, strong growers and will not present a cultural problem but will readily develop into fine specimens, we have decided to offer two and three-year-old plants. They will bloom first or second year after planting.

Special plants, 2 years old, about 5 to 8 in. tall

Each \$2.00, Three \$5.75, Doz. \$20.00

Special plants, 3 years old, about 7 to 10 in. tall

Each \$3.00, Three \$8.50, Doz. \$30.00

Sizes given are more or less and vary with habit of growth of each plant.

Four year plants, about 10 to 12 in. tall

Each \$4.00, Three \$11.00, Doz. \$40.00

Chevalier de Reali

Palestrina

Azalea Vuykiana

Palestrina *Each \$6.00, Three \$16.00*
 This hybrid is considered one of the hardiest white Azaleas. Pure white hardy Azaleas are few and far between. Palestrina mixes well with Pontica and Mollis varieties, or when grown along with dwarf evergreens it makes a splendid splash of color. Responds to the same treatment as the other Azaleas listed.

Royal Azalea

AZALEA SCHLIPPENBACHI

Hardy as an Oak. Blooms beautifully in deep shade.

The Royal Azalea is one of the first to bloom. It produces clusters of big, showy Rhododendron-like flowers which are a soft rose-pink clean and clear in color, making a beautiful show. Ultimate height of plant varies from 3 to 5 feet and they never fail to flower. What is more, they are hardy under zero temperatures, do well in shade or sun and do not require an acid soil nor do they need a heavy ball of earth for successful transplanting. A fine low-growing profuse flowering shrub for the border or planting in front of the house.

15 to 18 in. bushy plants *Each \$4.00, Three \$11.00, Doz. \$40.00*
 18 to 24 in. bushy plants *Each \$5.00, Three \$14.00, Doz. \$50.00*

Early Azalea Schlippenbachi
 One of the finest and easiest to grow of the Hardy Azaleas.
 Perfect for shady places.

**Rhododendron
 Carolinianum
 P.J.M. Hybrids**

Azalea Mucronulatum

Azalea Mollis Named Varieties

All plants offered are of good size, ready to bloom.

Here we offer a collection of the finest colors in named varieties. These plants have been grafted and are four years old. They are about 10 to 15 inches in height, depending on the variety. Some are taller growers and some bushier than others, according to their habit and natural form. Each variety offered is a choice one and planted by the thousands in Europe where their value and merit have been appreciated for many years.

Chevalier de Reali Each \$5.00, Three \$14.00, Doz. \$50.00
This is considered by many experts as the best pale yellow Azalea Mollis. Its lovely straw-yellow flowers make a fine show over a long period and blend perfectly with the other varieties, or it makes a good background for Tulips.

Dr. M. Oosthoek Each \$5.00, Three \$14.00, Doz. \$50.00
Here is one of the most brilliantly tinted hardy Azaleas. The flowers are fiery red with soft burnt-orange glow, almost creating a salmon effect. A fine grower and always blooms freely.

Koster's Brilliant Each \$5.00, Three \$14.00, Doz. \$50.00
This variety is one of the most brilliant of the Azalea Mollis. Its fine clusters of flowers are a fiery brilliant coppery flame color. There are no red Azalea Mollis but this variety comes nearest to this color, and cover the plant completely. Be sure to plant it in full sunlight because when grown in the open it shows at its best.

Lemonora Each \$5.00, Three \$14.00, Doz. \$50.00
Delicate apricot-yellow tinted pink, large truss, a distinct variety. It is a fine grower developing into quite a large plant. Beautiful to see when in full bloom.

Queen Emma Each \$5.00, Three \$14.00, Doz. \$50.00
The large, individual flowers are grouped in big clusters which cover the plant completely. Color is deep apricot-yellow with soft buff-persimmon overtones, giving a fine bright, yet soft effect. This is one of the much desired varieties.

AZALEA MOLLIS—All Colors Mixed

10 to 15 in. high Each \$3.00, Three \$ 8.50, Doz. \$30.00
15 to 18 in. high Each \$4.00, Three \$11.00, Doz. \$40.00
18 to 24 in. high Each \$5.00, Three \$14.00, Doz. \$50.00

All plants offered are ready to bloom.

Azalea Pontica

They flower after the Azalea Mollis have finished flowering. Also known as Hardy Ghent Azalea.

Their blooming time, requirements and general habit are the same as those of Azalea Mollis. As to hardiness, they are even harder but their special merit is the unusual range of colors which is available in this group. While the flowers of the Ghent Azaleas are not nearly as large as those of the Mollis varieties, their brilliance and variation of tints place them along the choicest spring shrubs. Most desirable in colder sections of the country, as because of their hardiness they never fail to bloom.

Ignaea Nova Each \$6.00, Three \$16.00, Doz. \$60.00
Brilliant carmine-red flowers with gold blotch in big heads. Very outstanding and brilliant; in addition it is late flowering. A fine variety.

Pallas Each \$6.00, Three \$16.00, Doz. \$60.00
Clear geranium-red with orange blotch flowers in open clusters. Plant is a good grower and blooms freely. One of the popular varieties.

Azalea Mucronulatum

One of the very first Azaleas to flower, opening rosy lavender flowers the same time as Forsythia. Planted in front of a Forsythia, it makes a handsome combination. It will succeed splendidly in soil which is almost alkaline. Quite fast growing. Give some water during very dry periods. Ultimate height about 6 feet. Makes a magnificent show in early spring.

Don't miss these, they are among the finest and earliest shrubs to bloom in spring. Easily grown, good foliage, increase in size rapidly. We consider this Azalea among the best. Hardy most anywhere.

Each Three Dozen

18 to 24 in. 5.00 14.00 50.00

Rhododendron Carolinianum

P. J. M. Hybrids

These hybrids are the result of a cross between the iron-clad hardy Rhododendron Carolinianum and an unidentified species from the mountains of Central China.

The plants are bushy and have small, glossy dark green foliage which turns to a rich mahogany during the winter months. To this outstanding foliage characteristic is added a mass of bloom which completely covers the plant in April. The flower clusters are bright while others show lighter shades with a trace of lavender shading. All are so nearly alike that it has never seemed necessary to introduce them under varietal names.

They are the hardest and easiest Rhododendrons to grow, tolerating temperatures way below zero without harm. Plenty of sunlight is necessary for perfect development and abundance of blooms. A superb plant of medium height, neat habit, extremely hardy, handsome foliage and lovely flowers. A perfect subject for foundation and foreground planting. This Rhododendron blooms heavily at an early age.

12 to 15 in. plants Each \$5.50
15 to 18 in. plants Each \$7.50

Hybrid Rhododendrons

Hybrid Rhododendrons do not require shade, in fact, they do just as well in full sun, with some shade needed in the South where sun is extremely hot. They are easy to grow but do require an acid soil, free from lime. The most effective plantings are those in masses combining all colors for contrast and interest. The gorgeous flowers of these beloved broad-leaved evergreens assume shades and tints to fit any color scheme and are suitable for large or small home plantings.

Rhododendron Hybrids are unquestionably among the most magnificent of flowering shrubs. Their fine, evergreen, leathery foliage has a majestic dignity, which proves most effective during the winter months.

We offer a fine lot of flowering plants in three sizes in various shades: Red shades, Pink shades, Lavender shades, Purple shades, as well as White.

De Rothschild Azaleas "Supreme Selections" (See page 87)

Distinctive Trees

Metasequoia Glyptostroboides

THE DAWN CYPRESS—The Primeval World's Giant Tree

A tree of exceptional beauty; it is hardy and easy to grow. Until 1945 the genus *Metasequoia* had only been known from fossil specimens but in that year a Chinese botanist, M. T. Wang, discovered living specimens in Hupel province. The tree was duly named *Metasequoia Glyptostroboides* by Doctors Hsen-Hsa and Wan Chun Cheng. Soon after its discovery in 1945 an expedition was sent out by the Arnold Arboretum of Boston to collect seeds. Several plants raised from this seed were given to Wayside Gardens for propagation. In the wild state the Dawn Cypress grows to a height of 115 feet. It is a rapid grower, forming an erect narrow pyramid of soft fresh green foliage very like that of the deciduous Cypress. In the autumn the tree assumes a lovely subtle tone of apricot-gold with a slight flush of strawberry-pink before it suddenly sheds its leaves for the winter.

Culture. Any good soil, likes moisture, dig a good size hole to give roots a good start. It has proven hardy at below zero temperatures in Mentor, Ohio. A report from Finland also states it is quite hardy there. It is one of the most ornamental and rarest conifers ever introduced in this country.

Fine young trees, About 6 ft. Each \$6.00

See Page 91 for Items Listed Below

SALIX SALAMONII - Willow

This is one of the fastest growing trees we know about. It was obtained through a cross of the common Weeping Willow, *Salix Babylonica*, with the variety *Alba*. It is much hardier and stronger as well as faster growing, handsomely weeping with good foliage. Used freely in England but not well known in this country. We know of nothing better for quickly blocking out undesirable views or buildings. Does well in moist soil and when established grows as much as five to six feet in one season while young. Grows ultimately as tall as the common Weeping Willow. The best size for planting is young trees about 6 to 7 feet tall. They establish at once and grow rapidly. We do not offer larger trees because of this fast growth and recommend planting only in very cold locations.

Each \$7.00

GINKGO BILOBA

Also called the good luck tree. Touch it and your wishes come true.

One of the oldest things in the world is the Ginkgo tree, dating back to prehistoric times. Millions of years ago trees resembling Ginkgos were common throughout the northern hemisphere, still existing as fossils. They belong to the conifer family but their fan-like leaves, which turn bright golden in late fall, are shed each year. The method by which the Ginkgo achieves fertilization is one of the most astonishing things in Nature. They are beautiful trees for planting on the lawn as a specimen as well as perfect for avenue planting. Their foliage is impervious to insect attack and they grow moderately fast. A tree to own.

Nice grafted trees, 4 to 5 feet tall, Each \$7.00, Three \$18.00, Doz. \$67.50

Fagus Sylvatica

Metasequoia Glyptostroboides

FAGUS SYLVATICA - European Beech

The Noblest of Trees—Plant it as a

Monument in Memory of Someone or Some Special Event

The European Beeches are the most magnificent and stunning trees. Symmetrical in habit with smooth gray bark, their foliage is clean and shiny and comes in several different colors. The tree is long lived, two to three hundred years is not at all unusual. Tough, hardy, and immune to insects and fungus. Their monumental quality makes them eminently suited for specimen planting. There just is not another tree to equal it.

Fastigiata

Each \$8.00

The columnar or upright growing European Beech, is also known as the Dawyck Beech. It is a spectacular plant; grows into a column just like the Lombardy Poplar. Narrow, pyramidal, upward branching, it makes a superb specimen for an isolated location. Its foliage is clean, bright and shiny green. We offer nice young specimens about 4 to 5 feet tall.

Pendula

Each \$10.00

A magnificent weeping tree which will live to a great age. Bright shiny green foliage covers the pendulous branches abundantly. In winter the silvery gray bark continues to give unusual interest; again we say a magnificent tree. We offer plants about 4 to 5 feet high.

Pendula Purpurea

Each \$12.00

This is the weeping form of the Copper Beech. The main stem grows quite upright while the branches droop downward. When it is in leaf it reminds one of a huge purple fountain, while the silvery gray branches in winter never fail to please. Here is truly a beautiful tree with a life span of 3 to 5 hundred years. Plants offered are about 4 to 5 feet.

Purpurea

4 to 5 ft. tall, Each \$9.00; 5 to 6 ft. tall, Each \$11.00

The Rivers' Purple Beech is in the opinion of many people, the noblest and most beautiful large specimen tree in cultivation. Its deep black-bronze foliage is unsurpassed. We wish it were possible to ship large size specimens but we have to be content to send out plants of modest size. Easily grown and given good care and water during dry periods, they grow quickly into nice specimens.

CRATAEGUS MONOGYNA STRICTA

This is the upright form of the common May or Hawthorn except that this is a vigorous, columnar, white flowering form in full bloom in May. For dry and poor soil conditions it is particularly suitable; will grow 20 to 30 feet high. It may well replace the undesirable Lombardy Poplar as it is an upright, narrow tree of all-around merit and beauty of form and valuable as a single specimen. It is a tough tree requiring no attention, excellent for a narrow screen if planted 5 feet apart.

Each \$8.00, Three \$22.00, Doz. \$80.00

Salix Salamonii

Ginkgo Biloba

MORaine LOCUST

(Plant Pat. No. 836)

A beautiful vase-shaped tree, in form resembling the American Elm. Dutch Elm disease is killing many Elms and nurserymen have been doing their best to find a suitable tree to take the place of Elms. The answer after many years of testing, is the Moraine Locust. Do not confuse the Moraine Locust with the native Locust tree.

First of all, it is fast growing and happy on a wide range of soils.

Second, it is easy to transplant.

Third, it does not produce unsightly seed pods and has no thorns.

Fourth, it is hardy and handsome. Not too dense, grass will grow under it.

It is a beautifully shaped tree and as we said before, resembling in form the American Elm. It is a perfect street tree and most satisfactory on the average small lawn where a tall tree and some shade is required.

6 to 8 ft. trees, branched, Each \$8.00

Moraine Locust

[91]

Crataegus Monogyna Stricta

Edgings and Low Hedges

ILEX CONVEXA HETZI

This is one of the choicest of evergreens. It is very bushy, has shiny dark green, Boxwood-like foliage somewhat convex and it grows about 4 feet high and 3 feet across. The glossy leaves are so profuse that twigs are invisible. Left to itself it grows "informally formal" and blends beautifully with other evergreens. As a small "accent" plant, it is faultless. For small hedges it is a jewel, particularly in cold climates where Boxwood is impossible. Space plants 18 inches apart. An absolute "must" for every garden. Does well in light shade or full sun and is equally happy on alkaline or acid soil, and last but not least, it is hardy.

Special size for hedging, bare root, nice well-grown plants.

	Doz.	25	100
6- 8 inches tall.....	\$7.50	\$13.00	\$45.00
8-10 inches tall	9.00	18.00	55.00

POTENTILLA

**For Hedges Use Any Variety You Choose
All Summer and Fall Flowering**

Three \$4.75, Doz. \$18.00, 100 \$125.00

For a charming low hedge or edging, all *Potentilla* are excellent. Compact in growth, slow growing, it can be pruned to most any small size. Fern-like foliage and a constant display of small golden, cup-shaped flowers throughout the summer make it a No. 1 small edging plant. Succeeds in sub-zero temperatures on most any kind of soil.

Turn to pages 112 and 113 for varieties and details.

COTONEASTER

**Divaricata Hedging size 18 to 24 inches:
Each \$1.75, Three \$4.75, Doz. \$18.00, 100 \$125.00**

A low growing, much branched and graceful shrub from China. Its ultimate height is about five feet and it is perfectly suited for hedges of medium height, say from 3 feet. Foliage is small and round, highly polished dark green. It creates a splendid effect. Brilliant small egg-shaped, red fruits in autumn add to its beauty. Few shrubs equal *Cotoneaster Divaricata* in the border or as a hedge plant.

HYPERICUM

Hidcote Each \$3.00, Three \$8.50, Doz. \$30.00

From the famous Hidcote estate in England, we obtained this fine variety a few years ago. It grows into a twiggly shrub about 18 in. tall and about the same diameter. Throughout the summer, it is covered with bright yellow, cup-like flowers about 2 in. in diameter. In cold winters, it freezes back to the ground but this does not matter because it springs up from the base, producing each summer its masses of blooms. A fine shrub for the foreground in the border in cold climates. In the temperate parts of the country it will reach a height of about 3 to 4 ft. Flowers are fragrant and appear late June continuing until mid-October.

RIBES ALPINUS - Alpine Currant

For Hedges in Shade. Hardy at 20 below

A moderately slow growing shrub. It is densely branched and sturdy and does not require much pruning or clipping. There are no other shrubs which are so well suited for hedges in deep shade nor are there many shrubs which can be grown successfully in such low temperatures. Its foliage is small and attractive. Planted 2 feet apart it makes a dense hedge. It is also most valuable to grow on the north side of a building or under tall trees where undergrowth is desired. **15 to 18 in. plants:**

Each \$1.75, Three \$4.75, Doz. \$18.00, 100 \$125.00

VIBURNUM OPULUS NANUM

The Hedge Viburnum. A dwarf, stubby plant never over two feet high, particularly well adapted for edgings and hedges in wet or heavy clay ground where it is difficult for other plants to thrive. Does well in light shade. It is extremely hardy. Can be clipped or left natural as desired. In either case it grows into a fine compact and low hedge which requires no care.

*Each \$1.50, Three \$4.25,
Doz. \$15.00, 100 \$100.00*

LIGUSTRUM VICARI

Golden Vicari Privet makes a superb golden edging to walks or beds. It can be trimmed to remain 12 to 15 or 18 inches tall. Being of slow growth, it does not require frequent pruning. It may also be used to good advantage as an individual specimen in a planting in front of the house or shrubbery border. We send out 3- to 4-year-old plants which are about 15 inches tall. We have tested it in Mentor and found it completely hardy. Should be grown in full sun for best color.

Each 90c, Three \$2.60, Doz. \$9.00, 100 \$55.00

PACHISTIMA CANBYI

A choice dwarf, compact evergreen shrub of inestimable value. Superb as an evergreen edging to flower beds or borders for walks. Perfect in front of evergreen plantings. Spreads to about 18 inches in diameter and never grows over 8 inches in height. May be trimmed or left natural. Withstands 20 degrees below zero and foliage does not burn or discolor during winter. Does well in sun and light shade. Charming as a ground cover, in small places where the usual kinds would be out of scale.

*Each \$2.50, Three \$7.15,
Doz. \$25.00, 100 \$190.00*

TEUCRIUM CHAMAEDRYIS

Shrub-like plant of moderate growth. Has shrublike, shiny, dark leaves. Glossy green foliage resembling dwarf Boxwood, may be used in place of Boxwood where the latter is not hardy; can be clipped to suit any height up to 12 inches. Plant in fall or early spring, 6 inches apart, in full sun. Excellent edging to flower beds.

*Three \$2.50, Doz. \$9.00,
100 \$55.00, 1000 \$500.00
(250 plants or more at 1000 rate)*

SALIX PURPUREA NANA

Dwarf Blue-Leaf Arctic Willow. Discovered north of the Arctic Circle. A charming low-growing Willow excellently suited for low hedges. Grows anywhere in wet or heavy soils where other plants perish. It is able to withstand the lowest temperature encountered in this country, is of easy culture. The foliage is a lovely gray-blue-green. Can be clipped for formal effects or left natural as desired. Should be planted about 8 inches apart. May also be grown as single specimens in the foreground of the shrub border. Its natural height is about 3 feet, may be clipped and held to 12 in. high and 12 in. wide.

*Three \$2.80, Doz. \$10.00,
100 \$65.00, 1000 \$600.00
(250 plants or more at 1000 rate)*

DWARF RED BARBERRY, CRIMSON PYGMY

Everyone who has seen it wants it because of its charm and cheerful coloring of its foliage. The old leaves are bronzy blood-red while the new growth tips are several shades lighter, which sparkle in the sunlight. Our oldest stock plants, now several years old, measure 15 to 18 inches in diameter and are about 12 inches high. Each one is a picture in itself. Individual plants are colorful and will make a fine showing in front of any shrub planting, in front of a house for instance. It is of slow growth and excellent as edging to walks or flower beds where it will be most attractive. Outstanding for permanent beds or for lettering on lawns. Must be grown in full sun in order to obtain the brilliant foliage color. If grown in shade they will not color correctly.

*Specimen plants about 8 inches high.
Each \$1.30, Three \$3.70, Doz. \$14.00, 100 \$90.00
2-year plants just right for hedge planting, about
4 to 5 in. high, Three \$3.00, Doz. \$11.00, 100 \$75.00*

Untrimmed Hedge of Berberis Mentorensis Showing Perfect Natural Hedge Form, Third Year After Planting 15- to 18-inch Plants

The Best Barberry

Drought Resistant Mentor Barberry

BERBERIS MENTORENSIS (Plant Patent No. 99)

It has very stiff, upright growing branches and quite formidable thorns. Its foliage is heavy and thick and of perfect color—a green as dark as the Japanese Yew. In hot and dry seasons or in localities where high temperatures go hand in hand with lack of rain, it never shows any signs of rust and discoloration of foliage no matter how hot or dry it may be. In Ohio the leaves remain green until after the holidays. In Kansas, Oklahoma, Utah, and the Southwest, Berberis Mentorensis is evergreen and considered **the finest evergreen plant for hedges**. It is amazingly satisfactory growing around airways or close to dry foundation walls, and does an outstanding job in city gardens, either as single specimens or as a hedge. Its unusual ability to withstand heat and drought is nothing short of wonderful. Always good and clean looking, upright growth, easy upkeep (requires really no pruning), and its tenacious foliage, more than compensates for the lack of berries. We heartily recommend Berberis Mentorensis to you. For hedges plant in a single row, 15 to 18 inches apart for best effect.

First—It is evergreen practically the year around. Think what that means.

Second—Its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—When used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.

Fourth—Needs no pruning. It is of erect growth which becomes dense when the plant is three or four years old. No upkeep! No pruning!

Fifth—Combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

Buxus Koreana - Hardy Korean Box

Korean Boxwood

This is one of the most satisfactory of evergreen hedge plants. Our original stock came from Canada and was used to temperatures many degrees below zero. It thrives where it is impossible to have the common Boxwood. We have grown a nice quantity of plants at Mentor outdoors without protection subject to all weather conditions and we recommend it wholeheartedly. Its foliage is not quite as round or shiny as of the well known Boxwood but it is just as effective. You may clip it into a formal low hedge, or if you prefer, let it grow more or less natural. We furnish plants which will permit either way of handling. Light shade or sun in any reasonably good soil. Plant fall or spring 6 to 8 inches apart.

Acer Palmatum

Atropurpureum—Japanese Red Maple

A rare colorful small shrub or dwarf tree with red-purple leaves. It is of very slow growth and therefore an excellent plant to have as a single specimen on the lawn. It never fails to draw attention. Its beautiful foliage and artistic growth all combine to make it a universal garden favorite. The plants we offer are many years old and will make a handsome display no matter where you put them. Bright sun contributes to deep and richly colored foliage. This is a "must" for every garden.

ACER PLATANOIDES - Schwedleri Nigra

Norway Maple "Crimson King" (Plant Patent No. 735)

About ten years ago a fascinating purple or maroon-leaved Norway Maple tree was sent to America from Europe. It created the same sensation over here as it did in Europe. Several specimens were propagated and planted along the East Coast as well as on the Pacific Coast for observation. The results have been most gratifying. It proved perfectly hardy and happy where Maples grew and it retained its magnificent leaf color throughout the entire summer. The effect is not unlike that of the Copper Beech but in addition, the tips of the branches and the young foliage are of a lighter shade and glisten brilliantly in the sun. One would think the tree was in bloom. Here truly is a rare thing in trees; a superb plant for lawn, small or large; street trees or specimen for contrast among other trees.

	Each	Three	Doz.

AESCULUS - Chestnut

Carnea Briotii (Red Horse Chestnut)

5 to 6 ft. branched trees. Each \$10.00

A beautiful lawn tree of rounded, shapely habit. At the tips of the branches, cone-shaped spikes or panicles of rosy crimson flowers appear in May and June like candles on a Christmas tree. The leaves are palmate, giving the tree an unusual appearance throughout the summer while the shiny flower buds at the tips of the branches add interest during the winter months. A most ornamental tree which is easily grown in any ordinary soil. (All young trees are sparsely rooted. This is a characteristic so don't be alarmed when you receive the plant.) Ultimate height about 30 feet, spread 20 feet.

Guaranteed Superior Quality

Wayside Gardens

MENTOR, OHIO

Red Aesculus - Chestnut

Acer Platanoides Schwedleri Nigra
Norway Maple, Crimson King (Patent No. 735)

Acer Palmatum Atropurpureum
Specimen of Hardy Korean Boxwood

The New Althea, Blue Bird (Plant Pat. No. 1739)
Flowers wide open, 5 inches across.
(See page 96)

ABELIOPHYLLUM DISTICHUM

(White Forsythia or Korean Abelialeaf)

A Forsythia with white blossoms! This is the exclamation of incredulity frequently heard from those coming across a blossoming Korean Abelialeaf for the first time. Both produce their bell-shaped flowers in early spring before the leaves. The Abelialeaf is a much lower growing shrub than most Forsythias, however, averaging about 3½ feet in height.

Abeliophyllum distichum is a native of Central Korea where it was found in 1919. Lest there be any question about the hardiness of this Korean native, we might add that it has been growing in the Morton Arboretum since 1938 when it was first introduced into the United States. It has not only proved reliable but a regular bloomer as well, asking only a well drained location in full sun. The deep purple flower buds are produced in autumn. In a mild climate they open in February and transform the bush into a mass of white sweetly fragrant blossoms. The flowers are actually pale pink when they open but soon fade to white.

30 to 36 in. plants. Each \$4.00, Three \$11.00, Doz. \$40.00

ALTHEA - Rose of Sharon

Erect growing shrub of sturdy and formal shape, particularly well suited for screens or specimens in the shrub border. They bloom from July to frost and give color when most other shrubs have finished blooming. We offer four beautiful varieties of recent introduction, practically unknown, and in our estimation the four best. The ultimate height is about 10 feet.

Culture. Most any soil will do providing it is well drained. They require full sun to do their best. Pruning is not required. They are perfect to grow against a sunny wall. The branches are very willowy and pliable and can be fanned out flat with little effort. Trim away surplus wood and you have an "Espalier" tree far handsomer than can be made with a fruit tree. Require no spray.

Blue Bird (Plant Patent No. 1739)

2 to 3 ft., Each \$3.00, Three \$8.50, Doz. \$30.00

This blue Althea is one of the outstanding new summer flowering shrubs. It is vigorous in growth, upright in habit, and a prolific bloomer. The flowers measure 5 inches across, are wide open, resembling big, blue saucers. Summer flowering shrubs are few and far between; Althea Blue Bird is a magnificent addition to this small list. It will greatly add to the color of the border, or in any shrub planting, and as we have said before, single flowered Altheas are infinitely more attractive than the double forms. 4-year plants about 2 to 3 feet high. They will bloom first year after planting.

Hamabo

Each \$2.75, Three \$7.85, Doz. \$27.50

This most interesting cheerfully colored Althea is not new but practically unknown in this country. It is a great favorite in Europe and we can quite understand why. For several years we have tested it at Wayside and found it as hardy as any of the others. But it is so arresting that everyone visiting us has wanted a plant of it. Flowers are white and red, brilliant and gay, and contrast beautifully with the dark green foliage. Here is a real contribution to the summer flowering shrubs. The plants we send you will flower only a few months after planting.

Red Heart Flowering size plants, 1½ to 2 feet

Each \$3.00, Three \$8.50, Doz. \$30.00

A lovely mid-summer flowering clean shrub upright in growth and of easy culture. All it asks is a warm sunny spot. Flowers are pure white with a scarlet-red dot in the center which is quite evident because the big white blooms open wide resembling saucers. A cheerful shrub blooming through July and August. If planted close to wall with south or east exposure the branches may be fanned out quickly developing into an attractive espalier effect.

Woodbridge

Each \$2.75, Three \$7.85, Doz. \$27.50

This is an improvement over Rubis. Produces very large, wide-open, flaring flowers of a fine clear rose-pink color. The best and most brilliant of the pink Altheas. Its freedom of bloom is outstanding.

Wm. R. Smith

Each \$2.75, Three \$7.85, Doz. \$27.50

Large, disc-like, pure white flowers which open flat and are produced in great numbers from early July until frost. Most white Althea blooms do not open fully and therefore are not showy. Wm. R. Smith is the one exception. Its flowers are large, open and are superb.

ARONIA - Chokeberry

Arbutifolia Erecta

Each \$2.75, Three \$7.85, Doz. \$27.50

The common Chokeberry is being grown in most every garden, somewhat inclined to be untidy. It is, therefore, that we offer the little known erect form of this useful shrub. Arbutifolia Erecta is as erect growing as the Lombardy Poplar. Mature height about 5 to 6 feet; branches are slender, leaves oblong and 3 inches long, becoming vividly colored every autumn. Here is a plant that is perfect where space is limited; hardy and any good soil will grow it satisfactorily. MAKES A HEDGE YOU JUST DON'T HAVE TO PRUNE! Flowers in early summer—brilliant berries and foliage in the autumn.

BETULA - Birch

Pendula gracilis (Cut-Leaf Birch)

Each \$5.50, Three \$15.00, Doz. \$55.00

Its graceful weeping branches, finely cut foliage and shimmering white bark make this one of the most beautiful ornamental trees. Even in winter, without foliage, the delicate pendulous branches make a lovely silhouette against the drab colors of other trees in the background. It is not too particular as to soil but prefers a moist location and a sunny spot.

White Birch Clump

4-5 ft., Each \$6.00, Three \$16.00, Doz. \$60.00

In naturalization, or as a lawn specimen, this lovely, multiple-stemmed tree is most effective. The white bark of its 3 or more trunks adds great charm to the landscape picture. Growth is gracefully upright, with horizontal branches. It is best to start with not too large trees; if well fed and watered they grow fast. Reaches a height of 35 feet.

CERCIS - Redbud

Chinensis

Each \$4.00, Three \$11.00, Doz. \$40.00

This charming, brilliant spring-flowering shrub is a Chinese counterpart of the American native Redbud. It flowers at the same time, but the quantity and quality of its flowers far surpass those of our common wild form. It is shrub-like in growth, and when in bloom every branch and twig is covered with thousands of bright purple blossoms almost double the size of the common variety and noticeably darker. You will want this in your garden surely. Ultimate height from 6 to 8 feet.

CARYOPTERIS - Hardy Blue Spirea

Heavenly Blue (Plant Patent No. 1091)

Each \$2.50, Three \$7.15, Doz. \$25.00

A delightful deep blue colored autumn flowering shrub. It is the dark blue form of Caryopteris, Blue Mist, which Wayside Gardens introduced several years ago. Heavenly Blue is our own origination; the result of crosses and selections made at Mentor. Heavenly Blue is upright in growth. When mature, it is about 15 to 18 inches in diameter and 18 to 24 inches tall. One shrub will produce 30 or more beautiful deep blue flower spikes, a color which we all know is quite rare at any time and particularly so in the autumn garden. It does best in a light soil; in fact, the sandier the better, and must be grown in full sun. It comes to perfection in a warm, dry sunny spot. We consider this new shrub one of the finest things available for rich autumn color.

CLETHRA ALNIFOLIA ROSEA

Each \$3.00, Three \$8.50, Doz. \$30.00

A Pepper Bush is a compact neat plant of many slender, upright branches rarely over four to five feet high. Each branch is topped with finger-like clusters of small, deliciously scented pink flowers. To many people, the fragrance is reminiscent of pepper; hence, its name. This is a very fine and useful shrub, especially for low moist places or damp woodland conditions. It grows equally well in full sun or shade. Here is the rare pink form of the much loved white Pepper Bush, giving bloom when most needed in late summer and early autumn with fine dark green foliage to boot.

CORYLUS

Maxima atropurpurea (Purple-Leaved Filbert)

Each \$4.50, Three \$12.50, Doz. \$45.00

For a rich display of bronze foliage there is not much better than the Purple-Leaved Filbert. It is a much branched shrub covered from top to bottom with fine, bronze leaves which make a pleasant break in the monotony of the green leaves in the shrubby border. The richest and deepest colors are obtained when it is grown in full sun. It grows well in shade but it then loses part of its coloring. Maximum height about 10 feet. Can be kept any height up to 5 feet with pruning. Hardy anywhere! A fine plant for the lawn as a single specimen. Superb foliage for cutting and use with flowers.

Maxima Aurea

Each \$6.00, Three \$16.00, Doz. \$60.00

This is the golden leaf Filbert. Its handsome leaves are tinted a soft greenish yellow, the young new growth golden yellow. Brightest shades are obtained when grown in full sun. Handsome shrub for the garden and its foliage like the purple Filbert is fine decorative material.

Avellana Contorta

Each \$6.00, Three \$16.00, Doz. \$60.00

A rare shrub which is frequently referred to as the "Larry Lauder's Walking Stick Bush." Its fantastically twisted, turned and almost cork-screw-like branches will remind one of Harry's famous cane. Slow of growth but easily cared for. Like all Filberts, it does well in either sun or shade. Plant it where you can enjoy the curiously twisted branches in the winter against the snow. Ultimate height about 7 feet. Here is a really good conversation piece.

CYTISUS

Praecox (Warminster Broom)

Each \$3.50, Three \$9.75, Doz. \$35.00

One of the most beautiful of all May-flowering shrubs. Grows about 4 to 5 feet high. The twiggly evergreen branches are pendulent and in May are hidden under a mass of sulphur-yellow pea-shaped blooms. The effect created by this shrub when in bloom is most unusual and will be one of the highlights in your selection. Our original stock plants came from the Arnold Arboretum in Boston where year after year they continue to make a grand display. This is no new shrub but one not easily propagated in the nursery. Therefore, it is not generally offered. We send you 3-year plants that already have flowered in 5- to 6-in. pots. Pot plants invariably establish at once and this is the best way to transplant them.

CYDONIA - FLOWERING QUINCE

One of the first shrubs to bloom in spring. Their brilliant flowers and shiny foliage place them among the No. 1 plants for the spring garden. They may be allowed to grow into specimen plants or trimmed into hedges. Ultimate height about 5 or 6 feet. We offer here a collection of new hybrids. These varieties are outstanding. The size of their blooms are well as the quantity in which they are produced is almost unbelievable.

New Hybrid Cydonias

Knaphill

Each \$4.00, Three \$11.00, Doz. \$40.00

This fine flowering Quince originated in England and is a choice low growing plant. Eight-year-old specimens in our nursery are about 16 inches high and 18 inches across. It forms a small mound which in early spring is completely covered with big vermilion-red flowers. An ideal variety for planting in front of the shrub border or for foundation plantings; it may also be used for low edgings. Knaphill will unquestionably become as great a favorite here as it is in Europe. We offer nice bushy specimens about 15 to 18 inches high.

Nivalis

Each \$4.00, Three \$11.00, Doz. \$40.00

This is the best pure white Quince. The sparkling white flowers contrast well with the dark green foliage. A very handsome flower for cutting as well as a fine early flowering shrub for the border.

Pink Lady

Each \$4.00, Three \$11.00, Doz. \$40.00

An orderly shrub quite compact in growth. Its branches in spring are literally covered with single bright pink flowers. A pleasant change from the too many red kinds. Twigs cut in late winter and brought indoors and placed in water will bloom freely; their appearance is quite artistic.

Rowallane

Each \$4.00, Three \$11.00, Doz. \$40.00

This is a recent new variety from England. It makes a low growing plant about 24 to 30 inches high and as wide. Foliage good rich dark green which appears after the plant has flowered. The blooms are plentiful and rich vermilion-red. Intensely bright and sparkling, a splendid plant for the foreground of the shrub border.

Stanford Red

Each \$4.00, Three \$11.00, Doz. \$40.00

The flowers are extraordinarily large, open geranium-red and deepen to an intense blood-red of great strength and carrying power. It is excellent for cutting, the flowers lasting a long time and in addition, it's almost thornless. A beautiful shrub with white Tulips. A "must" for your garden. We offer plants about 3 feet tall, ready to bloom.

Abeliophyllum Distichum—also called White Forsythia

Cytisus Praecox, Warminster Broom
One of the loveliest of the spring-flowering shrubs.

Althea, Hamabo

Cercis Chinensis

Althea,
Woodbridge

Corylus Avellana Contorta

Crataegus, Autumn Glory

CRATAEGUS OXYACANTHA

(Hawthorns)

Crataegus, Autumn Glory
Each \$8.00, Three \$22.00, Doz. \$80.00

This magnificent Hybrid Thorn grows into a medium sized tree about 15 to 18 feet high. Makes a shapely head and has deep green foliage. In spring it is very attractive with its many big clusters of white blooms. But in early autumn it really is a sight to behold when the immense clusters of giant berries turn a brilliant red. In our opinion it is even more spectacular than the well known and popular Mountain Ash. The fruit remains on the tree well into the winter. A rare, beautiful and unusual small tree you will enjoy in your garden for many, many years.

CYDONIA SPITFIRE

(Plant Patent No. 830)

Upright Growing Cydonia — Perfect for Hedges and Single Specimens

Here is a fine, early flowering shrub with excellent habit. It grows upright to a height of about 6 to 7 feet when mature. It may be held down to 4 to 5 feet if you wish by simply topping it once or at the most twice a year; side pruning is not necessary. The flowers are large and deepest crimson-red. The upright stems are covered with them from the ground up. You can well imagine what a brilliant effect is made when Spitfire Cydonia is used for a hedge. The plants are not more than 2 feet across when mature so that it is an excellent subject to use as a single specimen as well as in shrub plantings where space is limited. No flower buds have ever been killed nor has there been any damage from frost to the wood in temperatures as low as 15 degrees below zero. We have had this plant under test for ten years and think it is a fine addition to flowering shrubs that may be successfully used for hedging as well as specimen planting. We offer plants about 3 feet tall, ready to bloom.

Each \$4.00, Three \$11.00, Doz. \$40.00

Upright Form Cydonia, Spitfire
Chionanthus Virginica

CHIONANTHUS - Fringe Tree

Virginica *Each \$4.50,
Three \$12.50, Doz. \$45.00*

One of the most striking of native small trees. Its handsome, oblong leaves turn a bright golden yellow in autumn. In June large masses of loose panicles of feathery petaled, snow-white flowers make it an outstanding garden plant. Thomas Jefferson grew this shrub at Monticello as it was one of his favorites. Give it plenty of room to fully develop.

Cydonia Pink Lady
(See page 96)

ENGLISH HAWTHORNS (Crataegus Oxyacantha)

The English Haw or Hawthorn is a lovely flowering shrub or small tree about 15 feet high, with spreading branches and stout spines. The leaves are broad, the 3 to 5 lobes much toothed. Its flowers are in large clusters and are produced in immense quantities. The fruits are scarlet. They are especially well suited for the small garden or as specimens on the lawn where a Maple would be too big and create too much shade.

Paul's Scarlet English Hawthorn *Each \$7.50, Three \$20.00, Doz. \$75.00*

This is a brilliant pink, double-flowered variety. One of the choicest ornamental trees in existence. Fool-proof and hardy; sure blooming. It is a joy to see it each spring.

**Crataegus
Oxyacantha
English Hawthorn**

Cornus, White Cloud

Three New Dogwoods

A few years ago while visiting one of the fine old estates in the East which prides itself on a magnificent planting of Dogwoods, we observed two outstanding specimens, one the flowers of which were the color of apple blossoms, and the variety was so named. The second tree was a gorgeous rose-red; it made a superb vibrant show of color. This strikingly beautiful plant was named "Spring Song." Permission was obtained to propagate both varieties and we are able now to pass a limited number of these two valuable varieties.

Cornus Florida Apple Blossom, 2 to 3 ft. tree Each \$7.00

Cornus Florida Spring Song, 2 to 3 ft. tree Each \$7.00

Cornus Florida, White Cloud
3 to 4 ft., Each \$7.00, Three \$18.00, Doz. \$67.50

From thousands of seedlings of white Dogwoods, we selected several years ago an outstanding variation. This distinctive tree was replanted and grown by itself for further observation until we were satisfied we had something extra fine in white Dogwoods. It is outstanding in particular, for the immense amount of flowers it produces as well as the rapidity with which it starts flowering so freely. At opening the flowers give a creamy yellow effect which after a few days, changes over to white. When in bloom the tree is literally a white cloud; the foliage is almost not to be seen. Instead of just planting ordinary seedling trees, particularly when space is limited, try this new variety. It will reward you with greater masses of blooms for all your life.

Cornus Kousa
Chinensis, "Milky Way"

Cornus, Coral Beauty—showing its lovely coloring in winter

CORNUS ALBA ATROSANGUINEA "CORAL BEAUTY"

A Wayside Gardens Introduction

Cornus alba is well known for its red bark in winter. It is a wide spreading and somewhat untidy shrub. In the special selection of Coral Beauty we have a plant of slower, neater, and more compact growth. It is not as tall and has a much brighter colored bark. In winter the stems are brilliant coral-red in vivid contrast with other shrubs or snow. For winter color in the garden, or for cutting, there is nothing better. Pale blue berries follow the flowers in autumn, ultimate height about 4 to 5 feet. Please note stems in summer are green, foliage a pleasing fresh green. A shapely, fine shrub of moderate size.

Bushy plants, 3 ft., Each \$6.00, Three \$16.00, Doz. \$60.00
Bushy plants, 2 ft., Each \$5.00, Three \$14.00, Doz. \$50.00

Cornus Florida Apple Blossom

Cornus Kousa Chinensis "Milky Way"

Through the years we have been much impressed with the beauty of the true Chinese Dogwood. We also observed that amongst the many hundreds we have grown at Wayside Gardens there occurred a lot of variations. We have selected from these better forms an outstanding specimen which we have called "Milky Way." Young specimen plants of this particular type are now being offered. They will start blooming one or two years after planting but as the tree grows a little older and bigger it will simply stagger you with its beauty. Don't delay planting one, nothing you ever saw in a garden can equal it.

4 to 5 feet, Each \$12.00

Cornus Kousa Chinensis Flowering size trees, Each \$10.00

Chinese Dogwood was brought to the Arnold Arboretum from China by E. H. Wilson in 1907. The flower heads are extremely large, frequently 5 to 6 inches across, the white bracts overlapping the button-like mass of real flowers in the center. Experts have acclaimed this Dogwood as the finest of Chinese plants introduced to America. Its flowers are produced in June long after the American Dogwood has bloomed and remain in excellent condition for nearly a month. The fruits are like large strawberries, and very much enjoyed by the birds. Its foliage turns scarlet in autumn. This is a rare tree known only to a limited few. It is a magnificent contribution to the American gardens and we urge you to plant one as soon as possible so you may enjoy this Oriental beauty soon. Ultimate height about 10 to 12 feet. It is much harder than our Dogwood and will flower and grow profusely where the American Dogwood would not survive.

COTONEASTER - The Queen of Shrubs

Apiculata (Cranberry Cotoneaster) Each \$3.50, Three \$9.75, Doz. \$35.00

A beautiful hardy dwarf Cotoneaster from Western China. This little known variety grows about 2 feet high with arching branches weighted down during the autumn with masses of bright crimson fruits about the size of a Cranberry. The foliage is shiny green and beautiful through the year in mild climates while in cold parts of the country, it loses its leaves late in the fall. Perfectly hardy. Apiculata is not subject to red spider or other troubles. Its fruit is fully as large as Cranberry and more brilliant.

Dielsiana 2 to 3 ft., Each \$4.50, Three \$12.50, Doz. \$45.00

This is one of the fine shrubs. Height about 6 feet and lots of style. Arching branches are crowded with small pink flowers which are replaced in early autumn with thousands of scarlet berries while the foliage itself becomes also brilliantly tinted in late autumn. Its arching habit, fruit and colorful foliage truly make this a beautiful shrub.

Divaricata 3 to 4 ft., Each \$3.50, Three \$9.75, Doz. \$35.00

A low growing, much branched and graceful shrub from China. Its ultimate height is about five feet and it is perfectly suited for hedges of medium height, say from 3 to 5 feet. Foliage is small and round, highly polished dark green. It creates a splendid effect. Brilliant small egg-shaped red fruits in autumn add to its beauty. Few shrubs equal Cotoneaster Divaricata in the border or as a hedge plant.

Meyeri 3-4 ft., Each \$5.00, Three \$14.00, Doz. \$50.00

One of the finest of the species, growing 6 feet tall. The branches are slightly pendulous. The leaves are gray-green above and silvery below, somewhat tomentose. Covered in autumn and late summer with coral-pink fruits, making a lovely picture in the autumn garden. Of easy culture and perfectly hardy.

Salicifolia Autumn fire Each \$7.50

A prostrate plant of exceptionally fast growth which will carpet a bank or cover the ground around shrubs in a handsome and distinctive manner. Does equally well in half shade as in full sun. Bright green willow-like leaves and beautiful red clusters of fruit. For ground cover plant 4 feet apart; seldom over 6 inches high and will spread up to 8 feet. A fantastic plant.

DAPHNE

Daphnes are lovely, fragrant plants and the two varieties offered give bloom from very early spring to May and occasionally, through the summer. Both are of delicious fragrance and dainty, compelling beauty. They are hardy with little protection except in the coldest sections of the country.

Culture: They prefer a sunny position in well drained, sandy soil. In order to keep the evergreen foliage perfect, protect it with a little straw during the coldest part of the winter. The plants will withstand temperatures as low as 10 below zero. Water sparingly in summer. Daphnes will not grow well in cold, poorly drained soil.

Cneorum (Garland Flower)

These shrubs are of spreading habit and do not grow over 8 to 12 inches high; producing delicately perfumed, rose-pink blossoms. The flowers completely cover the plant not only in spring but again in early autumn. As an edging plant in front of evergreens or shrubs it is unequalled. It also forms a splendid low hedge along garden walks and around flower beds.

	Each	Three	Doz.
Heavily budded plants, 7-9 in. spread	\$2.50	\$7.15	\$25.00
Heavily budded plants, 9-12 in. spread	3.00	8.50	30.00
Heavily budded plants, 12-15 in. spread	4.00	11.00	40.00

HARDY DAPHNE "SOMERSET"

(Plant Patent No. 315)

This deliciously fragrant and easy to grow Hybrid Daphne originated in England a few years ago. It has received the highest honors from the Royal Horticultural Society of Great Britain.

During May and early June the plants are covered with delightfully scented bluish-pink, star-shaped flowers in clusters 6 to 8 inches long. The fragrance is not unlike that of Daphne Cneorum or Viburnum Carlesi. It grows and flowers exceptionally well in light shade.

FLOWERING PLANTS FROM POTS

Daphne Somerset grows best and fastest when it is transplanted while not too big. We, therefore, offer nice young plants from pots which will bloom the first year. They average about 12 to 18 inches tall, and in one year will grow to almost twice the size.

Each \$5.00, Three \$14.00, Doz. \$50.00

BLUE DAPHNE Each \$5.00, Three \$14.00, Doz. \$50.00

Genkwa (Lilac Daphne)

This is one of the finest garden gems, not only rare but beautiful. In March and April, Lilac-like blue flowers are produced on gracefully pendulous branches before the foliage appears. Its ultimate height is about 3 feet. It can be grown in flower border, rock garden or in front of shrub border. Likes well drained, ordinary garden soil but will thrive without protection in localities where temperatures go below zero. Transplants with absolute success if pot-grown plants are set out. We offer fine young plants about 12 to 15 inches tall in pots. Daphne Genkwa spreads slowly, in time forming a bushy plant about 3 feet across. A beautiful thing to see in bloom.

EXOCHORDA MACRANTHA "THE BRIDE"

A Beautiful Compact Form of the Common Pearl Bush

(Plant Patent No. 1506)

2-3 ft., flowering plants, Each \$5.00, Three \$14.00, Doz. \$50.00

A new small, compact shrub very bushy in habit and not over 4 feet in height. Perfect for the modern small garden. It does not grow out of bounds. In late April and through early May, it is covered with a wealth of flowers. Drooping racemes of pure white flowers are preceded by round, pure white buds resembling pearls. We know of no shrub which remains handsome and in flower as long as Exochorda, The Bride. Our picture does not do this lovely shrub justice.

DEUTZIA

All Deutzias are showy flowering shrubs of very bushy habit. They have many stems rising directly from the root, arching upward and outward, thickly covered with foliage which almost completely disappears in May under a superabundance of panicles of small, frilled, bell-like flowers. They are hardy throughout most of the country.

One of the outstanding good qualities and merits of the following four mentioned Deutzias is their freedom of bloom in quite heavy shading. Gracilis especially is perfect under shady conditions.

Crenata pendula Each \$3.50, Three \$9.75, Doz. \$35.00

This beautiful, strong growing hybrid came to us from France a few years ago. It produces large, single, milk-white flowers in handsome pyramidal clusters. Shown in England a few years ago, it received an Award of Merit from the Royal Horticultural Society. Its low, pendulous growth and modest height, 3 to 4 feet, make it an excellent shrub for foreground planting. Last, but not least, is the enormous amount of flowers which completely cover the bush at flowering time.

Gracilis Each \$2.50, Three \$7.15, Doz. \$25.00

Seldom more than 2 to 3 feet high. This is one of the prettiest and most graceful of all the Deutzias. The plant makes a fountain-like bush attractive at all times of the year. In May it is covered with an astonishing profusion of delicate snowy white flowers. It does well in light shade and is well adapted for low edging to walks or paths, excellent in clumps in the foreground in the border.

Kalmiaeflora Each \$3.50, Three \$9.75, Doz. \$35.00

A low growing bushy shrub. The branches are slender and slightly arching. Covered in late May and early June with Kalmia-like pink flowers. It does not grow over 3 feet and, therefore, is an excellent shrub for the small garden or in the foreground of the shrub border. Of easiest culture. Give it a sunny spot or light shade. Again, we repeat, a nice small shrub for the small garden.

EUONYMUS

Alatus Compactus - Dwarf Flame

In the Arnold Arboretum in Boston this shrub causes much comment each autumn for its unbelievable brilliance of foliage. Its compact growth, easy culture, and slow growth make it one of the outstanding shrubs for hedges as well as individual specimens in the garden. Its ultimate height is six feet. Does well in shade. Ours is the true, compact, slow growing form. Perfect for small hedge which in fall turns into a line of fire.

Hedging size, 18-24 in. Each \$3.00, Three \$8.50, Doz. \$30.00
2 to 3 ft. Each \$4.00, Three \$11.00, Doz. \$40.00

Europaeus Intermedia Fructo-Albo

Each \$7.50, Three \$20.00, Doz. \$75.00

This upright growing small shrub (6 to 7 feet high) should be among the first twelve fruiting ornamentals. The rigid branches are a perfect sight when carrying the extra large white fruits which are retained long after the leaves have dropped. Cut sprays placed in water will last six weeks or more. The tree is easily grown anywhere and free from "bugs" and troubles. Excellent for the small garden. Grow it in full sun or light shade. Any reasonable garden soil suits it.

Monstrosus 3 to 4 feet—Each \$6.00, Three \$16.00, Doz. \$60.00

A rare new shrub particularly interesting during the winter. Its bark is corky and spreads out in big flat wings of most interesting character. The common Euonymus alatus does this also but not in the same degree as this new variety Monstrosus. Grows beautifully in shade or full sun; in autumn its foliage becomes a brilliant, glowing fiery mass. Ultimate height about 5 feet. Grows anywhere and is hardy anywhere.

	Each	Three	Doz.	100
Patens (Kiautschovica)				
Bushy plants, 12 to 15 inches.....	\$2.75	\$7.85	\$27.50	\$210.00
Bushy plants, 15 to 18 inches.....	3.25	9.25	33.50	275.00

This is one of the easiest grown evergreen shrubs. Compact and shapely, and ultimately about six feet tall. Its foliage is rich green, somewhat like that of Euonymus Vegetus and remains on the plant practically throughout the entire winter and is quickly replaced by shiny new foliage. In spring it is a plant par excellence for growing in shady places, under tall trees or in sunless corners. It makes a fine hedge and can be pruned any way to suit. Blends beautifully with evergreens, grows equally well on acid or alkaline soils and is hardy. In autumn numerous orange berries add to its charm. Transplants easily in fall or spring. Does excellently in shade.

Planipes Each \$6.00, Three \$16.00, Doz. \$60.00

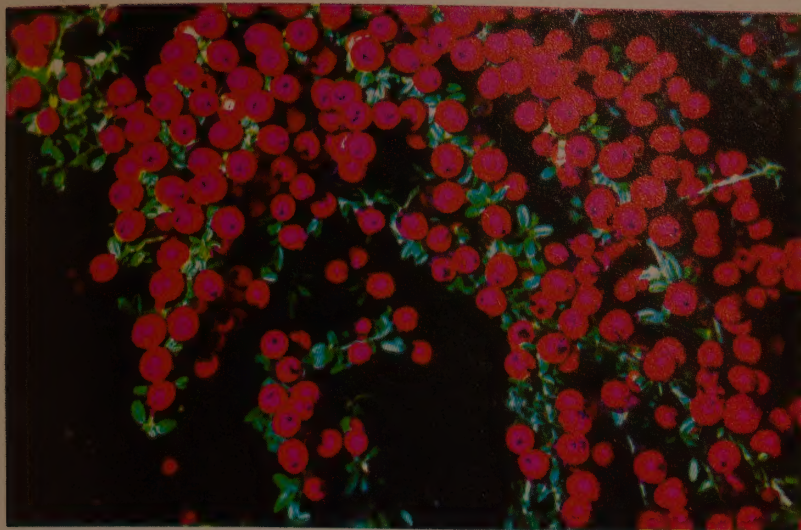

A beautiful species from Japan forming a large bush of upright habit, about 6 feet high. It is conspicuous in autumn with its large magnificently colored leaves and hundreds of rosy-red fruits suspended on 3 inch threads. We furnish nice plants ready to bear fruit.

Vegetus. See Vines, page 120.

Euonymus Intermedia Aldenhamensis

This upright growing small shrub (4 to 5 ft. high) should be among the first twelve fruiting ornamentals. The rigid branches are a perfect sight when carrying the extra large rose-red fruits which age to a brilliant red and are retained long after the leaves have dropped. The shrub is easily grown anywhere, and free from "bugs" and troubles. Excellent for the small garden. Does well on any soil in either light shade or full sun and is perfectly hardy.

Showing its startling autumn coloring
(See page 100)

Hydrangea Quercifolia

Quercifolia About 18 inches tall

Each \$4.00, Three \$11.00, Doz. \$40.00

The Oakleaf Hydrangea is a most valuable shrub, blooming late summer and throughout the entire autumn. It is one of the few plants which is perfectly at home in quite deep shade. The artistic flowers are borne in open conical heads, majestic and showy, changing from white to soft rose lasting seemingly indefinitely. The big ornamental leaves take on rich autumn tints and help to provide color and interest where it is almost impossible to obtain it at a time of the year when very few shrubs have bloom. Seldom over 4 to 5 foot high and of slow growth. Hardy, requires no particular care. Here is a plant of the "first water."

Hydrangea Quercifolia
The Magnificent Oak Leaf Hydrangea

Calluna, J. H. Hamilton

Erica Carnea

Deutzia Gracilis (See page 100)

Heaths and Heathers

CALLUNA - ERICA

The Heaths are hardy, compact, low growing and spreading, evergreen shrubs. They are most useful for planting in front of shrubs or evergreens and, naturally, are perfect for edgings. They come to perfection when planted in quantities of six or more in one clump to fill in a bay or bare spot. There are many varieties, some winter-blooming and others for spring or summer show. The small foliage is densely arranged around wiry, short stems and takes on lovely shades of green and bronze throughout the winter.

All Heaths and Heathers do best in a well drained, warm soil which should be about two-thirds sandy loam and one-third peat, well mixed. Mix through this well rotted cow manure and if this is not available, use Wayside Gardens' Plant food at the rate of a cupful per plant. Soil should be slightly acid and always well drained. The first winter after planting, it is well to cover newly set out plants with a light covering of straw or leaves. Water freely during dry, hot weather. Occasionally trim tips to keep plants looking neat; this is the last season's growth. Remove it in early April before new growth starts. It is the new growth the flowers are produced on.

CALLUNA

H. E. Beale *Each \$2.75, Three \$7.85, Doz. \$27.50*
A grand addition to a large genus. It is a strong grower, of open habit, reaching a height of 1-1½ ft. The spreading growths are gaily decorated with extra-large, double, silvery pink blossoms from early August to late October. One of the first twelve Heathers to plant, succeeding even on clay soils.

J. H. Hamilton *Each \$2.75, Three \$7.85, Doz. \$27.50*
A new Heather, 12 inches high but much wider, found on Mt. Maughan, Yorkshire. It has semi-prostrate, interlacing growth and is one of the most distinct of the family. From July to winter its slender, 3-6 in. twigs are roped with delightful rose-pink, full double flowers.

Vulgaris *Each \$2.50, Three \$7.15, Doz. \$25.00*
(Scotch Heather.) A low-growing shrub with erect branches covered with short, closely adpressed leaves. The pretty bell-shaped flowers occur in great profusion toward tops of the shoots, and are a pretty rosy color. This is the wild Scotch Heather so much admired. It is of easy culture.

Calluna Vulgaris

Sungold Golden
flowers all
summer
and fall.
(See page 104)

ERICA

Carnea *Each \$2.75, Three \$7.85, Doz. \$27.50*
Grows wild in Central and Southern Europe. Dwarf, spreading habit; covered during February, March and April with deep rosy red flowers.

Carnea, Springwood White *Each \$2.75, Three \$7.85, Doz. \$27.50*
The finest early flowering white variety. Its strong, trailing growths packed with long, urn-shaped flowers. Early blooming, from January until March. A lovely plant at all times.

Carnea, Springwood Pink *Each \$2.75, Three \$7.85, Doz. \$27.50*
Early blooming, strong growing and brilliant pink flowers from January until April make this one of the finest spring and winter blooming varieties. A neat and clean plant.

Vivelli *Each \$2.75, Three \$7.85, Doz. \$27.50*
A splendid addition to an already large family. Its 12 inch growths are packed with blood-red flowers. These look handsome resting on the dark green leaves from March to May.

Forsythia, Lynwood Gold (See page 104)

FORSYTHIA—The Best Varieties Available Today

Lynwood Gold—Golden Yellow

This splendid new Forsythia is one of several fine new shrubs we have obtained in Europe for introduction in this country. The branches are erect and literally smothered under golden yellow flowers from top to bottom. Not only are the flowers produced in the most profuse manner but the individual blooms are better and fuller in form as well as of greater substance, apparently never minding bad weather. For a magnificent show of golden yellow, there is nothing better. Ultimate height 5 to 7 feet depending on conditions. Lynwood Gold Forsythia is a worthwhile companion to the new and popular pale yellow variety, Spring Glory.

3 to 4 ft. plants at: Each \$3.50, Three \$9.75, Doz. \$35.00
4 to 5 ft. plants at: Each \$4.00, Three \$11.00, Doz. \$40.00

Spring Glory—Primrose Yellow

Forsythia, Spring Glory is without question the loveliest of all the Golden Bells. It would not be far amiss to say that it produces twice the number of blossoms as the common Forsythia, the pale yellow color is very pleasing and brilliant, infinitely more attractive and cheerful than that of the varieties now in general use. If you desire a sparkling and cheerful display in your garden in early spring, plant a few Forsythia, Spring Glory. There is nothing which will make you forget winter as quickly nor announce spring as flamboyantly. Spring Glory is "the variety" to grow for flowering indoors. Branches cut during January and February burst into bloom without any trouble in a few days and make a gorgeous show in the house during the winter months at practically no cost to you.

2 to 3 ft. plants at: Each \$2.50, Three \$7.15, Doz. \$25.00
3 to 4 ft. plants at: Each \$3.50, Three \$9.75, Doz. \$35.00

HYPERICUM

Attractive and charming low growing, summer-flowering shrubs. Their brilliant flowers are beautifully formed and grow on slender branches from early summer until stopped by frost. Excellent subjects for the flower border or in the foreground of taller shrubs, as well as for ground covering.

Calycinum

Each \$2.25, Three \$6.50, Doz. \$22.50

This is a most valuable variety because it can also be used as a ground cover for both sunny and semi-shady places. The underground runners are produced so freely as to completely cover the ground; at the tops the golden yellow flowers shine like jewels. Its height is about 10 to 12 inches. We recommend this as one of the best and hardiest.

Hidcote

Each \$3.00, Three \$8.50, Doz. \$30.00

From the famous Hidcote estate in England, we obtained this fine variety a few years ago. It grows into a twiggly shrub about 18 inches tall and about the same diameter. Throughout the summer, it is covered with bright yellow, cup-like flowers about 2 inches in diameter. In cold winters, it freezes back to the ground but this does not matter because it springs up from the base producing each summer its masses of blooms. A fine shrub for the foreground in the border. In the temperate parts of the country it will reach a height of about 3 to 4 feet. Flowers are fragrant and appear in late June continuing until mid-October.

Sungold

(U. S. Plant Patent No. 568)

Each \$3.00, Three \$8.50, Doz. \$30.00

A hardy, shapely, dwarf shrub which grows into an almost completely oval shape of 2 to 2½ feet in diameter, and about 18 to 24 inches in height, densely covered with foliage that is handsome throughout the summer. It bears its cymes of golden flowers at the end of every shoot of the summer's new growth. It flowers more freely and much longer than any of the Hypericum Patulum now in general use. Its flowers are bigger and produced in immense quantities, transforming this lovely plant into a small mound of gold when in full bloom. Of particular interest and value is its exceptional hardiness. In our nursery tests over five years it has proven its ability to withstand cold weather as well as outgrow and outbloom any Hypericum we have ever seen. The average size of bloom is from 2½ to 3 inches in diameter.

Persian Lilac

Ilex-Holly

Convexa Hetzi Each \$2.50, Three \$7.15, Doz. \$25.00, 100 \$190.00

This is a very fine form of the well known Convexa; it has proven to be hardier and stronger growing. The glossy boxwood-like leaves are profuse and as the plant is closely branched it has a rich boxwood-like appearance. We recommend it without reservation. Bushy plants 12 to 15 inches high and spread.

Convexa compacta

Each \$3.50, Three \$9.75, Doz. \$35.00

A charming dwarf evergreen for foreground planting, perfect in front of evergreens, in front of the house, or it will make a choice dwarf evergreen hedge. It is a compact form of the common Ilex Convexa with a great deal of punch. Its shiny, bright foliage and compact growth definitely put it in a class by itself. You should have one or more of this delightful little shrub. We offer 15 in. plants, bushy and compact. In our opinion, it is the best of the various compact forms of Ilex Convexa.

Glabra

Each \$4.00, Three \$11.00, Doz. \$40.00

The Inkberry is a loose, spreading shrub, 4 to 5 feet high at maturity, with shining dark green leaves and a profusion of glittering black berries through the winter. It is an excellent plant for hedges in shady situations. It may also be effectively used as individual plants mixed with evergreens or in front of the shrubbery border.

Rotundifolia (Crenata Rotundifolia)

Each \$4.00, Three \$11.00, Doz. \$40.00

A compact growing rather globular shaped evergreen Holly as high usually as wide. It is hardier than Ilex Convexa and more compact. Its bright green leathery leaves are larger than those of Convexa. A splendid plant for planting in front of a house where the shiny leaves mix well with other shrubs and are a constant pleasure throughout the winter; does well in sun or light shade and is of easy culture.

Serrata (Sieboldi)

Each \$4.00, Three \$11.00, Doz. \$40.00

This is a deciduous Holly. It is slow growing and ultimately reaches a height of about 10 feet. In winter, after the leaves have been shed, it is one of the most showy shrubs because of the persistent brilliant red berries which hang on practically all winter. They make a cheerful showing outside against the snow and are charming for cutting and winter decorations. Also it is a fine plant for moist places, where other shrubs would not be happy.

KERRIA

Japonica flore-pleno

Each \$3.50, Three \$9.75, Doz. \$35.00

Double Kerria is sometimes called the Globe Flower because the choice double golden flowers have a ball-like shape not unlike the button Chrysanthemums. The plant grows vigorously and attains a maximum height of 4 to 5 ft. It is bushy in habit with many bright green stems, attractive all winter. Give it a sunny location in front of the border and its golden yellow blooms all summer will be a pleasure. The flowers last well in water and are excellent for cutting. Also does well in light shade.

KOLKWITZIA - Beauty Bush

Amabilis

Each \$3.50, Three \$9.75, Doz. \$35.00

A handsome flowering shrub which came from China. While upright in growth its branches at the ends are arching, almost pendulous, so that they cover the ground about them and never look "leggy" and bare. It is perfectly hardy anywhere, has excellent foliage and in June is a fountain of bell-shaped, light pink flowers not unlike the Weigela. Grows anywhere and does exceedingly well in dry, sandy, poor soil. Ultimate height about 7 to 8 feet.

Hybrid Lilac Species

THE DAPHNE LILAC

Microphylla Superba

Each \$4.50, Three \$12.50, Doz. \$45.00

A remarkably lovely shrub, deliciously fragrant, introduced from China. Graceful, slender stems; mahogany-red buds opening to soft pink, panicles of small individual florets. The flowers produce a two-tone effect that is most unusual and novel. The main truss is on top of each stem and smaller trusses are set down the branches, so that the entire plant forms one large bouquet. The foliage is very decorative, about one inch long and three-fourths inch wide. Blooms again in the fall. Of neat habit, seldom growing over 5 feet tall.

THE PINK PEARL LILAC

Sweginflexa

Each \$3.50, Three \$9.75, Doz. \$35.00

A handsome Hybrid species of neat clean growth, makes a fine looking shrub about 6 to 7 feet tall when fully grown. At the end of May when the French Hybrid Lilacs have finished blooming, Sweginflexa produces a profusion of long, graceful flower panicles of perfect form. The flowers are long tubed, reflexing at the tip, delightfully fragrant and a soft coral-pink or empire-rose. The pearly effect of its color is responsible for the common name, "Pink Pearl Lilac." Blooming after other Lilacs have finished, this is a lovely and valuable plant which helps to continue the procession of bloom in the garden. Hardy anywhere, an unusual plant, we send plants about 2 feet tall which will bloom first year after planting.

PERSIAN LILAC

A dense compact plant with good foliage which, at blooming time, is completely covered under a tremendous amount of bloom. We know of no other Lilac which flowers so prolifically and responds so splendidly under what might be termed indifferent treatment. It blooms ahead of the French Hybrid Lilacs and the flowers do splendidly when cut. The ultimate height depends much on soil conditions. Average would be about 7 to 8 feet and almost that much across.

Each \$3.50, Three \$9.75, Doz. \$35.00

Kolkwitzia Amabilis, flower detail
A magnificent flowering shrub for hot and dry locations.

Laburnum Vossi

LABURNUM - Golden Chain

Vossi Each \$7.50, Three \$20.00, Doz. \$75.00

Bushy plants ready to flower. This is the long clustered Golden Chain. The flowers are not unlike those of the Wisteria and beautiful golden yellow. The hanging clusters of blooms are often 18 to 20 inches long and borne very profusely in late spring, transforming the small tree into a mass of golden yellow. Here is one of the nicest small trees for today's smaller gardens. It is magnificent when in bloom and handsome when not because of its smooth bright green bark and clover-leaf-like foliage. It is best planted where it has some shade or on the north side of the house. Does beautifully mixed in between taller shrubs. It usually blooms first year after planting. This is a "must"; you'll want more than one.

Laburnum Pendulum, Weeping Golden Chain

Each \$8.00

Here is a rare and handsome tree. The branches of the Weeping Golden Chain grow downward instead of up. Golden clusters of flowers hang along the weeping branches making a spectacular showing. Like the weeping cherry it is grown on an upright stem of suitable height permitting the pendulous branches to hang down causing a cascading effect of lovely dark green foliage.

The Pink Pearl Lilac, Syringa Sweginflexa Illustration is one-half actual size.

[105]

Syringa Microphylla Superba

Dwarf Syringa, Palibiniana

Dwarf Korean Lilac

Syringa Palibiniana

Each \$5.00, Three \$14.00, Doz. \$50.00

This is a fine dwarf growing Lilac from Korea where it was discovered in 1917. Not yet well known but it will be used in great numbers in today's small gardens. It flowers profusely, panicles are about 6 inches long and lilac or lavender colored. Foliage is small and clean. Plants are rounded and bushy in our nursery, never over 3 feet high and 3 feet across, although very old specimens found were 6 to 8 feet. Here is a rare and fine plant of only recent discovery you will enjoy having.

Syringa Palibiniana Standards

Each \$10.00

A most attractive Tree Lilac, intended for formal gardens. Looks especially good in the center of a flower or Rose bed. The head is symmetrical, leaves small and clean. In late June a mass of flowers completely covers the top. Here is a choice item for the person who wants something different. Stems are about 36 to 40 inches high. Unlike other Lilacs, Palibiniana blooms the first year of planting.

Palibiniana Standard

PLANTING INSTRUCTIONS FOR LILACS

It is very important you plant Lilacs deeply. See to it that they are planted at least 2 to 3 inches deeper in your garden than they were grown in the nursery. Further, do not expect Lilacs to bloom correctly with full size flowers until not less than two years after planting. Lilacs require time to re-establish themselves and develop flower buds of the proper size and color. They respond rapidly to heavy feeding and are lovers of alkaline soils; use lime freely.

Primrose

Clarke's Giant

French Hybrid Lilacs

The finest and highest rated varieties

The following are the "cream" of the cream of Lilacs. They stand out above other varieties because of their enormous trusses and exquisite colors, as well as their fragrance. No more need be said than "These are the best to date."

The plants offered are healthy and vigorous, about 2 feet tall, depending on the habits of the variety, and will flower profusely as soon as they have become well established.

Alice Eastwood (New) Each \$3.50, Three \$9.75, Doz. \$35.00

The buds are claret-purple, when open are handsome double Cyclamen-purple. Clusters are beautifully formed and slender, almost "spike-like" and are particularly handsome when used as cut flowers. A unique and extra fine variety.

Clarke's Giant (Plant Patent No. 754) 18-24 inch plants, Each \$4.00

2-3 foot plants, Each \$5.00; 3-4 foot plants, Each \$6.00

The remarkable vigor, as well as the abundance with which the flowers are produced, makes it the finest and surpasses by far any other Lilac introduced to date. The color is soft gentian-blue when fully open. The flower clusters are carried well above the foliage. The fragrance leaves nothing to be desired.

Decaisne Each \$3.50, Three \$9.75, Doz. \$35.00

Single. Florets delicate aster-violet streaked with gentian blue, contrasting magnolia-purple buds. A most prolific bloomer. It is a refined plant in every way. Makes a nice shapely bush, not very tall, rather broad. Rated as one of the best in its color.

Esther Staley (Plant Pat. No. 768) 18-24 in., bushy plants, Each \$4.00

2-3 ft., bushy plants, Each \$5.00; 3-4 ft., bushy plants, Each \$6.00

The Best Pink Lilac to Date! A magnificent Lilac in a most desirable and unusual color. Pink lilacs have been waited for and wanted for years. There is nothing like it. Buds are red; flowers are single, moderately large and soft Paul-Neyron-rose. The plant is healthy and has remarkable vigor.

Katharine Havemeyer Each \$3.50, Three \$9.75, Doz. \$35.00

An outstanding variety. Trusses are immense, very fully double. Most beautiful mauve-pink. One of the most persistent bloomers. A very thrifty bush.

Mme. Lemoine Each \$3.50, Three \$9.75, Doz. \$35.00

Flowers large, double, pure white. Clusters narrow, medium to large. One of the most satisfactory and popular of the double whites and a very dependable bloomer.

Mrs. Edward Harding Each \$3.50, Three \$9.75, Doz. \$35.00

This variety was awarded in 1921 the special prize founded by Mrs. Edward Harding for the best double red Lilac. Large panicles of large, full flowers of the brightest carmine.

Paul Thirion Each \$3.50, Three \$9.75, Doz. \$35.00

This is a middle season bloomer. Though the trusses are not overly large they bloom very heavily. The buds are a rich dark color that open to a brilliant reddish lavender-blue. Double.

Pres. Grevy Each \$3.50, Three \$9.75, Doz. \$35.00

Flowers semi-double to double, clear soft cobalt blue borne in large pyramidal clusters. One of the best in color. A prolific bloomer with nice habit of growth.

Primrose (Plant Patent No. 1108) 18-24 in., bushy plants, Each \$5.00

2-3 ft., bushy plants, Each \$6.00

This is the famous Yellow Lilac which has recently been developed in Holland. It has made quite a name for itself in Europe during the past few years. Shown at the famous Chelsea Show in London in 1952, it created a mild sensation. The plants are bushy and dense and produce an exceptional number of flowers. There isn't anything like it.

Vestale Each \$3.50, Three \$9.75, Doz. \$35.00

Immense trusses in great abundance of purest white. Single. Considered one of the best white Lilacs.

Esther Staley

Pres. Grevy

Decaisne

Paul Thirion

Malus - Flowering Crabs

Two groups of flowering trees, the Cherries and the Crabs, stand far above others in daintiness and grace. The Japanese Cherries are well advertised by the spectacular planting in Washington, D. C., but the even lovelier Crab Apples have never received justice at the hands of American planters. Crabs are extremely hardy and will thrive in positions and exposures which would be fatal to the more delicately constituted Cherries. They also exhibit a greater variety

Pink Weeper Crab Each \$5.50, Three \$15.00, Doz. \$55.00

This is an unusually handsome Weeping Flowering Crab. The main stem is upright. The branches are weeping and droop onto the ground. The effect is like a fountain and when in bloom in spring, a picture not easily forgotten. Makes a perfect small specimen tree for the lawn. The flowers are pink when open; the buds blood-red. A beautiful flowering, small weeping tree. Its attractiveness is prolonged by its fruit until late in the fall. Ultimate height 10 to 12 feet. We offer nicely shaped trees about 4 to 6 feet.

Malus, Red Jade (Plant Patent No. 1497) Each \$10.00

This dramatic flowering Crab, as you will note from the illustration, is semiweeping or rather pendulent in habit. The flowers are legion and bluish-white, transforming it into sheer beauty in the spring. However, it is not the flowers but the brilliantly colored fruit in autumn that makes this variety a sensation. There is nothing like it. Originating in the Botanical Gardens in Brooklyn, New York, arrangements were made for Wayside Gardens to introduce it to the public. Here, unquestionably, is a small tree that will thrill you with its beauty as well as every passerby who sees it. Only a limited number of plants are available at this time.

Strathmore (Pyramidal Crab) Each \$5.50, Three \$15.00, Doz. \$55.00

This is a narrow, upright tree. Foliage remains reddish all summer turning strikingly red and scarlet in autumn. The flowers resemble those of the Hopa Crab. Its pyramidal growth permits it to be grown in a narrow space.

Hopa Each \$5.00, Three \$14.00, Doz. \$50.00

Beautiful in bloom, beautiful in fruit. In the spring it is completely covered with the fragrant, bright pink flowers. From midsummer till severe freezing, the clusters of small, red Crab Apples gleam brightly along the branches. The fruit makes very fine jelly. In the spring the foliage is a rich maroon. Perfectly hardy, easy to grow, thriving in any soil.

Katherine Each \$5.50, Three \$15.00, Doz. \$55.00

A superbly beautiful white Crab. The clusters of large white flowers make the branches appear as if they are covered with a heavy layer of snow. It opens very light pink but soon changes to pure white. We think it one of the finest whites.

Dorothea Each \$5.00, Three \$14.00, Doz. \$50.00

From the Arnold Arboretum in Boston we received our start of this lovely fragrant Crab. 2-inch double pink flowers in immense quantities transform this tree into a lovely bouquet. Many people claim that the Dorothea Crab will ultimately replace the Bechtel's variety. Be that as it may, Dorothea is one of the great shows when flowering Crabs are in bloom.

Fimbriata flora-plena (Bechtel's Crab) Each \$5.00, Three \$14.00, Doz. \$50.00

This is a universal favorite and no wonder. Its fully double pink flowers are about 2 inches across and deliciously fragrant. The flowers occur in clusters so profusely they almost hide the foliage. The small tree when fully grown is seldom over 10 feet in height. It is round headed and quite neat and formal, blooms when very young and it is at its best when the other flowering Crabs have passed. Hardy anywhere, requires little or no care yet rewards you with a grand display of blooms year after year. We offer flowering trees about 4 to 5 feet tall. We have grown a nice lot of them.

Hillieri Each \$5.00, Three \$14.00, Doz. \$50.00

This handsome new English Crab will soon replace the common Floribunda. The flowers are almost an inch in diameter and semi-double; crimson in bud, opening a beautiful shade of bright pink, wreathing the arching stems in clusters of from 5 to 8 flowers. It blooms late and prolongs the flowering season by several days. One of the best of the double Crabs. Ultimate height, about 10 to 12 feet.

Pink Weeper Crab

in character of tree, a wide range of color in their blossoms, and in autumn are adorned with glittering clusters of fruit in shades of green, yellow, orange, scarlet and crimson. No other flowering trees equal the flowering Crabs in profusion of bloom and amongst other good qualities, varieties may be selected which have a restricted growth or dwarf habit so that they will never become too large and clumsy.

All flowering crabs offered are carefully grown and of an age where they will bloom shortly after planting. They are about 4 to 6 feet tall depending on variety.

Kaido or Fragrant Crab - Also called Midget Crab (Micromalus)

Each \$5.00, Three \$14.00, Doz. \$50.00

This is an indispensable noted for its deliciously fragrant soft pink flowers. It blooms early and the exquisite coloring of its rose-pink buds and rich clear pink flowers makes it one of the finest small pink flowered trees. In growth it is decidedly upright, in fact, almost pyramidal and when fully grown will be about 12 to 15 feet in height, and not much more than 4 feet across. A rare tree which we are happy to be able to offer at last. We send 4-year-old trees, about 3 to 4 feet high.

NEW DWARF GROWING FLOWERING CRABS

You of course are familiar with the dwarf Apple and Pear trees. They are especially grown on "dwarfing understock" or roots which prevents them from reaching their normal size as well as induces them to bear fruit early and heavily.

We have done the same thing with a number of distinct and handsome Flowering Crab Apples, which will permit you to grow them in the shrub border or as small colorful specimens on the lawn. It requires more time and care to produce this type of tree so they cost somewhat more than the regular type. For small gardens or as a specimen in the flower bed they are made to order. The dwarf varieties available are:

Hopa Hillieri Kaido Katherine

All are priced at \$5.00 each.

When ordering be sure and mention "dwarf trees."

Dwarf Flowering Crab

Malus, Red Jade

Showing its spectacular fruit in autumn. Photographed in the Brooklyn Botanic Gardens, Brooklyn, N. Y., where it originated.

[108]

Malus, Hopa

Malus Crimson Brilliant

The Most Brilliant Red Flowering Crab to Date!

(Plant Patent No. 939)

More than 27 years of breeding and selecting have gone into the creation of this choice specimen. It is very hardy and can be grown anywhere. It is of medium size; when mature it is about 15 feet tall so it can be grown in small gardens without crowding out other things. It is a lusty growing plant which usually takes 2 years or more after planting before it blooms. As the tree grows older it increases in floriferousness. The fruit is purple-red in color and about the size of a Cherry. The flesh is also red. The six-year-old specimen illustrated was completely covered with crimson flowers of a shade not unlike that of the well known Darwin Tulip, City of Haarlem. Crimson Brilliant Crab is without question the finest of the red Crabs. There is nothing that can compare with it and it is our choicest introduction of new Crabs.

Nice Trees, about 5-6 ft.

Each \$7.00

Three \$18.00, Doz. \$67.50

Malus, Katherine

[109]

Newly planted Flowering Crabs should be watered freely the first year. After planting, spade in 2 quarts of Wayside Gardens Plant Food in top layer of soil about 10 inches deep. Do this once more the following year then stop. Feeding and too free watering induces rapid growth but not flowering. Keep soil somewhat poor and dry for early and free blooming.

Fimbriata flora-plena

Malus, Crimson Brilliant

Malus Hillieri (See page 108)

Malus Kaido, Fragrant Midget Crab (See page 108)

Prunus - FLOWERING PLUMS

Pissardi rosea (Purple-Leaved Plum "Special Selection")

About 4-5 ft. tall, Each \$5.00, Three \$14.00, Doz. \$50.00

The deep bronzy purple foliage of this small tree is its great attraction; however, the thousands of pink, single flowers in spring are not to be overlooked. Most "purple" leaved trees lose much of their color throughout the summer but this is not the case with this special selection recently imported from England. Its foliage is of the deepest shade of purplish red imaginable, almost black. It makes a fine contrast plant and helps give variety and color in the garden, easily grown and ideal for the small yard or a special point of interest. Ultimate height about 10 feet. Occasional pruning will keep it in shape desired.

Double Pink Flowering Plum, Purple Leaf Plum (*Blireiana*)

About 4-5 ft. tall, Each \$5.00, Three \$14.00, Doz. \$50.00

This small tree, grows about 15 feet tall. In early spring it is covered with large clusters of pink blossoms like those of the double flowering Cherry. In fact it is often mistaken for a flowering Cherry. It is very hardy and should be used in place of flowering Peaches or Cherries in those localities where the latter are not hardy. In addition to the delightful display of double pink flowers you will enjoy the bronze-colored foliage as well as the delicious, small, sweet Plums which ripen in early autumn. Here is a small tree equally charming for the small garden or as a specimen on the large lawn. It is the first tree to bloom along with the Forsythia.

Hally Jolivette - Mist Cherry

In bloom for 2 to 3 weeks

This is a very compact and very finely branched tree. Its branches are produced by the legion, willowy yet stiff. In early spring, they are covered with thousands of small bluish white blossoms transforming the plant into a fluffy ball of flowers unlike anything you have ever seen before. When out of bloom, the foliage is handsome and pleasant to look at. A first rate novelty we unconditionally recommend.

State quarantines prohibit the sending of certain fruits and their flowering horticultural forms such as: Flowering Almonds, Flowering Peaches, into Arizona, California, Idaho and Washington.

Strathmore (Pyramidal Crab) (See page 108)

Beautiful plants in bush form, 3-4 ft., high for shrub border.
Each \$5.00, Three \$14.00.

Standard or regular tree form on stems about 3½ ft. high with fine, bushy head. Each \$6.00, Three \$16.00.

Hally Jolivette — Mist Cherry

Prunus Blireiana Flowers of the Double Pink Plum

[110]

Mahonia Aquifolium

Philadelphus - Mockorange

Belle Etoile (Fragrant Star Mockorange)

Each \$3.50, Three \$9.75, Doz. \$35.00

We, as well as others who have seen and smelled the charming flowers of this Mockorange, consider this one of the most fragrant. It is an origination of that great Frenchman, Lemoine. The star-like flowers open in Lily-like fashion, the centers showing a decided light purple flush. This extra touch of color, plus its intense and delightful fragrance which can be detected over the entire garden, sets this shrub aside as one in a class by itself. Its growth is orderly, nice and bushy, and it grows about 5 feet tall and 4 feet in diameter.

Enchantment (Double Mockorange)

Each \$3.50, Three \$9.75, Doz. \$35.00

Has erect branches furnished with long thick panicles of double white flowers. The blossoms are set very closely, creating a most striking effect. Sweetly fragrant. Does quite well in light shade. Very hardy and easily grown. As its name implies, it will enchant you. Ultimate height about 6 feet. A handsome shrub.

Innocence (Prolific Mockorange) Each \$4.00, Three \$11.00, Doz. \$40.00

The long arching branches carry a wealth of large single alabaster-white flowers. So heavily loaded with flowers are the slender branches as to assume the appearance of sheaves of bloom. They are of such purity of whiteness as to make all other Mockoranges seem gray by comparison. The fragrance is delightful, more delicate, yet more penetrating than that of Jasmine. Its flowers are so intensely white, one constantly marvels at its ethereal effect. A "must" in every garden. Ultimate height about 6 feet. Unquestionably the most prolific flowering Mockorange.

Pyracantha Lalandi lends itself beautifully for training as vines or wall covers but must have a warm and sunny exposure.
(See page 112)

Magnolia

Soulangeana

Nice bushy trees, 3 to 4 feet.....Each \$5.50, Three \$15.00

Nice bushy trees, 4 to 5 feet.....Each \$6.50, Three \$17.00

Soulange's Magnolia, sometimes called the Saucer Magnolia for no reason at all, is the rather rare Pink Magnolia of city gardens and parks. It makes a small tree with gorgeous shining foliage and in early spring produces its enormous, pinkish white flowers, more or less purplish outside and slightly fragrant. This Magnolia is the showiest of the family for planting in northern gardens, and when in bloom, even one plant will dominate the garden—yes, the neighborhood, if it is a sizable specimen. A whole street in Rochester, lined with this variety, is a mecca for all enthusiasts every spring.

Mahonia

Aquifolium

Each \$4.00, Three \$11.00, Doz. \$40.00

This is more popularly known as the Oregon Holly-Grape. It has large, spiny, metallic looking leaves which turn a bronzy red in autumn. In spring the clusters of yellow flowers are very attractive. These flowers are followed by blue fruit in June and July. We consider it one of the most attractive evergreens of easy cultivation. Does perfectly in north exposure in planting of evergreens. Ultimate height about 2½ to 3 feet, depending on location where grown. Does not mind shade and has very ornamental foliage for cutting.

Fragrant Star Mockorange, Belle Etoile (Beautiful Star)

[111]

Philadelphus, Innocence (Prolific Mockorange)

Robinia Friesia

Rhus Cotinus Notcutt Variety THE PURPLE-BLACK SMOKE TREE NOTCUTT VARIETY

(Plant Pat. No. 1457)

Coppery purple-black foliage and coppery purple-black smoke plume. A fantastic shrub. Magnificent richly colored foliage which is somewhat lighter in tone when young becoming darker as it ages. Feathery plumes in June and July just as richly colored as its foliage. Plant is of neat compact growth. Its foliage is incomparable. There is no other purple Smoke Tree like it. The feathery plumes are large and richly colored. In autumn when the leaves begin to turn, this shrub is a riot of colors. It was a sensation when first shown in England where it originated and was turned over to Wayside Gardens exclusively for introduction under patent in this country. Stock very limited. We send out plants about 2 to 3 feet tall. Here is something outstanding and tremendously different.

Each \$6.00, Three \$16.00, Doz. \$60.00

Rhus Cotinus Notcutt Variety (Plant Pat. 1457)

Robinia - Pseudoacacia Locust - False Acacia

A most useful as well as attractive tree. It is of picturesque outline, very rugged and open-branched. Bright pinnate Acacia foliage and racemes of white flowers. It thrives on the poorest soils. Below are given three remarkable horticultural varieties.

Friesia because of its pale gold foliage.

Fastigiata because it is a beautiful fast growing pyramidal tree.

Tortuosa grows into a noble straight stem with sinuous "twisted" branches.

All grow about 40 feet tall. Their open branches permit grass to grow luxuriantly right up to the trunk. Just the tree you need near a terrace where too dense shade is undesirable, and they thrive on the poorest soil. They root deeply and do not rob top soil.

Monument (*Robinia Hispida*) 6 to 8 ft., Each \$7.00, Three \$18.00

A tree that can be grown in every garden, big or little. It may be used as a small lawn specimen or in the shrub border where it will not crowd or harm plants near by. During late May and June it is covered with drooping clusters of deep rose-colored flowers resembling Pea blossoms. Will grow in any soil anywhere. Ultimate height about 10 to 12 feet. We offer nice plants about six feet. Prune it severely immediately after planting.

THREE UNUSUAL LOCUSTS

***Friesia* (New)** 5 to 6 ft., Each \$7.00, Three \$18.00, Doz. \$67.50

A magnificent Locust which has yellow foliage. The young shoots are almost orange. In autumn the foliage changes to coppery yellow. Through all this color one sees the bright red thorns. It is a magnificent plant and only recently introduced in Europe. We were fortunate in obtaining a few nice husky plants. Here is something rare and handsome.

***Fastigiata* (New)** 6 to 8 ft. Each \$7.00, Three \$18.00, Doz. \$67.50

The habit of growth is more slender than that of the Lombardy Poplar and because of its lovely foliage it is a far superior plant. It seems alive as the slightest wind sets the leaves in motion. This pyramidal form is thornless. Just the thing for a narrow space or to block out a hole where a wide spreading tree would not be permitted. A rare tree of recent introduction in Europe.

***Tortuosa* (New)** 4 to 5 ft., Each \$7.00, Three \$18.00, Doz. \$67.50

This is a straight stemmed Locust with curiously twisted branches. It is one of the most unusual plants we have discovered abroad. When the leaves are gone and the branches stand out clearly against the sky, it is fascinating to look at. You cannot plant anything in your lawn which will give you more pleasure especially in the winter.

Pyracantha - Firethorn

Coccinea Lalandi Each \$3.50, Three \$9.75, Doz. \$35.00

A most remarkable fruiting evergreen shrub. Bears attractive large trusses of white flowers during the late spring followed by an abundance of brilliant orange-scarlet berries which remain late into the winter. A marvelous plant for foundation planting where soil is dry. The long shoots it makes can be used as a vine over a doorway or along a window casing. The plants can be trimmed to fit any position. It is difficult to transplant field-grown or large plants. We therefore send young stock from 6-inch pots which will reach a height of 2 to 3 feet the first year. It prefers a warm, well-drained location.

***Lalandi Fructu luteo* (Yellow *Pyracantha*)**

Each \$4.50, Three \$12.50, Doz. \$45.00

Habit of growth, hardiness and blooming similar to the well known Firethorn. Its difference is in the color of the berries which in this case are golden yellow instead of red. They are produced in prodigious quantities. Grow it as a shrub or train as a vine. Full sun, well drained sandy soil and must be transplanted in small size from pots. Grows fast and will bear fruit first year after transplanting.

Potentilla - (Buttercup Shrub)

Hardy at subzero temperatures — Plant these for next summer's bloom. A sensational plant!

The shrubby *Potentillas* are among the most rewarding and accommodating of hardy garden plants. Floriferous and disease free as well as easily grown. They thrive in ordinary fertile soil in sun or partial shade. Prodigious they display their hundreds of yellow or cream blossoms which look like miniature single Roses throughout the summer and well into the late autumn; in fact, until frost. In form and habit they vary widely between low sprawling or prostrate hummocks to dense medium sized shrubs well suited for low carefree hedges. They may be planted in fall or spring and are particularly recommended for those locations where temperatures go much below zero. When used for hedges, plant 18 inches apart. They are native of Manchuria and Northern China.

Sutters Gold Each \$3.00, Three \$8.50, Doz. \$30.00

A low growing shrub, stems ascending or procumbent; small leaves, dense, fern-like, closely set along the stem, forming a carpet of mossy green on which are studded dozens of large golden Buttercup-like flowers. The variety is at present the largest flowered of the yellow *Potentillas* and surely one of the nicest. A native from the cold plains of Northern China.

Fruticosa, Gold Drop Each \$2.50, Three \$7.15, Doz. \$25.00

A charming small shrub of such compact growth as to resemble a small, irregular shaped mound about 2 to 2½ feet high. It is closely and densely covered with small, fern-like leaves and studded with intensely brilliant golden yellow. Buttercup-like flowers from early June until October. This delightful small shrub may be used in front of the shrub border or in the foreground of any perennial planting. It does best in full sun and is hardy in below zero temperatures. Spaced 12 inches apart in a single row it will make one of the most charming informal hedges that can be imagined. A No. 1 small edging plant. Succeeds in sub-zero temperatures on most any kind of soil.

Jackman's Variety Each \$3.00, Three \$8.50, Doz. \$30.00

An extra good variety which makes a continuous display of large, brilliant yellow flowers in shape like those of the Strawberry. Deeply lobed beautiful foliage, very bushy habit; grows into a fine upright compact specimen. Particularly good as a plant for a low hedge.

Katherine Dykes Each \$2.50, Three \$7.15, Doz. \$25.00

In England this is considered the best of the *Potentillas* for garden use. It grows about 2½ feet high sometimes 3 feet, is compact but with arching branches which are studded with clear sparkling yellow cup-like blooms from beginning to end. For background, there is the handsome, small, fern-like foliage. Blooming all summer and being of medium height, never spreading much over 3 feet, it is one of the choice small all-summer flowering shrubs. Perfect for small gardens or in narrow borders. Don't miss this little gem which needs no care.

Sorbus (Mountain Ash)

Sorbus - Mountain Ash

The Rowan tree, with the Oak and Ash and Thorn, was one of the magic trees of the fairies. Dark legends of the "Druids of Eld" cling to the heathenish Rowan and its blood-red fruit. But the old name departed with the magic, and the witching Rowan is now prosaically called the Mountain Ash and planted widely in the most unromantic places for the glittering color of its fruit in autumn.

Aucuparia

Each \$6.00, Three \$16.00, Doz. \$60.00

It forms a symmetrical, round-topped tree 20 to 25 feet high with striking foliage somewhat like that of the Sumac, and enormous clusters of scarlet-orange berries in the autumn. The fruit is very attractive and the robins like the berries. It is a fine small tree easily grown.

Potentilla, Katherine Dykes

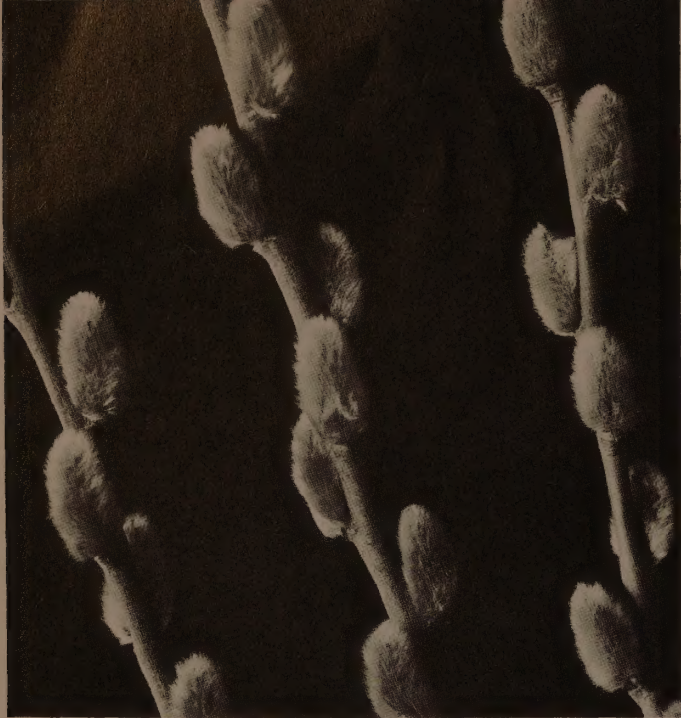

Potentilla, Jackman's Variety

Potentilla,
Gold Drop

Potentilla
Arbuscula,
Sutters Gold

Salix—French Pussy Willow. Notice the close spacing of the catkins

SALIX - WILLOW

French Pussy Willow

Each \$3.00, Three \$8.50, Doz. \$30.00

Not the wild Pussy Willow but a fine cultivated French variety. Branches of this variety have been selling at retail during the winter months in cities at from \$1.00 to \$2.00 per doz. **You can grow them on your own lawn!** Enjoy these dainty silvery pink flowers every winter. A beautiful round shrub in summer or use them for tall screens or backgrounds. Cut the ends of the branches in January or February. Place them indoors in a vase of water. Watch them unfold their large catkins of silver-pink, from 1 to 2 inches long. They will repay you many times their cost in pleasure. Ultimate height 10 feet. Cut back branches to 6 inches when planting and each spring after catkins have formed to promote long, vigorous new canes.

Spiraea Crispifolia

Spiraea Arguta Compacta (Foam of May)

Spiraea Arcuata

Spiraea

We are happy to make you acquainted with several little known choice varieties of Spiraea. Some were discovered growing in fine English gardens, while others were found in botanic gardens abroad. Our main object was to obtain varieties of medium height; the kinds that do not have to be "butchered" each year to keep them under control. All are easily cultivated, of graceful habit, with pleasing foliage as well as an abundance of bloom. They are hardy and trouble free.

Arcuata

Each \$3.00, Three \$8.50, Doz. \$30.00

A jewel from the Himalaya Mountains, perfect for today's landscape. It rarely is over 4 feet tall and flowers unbelievably heavily. Excellent foliage, neat habit, pendulent, requires no care and does not need to be often "butchered" like Spiraea Van Houttei to keep it to desired size. A splendid plant for small gardens and houses. The perfect dwarf Spiraea Van Houttei. Flowers pure white in June and July followed by conspicuous seed clusters of mahogany-red which remain on the plant for months. Are just as handsome as the flowers.

Arguta Compacta (Foam of May)

Each \$3.00, Three \$8.50, Doz. \$30.00

This is the dwarf compact form of the common Arguta. Dwarf, bushy, with dense foliage, completely hardy and profuse blooming. Here we have a fine low growing shrub for today's smaller gardens; seldom more than 3 feet high. Its compactness and neat growth make it also an eminently good subject for low hedges. When in bloom this dwarf shrub is completely covered with white flowers.

Crispifolia (Daphne Spiraea)

Each \$3.00, Three \$8.50, Doz. \$30.00

Also called the Daphne Spiraea, it is a dwarf very slow-growing Japanese species not over 10 to 12 inches high when mature. The flowers are scarlet-rose, borne on very short stems so freely they completely cover the plants in July. When not in bloom they show a low mound-like mass of sharply toothed puckered leaves. As attractive as any small evergreen. Hardy as an Oak, use it in the rock garden or for a low edging as well as in front of other dwarf shrubs. It is a rare little gem. Looks very much like Daphne cneorum.

Japonica Coccinea

Each \$2.25, Three \$6.50, Doz. \$22.50

Similar in growth and habit to the Anthony Waterer Spiraea. The flowers of this new variety are much better and richer crimson-red. No one will ever again plant the old Anthony Waterer once they have seen this fine improvement. Ultimate height about 30 to 36 inches.

Lemoinii Alpestris

Each \$3.00, Three \$8.50, Doz. \$30.00

A rare little plant which forms a dense matlike growth about 4 to 6 inches high. The small lance-like leaves are on short wiry branches each one tipped with a small cluster of light pink flowers which occur heavily in spring but continue to provide color throughout the entire summer. It is a superb little creeping shrub for carpeting bare spots in front of shrubs. It is hardy, grows freely, chokes out weeds and gives a tidy appearance to an otherwise uninterested spot.

Trilobata, Swan Lake

Each \$3.00, Three \$8.50, Doz. \$30.00

Trilobata is a rare Spiraea from North China and Siberia. "Swan Lake" is a fine form of it which amazes one by its masses of white flowers. It has thin interlacing twigs and never grows over 3 to 4 feet in height. It is a lovely small shrub when its hundreds upon hundreds of clusters of white flowers mingle with the dark green, 3- to 5-lobed, gooseberry-like leaves. Resembles a small Spiraea Van Houttei which is a Trilobata seedling and seen everywhere as well as being much taller. Here is a perfect profusely blooming small plant for the small garden.

SYMPHORICARPOS

White Hedge

Each \$2.50, Three \$7.15, Doz. \$25.00

This is a much improved form of the well known Snowberry Symphoricarpos Racemosus. The pendulous characteristic of Racemosus is completely eliminated in the variety White Hedge, which is a far superior small shrub. Its growth is upright, strong and compact and the clusters of white berries are borne in erect trusses in an unusually large number. We consider it a great improvement and a fine addition to colorful, medium sized shrubs for today's smaller gardens, and it is a perfect small shrub for a shady place.

Orbiculatus, Magic Berry

Each \$2.50, Three \$7.15, Doz. \$25.00

Dwarf bushy habit, ultimate height about 3 to 4 feet. Tips of branches slightly pendulent which in autumn are heavily covered with small red fruit perfect for cutting and indoor use. Magic Berry also makes a fine hedge plant and fits perfectly in any shade spot around the house.

TAMARIX - Tamarisk

Tamarix should be cut back to 6 or 8 inches when transplanted. If this is not done, success is doubtful.

Summer Glow

Each \$3.00, Three \$8.50, Doz. \$30.00

There is a lacy loveliness and charm about this lovely shrub not found in any others. The beautiful silvery blue-green foliage is like a veil. A sharp and delightful contrast is made by the airy Tyrian rose-pink flower spikes which appear on top of the delightful foliage all summer long. The flowers and foliage are lovely for cutting. This shrub is also excellent for seashore or lakeshore gardens, being very tolerant to salt air and wind. The plants we send out will bloom the first year. Ultimate height about 8 feet. Can be pruned and kept to 5 to 6 feet if desired.

Viburnum-Snowball

Beware, never use any spray containing sulphur on or near any Viburnums, Sulphur will produce black spots on the leaves and may defoliate the plants altogether.

Burkwoodi (New English Hybrid)

Bushy plants, 2-3 ft.

Each \$4.00, Three \$11.00, Doz. \$40.00

18-24 in.

Each \$3.00, Three \$8.50, Doz. \$30.00

A most amenable new shrub thriving in sunless places and smoky towns. Waxy bluish-white and delicately perfumed, the flowers of this new Viburnum are produced in early spring when the leaves are unfolding. They form round, domed clusters, and the Gardenia-like fragrance is so sweet as to pervade a large area. The plant grows about 6 feet high and 4 to 5 feet in diameter. It likes a well drained location with plenty of moisture. This is a new medium sized shrub—a real aristocrat. For the small garden, where there is room only for the choicest shrubs, the one Viburnum above all others that should be grown is Viburnum Burkwoodi. Foliage brilliant in autumn, shiny dark green all summer.

Opulus Compactum

Each \$5.00, Three \$14.00, Doz. \$50.00

A rare, dwarf form with umbels of red berries in early autumn. Very compact habit and very freely fruiting are the outstanding characteristics of this variety. The common Viburnum Opulus is a well known and much used shrub. Its drawback is that it grows too fast and too big, constantly requiring pruning to keep it in bounds. All these objectionable habits are eliminated in the new compact, dwarf form we offer. Grows about 4 to 5 feet high. We offer nice 2- to 3-ft. plants.

Opulus Nanum (The Hedge Viburnum)

Each \$1.50, Three \$4.25, Doz. \$15.00, 100 \$100.00

A dwarf, stubby plant never over two feet high, particularly well adapted for edgings and hedges in wet or heavy clay ground where it is difficult for other plants to thrive. Does well in light shade. It is extremely hardy. Can be clipped or left natural as desired, in either case it grows into a fine compact and low hedge which requires no care.

Opulus Xanthocarpum (Golden-Fruited Cranberry Bush)

Each \$4.00, Three \$11.00, Doz. \$40.00

This makes a handsome bush 5 to 7 feet high. It is particularly attractive from July to December after when its beautiful blossoms are replaced by immense clusters of 1/2-inch golden yellow fruits. The clusters of berries are many and heavy, and create a beautiful show against the rich green foliage. The plants we ship are about 4 feet tall.

Tomentosum

Each \$4.00, Three \$11.00, Doz. \$40.00

If all the other Viburnums were thrown into the discard, this one would justify the family. It is a superb flowering shrub and the spectacle of a good Tomentosum in bloom is a sight not ever to be forgotten. In early June the horizontal branches become perfect mosaics of wheel-like clusters, ringed with dazzling white flowers, with spidery sunburst centers, resembling a fall of snow. Ultimate height 8 feet.

Wrightii

Each \$6.00, Three \$16.00, Doz. \$60.00

This distinct and beautiful shrub came from Japan. Its handsome oval metallic-green leaves have sunken veins creating a most attractive effect in addition to the color. From August until October large cymes of glistening red fruits produce a brilliant display while during October and November the foliage turns a rich crimson. It develops into a spreading bush about 4 to 6 feet high. Hardy and trouble free. What more could you ask from any plant.

Viburnum-Setigerum

(Theiferum)

Viburnum Setigerum is one of the finest of tall growing shrubs and it is not as well known as it should be. It is a plant that should be in every garden. It is compact growing and upright, ultimately reaching a height of 10 feet. In early summer it produces quantities of white flowers which are followed in autumn by dense clusters of glistening brilliant red berries against a bronzy green foliage. At that time for several weeks Viburnum Setigerum steals the show in the garden. It is one of the finest shrubs in cultivation. Do find a place for it; you will enjoy that investment all your life. We offer two sizes as follows for a most attractive price.

3-4 foot, Each \$3.00, Three \$8.50, Doz. \$30.00
4-5 foot, Each \$4.00, Three \$11.00, Doz. \$40.00

Spiraea Lemoinii Alpestris

Two Exceptionally Fine Viburnums

Viburnum Carlcephalum

THE NEW FRAGRANT SNOWBALL

(Plant Patent No. 776)

The Finest Fragrant Shrub in a Decade

(See page 117)

This is the famous and splendid hybrid from V. Carlesi and V. macrocephalum, which originated in England.

It is absolutely hardy and has gone through several winters here in Mentor with temperatures as much as ten degrees below zero. It is of branching habit and quick growth, growing about 6 to 7 feet high and can be pruned to any size or shape desired. Does equally well in acid soil or those which are alkaline.

It is a most profusely flowering shrub with large round clusters of blossoms which may be as much as 6 inches across, rarely ever smaller than 4 inches, either flattened or globular, mostly the latter. The flowers are exceedingly fragrant, rivaling its seed parent.

It is a deciduous shrub and carries a wealth of foliage. The leaves in the autumn are brilliantly colored.

This hybrid was shown at the Royal Horticultural Show in London where it received the highest awards and praise. We claim without reservation that it is one of the finest spring flowering shrubs we have ever seen.

Viburnum Tomentosum Mariesi

WAYSIDE GARDENS FORM

Lovelier Than Dogwood

Here is a magnificent shrub of medium size that should be in every garden. When in bloom most people consider it lovelier than the Dogwood. The particular form offered is a selection made at Wayside Gardens chosen first for its freedom of bloom as well as flowering close to the ground; second, because of its fine compact habit of growth and it never becomes "lanky" or bare at the base of the plant. Third reason is its fine foliage which colors handsomely in the autumn making a fine foil for the brilliant red berries. Its ultimate height will be about 6 to 7 feet depending on conditions. Bugs don't bother it but like all Viburnums, it does not like sulphur dust or spray in any form.

	Each	Three	Doz.
3 to 4 ft. ready to bloom.....	\$6.00	\$16.00	\$60.00

Weigelas

The Weigelas are an interesting and useful family of shrubs, flowering in May, June and July. The flowers in shape may be likened to those of a Foxglove and are borne in immense quantities. They prefer a moist soil and do not like shade or roots of large trees encroaching on them. Otherwise their culture is simple. The average ultimate height of most varieties is about 5 to 6 feet.

Bristol Ruby (Spring and Autumn Flowering)

(Plant Patent No. 492)

The color of the flowers is pleasing sparkling ruby-red, shading to garnet-crimson. They are produced in immense quantities and create a wonderful display of colors. After the big display is past there is again a fine showing of bloom throughout the summer and entire autumn. Few shrubs produce flowers as freely and over so long a period as does Bristol Ruby Weigela. It attains a height of 6 to 7 feet at maturity, and grows into a perfectly formed, well rounded specimen requiring very little pruning because it flowers well from old wood; no die-back or uneven growth at any time. Excellent reports from Canada and Vermont and other difficult regions fully substantiate our own estimate of its unusual hardiness. Bristol Ruby is definitely superior to any other red Weigela in every respect and visitors here at the nursery are quick to note its better qualities.

VITEX (Chaste Tree)

Macrophylla Each \$3.00, Three \$8.50, Doz. \$30.00

A graceful shrub with attractive spikes of lovely lavender-blue flowers. Blooms profusely from July until fall and grows more than ten feet high unless pruned back. It is a most desirable summer-flowering shrub of distinctive appearance. Fits in well in the border and is also suitable as a lawn plant. Its form, foliage and lilac flowers are very unusual.

Ampelopsis, Beverly Brooks

Graceful Ampelopsis Lowi

Hardy Vines

Ampelopsis - Boston Ivy

Lowi (Miniature Boston Ivy)
Each \$2.50, Three \$7.15, Doz. \$25.00

The small-leaved Boston Ivy is a charming self-clinging and quickly climbing vine. The leaves are small, palm-like and deeply lobed, turning into beautiful autumn tints before falling. This variety is especially well adapted to cover house walls as well as stone gateposts or low walls. The close fitting short-stemmed leaves do not allow birds to nest. Its effect is tracery-like and does not completely cover the brick or stonework. It is quickly replacing the common Boston Ivy or Veitchi variety because it is so much more charming.

Beverly Brooks Form Each \$3.00

A much improved Ampelopsis Veitchi. It is far superior to the usual type which we have discarded; completely self-clinging. The leaves are small and shiny during the summer and assume various red autumn tints. It is not too rampant and can be grown in any exposure. The plants we offer are grown from cuttings, in so doing all the fine characteristics are retained of this much superior form. It is superb in covering large surfaces its shiny leaves taking on delightful autumn colors. Here is a vine you will enjoy all your life and well worth the little extra money. Resulting from a superior method of reproduction.

Guaranteed Superior Quality

Wayside Gardens

MENTOR, OHIO

Hydrangea Petiolaris

CLIMBING HYDRANGEA
THE CHOICEST OF ALL VINES
AS WELL AS A SUPERB GROUND COVER
IN SUN OR SHADE

This perhaps is the finest and choicest of the following vines offered in our catalog. It is not a rampant growing plant but when established makes good growth each year. It is woody but clings to brick or wooden walls without support, and also does fine on old trees or stumps.

Its foliage is bold, clean and shrub-like, and a rich dark green color. Short spur branches projecting from the wall are topped with white fragrant Hydrangea-like blooms throughout the summer. The effect created is most artistic as well as amazing.

Last but not least, it does equally well in shade or sun. In fact, we recommend the Climbing Hydrangea for north, west walls or such places where shade is dense in summer. If you own one of these vines you will have something you will admire all your life. The height can be easily controlled from 10 to 20 feet as desired.

Strong 4-year-old plants which will establish and grow rapidly.

Each \$3.00, Three \$8.50, Doz. \$30.00

Heavy 6-year field-grown plants.

Each \$5.00, Three \$14.00, Doz. \$50.00

Hydrangea Petiolaris—Climbing Hydrangea. The choicest vine.
Par excellence for growing on shady walls.

Bignonia, Mme. Galen

Bignonia - Trumpet Vine

Mme. Galen

Each \$4.00, Three \$11.00, Doz. \$40.00

The Scarlet Trumpet Vine, *Bignonia Radicans*, is one of the popular vines found growing on many fences, barns or stone walls. It has been discontinued by us, however, in favor of the much lovelier hybrid *Mme. Galen*.

The blooms of *Mme. Galen* are open, flaring flowers, 2½ to 3 inches across and grow in clusters all summer long. The color is rich apricot, tinted orange, handsome and showy against the fine foliage of the plant. No insects bother it. It is clean, quick growing and requires no support. It will fasten itself to brick or wood. Is perfectly hardy but likes a sunny location. You will never fail to admire its flowers throughout the summer.

Celastrus - Bittersweet or Wax Work

Loeseneri (Chinese Bittersweet)

Each \$2.50, Three \$7.15, Doz. \$25.00

Surest and most prolific fruiting variety known. This new importation is a rare species from Central and Western China. The clean leaves are glaucous green and somewhat larger than those of the common Bittersweet. It is the most prolific fruiting kind we know. In autumn, yellow and orange-scarlet berries cover the vine all over instead of in occasional small clusters as in the common Bittersweet. It's a sure fruiter. You do not have to plant two plants in one hole.

Celastrus Loeseneri

Large Flowered Clematis

The Most Colorful Vines for the Garden

These European garden treasures are notable for their spectacular flowers. Outstanding in color and in form, they lend distinction and charm to any garden. Grown on trellises, arbors, pergolas, old tree stumps, and walls these climbing plants flaunt their beauty in high places above other flowers. They are superb subjects to be grown on posts placed in the hardy border, providing, as it were, color on top of color.

Both the large and the small-flowered varieties are a "must" in every garden. While the large-flowered forms provide great richness of color, the small-flowered kinds impress us with their curiously formed flowers which are produced in great abundance. All varieties last well when cut and lend themselves to many unique arrangements.

Culture: Clematis are very easily grown if you will observe a few requirements. First, they enjoy a rich loose soil. This is easily prepared anywhere. If your soil is heavy, mix it freely with peat moss or any other humus, adding well rotted manure. For top results, make the planting hole very much larger and deeper than needed for the size of the roots. The large hole, filled up to the right height with good soil, provides an excellent root run which in turn brings forth a quick, luxuriant growth and many more flowers. Remember, you are planting a vine. It needs ample nourishment to make the growth it is called upon to do.

(We do not ship Clematis into California, Washington or Oregon.)

Comtesse De Bouchard *Each \$2.50, Three \$7.15, Doz. \$25.00*
Rosy lilac flowers with lighter midrib. Lovely, delicate variety.

Crimson Star *Each \$3.00, Three \$8.50, Doz. \$30.00*
A handsome and colorful variety. Its garnet-red flowers are large and spectacular, borne in great quantities, goes well planted together with a white flowered variety.

Duchess of Edinburgh *Each \$2.50, Three \$7.15, Doz. \$25.00*
Magnificent double white.

Ernest Markham *Each \$3.00, Three \$8.50, Doz. \$30.00*
Glowing petunia-red-violet enhanced by a rich velvety sheen; very free flowering and a strong grower.

Jackmani *Each \$2.50, Three \$7.15, Doz. \$25.00*
The popular purple variety with large, purple-blue flowers; one of the loveliest vines we have.

Lanuginosa candida *Each \$2.50, Three \$7.15, Doz. \$25.00*
Lovely giant white flowers produced throughout the summer.

Lord Neville *Each \$2.50, Three \$7.15, Doz. \$25.00*
Rich reddish plum-violet blooms. It has proved to be a thrifty variety, producing its blooms freely the entire length of its 10-foot vines. An outstanding vine Clematis.

Mme. Baron-Veillard *Each \$2.50, Three \$7.15, Doz. \$25.00*
If pastel tones are desired, the warm lilac-rose flowers of this French introduction will undoubtedly meet with approval. As the days get cooler, the color of the blooms becomes more intense. It is tall growing (10-12 ft.), sturdy of growth and very profuse in bloom. The flowers are moderate in size, borne in generous clusters.

Mrs. Cholmondely *Each \$3.00, Three \$8.50, Doz. \$30.00*
Light blue flowers with rather long sepals in abundance. It starts blooming early and continues over a long period.

Ramona *Each \$2.50, Three \$7.15, Doz. \$25.00*
A beautiful single pale blue variety. The flowers are large and very effective, not to mention that they are borne in immense quantities.

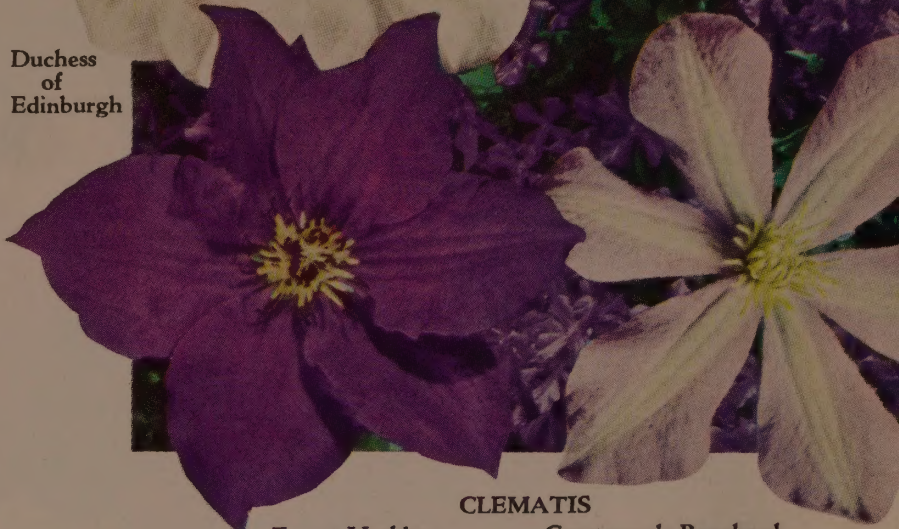

Wisteria Vine

Crimson Star

Duchess of Edinburgh

CLEMATIS

Ernest Markham

Comtesse de Bouchard

Background: Clematis Jackmani

Wisterias - THE QUEEN OF VINES

All the Wisterias we send out have flowered in the nursery. You can absolutely depend on yours to bloom. Newly transplanted Wisterias sometimes remain dormant (show no leaves) until August. Don't be alarmed at this dormant state. Water freely deep down and they will start when they are "good and ready."

Floribunda, "Issai" *Each \$6.00*

A very fine thing, entirely distinct and having many excellent qualities. Flowers a clear purple, much deeper color than common Japanese and are borne very profusely. It is also decidedly precocious, coming into bloom very young. The short, silky seed pods hang on all winter if not cut off, and are quite ornamental.

Floribunda longissima *Each \$6.00*

Extra long clustered Wisteria. Lavender-blue. We have actually measured clusters well over four feet long and there is dependable record of old vines producing occasional clusters fully six feet long! If the longest possible clusters are wanted fertilize heavily in autumn after the leaves have fallen, but not in spring or during the growing season.

Floribunda alba *Each \$5.00*

A perfectly beautiful pure white form.

Floribunda rosea *Each \$5.00*

Pink Wisteria. The finest Pink Wisteria we have ever seen. Clusters about 15 to 18 inches long. Slow to begin flowering but once started it blooms profusely. All plants have already bloomed in the nursery.

Floribunda violacea plena *Each \$6.50*

Double Violet Wisteria. The only double Wisteria known in this country, has the darkest colored flowers of all. They are exactly like dark purple Violets borne in clusters about 15 to 18 inches long. Very free bloomer.

Royal Purple *Each \$6.00*

Brilliantly colored, good sized clusters of royal purple; flowers are freely produced, making this one of the fine and outstanding varieties.

Sinensis (Chinese Wisteria) *Each \$4.00*

This is the old favorite called Chinese Purple, but really lavender shaded blue. Our plants are guaranteed to bloom.

Venusta alba (White Chinese Wisteria) *Each \$4.00*

Has white fragrant flowers. Our grafted plants are guaranteed to bloom.

Buttercup

Caenwoodiana

Purpurea

Stardust

English Ivy (Hedera Helix)

For Ground Covering in Shade

English Ivy should be used where temperatures are not too severe.

ENGLISH IVY—Hedera helix

Plants from 2½-inch pots, Doz. \$6.75, 100 \$40.00, 1000 \$350.00

HARDY BALTIC IVY (Hedera helix gracilis)

The well known English Ivy with its shiny, evergreen, glossy foliage is not suited for the northern parts of this country as a wall cover. It is lovely on the walls throughout the South, but its use should be carefully considered north of Washington D. C.

The north wall of our office building in Mentor, Ohio, is completely covered with a fine form of the Baltica Ivy (Hedera helix gracilis). Baltica Ivy will withstand temperatures as low as 10 degrees below zero but only when growing on north and west walls. Bright sunlight on east and south walls will kill it. For that position you'd better use Climbing Hydrangea or Boston Ivy for solid covering or its miniature form, the variety Lowi, if a tracery effect is preferred.

Baltic Ivy for Ground Covering in Shade

BALTICA IVY—Hedera helix gracilis

Plants from 2½-inch pots, Doz. \$6.75, 100 \$40.00, 1000 \$350.00

This special size in pots is offered for use as a ground cover.

Lonicera - Honeysuckle

Their climbing qualities are all that can be desired, but the fragrance of the flowers makes their strongest bid for favor. They are perhaps to the old-fashioned garden as a vine what the Hollyhocks are as a plant. They simply should be there somewhere.

Goldflame

Each \$2.00, Three \$5.75, Doz. \$20.00

Immense, showy clusters of trumpet-shaped buds and fragrant blooms. The outside of the petals is brilliant flame-pink, the inside a creamy golden yellow. Dark glossy foliage adds to its charm. The plants can be sheared to form a hedge or allowed to grow naturally as a vine or shrub. Blooms freely from early spring until heavy frost.

Halliana

Each \$1.50, Three \$4.25, Doz. \$15.00

Hall's Honeysuckle is so well known it needs no further introduction. It is a favorite old-fashioned vine with fragrant buff-yellow flowers throughout the summer. Does well in shade or sun and is excellent for covering rough objects or banks.

Henryi

Each \$2.00, Three \$5.75, Doz. \$20.00

The Evergreen Honeysuckle. There are practically no vines which retain their foliage during the winter in the colder parts of the country. Therefore the Henryi Honeysuckle is a very valuable variety. Its long, clean, dark green leaves remain on the vine all winter. The flowers, while fragrant, are of no importance, but the blue-black berries produced in autumn add materially to the charm of this plant. Does well in shade and is also an excellent windbreak. Hardy as an Oak.

Serotina, Winchester

Each \$3.00, Three \$8.50, Doz. \$30.00

Also called the late Honeysuckle. Flowers are rich red-purple outside and produced in abundance from July until October. A clean, fast and strong growing vine which makes a colorful ground cover as well. A fine improvement over the common Honeysuckle. Sweetly scented!

Lonicera Serotina, Winchester

Ornamental Ivies - (Hedera Helix)

Helix, Buttercup

Each \$1.00, Three \$2.80, Doz. \$10.00

The small leaves are closely set on the stem and are freely suffused bright golden yellow. It grows freely and is a most unusual variety bringing bright color where it is least expected. Charming indoors as well as ground cover or vine. Supplied in 2½-inch pots.

Helix Caenwoodiana

Each 90c, Three \$2.50, Doz. \$9.00

A charming variety for wall covering, ground cover, or indoor culture as well. The leaves are small and dainty and regularly divided into narrow finger-like lobes of which the middle one is longest. A very graceful variety. Supplied in 2½-inch pots.

Helix Purpurea

Each \$1.00, Three \$2.80, Doz. \$10.00

Has all the good qualities of the common Baltic Ivy with the addition that the leaves show purplish which in winter turns into a gorgeous bronzy-purple. It is a stunning vine and walls covered with it are outstanding and colorful as well as warm and dry; handsome as a ground cover. Supplied in 2½-inch pots.

Helix, Stardust

Each 80c, Three \$2.25, Doz. \$8.00, 100 \$50.00

This is a lovely silvery variegated form. The leaves are as if dusted with silver and silver edged, closely set along the vine and they are somewhat smaller than those produced by the green variety. The effect created is cool and so unusual and uncommon it is almost startling in a mild sort of way. Here really is something choice, be it as a vine to grow on a wall, or as a ground cover. It is also very attractive as a house plant in a north window. Available in 2½-inch pots.

Euonymus - Evergreen Bittersweet

The Most Versatile, Hardy, Easily Grown Evergreen

Vine and Shrub, The Plant of 1000 Uses

Kewensis

Each \$2.00, Three \$5.75, Doz. \$20.00, 100 \$150.00

(Miniature Evergreen Bittersweet.) A variety with very small dark green foliage. Everyone who has seen this appreciates its value as a graceful vine or ground cover. It grows close to the ground, and is a most valuable plant for a shady place in the garden where a dainty evergreen is needed. Fine ground cover under small trees. Beautiful as a small vine.

Radicans vegetus

(Evergreen Bittersweet.) A strong growing variety, with larger leaves than the type, and producing bright orange-red berries, which remain on the plant the greater part of the winter. As an evergreen, absolutely hardy wall cover, this plant is unequalled. Beautiful on big old trees or shady places.

	Each	Three	Doz.

Euonymus Vegetus

[120]

(AWARDED GOLD MEDAL CERTIFICATE FROM THE CITY OF PORTLAND, 1962.
AWARDED THE NATIONAL ROSE SOCIETY GOLD MEDAL AND THE CLAY
CHALLENGE VASE FOR THE BEST SCENTED BRITISH ROSE OF 1958.
AWARD OF MERIT CHELSEA SHOW 1959.)

My Choice

**The Rose which matches Peace in
beauty, vigor and size**

An outstanding Rose of exceptional character and growth. The ovoid bud is yellow splashed with vermillion. The reflex petals turn back slowly to reveal contrasting colors, lemon-yellow outside and carmine within. The colors pale as they open until the full flower is soft silvery pink with the old-world yellow of the Tea Rose on the reverse of the petal. From the huge flower comes the entrancing strong perfume of sharp damask.

At every stage, from the first coloring of the bud to the falling petals of the full flower, the colors are as exciting as they are unexpected. Added to this the bold flowers are held upright on vigorous stems clothed with healthy foliage and are produced in great profusion throughout the whole season.

Few roses have had more world test or more unstinted praise than this Gold Medal Winner from England. The originator says: "I do not wish to overrate My Choice but in my estimation with wider experience of its behavior I am placing it **second only to Peace**. Among the many seedlings raised My Choice was outstanding, with growth and vigor far above average."

Each \$3.00, Three \$7.95, Doz. \$31.80

(Plant Patent No. 1769)

Henry Ford

(Plant Patent No. 1218)

Many of America's finest Roses are attributed to the late Fred Howard. One that has found greatest favor of its color is "The Doctor," which is recognized throughout the world as one of the finest pinks in existence. The new Rose "Henry Ford" named after one of the greatest of all America's personalities, is similar in color to The Doctor. The buds are longer, spiral in form, and rich in fragrance. The flowers are produced more freely, the bushes are more rugged. The "Henry Ford" is a cross between The Doctor and Pink Dawn. From preview comments from those who are qualified to judge Roses "Henry Ford" will equal or surpass its parents in beauty, fragrance, color and growth.

Each \$2.50, Three \$6.60, Doz. \$26.40

Pink Champagne

(Plant Patent No. 1375)

A new and distinct hybrid tea. The plants outdoors under favorable conditions are up to five feet in height with a growth habit that is erect and does not sprawl or droop. The unusual shade pink flowers are borne on strong, upright canes and with an unusual intensity of the color. The flower size will measure from five to six inches in diameter. The undersurface of the petals being darker than the upper adds novelty and attractiveness and its value as a cut flower for the house is quite noteworthy. The leaves are Ivy Green.

Each \$2.50, Three \$6.60, Doz. \$26.40

Fullcream

(Plant Patent No. 2060)

A large, tall growing English Hybrid Tea. It has high centered flowers of exhibition size and quality. Buds open slowly and develop into unusually large cream colored flowers, somewhat lighter toward the edge of the petals. Here again we have a Rose which we believe has no equal. Good foliage and strong growing, it is a lovely as well as satisfactory plant.

Each \$2.50, Three \$6.60, Doz. \$26.40

Rose Opal

(Plant Patent No. 2190)

Here is a sensational Rose, a delightful everblooming Hybrid Tea that will be the high spot in any Rose garden. It produces a wealth of flowers of the most unusual coloring. There is nothing like it, printer's ink cannot reproduce the iridescent shimmering shade of a pink opal. Its color is pure rose-opal indescribably beautiful and completely different.

Each \$3.00

Butterscotch

(Plant Patent No. 613)

Nothing like the color of Butterscotch has so far been seen in Roses and very few Roses have as beautifully shaped flowers. The length and grace of the flower petals of this new variety are outstanding. The outside of the handsome petals is a soft, pale orange-yellow; the inside lemon-chrome at the base, changing to pale yellow-orange, penciled very lightly with orange-buff. The general color effect is a soft pastel capucine-buff. Visitors picked Butterscotch as one of the finest and most outstanding Roses in our fields. We are sure you will find Butterscotch one of the choicest Roses you ever grew. There is no other Rose like it.

Each \$2.50, Three \$6.60, Doz. \$26.40

Golden Masterpiece

(Plant Patent No. 1284)

The graceful, flowing lines of the long golden buds catch the eye immediately. As they mature an occasional blush of red caresses the edge of the slender, 1½- to 2-inch buds. Throughout the entire season, they unfold slowly, giving way to majestic, high-centered flowers of rich golden yellow.

Each \$3.00, Three \$7.95, Doz. \$31.80

Josephine Bruce

(Plant Patent No. 1294)

Its superb black-crimson flowers unquestionably proclaim it to be the best and finest and darkest red of the red Hybrid Tea Roses obtainable today. Similar in growth to Crimson Glory but somewhat more upright. The flowers are simply superb in form and produced in prodigious quantities throughout the entire season. Flowers when cut and put in water indoors, will outlast any other Rose. As a garden plant it is unbeatable. Excellent dark green foliage; of easy culture and very hardy. Produces a superabundance of flowers. We say again, it is the best dark red Rose obtainable today.

Each \$3.00, Three \$7.95, Doz. \$31.80

Michele Meilland

A Rose for the connoisseur, a gorgeous light-colored Rose for the garden and cutting. The flower, of dainty appearance, stands on a slim firm stem. It is light pink, sometimes showing a faint tinge of lilac and at others quite boldly marked coral or yellow. The stems are reddish purple, the leaves dark. Meilland, the originator of Peace, considered this his loveliest Rose and named it for his wife. He says of it, we quote: "It has the aura of perfection that is only found among aristocrats whether they be of the plant or animal kingdom. Truly a flower for the sophisticated who desires something more beyond just red or yellow."
Each \$2.50, Three \$6.60, Doz. \$26.40

Dawn

(Plant Patent No. 1316)

Plant is of medium size, perfect for Rose beds, upright in growth. The flowers are borne on moderately long but strong, rigid stems without any signs of "weak neck." Flowers are very long and pointed in bud stage, opening beautifully into a large, high centered flower of perfect Rose form. Its keeping qualities after being cut are better than average. Its color in all stages is superb, a symphony of pink, salmon, apricot with a touch of yellow against a background of coppery green foliage. Truly a Blue Ribbon Rose!
Each \$2.50, Three \$6.60, Doz. \$26.40

Dawn
Each \$2.50

 Meilland
Each \$2.50

Peace

This Rose is almost unbelievable. One marvel of it is the dawn-like range of colors through which it passes, from opening yellow buds, each petal edged with pink that seems to deepen as the flower slowly opens. The shades of color vary, too, unusually large, long lasting and constantly fresh looking, its effect is always delicate and lovely. The individual petals are long and of great substance, gradually opening a few at a time, around a high-pointed center, to a great golden hearted, very double, fully open flower. The plant is as superior as the bloom, and in the same large-scale way.
Each \$1.75, Three \$4.65, Doz. \$18.60

Peace *Each \$1.75*

Lively (Plant Patent No. 2061) *Each \$3.00, Three \$7.95, Doz. \$31.80*

This pink comes close to perfection. It is beautifully formed and has a shading all its own, full of life, hence the name Lively. Stiff almost thornless flower stems. Rugged growth. Two to 3 perfect flowers are usually produced on one stem which look proudly at you on "stiff necks" unmindful of weather, rain or shine. Color deepens slightly according to season or weather. Sent to us by one of England's most capable rose growers where it is considered the best of the deep pink roses and we are ready to agree after seeing it perform over here the last three years. We are sure you will agree with us.

Sterling Silver (Plant Patent No. 1433)

Each \$3.00, Three \$7.95, Doz. \$31.80

When fully open, this new lavender Hybrid Tea has the cool feeling of glistening rich sterling silver. Tight buds lightly suffused lavender-pink open slowly to 4- to 5-inch flowers with cool silver-lavender as the dominant tone. The fresh, sweet fragrance is unforgettable. The bush is medium tall and upright, vigorous and free blooming, with leathery foliage.

Lively
Each \$3.00

Tropicana
Each \$3.50

Tropicana (Plant Patent No. 1969)

Each \$3.50, Three \$9.20, Doz. \$35.70

A brilliant orange-red rose which has captured the imagination of everyone who has seen it growing. It is perfectly adaptable to all parts of the country. The color of the flower is retained throughout its entire life whether on the plant or in the house. A sturdy growing variety attaining a height of up to five feet. Foliage is ample, rich green and very disease resistant. Tropicana has won many Gold Medals in Europe and America. All-America Rose Selections' Winner for 1963.

Christian Dior (Plant Patent No. 1943)

Each \$3.00, Three \$7.95, Doz. \$31.80

Named for the late Prince of Fashion, its magnificent crimson-red coloring is overlaid with iridescent scarlet, non-fading or discoloring as the flower ages. Flowers grow on long stems which makes it exceptionally fine for cutting. It is the All-America Winner for 1962.

Chrysler Imperial (Plant Patent No. 1167)

Each \$2.50, Three \$6.60, Doz. \$26.40

Vivid crimson-red, an outstanding red Rose. The buds are long and tapering. It is an excellent grower and free blooming. Altogether a fine addition to the red Roses. Winner of the All-America Award for 1953.

Charlotte Armstrong

Each \$2.25, Three \$6.00, Doz. \$24.00

A Rose of a most unusual color, blood-red in the bud, opening to cerise in hot weather and to spectrum-red in cool weather, while the beautiful shape and extreme length of the bud, with its long, clasping sepals and the extreme floriferousness and vigor of growth and large luxurious foliage, make it a most satisfactory Rose in all respects.

Flaming Sunset

Each \$2.50, Three \$6.60, Doz. \$26.40

A deeper sport of McGredy's Sunset. The colors are particularly striking in the autumn. Recommended as a brilliant Rose for the garden and for decorative purposes. The flowers are light orange-red with yellow reverse, very vivid. Foliage light bronzed green. Neat form of flower which the center holds firm and compact as the outer petals open out. Of exceptional merit.

Christian Dior
Each \$3.00

Scarlet Emperor Each \$3.00

Scarlet Emperor

Each \$3.00, Three \$7.95, Doz. \$31.80

A bold strong growing scarlet-red Rose. The sparkling red does not fade or discolor and flowers are produced in unusual quantities. The bushes are upright in growth with excellent foliage giving the plants a truly fine outstanding appearance. We cannot say enough about the merits of Scarlet Emperor. It is tops, one of the finest of red Roses.

Kordes Perfecta

Each \$2.50, Three \$6.60, Doz. \$26.40

(Plant Patent No. 1604)

The great number of flowers produced and luxuriant foliage all combine to make this perhaps the most outstanding new Hybrid Tea Rose in years. The bud begins to show its combination of colors as the petals separate and is from there a constantly changing picture. The cream-white is lined with pink, and the flower finally opens to a most pleasing, unusual combination of pink and white with a suffusion of yellow.

Town Crier

(Plant Pat. No. 1807)

Yellow roses that are really husky and good growers are few. We believe that in Town Crier we have just about all the desirable attributes one could ask for. It blooms freely. Color is bright and conspicuous golden yellow. Form of flower superb both in bud or when fully open, fine long stem for cutting. A Hill introduction they are proud of. Don't be without it.

Each \$2.50, Three \$6.60, Doz. \$26.40

Town Crier
Each \$2.50

King's Ransom Each \$3.50

King's Ransom

(Plant Patent No. 2103)

Each \$3.50, Three \$9.20, Doz. \$35.70

Flowers are borne on long, strong stems that are excellent for cutting. The buds are long and slender, of the purest chrome yellow. They open gradually and develop into high centered flowers. King's Ransom flowers stand up well under wind and rain. The prolific flowering habit makes it unusually versatile in foundation plantings, formal groupings and color accents. All-America Award Winner for 1962.

Kordes Perfecta
Each \$2.50

Hawaii (Plant Patent No. 1833)

Each \$3.00, Three \$7.95, Doz. \$31.80

Here is a Rose that is well on its way to being one of the great garden Roses. Its distinct color and wonderful fragrance never fail to please. The blending of orange and coral is warm as well as exotic; from bud to full bloom it is lovely to look at. A strong growing and free blooming variety.

Royal Highness*Each \$3.50, Three \$9.30, Doz. \$37.20*
(Plant Patent No. 2032)

All America Award Winner for 1963 as well as the recipient of the Gold Certificate of the City of Portland. Perfect rose form, graceful buds. Color delicate soft pastel pink; fragrance exceptionally delightful. Growth is of medium size, fits in anywhere. Flower stems long and good for cutting, all of which adds up to Royal Highness being a royally good rose.

South Seas (Plant Pat. No. 2184) *Each \$3.50, Three \$9.20, Doz. \$35.70*

Soft, shimmering pink. An exotic beauty. The deep shell-pink bud changes to a 7-in. luminescent coral-pink bloom with deeper red overtones.

Virgo*Each \$3.00, Three \$7.95, Doz. \$31.80*

A superb white Rose of neat size and dainty form. Pure white, the flowers are carried on firm, slim stems. Virgo is apt to go on blooming after other white varieties have given up. Flowers are freely produced. The bud is long and shapely and pointed. The full blooms open wide and saucer-like; all of this makes for beautiful contrast in form.

*Guaranteed Superior Quality***Wayside Gardens****MENTOR, OHIO****White Knight***Each \$2.75, Three \$7.20, Doz. \$28.80*

(Plant Patent No. 1359)

This pure white Rose comes from the creator of Peace. At the moment it is tops in white Roses. Buds are perfectly pointed and open into beautifully shaped Roses. Of absolute pure white and does not discolor in damp weather. A strong grower and free bloomer.

*Grandiflora**Roses***San Francisco** *Each \$3.00***Queen Elizabeth**
Each \$2.50**Queen Elizabeth** (Plant Patent No. 1259)*Each \$2.50, Three \$6.60, Doz. \$26.40*

That delicate pure pink shade, found only in the choicest Cattleya Orchids has at last been reproduced in the new "Queen Elizabeth" Rose. All-America Winner for 1955. A lovely new color and new type as well, for this charming new ruler of roseland is the first of a new class of "Grandiflora" Roses. Its exceptional vigor insures a healthier, more luxuriant blooming all season long. Queen Elizabeth flowers are borne on long, almost thornless stems both singly and in clusters.

Mount Shasta (Plant Patent No. 2132)*Each \$3.00, Three \$7.95, Doz. \$31.80*

Flowers are high-centered. Stems hold two or three fragrant blooms. A constant display of pure white flowers and interesting gray-green foliage makes this probably the finest of the white grandiflora roses.

San Francisco (Plant Patent No. 2045)*Each \$3.00, Three \$7.95, Doz. \$31.80*

A glowing, fluorescent oriental red color. Most unusual in its combination of lower surface cardinal red with rich, velvety upper surface orient to signal red; also has a lovely bud and spicy fragrance, good substance and texture, long lasting as a cut flower.

War Dance (Plant Patent No. 2017)*Each \$2.75, Three \$7.20, Doz. \$28.80*

From one to three beautifully formed roses on a stem. Color is unique; it blazes a hot red extremely bright. Added to that the plant is vigorous and produces its brilliant blooms on stout upright stems. We repeat again a superb color not often achieved among red roses.

A Message from Fred Rockwell

MOST FOR YOUR MONEY

By F. F. Rockwell

America's Foremost Horticultural Writer

Every spring finds thousands of new admirers beginning their worship at the shrine of the traditional Queen of Flowers—the Rose. Frequently I am asked: "Which of the new Roses shall I buy? They are all described in such glowing terms that I cannot make up my mind, especially as I have a limited budget."

I invariably answer this question by asking another: "Why do you feel you must have new Roses? The best of the standard ones are better than many of the brand new and will still be glorifying gardens and giving their owners the ultimate in satisfaction for decades to come." This statement is made on the basis of our having grown, as they come along, most of the new Roses introduced during the past quarter century.

I find it very gratifying therefore, that keen plantmen at Wayside Gardens have decided to provide America's gardeners with a collection of "tried and true" Roses that have stood the test of time, especially as they can be produced and sold (because they do not carry any royalty fees and extensive advertising "overhead") at moderate prices. Selection of varieties for this list has been based upon reports—extending over many years and from all sections of the country—by members of the American Rose Society, the supreme court of decision as to which Roses are best for average American gardeners.

Eight Rose Varieties of Highest Rating by THE AMERICAN ROSE SOCIETY

Here are listed 8 varieties of Hybrid Tea Roses. These particular kinds have through the years proven to be outstanding. They are being grown all over the country because of their beauty as well as dependability. All are rated high by The American Rose Society. You may grow these with the knowledge that they are as beautiful as those of recent introduction.

Hybrid Tea Roses Offered on this page are Priced as Follows:

Select, 2-year, No. 1 plants

Each \$1.75, Three of one variety \$4.65,
Dozen of one variety \$18.60.

HYBRID TEA ROSES

American Rose Society Selections

Christopher Stone

Large, semi-double, vivid scarlet flowers overlaid with velvety crimson.

Crimson Glory

Well formed flowers of intense deep vivid crimson shaded oxblood-red.

Golden Dawn

The ideal yellow garden Rose. The ovoid, lemon-yellow bud, heavily splashed with crimson develops into a well formed, sweetly scented, large, double, sunflower-yellow flower.

Mme. Henri Guillot

Deep pink. It is lovely in both form and color. Large Carmellia-like blooms, watermelon to raspberry-pink in color.

Mrs. Sam McGredy

Scarlet coppery orange heavily flushed with Lincoln-red on the outside of the petals. Flowers freely produced and delicately perfumed.

Pedralbes

The semi-double, cream colored flowers pass to pure white when they are fully open. Large blooms, freely produced.

Soeur Therese

Long pointed buds are chrome-yellow, heavily marked with carmine. The open flower is rich daffodil-yellow and holds its color well.

The Doctor

This magnificent Rose is internationally recognized as one of the outstanding new Roses. The buds are long and pointed, expand to a simply enormous bloom in their fully developed state. The color is an exquisite silvery pink. Very fragrant.

Rosa Damascena, York and Lancaster

Two Old Fashioned Roses with a History

Omar Khayyam

Rosa damascena versicolor

York and Lancaster

Each \$3.00

An interesting rose on account of history; the War of Roses having originated around a bush of this variety in the Temple garden between Lancastrians and Yorkists. Grow it on rich strong soil for finest effect; will grow up to 6 feet under ideal conditions. Flowers produced prodigiously are semi-double blush white flaked with pink, sometimes entirely pink. It was named in 1551.

Rosa damascena (Damask Rose)

Omar Khayyam

Each \$3.00

Here is a conversation piece. A most interesting and historic rose rescued from Edward Fitzgerald's grave at Boulge Suffolk, England, originally planted in 1893, raised from seed from a rose on Omar Khayyam's grave at Nishapur. A true descendant. Very downy small gray-green leaves. The flowers have quilled and muddled petals forming a flat light pink flower, quartered and with a small button eye. A most unusual old fashioned rose.

Popular Rose Collection

An American Rose Society Selection

This assortment of Everblooming Roses consists of strong growing free flowering kinds. They represent the newest and best among the introductions of recent years. If you are starting a Rose garden, we urge that this collection be given first consideration. (We send only 2-year, No. 1, select grade plants.)

Gruss an Aachen

Perpetual Flowering Bedding Rose

Gruss an Aachen

Each \$1.75, Three \$4.65, Doz. \$18.60

This is one of the most popular of Roses for bedding or planting in amongst perennial plants or low shrubs in front of the border. Unlike most Roses, it flowers freely in light shade. Several good sized blooms form a fine cluster of pink flowers enhanced by a shading of pure salmon. The plant is compact and spreading in habit and flowers profusely over an exceptionally long period of time. Because of its great usefulness, hardiness and beauty, it has become the most popular of Bedding Roses.

Dwarf Polyantha Rose, Charlie McCarthy

A White, Prolific Flowering Cluster Rose

Charlie McCarthy is a lovely novelty in Roses. All of the lively qualities pertaining to Charlie are exemplified in the Rose. His scintillating wit is expressed in the foliage—fresh and sparkling. And like his steady stream of answers, the bushes are profuse with an unending show of flowers.

Though the plants grow old, they never grow up—rarely exceeding 18 inches in height. The creamy white miniature buds expand into pure white flowers approximately an inch in diameter.

The bushes are unique and novel in form, being globular or rounded like a freshly clipped Boxwood. The luxuriant foliage, so bright that it has the appearance of having been shellacked or polished, lends to the plants a snappy, tailored effect that is seen in no other Rose.

From spring until fall, all through the season, the plants are literally smothered in a glistening white snowbank of Roses. Like its namesake, the new Rose Charlie McCarthy, immaculately dressed, can always be depended upon for a top-flight performance.

*Each \$2.00, Three \$5.25,
Doz. \$21.00*

Dwarf Polyantha Rose, Charlie McCarthy

Climbing Roses

Allgold Climber

Each \$3.00, Three \$7.95, Doz. \$31.80

A fine climber of good growth. Clusters of gold floribunda form flowers. Perpetual blooming deep green foliage. See page 133 for complete description.

Albertine

Each \$2.50, Three \$6.60, Doz. \$26.40

One of the best ramblers by virtue of the large flowers, red tinted foliage and quick growth. The color is light salmon-pink with shades of yellow, copper and red in the bud stages. Flowers in a wonderful mass in June and July with a few incidental blooms later. Fragrant and very vigorous. Use it on pergola, arch, pillar, or fence.

Blaze

Each \$1.75, Three \$4.65, Doz. \$18.60

Hardy everblooming climbing Rose which inherits the blazing color of Paul's Scarlet Climber and the everblooming habit of Gruss an Teplitz, thus combining the most attractive features of both its parents.

Crimson Shower

Each \$2.50, Three \$6.60, Doz. \$26.40

A wonderful late blooming Wichuraiana rambler Rose. Flowers July through September. This extension of the flowering period of ramblers should prove of value to all who desire a planting scheme giving a succession of bloom. The flowers are produced in clusters in great abundance, are of rosette form and about an inch across. The clear shade of crimson certainly appears as an improvement on that of other red ramblers. The foliage is of the very best Wichuraiana type, consisting of shiny green leaflets which look highly polished. Use it on pillar, arch, pergola, fence. A great climbing Rose easily grown and prolific.

Dream Girl

Each \$2.50, Three \$6.60, Doz. \$26.40

The new everblooming Hardy Climber and Pillar Rose. This variety fills a long-felt need for a real coral-pink, full-petaled, hardy climbing Rose. Another most appealing quality is its pleasant spicy and penetrating fragrance. The blooms last for days after cutting. Beginning in June when older climbers like Mary Wallace, Dr. W. Van Fleet and others in this class finish blooming, Dream Girl produces successive crops of flowers throughout the summer, ending with a gorgeous display in late fall. It has a neat, compact habit which allows for easy training on a 6- to 8-foot trellis or arbor; also does well when trained as a pillar rose.

Inspiration

Each \$2.50, Three \$6.60, Doz. \$26.40

Inspiration is an appropriate companion Rose for the new Dream Girl, with similar growth habit. It is not too rampant or tall growing and so has many uses on trellises, arbors, and pillars, of medium size and habit. Successive crops follow from June on through October and show the same sparkling tones as found in that old Hybrid Tea, Pink Radiance, and the once-blooming Mary Wallace Climber. It is very hardy, reliable and free blooming in all sections, same as Dream Girl Climber.

Josephine Bruce Climber

Each \$3.00, Three \$7.95, Doz. \$31.80

This is the climbing form of the magnificent dark red rose; best grown in protected spot in colder parts of country. A superb red climber for south of Washington.

Margo Koster Climber

Each \$3.00, Three \$7.95, Doz. \$31.80

Tall husky climber with abundant foliage and flowers. Ranunculus type bloom of salmon shaded orange and pink.

Paul's Scarlet

Each \$1.50, Three \$3.90, Doz. \$15.60

Sparrieshoop (See page 140)

Each \$3.00, Three \$8.50, Doz. \$30.00

White Dawn

Each \$1.75, Three \$4.65, Doz. \$18.60

Here is the hardy, everblooming white climbing Rose we have been waiting for. Created by Dr. Longley of the University of Minnesota. The flowers are double, snow-white, fragrant and produced constantly from late spring to frost. Also, it WILL BLOOM THIS SUMMER AND FALL. With us, it is just as hardy as New Dawn, one of its parents.

Hybrid Climbing Rose Chor

**GIANT SCARLET CLIMBER,
ROSA XANTHINA HYBRID by HORVATH**

(U. S. Plant Patent No. 387)

Color of Flower: Brilliant scarlet-red of the same shade as Crimson Glory. The flowers are perfectly formed, very slow in opening and when fully open, 4 to 5 inches across. The flowers, although large, are perfectly shaped and just as handsome as those of a Hybrid Tea Rose. Flowers are produced abundantly on spur branches 12 to 18 inches long, which are stiff, holding the flowers in perfect position. Flowers have from 55 to 60 petals, do not discolor when fully open. Without any question of doubt, the finest scarlet Climbing Rose yet introduced. This is Horvath's finest creation.

Foliage: Rich bottle-green, quite abundant. No mildew or black spot in our test garden for three years.

Hardiness: Can be successfully grown with protection in colder regions.

Size of Plant: Ultimate height about 8 to 10 feet. Canes are very plentiful, not overly thorny.

Each \$2.50, Three \$6.60, Doz. \$26.40

Sweet
Sultan

Gold Rush

A vigorous climber, producing masses of handsome yellow flowers; has nice foliage and unlike most hardy climbers, it will produce flowers on its new growth for the season. We predict a great future for it. So far it has proven to be the best and hardiest of the yellow climbing Roses.

Each \$2.00, Three \$5.25, Doz. \$21.00

**Perpetual-Flowering
Climbing Rose,
Gold Rush**

Each \$2.00

Sweet Sultan

Noted for its Delightful Fragrance

Here is a most unusual Rose; first of all it is perpetual flowering. The large single flowers come in small clusters, are scarlet heavily shaded velvety maroon with gleaming golden anthers. A striking flower in the garden and superb for cutting. An unusual feature and added attraction is the rich autumnal color of its foliage. It can be used as a dwarf climber, or if you wish, a handsome shrub Rose for the border. It has great vigor and excellent health. Don't miss it.

"Allgold"

The New World Famous Golden Floribunda

(Plant Patent No. 1665)

Here is what the originator says:

"ALLGOLD has been consistently good with me. The first year the colour caught my eye. No other Floribunda has its deep unfading clarity. It is shining gold from the first glimpse of colour in the bud until petals drop.

"The more we have grown of this variety and the more experience we have had of it, the better we like it. We have not been able to find a fault with this Rose. Wet or dry, cold or hot, the blooms open the same clear unfading golden yellow. 'Sunshine on a dull day,' it brings cheer into any garden whatever the weather.

"Especially noticeable has been its resistance to black spot. It remains in full leaf even when other varieties around it are leafless.

"It is the considered opinion of both amateurs and nurserymen in England that it is the most outstanding yellow Floribunda yet introduced. For depth of colour, unfading qualities, freedom of flower, health of growth, it is absolutely 'tops.' Winner of leading awards from the National Rose Society, The Royal Horticultural Society and the Royal Agricultural Society of England."

Allgold, Each \$2.50, Three \$6.60, Doz. \$26.40

OTHER OPINIONS

NEW ZEALAND: 7th August, 1957. (Avenue Nurseries, Levin) New Zealand. ALLGOLD put up a magnificent display last autumn (April-May) and far surpassed anything that Golden Delight had done. ALLGOLD really shone out amongst all the other Roses and was a real show for quite a long period. We wished that we had imported three times as many of it.

SOUTH AFRICA: Edenvale Nurseries, Transvaal. ALLGOLD Of all the varieties on our display this is the one that attracted the most attention. We wonder whether it was because of its color—a truly deep, rich, sparkling yellow (the deepest yellow yet found in a Floribunda); or because of the size of the heads which are large with the flowers firmly held in position. Perhaps the admirers were amazed to see such exceptionally healthy, glossy, leathery foliage—which means ALLGOLD has everything. We have found this variety completely disease resistant and an excellent grower while the colour of its flowers is held until the petals drop. Raised by Mr. E. B. Le Grice of England and we have the privilege of introducing this magnificent Rose in South Africa.

Frensham

Allgold
(Plant Pat.
No. 1665)

The finest and highest rated of the red Floribunda Roses. It is an outstanding English introduction and Gold Medal Award Winner. It is our idea of what a Floribunda should be. This top-notch variety has everything, color clean crimson-vermilion-red, flowers in abundance, healthy rich green foliage, vigorous growing; if you want to grow it in front of shrubs or in a bed by itself you'll be more than pleased with it and as for a hedge of red Floribunda Roses, it is unsurpassed.

Each \$2.00, Three \$5.25, Doz. \$21.00

Frensham

The Most Desirable *Floribunda* Roses

Floribunda Roses or Cluster Roses are a group of Roses especially produced for mass planting. They are noted for their permanence, continuity of bloom, and ease of culture. Their habit of growth is bushy, and their chief characteristic is sturdiness, and they bloom continuously in numerous clusters from single to full double, and include the entire range of colors of Roses.

Golden Delight

Here is a tremendously vigorous clear yellow floribunda rose. It quickly develops into a rugged big bush 3 feet or more high and often 2 feet across. Produces hundreds of clear yellow Hybrid Tea type roses. Blooming constantly. Foliage is dark bottle green and clean; rarely ever affected by blackspot. A splendid English hybrid which performs remarkably over here.

Each \$2.50, Three \$6.60, Doz. \$26.40

Oberon

Soft, salmon-apricot fully double flowers perpetually produced on strong rugged plants particularly suited for bed planting. This briefly sums up Oberon. But there is more to it. It is a Rose in a class by itself. Many visitors told us they preferred it to Fashion. The color is not only softer and more delicate but Oberon is much, much more free flowering. It is perpetually covered with bloom literally until frost. Here is a beautiful European Rose which will make a name for itself over here in a short time.

Each \$2.50, Three \$6.60, Doz. \$26.40

Sandringham

Here is a healthy grower, fine trouble free foliage above which rise large trusses of sweetly scented light yellow blooms. No wonder it received a certificate of Merit as well as a Trial Ground Certificate. It is a fine robust Rose we heartily recommend.

Each \$2.00, Three \$5.25, Doz. \$21.00

One each of the three varieties illustrated on page 135 for \$6.75

Polyantha Rose The Fairy Beautiful for Edgings or Hedges

Hedge of Rose "The Fairy"

Perhaps the most remarkable little rose grown today is The Fairy. Here are some pertinent facts about it. Blooms untiringly from early summer until frost. We have never seen any signs of blackspot and do not spray it in the nursery. If you don't want to prune it you don't have to. Needs only moderate protection in winter in coldest locations. Grows about 2 to 3 feet high and will spread 3 feet or more. It is an unlimited source of cut flowers. A joy to look at. Superb for a low hedge. What more can you ask of any plant?

Lilac Charm

Sandringham

Lilac Charm

The Rose Which Took Paris By Storm! (Plant Patent No. 2189)

Well named! This English charmer really charms. The bright open lilac or almost violet flower with its vivid cluster of golden yellow stamens makes a beautiful color contrast. Never before has a Rose been introduced of such lovely coloring and downright charm. Plants are of medium size but bloom constantly, perfect for an edging to a Rose bed or several by itself in a bed. Shown in England during the summer of 1960, it created a sensation. Don't miss it!

Each \$3.00, Three \$7.95, Doz. \$31.80

THE FAMOUS *Polyantha Rose, The Fairy*

The Fairy is unexcelled for vigor, perfect health and hardiness, and its super ability to produce those graceful clusters of charming pink rosette type blossoms endlessly, from early summer until hard frost. Its growth is spreading, sending up rigid canes topped with crisp waxen-like pink blossoms; one spray is a complete little bouquet which will easily last a week or more when cut. The Fairy is in a class by itself! Foolish is the gardener who does not grow a few plants of it. Mix it with your perennials or grow it in front of shrubs; you'll thank us for urging you. The American Rose Society rates it high 8.66.

Polyanthas come and go, but the Fairy will be with us long after many of today's favorites are forgotten. Novice or expert, The Fairy will delight, blooming tirelessly and endlessly. And as far as using it for a perpetually flowering low hedge it is unsurpassed. We therefore offer a special size plant for hedging purpose.

Plants on their own roots

Each	Three	Dozen
2.00	5.25	21.00

Special size, own root plants, pot grown about 8 inches to 12 inches tall, will bloom shortly after planting.

Three \$3.50, Doz. \$13.00, 100 \$95.00

Oberon

Else Poulsen

Else Poulsen

Each \$1.75, Three \$4.65, Doz. \$18.60

Flowers semi-double, bright rose-pink. One of the loveliest and hardiest of the Floribunda Roses. It has become one of the great favorites because it has given excellent results throughout the years.

Color Carnival

Cecile Brunner (Shown life size)

Yellow Sweetheart

Amberlight (Plant Pat. No. 2197) Each \$2.50, Three \$6.60, Doz. \$26.40

It is not very often that we obtain something really distinct as well as handsome in rose breeding. LeGrice of England, when he created Amberlight, gave rose lovers something they have long waited for. Large flower clusters of semi double ruffled flowers on erect wiry stems perfect for cutting. Color entirely new, a startling clear amber paling to Egyptian buff like a string of glowing amber beads. Fragrance exceptionally good, flowers keep surprisingly long when cut. Growth is vigorous, healthy foliage and an abundance of bloom. A beautiful and distinct rose.

Color Carnival

Each \$2.00, Three \$5.25, Doz. \$21.00

At opening, flowers are bright yellow with a pink picotee edge which is quite pronounced. This edge increases in depth as well as in strength as the flower ages. A most interesting, colorful Rose. It is rather low growing and very bushy. One of the outstanding characteristics is that the picotee edge, while broadening, gives a salmon effect. As one of our men said, it is a terrific grower, has beautiful foliage and is always loaded with flowers. This is an outstanding, fully double Floribunda. Exceedingly prolific.

Fashion

Each \$2.00, Three \$5.25, Doz. \$21.00

(Plant Pat. No. 789). All-America Award Winner for 1950. An exquisitely beautiful Floribunda. The color is luminous coral-pink overlaid with gold which softens to clear coral and then deepens into deeper tinted tones at the finishing stage. Pointed buds are Oriental red and slowly open into miniature-like Hybrid Tea form. The open flowers are about 3 1/2 inches across and have a delightful old rose fragrance. Grows about 2 1/2 to 3 feet tall; good foliage and prolific blooming.

Saratoga (Plant Patent Applied for)

Each \$2.50, Three \$6.60, Doz. \$26.40

This new, gardenia-like, pure white variety has a lovely old rose fragrance. The plant is very prolific in its production of flowers, averages 3 ft. in height and the flowers open to about 4 inches. Excellent for use in mass plantings, as a hedge, or in any of the many ways in which Floribundas are used. AARS Winner, 1964.

Amberlight

Sweetheart Roses

Cecile Brunner Each \$1.75, Three \$4.65, Doz. \$18.60

This dainty Rose produces flowers in quantities that are truly prodigious. Many stalks break from the base of the rugged plants, each stalk providing numerous sprays. Each stem of the spray is tipped with a dainty peach-pink bud. The deep peach-pink changes to salmon in the opening flowers, and at the height of the season the entire plant is a bank of soft pink and salmon. This lovely effect can be transferred into the home, where you will find its delicate flowers last for many days.

Yellow Sweetheart

Each \$2.50, Three \$6.60, Doz. \$26.40

Here is a charming yellow "Sweetheart Rose." A compact plant somewhat spreading which covers itself with dozens of Cecile Brunner-like dainty golden yellow flowers. The gracefully formed small blooms are perfect for miniature bouquets or corsages. You will love it. An English introduction we are most happy to pass on to you.

Koster's
Fulgens

Carroll Ann

Mother's Day

Ranunculus Flowered Cluster Roses

(Polyantha Roses) Growing about 12 to 18 inches high.

The Polyantha or Ranunculus Roses are very popular for edging and bedding purposes. The plants grow into shapely, compact bushes about 12 to 18 inches high and they are covered with a great mass of flowers from early in the season until severe frost destroys their beauty. The blooms though small, are very effective, as they are arranged in showy trusses that accentuate their rich and beautiful coloring.

Carroll Ann

Each \$2.00, Three \$5.25, Doz. \$21.00

This is one of the best of this new form, and is greatly admired by visitors. The flowers are shaped like Ranunculus blooms, an entirely new form of Roses. The incurving petals produce perfectly charming globe-shaped flowers which grow in large clusters and are semi-double. The plant grows not over 18 inches high and therefore is a very fine variety to be used as an edging around Hybrid Tea Rose beds.

Koster's Fulgens

Each \$2.00, Three \$5.25, Doz. \$21.00

Brilliant red Ranunculus-like flowers, tirelessly produced throughout the entire season. The incurving red petals result in small ball-shaped flowers. Nice compact and strong growing Polyantha Rose. Good foliage and constantly blooming until the end of the season.

Lachs

Each \$2.00, Three \$5.25, Doz. \$21.00

This is a low growing variety and such a fine plant for edging. The hundreds of globe-shaped salmon flowers cover the bush for the entire season. The petals incurve strongly and so produce charming small ball-shaped blossoms which grow in good size clusters. Most attractive for small bouquets as well as a showy garden plant. Much desired for edging Rose beds.

Margo Koster

Each \$2.00, Three \$5.25, Doz. \$21.00

Dominant color of this lovely Ranunculus-shaped flower is salmon with rich shadings of orange and pink. The small, globe-shaped blooms occur in large clusters and are semi-double. The plant grows not over 18 inches high and therefore is a very fine variety to be used as an edging around Hybrid Tea beds.

Mother's Day

Each \$2.00, Three \$5.25, Doz. \$21.00

The habit of growth is exactly like that of Margo Koster. The flowers are deep dark red, an outstanding color.

Snow White

Each \$2.00, Three \$5.25, Doz. \$21.00

This is one of the new small flowered Cluster Roses. Its Ranunculus-like, pure white flowers are produced in great masses covering the entire plant. It rarely grows over 18 inches high and, therefore, is excellent for edging as well as for planting in solid beds.

Happy

Here is an edging or dwarf hedge rose of the first water. Growth habit is rather spreading and low, seldom over 12 to 15 inches high but quite often 18 inches wide. It has shiny bright dark green foliage which is invisible when it literally bursts into bloom. Plants are completely covered with clusters of the most brilliant deep red flowers. Superb for edging as well as a brilliant dwarf plant in front of the shrub border.

Each \$2.00, Three \$5.25, Doz. \$21.00

Polyantha Rose, Happy

Snow White

Margo Koster

Dusky
Maiden

Dusky Maiden Each \$2.00, Three \$5.25, Doz. \$21.00
(Gold Medal and Trial Ground Certificate National Rose Society. Award of Merit Royal Horticultural Society.) Rich glowing red overlaid with maroon enlightened like a starlit sky by the golden circle of prominent anthers. The perfume-laden clusters have the true Damask perfume. A shorter grower, about 3 to 3½ feet high, it produces a wealth of blossoms above abundant, deep green foliage, and don't forget, a fragrance you have been looking for so long. Plant Patent No. 2210.

White Wings (Plant Pat. No. 850) Each \$1.75, Three \$4.65, Doz. \$18.60

The silvery white petals show to good advantage above the laurel-green foliage. The individual five-petaled Roses are borne in pyramidal sprays. Each separate flower is artistically placed in the spray, the flowers standing out in bold relief, bright and clear. In the center of the disk formed by the perfect circle of petals is embedded a lovely cluster of amethyst stamens tipped with anthers of gold.

The Loveliest Pink Floribunda

Rosenelfe Each \$2.00, Three \$5.25, Doz. \$21.00
Graceful clusters of dainty La-France-pink Camellia-like flowers superbly suited for cutting and table decoration. The handsomely shaped small buds or open blooms lend themselves perfectly to any kind of decoration. In the garden they never fail to draw attention. Rosenelfe is a fine grower, has excellent foliage. Considered by many the best double pink Floribunda. In spite of the new introductions it is still tops.

White Wings

Dooryard Rose,
Mabelle Stearns

Dainty Bess

SINGLE ROSE

Dainty Bess

Each \$1.75,
Three \$4.65,
Doz. \$18.60

An exceedingly charming and daintily colored Single Rose of perfect form. The broad petals are delicate shell-pink which form a beautiful contrast to the conspicuous bunch of crimson stamens. It is always greatly admired for its charm and loveliness, and the blooms last exceptionally long.

Rosenelfe

Hybrid Musk Rose, Belinda (See page 140)

Famous Dooryard Rose

MABELLE STEARNS

Perpetual Flowering Dooryard Rose—A *Rosa Setigera* Hybrid by Horvath.

Color of Flower: Peach-blossom-pink with silvery reflexed, sharply recurving imbricated petals, center showing a lovely orange undertone. Flowers in panicles. Persistent grower and bloomer. Flowering period starting in June, lasting until frost; starts blooming about two weeks later than Hybrid Tea Roses, but is never without flowers the entire summer and fall. Flowers excellent for cutting and decorative work, are fully double, having from 50 to 60 petals, and are delightfully fragrant, lasting a week to ten days in water when cut.

Foliage: Bottle-green, rich and clean. Not troubled with black spot, mildew, or other Rose maladies.

Hardiness: Hardy without protection in the Temperate Zone. Can be successfully grown with little protection in the colder regions where growing Roses heretofore has not been possible or exceedingly difficult.

Use and Size of Plant: Ultimate height about 2 feet, spreading from 3 to 4 feet or more if permitted. Single specimens are very effective in the flower border or low shrub plantings.

Each \$2.50, Three \$6.60, Doz. \$26.40

Hardy Shrub Roses

Various Shrub Roses

Canarybird *Each \$5.00*
Light primrose-yellow flowers, single, of good size and borne in May all along the flower branches. Strong shrub to 7 feet. Grown instead of Hugonis of which it is a hybrid produced in 1931.

Elmshorn *Each \$3.00, Three \$8.50, Doz. \$30.00*
Perpetual Flowering Shrub Rose. Introduced in 1951 by Kordes. Flowers clear bright red in big clusters, no fading. Upright in growth, about 4 to 5 feet. In bloom entire summer until frost. Foliage deep green, absolutely free of black spot. Of easiest culture and hardy at zero. Recognized as one of the finest constant blooming shrub Roses. A "must"!

Harison's Yellow *Each \$2.50, Three \$7.15, Doz. \$25.00*
Fine double golden yellow flowers on bushy plant, blooms more or less all summer. This is the old-fashioned yellow Rose seen frequently growing behind old houses. Hardy and trouble free.

Hugonis *Each \$2.50, Three \$7.15, Doz. \$25.00*
A splendid Rose for the shrubbery border with delicate yellow, single flowers produced on long, arching sprays early in May; after it has finished flowering it remains an attractive decorative bush for the balance of the season; perfectly hardy anywhere.

Marguerite Hilling (Pink Flowered Nevada) *Each \$6.00*
What we have said about Nevada we repeat word for word for the lovely pink flowered form named Marguerite Hilling. The arching sprays of single chalice-like pink flowers are a sight to behold. A magnificent new English shrub rose.

Nevada *Each \$5.00*
One of the most remarkable hybrids ever raised. It forms a fine sturdy shrub up to 7 feet and is practically thornless, with smooth, light green leaves. The stems arch outwards gracefully, bearing along their length a regular array of almost single blooms, about 4 inches across. In bud they are flesh colored, opening creamy white, wide and flat, with a boss of yellow stamens. This is a grand shrub rose, producing hundreds of flowers at a time, creating a wonderful effect, in three great bursts of bloom during the season. The June display is most arresting, and in August another display appears, and flowers continue until the autumn. Little pruning; recommended very strongly where a fine perpetual-flowering shrub is required.

Sparrieshoop *Each \$3.00, Three \$8.50, Doz. \$30.00*
A famous Kordes introduction. The flowers grow in large clusters. They are semi-double in bud form but open to single classic chiseled flowers of most unusual beauty and form. The color is mother-of-pearl-pink in the center with a stronger color towards the edges of the petals. "Simply stunning" and magnificent for cutting. May be used as a short pillar Rose but at its best if kept at a height of 4 to 5 feet and planted among shrubs in the border. It flowers from early summer until frost. Free from Rose maladies.

Rosa-Moyesii and Hybrids

Geranium *Each \$5.00*
A Moyesii hybrid with brilliant geranium-red flowers 3 inches across followed by bright crimson flagon-shaped fruits which makes this shrub as attractive in autumn as when in bloom in early summer. Its habit of growth is quite compact. An invaluable colorful shrub Rose for the smaller garden.

Rosa Moyesii *Each \$3.00*
Is also known as Rosa Holodonta. It is probably the most beautiful Rose species in cultivation. A native of China, attaining a height of 7 to 8 feet. Flowers are rich blood-crimson, 3 inches across, carried during June and July, either one or two blossoms terminating each short spur. The large bright crimson flagon-shaped fruits are as attractive in the autumn as are the flowers in early summer. Moyesii and all its hybrids are excellent subjects in the shrubbery border or amongst evergreens.

Rosa Spinosissima or Scotch Rose

Stanwell Perpetual White *Each \$2.50, Three \$7.15, Doz. \$25.00*
A dense bush about 3 feet in height. It has small leaves and the stems are densely covered with fine prickles. The flowers are large and double, colored white with a bluish tint. Flowers from June to autumn. A Rose you will enjoy; hardy as all Scotch Roses, easy to grow, handsome to look at, fits in nicely in front of other shrubs or evergreens.

Fruehling's Gold *Each \$3.00, Three \$8.50, Doz. \$30.00*
All Scotch Roses thrive on any soil and light soils in particular. The plants of Fruehling's Gold develop into nice clumps from 3 to 5 feet high. The canes are covered for 18 or more inches from the top down with lovely yellow, cup-shaped flowers which are sweetly scented. It is a superb hardy Rose for the shrub border. Has withstood 10 degrees below zero in Mentor. Does not show any foliage troubles. All in all a lovely plant of recent introduction and a great contribution for those cold parts of the country where it is difficult to grow Roses, as well as a colorful subject for the shrub border.

Fruehling's Morgen *Each \$3.00, Three \$8.50, Doz. \$30.00*
A bushy shrub up to 7 feet in height. The flowers, up to 4 inches across, have 5 petals and are cherry-blossom-pink with a cream center and dark stemmed stamens. There is a faint but sweet scent. Flowers in late May and June. Here again is a fine Rose that mixes well with other shrubs in the border. Can be pruned to lessen height if desired. Perfectly hardy.

FOOD FOR THOUGHT—As Well as For Your Flowers

What your plants need is a balanced organic food, not just a stimulant. They need one containing in right amounts those things that make plenty of strong roots, produce sturdy stalks, thrifty foliage and an abundance of good sized blooms. That's exactly the kind of Plant Food we use at Wayside. Much of our success in growing such unfailingly fine plants is due to it. Turn to page 142 and get the full facts about it.

Rosa Rugosa Hybrids

HARDY, EASILY GROWN

Rugosa Roses are particularly valuable for hardiness, healthiness and ability to thrive under most adverse conditions of soil and climate, withstanding almost anything. They are distinguished by erect, very spiny stems, and by their tough, curiously wrinkled or Rugosa foliage. Particularly valuable for hedges or shrubberies in seashore gardens and regions where winters are very severe. Many are everblooming.

Planting Distance: Hedges—1/2 to 2 feet. Shrubs—3 to 4 feet.

Pruning: Shrub types—cut out old canes and shorten new canes to 4 feet or less.

Height: 4 to 5 feet except where noted.

Flamingo *Each \$3.00, Three \$8.50, Doz. \$30.00*
This variety is the result of a cross between Rosa Rugosa and Hybrid Tea Rose, White Wings. It is a fine, all-summer and autumn flowering shrub-like plant. The flower buds are pointed and occur in clusters. The saucer-like flowers follow each other in a constant procession until stopped by frost. Color is flamingo-pink in summer and a deeper rose-pink in fall. Grows to a height of about 4 to 5 feet; foliage abundant and rich gray-green. Has wintered in Mentor, Ohio, perfectly, not freezing back an inch in below zero temperatures. A fine border shrub blooming all season. Flowers more profusely if you don't fertilize it.

Frau Dagmar Hartopp *Each \$3.00, Three \$8.50, Doz. \$30.00*
This is a fine new low growing Rugosa Rose, excellent for foreground planting or ground covering. Like all Rugosa Roses it loves the seashore and does remarkably well on the poor, sandy soils which are usually found in such localities. The foliage is rich green and heavily crinkled, no black spot or similar troubles. The silvery pink flowers are studded all over the plants and rise just above the foliage from **early June until frost**; will stand below zero temperatures. Plants are rugged and hardy. An excellent European variety of recent introduction you will want for those difficult places not to mention for those sections of the country where Hybrid Tea Roses do not survive. Average height about 3 to 4 feet high, lower on poor soil; may be cut back to as low as 10 inches and will produce a sea of flowers.

Grootendorst *Each \$2.50, Three \$7.15, Doz. \$25.00*
An improved variety having large, fringed, cherry-red flowers borne on a fine, large well-foliaged bush. Excellent as a hedge.

Schneezwerg *Each \$3.00, Three \$8.50, Doz. \$30.00*
The semi-double white flowers, sweetly fragrant, are produced constantly throughout the season. Before the summer is too far along quantities of brilliant red seed pods or hips combine beautifully with the white flowers and mossy green leaves. Spreads slowly but is never much over 30 inches high. Does perfectly on sandy soils near the seashore or in very cold parts of the country where Tea Roses would not survive. It is a splendid Rugosa Hybrid which we cannot recommend too highly.

DWARF ROSA RUGOSA REPENS ALBA

Here is a real find for ground covering or carpeting a sandy, poor bank. Hardy as all Rugosa Roses, it withstands temperatures way below zero. Prolonged dry spells don't hurt it once it is established. It is perfect along the coast as it is not easily damaged by salt spray nor does it object strongly to poor sandy soil. Spreads readily by underground runners. Forms a dense carpet weeds won't penetrate. Its white flowers are followed by red seed hips. A fine plant for a difficult, troublesome spot.

Each \$3.00, Three \$8.50, Doz. \$30.00, 100 \$225.00

Hybrid Musk Roses

Hybrid Musk Roses are perpetual flowering cluster Roses of bushy habit. They grow from 4 to 5 feet tall, depending on soil and climate.

Belinda *Each \$2.50, Three \$7.15, Doz. \$25.00*
Its growth is lively, stems and foliage are dark emerald-green. It blooms profusely in large trusses similar to the perennial Phlox. When the plants are well established the flower trusses increase in size and look not unlike the panicles of Hydrangea Paniculata. The innumerable flowers are bright rose-pink with lighter centers. A wonderful plant as a single specimen mixed in the shrubs.

Robin Hood
A perfect hedge Rose; its habit of growth is densely compact and it produces an abundance of healthy deep green foliage. The smothering wealth of flowers which are cherry-red are produced in clusters early in the season and again sparingly during the summer and autumn. Hardy below zero without any injuries. It is not particular as to soil; can be cut to any desired height over 3 feet.

Strong 1 year plants for hedges

Each \$1.00, Five \$4.50, Ten \$8.00, 100 \$65.00
2 year specimen plants Each \$1.75, Three \$4.65, Doz. \$18.60

Will Scarlett *Each \$2.50, Three \$7.15, Doz. \$25.00*
Will Scarlett produces large clusters of brilliant flowers on stems 2 to 3 feet high. It has proven to be perfectly hardy in Mentor. During this period the plants were not given any winter protection. Here is a fine shrub Rose you will want to plant in the foreground of your shrub border where it will make a fine splash of color.

"EXCLUSIVE" ORGANIC PLANT FOOD

Thousands of customers and strangers alike have visited **WAYSIDE GARDENS**. They have marvelled at our nursery plants. They have been known to actually gasp for breath at the sheer beauty of 400 acres of flowers brought to such a high degree of perfection. Invariably, they ask us the same question:

"To what do you attribute the superior qualities of your flowers?"

And invariably our answer is the same: "The chief reason for the high quality of **WAYSIDE** products is due to the fact that we use only the very finest Plant Food that skill and money can produce!"

We Learn from Experience and Experts

We are indebted to a noted English gardener for the Exclusive Organic Plant Food we use in growing millions of plants of superior quality. Among other things, he said:

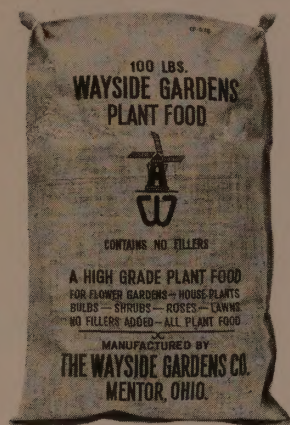

"A lawn should not be treated like a hayfield, but like a permanent garden. Therefore, I object to chemical fertilizers for lawns. It is not the **QUANTITY** of grass cut from the lawn each week, but the **DENSITY AND LUXURIANCE OF THE GRASS** which produces the effect of walking over a thick velvet carpet that counts. If you want a thick lawn in which there is no room for weeds, it is essential that you use a properly balanced **ORGANIC Plant Food**."

WAYSIDE'S exclusive organic Plant Food is made from bone

You will agree that we have entirely too much at stake to afford to use any other kind. In addition to the enormous investment represented by our nurseries, we have a reputation to maintain among thousands of the most critical floral customers in the land. We prize and guard very jealously such possessions.

Contented only with the best we advise our customers to adopt the same attitude, in order that the fine specimens grown at **WAYSIDE** may be duplicated in your own garden. We recommend only that which we ourselves use.

meal, dried blood, ground fish, phosphate and muriate of potash, in proportions recommended by the "old country" expert. These long-lasting ingredients, heavy with life-producing qualities, give your flowers a well balanced diet, containing in just the right amounts those things that go to make strong roots, sturdy stalks, bright green leaves, a profusion of foliage and an abundance of large and healthy blooms year in and year out. It does not stimulate, but nourishes any and all plants and imparts to them a youthful and lusty vigor. It disintegrates slowly. It is excellent to use in bulb plantings as well as in Rose beds, or hardy plant borders. Use it consistently year after year, and your garden will be among the most beautiful.

Wayside Gardens "Exclusive" Organic Plant Food Contains No Useless Weight or Bulk Producing Fillers

A 100-lb. bag for \$9.00; 500 lbs. for \$40.00; 2000 lbs. for \$125.00.

Prices are F.O.B. Mentor, Ohio, and we ship by truck or rail freight collect unless otherwise instructed.

How to Use Wayside Gardens Organic Plant Food

We need not use much of it to obtain the lasting results. Furthermore, it is easy to use and apply it. If your garden is an established one, apply twice a year, March first and October first. **Use 15 to 25 pounds for top dressing a space 500 square feet for Hardy Plants, Roses, Annuals and Bulbs.** Twice this quantity for Shrubs, Azaleas or Rhododendrons. In making a new garden, double the amount recommended and mix with the soil. Planting may be done at once. For old lawns, use 10 to 25 pounds for top dressing 500 square feet. For potted plants, a 3-inch potful mixed with a bushel of soil will give you splendid results.

USE WAYSIDE GARDENS DEHYDRATED COW MANURE

How often, in reading articles or books about growing some particular plant, have you found the recommendation that well rotted cow manure should be used to give it a strong, safe start. And just as often haven't you had to say to yourself "That's just fine—but where on earth am I going to get any real cow manure?"

Well, you no longer need to ask yourself that question. The answer is — **Wayside Dehydrated Cow Manure**. It is the real McCoy: 100% manure; nothing taken away, nothing added. And it is prepared in the most convenient, most effective and most easy-to-use form in which it has ever been possible to obtain it.

Where "old" cow manure is particularly recommended—as in the growing of Roses, Delphiniums, and such humus-loving bulbs as Tuberous Begonias, Gloxinias and Callas, it is an answer to the suburban gardener's prayer.

As **Wayside Dehydrated Manure** is all manure, it is the perfect companion for **Wayside Organic Plant Food** which does contain other essential elements—they go together like a horse and carriage. We therefore suggest that you use **both** in your round of garden operations if you want the most successful garden you have ever had.

HOW TO USE

For Flower or Vegetable Gardens: Broadcast about 8 to 10 lbs. per 100 square feet before planting, rake well into soil.

House plants: Use about one level tablespoonful for every inch of diameter of pot, mix into soil and water.

For Seed flats: Use 2 parts of sifted soil mixture and one part of Dehydrated Cow Manure.

Home-made Compost: Dehydrated Cow Manure is an efficient bacterial activator for making compost from garden and kitchen wastes. Add contents of 5-inch flower pot occasionally to compost pile to help break down waste.

100 lbs. for \$6.50

500 lbs. for \$30.00

1000 lbs. for \$50.00

All prices are f.o.b. Mentor, Ohio

COTTON SEED MEAL

Finest Fertilizer for Azaleas, Rhododendrons, etc.

A superb organic plant food for acid soil loving plants, such as Azaleas, Rhododendrons, Camellias, Gardenias; use also for Begonias and African Violets. 1 tablespoon to each 6-inch pot and about 3 to 5 lbs. around Azaleas, etc. in garden; spade lightly into soil in spring or fall. Avoid root damage from deep digging. Unused meal will store for several years. Apply each year for healthy luxuriant growth. **100 lbs. \$9.50.**

ALUMINUM SULPHATE

Makes Alkaline Soils Acid

Use to make neutral and alkaline soils acid to develop satisfactory soil for acid-loving plants. Creates "bog" or acid-type soil for Rhododendrons, Blueberries, Azaleas, Camellias; makes Hydrangeas produce blue flowers instead of pink. Average dose 5 lbs. per 100 sq. ft. washed into ground. Make application early spring every other year for constant effect. **5 lbs. \$1.00.**

Wayside Gardens

GARDEN SPRAY

AN EXCELLENT, MULTI-PURPOSE GARDEN SPRAY FOR INSECT and FUNGUS CONTROL

Almost every amateur gardener has become confused by the many kinds of insecticides and fungicides on the market, and the many complications involved in their use. From the multitude of letters we receive about the subject, we would say the confusion is about complete.

WE HAVE THE SAME PROBLEMS

The only difference between your garden and ours is size. On our 400-acre garden of fine plants, we must use the very best spray to protect our investment.

Each year we have prepared, for use at Wayside, a single spray to take care of our spraying problems. We instructed the manufacturer to package this same spray, in convenient home garden sizes, and we are offering them to you at the lowest possible price.

We are vitally interested in your having a good garden, and remaining a booster for Wayside Gardens, so it is important to us to pass on to our customers the benefit of our experience.

There is no need to keep a dozen or so remedies on your shelf when one or two will do the job completely and thoroughly.

A simple application of Wayside Gardens' spray, once every three weeks, during the growing season, will do more to control plant disease and insects than any other cure we know to date.

Complete directions are on the package.

Not to be used on Vegetables.

6-gal. Spray Gun . . . \$ 9.75
12-Gal. Spray Gun . . . 12.75

GARDEN SPRAY

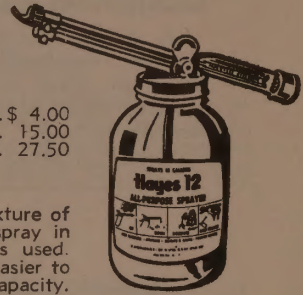

1 pound of Spray Powder in	16	one-ounce packages makes	32	gallons of Spray.....	\$ 4.00
5 pounds of Spray Powder in	80	one-ounce packages makes	160	gallons of Spray.....	15.00
10 pounds of Spray Powder in	160	one-ounce packages makes	320	gallons of Spray.....	27.50

Combination of 12-gal. Spray Gun and 1 lb. of Spray Powder (powder divided into 1-ounce packages) for \$15.00.

Combination of 6-gal. Spray Gun and 1 lb. of Spray Powder (powder divided into 1-ounce packages) for \$12.00.

SPRAY GUN

This spray gun attaches to your garden hose, diluting a mixture of concentrated insecticide (in the glass jar) and releasing a spray in proper proportions, no matter what force water pressure is used. We recommend the 12-gal. spray gun since we believe it is easier to use and will accommodate any amount from 1 to 12 gal. capacity.

Wayside Gardens

GARDEN DUST

KEEPS OUR PLANTS CLEAN...IT WILL YOURS, ALSO

The Multi-Purpose Garden Dust—Use It Where Inconvenient to Use Garden Spray

"Wayside Gardens" Garden Dust is a mighty fine combination of the recently discovered insecticides. We use it at Wayside and keep our plants clean and healthy without much difficulty. To make a report here of what goes into this dust is more or less pointless. What is important is that it does a perfect job for us and we know it will for you. We are not so much interested in a little profit from an insecticide as we are interested in seeing that whatever plants you buy from us or what flowers you

already have, grow well and give you pleasure. It is for this reason we make this dust available to our customers. Prevention is better than a cure so dust frequently and dust sparingly for best results.

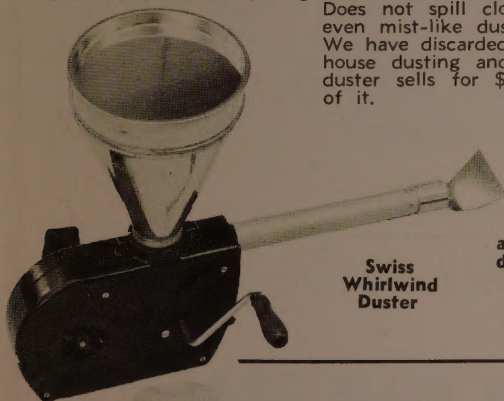

4 lbs. Garden Dust.....	\$ 4.65
25 lbs. Garden Dust.....	15.00
50 lbs. Garden Dust.....	27.50

SWISS WHIRLWIND DUSTER

From Switzerland, we have imported a fine, small dusting machine which beats anything and everything we have ever come in contact with. It is made from plastic and aluminum, is light as a feather and operates beautifully without effort. Does not spill clods of powder but blows a fine even mist-like dust which gives complete coverage. We have discarded all our old equipment for greenhouse dusting and now use a few of these. This duster sells for \$16.00 and is worth every penny of it.

We offer the Swiss Whirlwind Duster for \$16.00.

Combination of Whirlwind Duster and 4 lbs. of Wayside Gardens' Garden Dust for \$19.00.

Swiss Whirlwind Duster

JAPANESE MIDGET DUSTER

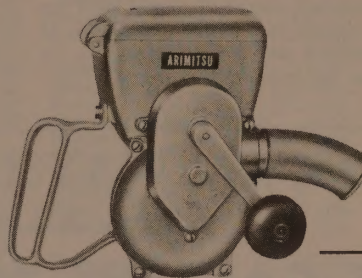

Blows an eight foot cloud with one turn of the crank. A strongly made and superbly efficient little machine.

This is a remarkably efficient small duster. It will throw an eight foot stream of dust. Perfect for small fruit trees, climbing Roses, etc.

It is light, a child can operate it. With reasonable care and use, nothing to get out of order. It weighs less than 1 1/2 pounds. Container holds enough Wayside Dust to do 50 Rose bushes; machine is nicely finished of metal construction. It is a splendid little tool. Just the duster you want for a small garden.

Price for Duster \$7.00.

Midget Duster and 4 lbs. of Garden Dust for \$10.50.

MER-MADE

The Activated, Balanced Liquid Plant Food Derived from the Sea:

- Contains fish . . . more than 40 fish to make a pint. Plus a 100% organic chelating agent to activate the minerals within the soil. Nineteen trace minerals.
- Combination of 100% organic nitrogen and chelating agent produces more blooms, more luxuriant foliage.
- High phosphorous content for sturdy growth and fibrous root system.
- Non-burning. Guaranteed not to burn the most delicate plant.
- Feeds gradually, matching plants' needs and capacities.
- Water soluble . . . dilutes instantly. Easy-squeeze bottle . . . one squeeze in one quart of water.

8 oz. size	\$1.00
1 Quart	2.00
1 Gallon	6.50

OUTDOOR PLANTS

Mix one tablespoon of Mer-Made to one gal. of water or one pt. to 50 gals. of water.

HOSE SYPHON

Add one qt. Mer-Made to 5 gal. water. Total application, 100 gals. of water.

HOUSE PLANTS

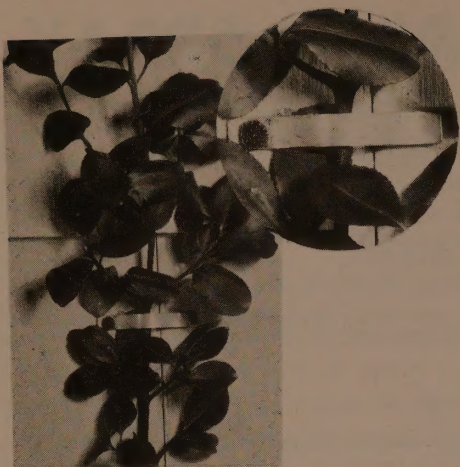

Mix one squeeze (1 tsp.) of Mer-Made in one qt. of luke warm water. Apply once every two weeks, using a solution equal to a customary watering.

WATERING CAN

With Mer-Made diluted in water, apply until soil is saturated.

CLAMPUM VINE CLAMP

A clever, inexpensive and efficient, flexible, rust-proof metal clip to hold vines in place on brick, concrete or wooden walls. Something you have been looking for.

Price, \$1.50 per 25 clamps

FINE ENGLISH PRESSURE SPRAYER

\$14.50

The Dron-Wal Pneumatic Fine Mist Sprayer
A Pressure Sprayer That Will Last a Lifetime

Thirty short easy strokes with the plunger produces sufficient pressure to create a fine mist just right for house plants. It is the finest thing you can have for giving a fine mist-like spray. Spray is controlled by slight pressure of thumb on lever. Pressure spray-can is made of solid brass nicely finished and polished. Holds 1 1/2 pints of water or spray. We discovered this unit in England and were much impressed with its quality and exceptional performance, as well as its good looks. This is not a piece of junk.

Instructions and recommendations for its many uses will be enclosed with sprayer and if you don't like it send it back cleaned for full credit.

Lifetime TEAKWOOD TUBS Imported From Holland

Teakwood is often spoken of as indestructible. We therefore were very pleased to be able to obtain these hand made handsome decorative tubs in Holland where they are used in almost every home. They are made from the finest Java Teak, with two wide heavy bands. We import two different styles: one beautifully polished and sculptured for indoor use; the other polished and equally handsomely finished for use outdoors on terrace or porch. This tub can of course also be used indoors. Its appearance is that of fine furniture. It has straight staves, while the kind for indoors are turned and molded. You may plant directly in these tubs and not use a flower pot; in that case be sure and drill three small holes for drainage in the bottom. They are supplied without draining holes as many people may want to use them as a container.

Prices (Plants not included)

Outside Tubs Not Turned—Outdoor Use

- 12 inches in diameter, each \$15.00
- 14 inches in diameter, each 17.00

Indoor Tubs Turned Staves—Indoor Use

- 8 inches in diameter, each \$14.00
- 10 inches in diameter, each 15.00
- 12 inches in diameter, each 16.00

If you are not satisfied with any of the above tubs ordered, they may be returned and full credit will be given you if tubs are returned in perfect condition. If tubs are not carefully packed and are returned to us in damaged condition, no refund will be made.

Imported Teakwood Tubs for Indoor Use

A Perfect Setting for a **WAYSIDE GARDEN** *is a* **WAYSIDE LAWN**
Grow A Lawn You Can Be Proud Of!

WAYSIDE GARDENS TOP GRADE LAWN MIXTURE

A general purpose lawn mixture of exceptionally high quality, rating among the three finest grass seed mixtures offered in America. Permanent grasses predominate over temporary grasses in the ratio of four to one, which is considered by experts to be ideal. This mixture will produce a beautiful weedless lawn. "Equally good for sun or shade."

TOP GRADE LAWN MIXTURE

1 lb. \$1.50, 5 lbs. \$7.00, 10 lbs. \$13.50, 25 lbs. \$31.25, 100 lbs. \$115.00

1 lb. Wayside Gardens Top Grade Lawn Mixture will sow 350 sq. ft.

MERION BLUE GRASS

Beneath its beautiful surface lies the secret of its vigor, long roots and many rhizomes—the creeping stems which spread underground over a wide area and come up to form new top growth, developing the thickest stand of any comparable grass.

Once established, Merion does not have to be reseeded annually to maintain its cover. Other superiorities recited with enthusiasm by those who have grown it are: Spreads faster than Kentucky Blue grass, stands closer mowing, resists heat and drouth, crowds out crab grass, holds its dark green color in the hottest weather with less water than other grasses.

MERION BLUE GRASS, STRAIGHT

1 lb. \$2.00, 5 lbs. \$9.00, 10 lbs. \$17.50

1 lb. Merion Blue Grass Straight will sow 750 sq. ft.

MERION BLUE GRASS MIXTURE

1 lb. \$1.50, 5 lbs. \$7.00, 25 lbs. \$31.25

1 lb. Merion Blue Grass Mixture will sow 500 sq. ft.

It's Easy To Order By Mail From Wayside

New Customers Are Invited to Read This Page Before Ordering

The business of Wayside Gardens is conducted each spring and fall with many gardeners and is based on confidence and co-operation. By its very nature, most of our shipping must be done during only a few weeks in each season. Based on many years' experience, we have

We Ship at Proper Planting Time

All plants, Roses, shrubs or bulbs will be shipped at the proper period during planting in your locality. If there is a special date on which you would like to receive your order, mention it on your order blank. Weather permitting, we will comply with your request, but remember a "rainy" day can upset the best laid plans. If, upon receipt of package or bundle, you are not able to plant contents at once, open package containing hardy plants to admit air, keep roots moist and store in a cool place, away from wind and heat. Boxes or bundles containing shrubs or Roses should not be opened but kept in a cool place until you can plant. We pack carefully and a few days' delay in planting will not matter if you carry out the above instructions.

Shipping Directions

It is not possible to determine weights of shrubs or plants in advance; therefore, we have never included transportation charges in the purchase price of any of our products. Unless instructed to the contrary, we ship by Express, this being the fastest as well as the best method because large bundles rarely comply with postal regulations.

We can forward small orders by parcel post and, if wanted sent that way, add 10 per cent to value of order for postage and packing to points east of the Mississippi River and 15 per cent to points west of the Mississippi River. Packages traveling by parcel post containing perishable items shipped after May 1st are sent special handling. We pay the special handling charge.

worked out systems for handling plant materials expeditiously and correctly. However, to smooth these seasonal rush periods out as much as possible, it is extremely helpful if you will order as early as possible.

Our Method of Packing

Shrubs, Roses, bulbs and hardy plants are sent in separate packages, sometimes several weeks apart because they do not mature at the same time and are transplanted at widely differing periods. Perennial plants are never included in the same bundle with shrubs or Roses. So do not be alarmed if you don't receive all you have ordered all in one bundle at once. This special notice is to save you unnecessary correspondence.

Remittances Must Accompany Order

Your remittance and your order will be acknowledged when received. Checks, money orders or bank drafts may be used. Please avoid the use of currency as much as possible. Because of possible delay and the nature of the material involved, we do not like to ship any nursery stock C.O.D. but will if you insist.

Quantities and Prices

- 1 or 2 plants of one kind are sold only where each rate is quoted.
- 3 to 5 plants of one kind are sold at the proportionate part of three rate. We do not sell any hardy plants in smaller units than three unless the variety is specifically quoted per each.
- 6 to 24 plants of one kind are sold at the proportionate part of the dozen rate. 25 or more plants of one kind are sold at the proportionate part of the hundred rate.

WAYSIDE GARDENS GUARANTEE

1. We guarantee each order we send out to be filled with stock of fine quality and to reach you in good live growing condition. If you are not entirely satisfied, return it at once and we will replace it free or refund your money.
2. Wayside stock is very carefully grown and handled. Under normal care and conditions it will grow and flourish. Of course, you would not expect us to replace free of charge stock lost due to conditions beyond our control, such as extreme heat or cold or possible neglect or lack of experience on the part of the planter.
3. However, if you will report losses due to the above-mentioned conditions within the period of 30 days, accompanying your report with remittance of one-half the original purchase price, we will be glad to send you new plants for those lost. Shipments of these items will be made at the earliest possible date or, better still, you can add them to your next order. When reporting, state clearly quantity as well as variety. Replacements are made as soon as possible upon hearing from you.
